Bentzon's music ranges from a kind of witty, sometimes ironic, entertainment to works of highly crafted polyphony. The pieces up to 1920 reflect a Gade-like Nordic Romanticism. After his time in Leipzig, however, the influence of German Expressionism became discernible (for example in the string quartets of 1922 and 1924). In the mid-1920s, while concentrating on chamber compositions, he began to develop what he called *karakterpolyfoni*, 'character-polyphony'. This involved using an individual set of principles for voices or for each different instrument, capitalizing on inherent possibilities and limitations; in this approach he may have been influenced by Nielsen's Wind Quintet of 1922. Bentzon's procedure was first clearly apparent in the Sonatina op.7 for flute, clarinet and bassoon (1924), a work performed at the 1927 ISCM Festival, and character-polyphony is shown in a refined form in the *Variazioni interrotti* op.12 (1926). During the years 1924–30, Bentzon tried to combine the expressionistic style with *karakterpolyfoni*, and in this artistic period he created some of his most important and radical works, such as *Strygekvartet i en Sats* (1928), *Kammerkoncert no.1* (1929) and *Kammerkoncert no.2* (1930).

Early in his career Bentzon showed a disappointing grasp of the orchestra, despite being a pupil of Nielsen. Critics found the *Dramatisk ouverture* op.5 (1922), which was first performed with Nielsen conducting, thinly scored and lacking in dramatic content. But in his works appropriate for amateur performance, stemming from his work in music education, he had more success; although largely choral music his educational output included such orchestral works as the *Variationen über ein dänisches Volkslied* op.17 (1928), and the *Musikantisk koncertino* op.23 (1935). Between 1933 and 1936 Bentzon's many works for mixed choir combined 'character polyphony' with simpler vocal writing. He eventually returned to chamber music and, in combining his artistic principles from the late 1920s with a folk simplicity, he created a new genre: the *Racconto*, a one-movement work for three to five instruments of differing timbres (six *Racconti* were written between 1935 and 1949). He also composed to meet the need for orchestral works to be performed on the then developing medium of radio (*Fotomontage* op.27 (1934), *Variationer for mindre orkester* (1936), *Mikrofoni* for chamber ensemble (1939). After 1936 Bentzon only wrote two major choral works: *En romersk fortaelling* ('A Roman Tale') for soloists, mixed choir and piano (1937), which caused a scandal at its première because of the daring text, and the prize-winning *Jorum*, for mixed choir a cappella (1943). In 1943 he completed his opera *Saturnalia*; it was given only a few performances at the Royal Theatre, its lack of success being partly due to the difficulty of setting the text dramatically. In 1941 Bentzon wrote his Symphony no.1 in D, and in 1947 he finished his last major work, Symphony no.2 in B♭, in which he describes his compositorial development from 'artistic style' via folk simplicity to the synthesis of his last years.

WORKS
*(selective list)*

VOCAL AND ORCHESTRAL

Opera: Saturnalia (Bentzon, after Apuleius), 1942–4, Copenhagen, 1944

Choral: 3 sonetter af Michelagniolo Buonarotti, op.4, female choir, 1923; 3 Songs, op.9, male choir, 1925; 5 Songs, op.19, male choir, 1929–31; Hvem vil med op at flyve? [Who wants to come and fly?], cant., op.20, children's choir, pf, recs, 1934; 3 Songs, cant., op.21, SATB, recs, 1934–5; Småsange og kanoner, op.22, children's choir, 1932–5; 3 fabler (Bentzon, after La Fontaine), op.26, SATB, 1936; En romersk fortaelling [A Roman Tale] (Bentzon, after Petronius), op.32, S, Bar, chorus, pf, 1937; 4 Songs, op.36, 1940; Lyse land [Land of Light], op.36 no.1, 1940; 3 Songs, op.38, male choir, 1941; Lirekassen [The Hurdy-Gurdy], op.38 no.3, 1940; Jorum, op.40, SSATTB, 1943; 2 Songs, op.48, male choir, 1935 and 1948

Other vocal: 4 sange, op.13, 1v, pf, 1926; Mikrofoni no.1 (Lat.), op.44, Bar, fl, vn, vc, db, 1939; many other works

Orch: Dramatisk ouverture, op.5, 1922; Variationen über ein dänisches Volkslied, op.17, school/amateur orch, 1928; Kammerkoncert no.1 (Sym. Trio), op.18, vn, hn, vc, orch, 1929; Kammerkoncert no.2 (Intermezzo espressivo), ob, cl, hn, bn, str, perc, 1930; Musikantisk koncertino no.1, op.23, vn, str, 1935; Fotomontage, ov., op.27, 1934; Variationer for mindre orkester, op.28, 1936; Cyklevise-rhapsodi, op.29, 1936; Sinfonia seria, op.33, solo insts, str, 1937; Sinfonia buffo, op.35, solo insts, str, 1939; Sym. no.1 (after C. Dickens: *Pickwick Papers*), D, op.37, 1941; Kammerkoncert no.3, op.39, cl, small orch, 1941; Sinfonietta, op.41, str, 1941; Sym. no.2, b, 1946–7; Saturnalia-Suite, op.47, 1948

CHAMBER AND INSTRUMENTAL

6 str qts, op.3, 1922, op.6, 1924, op.8, 1925, op.11 (Preludio patetico), 1925, op.15, 1928; Racconto no.6, op.49, 1949

Other works: Variationer over et tema af Chopin, op.1, pf, 1921; Divertimento, op.2, str trio, 1921; Sonatina, op.7, fl, cl, bn, 1924; Etude rhapsodique, op.10, eng hn, 1925; Variazioni interrotti, op.12, cl, bn, str trio, 1926; Thema mit Variazionen, op.14, cl, 1926; 3 expressive Skizzen, op.16, vn, vc, 1927; Sonata, bn, va, vn, 1927; Racconto no.1, op.25, fl, sax, bn, db, 1935; Racconto no.2, op.30, fl, str trio, 1936; Racconto no.3, op.31, ob, cl, bn, 1937; Studie i variationsform, op.34, bn, 1938; Fabula, op.42, va, 1939; Pf Sonata no.1, op.43, 1946; Racconto no.4, op.45, vn, eng hn, cl, 1944; Racconto no.5, op.46, wind qnt, 1945

Principal publishers: Hansen, Samfundet, Skandinavisk

WILLIAM H. REYNOLDS/MORTEN TOPP

**Bentzon, Niels Viggo** (*b* Copenhagen, 24 Aug 1919; *d* Frederiksberg, 25 April 2000). Danish composer and pianist. He was a descendant of the HARTMANN family, his mother (the pianist Karen Bentzon) being a granddaughter of J.P.E. Hartmann, and Jørgen Bentzon was his cousin. It was his mother who gave him his first piano lessons, and for a short time he was also taught by the jazz pianist Leo Mathisen. Bentzon's formal musical

education was at the Royal Danish Conservatory of Music (1938–42), where he studied the piano (with Christian Christiansen), the organ (with Emilius Bangert) and music theory (with Jeppesen). He made his official début as a pianist in 1943. As a composer Bentzon was self-taught, and apart from a few attempts at the age of 15, his composing began quite suddenly in the summer of 1939, with his *Klaverfantasi* op.1a. He composed almost incessantly from that point onwards, and at his death his output had reached a total of more than 630 works.

Between 1945 and 1988 he was active as a teacher, initially at the Jutland Conservatory of Music in Århus (1945–56), where he taught the piano, then as a teacher of theory and music analysis at the Royal Danish Conservatory of Music (1950–88, from 1960 as a lecturer). He wrote several books and articles on music, including a textbook on 12-note composition (1953), and from the 1960s also published poems, short stories and other fiction. He participated actively in cultural debate, writing countless articles and commentaries for the press. He also exhibited drawings and paintings, and was periodically involved in 'happenings'. As a pianist he gave concerts both in Denmark and abroad, where he attracted notice as a unique interpreter of his own music, although his repertory extended to composers such as Beethoven, Schoenberg, Hindemith and Hartmann.

It was primarily as a composer, however, that Bentzon became known to a wide public. He was ranked among the most promising young Danish composers in the early 1940s, and in 1947 attracted considerable international attention during the ISCM concerts in Copenhagen with the performance of his Partita for piano op.38. His enormous list of works, which includes several classics of modern Danish music, consists primarily of instrumental music, especially for the piano. Bentzon relied little on romantic notions of 'inspiration', rather he spoke of his steady stream of compositions in terms of a 'production process'. This great productivity appears to have been essential in allowing the occasional crystallization of truly significant works, but it resulted at the same time in a relatively large quantity of rather trivial music. He resisted a cerebral approach to composition, and many of his works can best be described as 'frozen improvisation' (he was an outstanding improviser).

Early influences were the music of Hindemith, Brahms, Nielsen and slightly older Danish contemporaries such as his cousin Jørgen Bentzon and Franz Syberg; later Bentzon looked to Britten, Schoenberg, Berg and Stravinsky. But his style remained deeply personal and, particularly in the early works, exhibited an expressiveness unusual in Danish music of the postwar period. He used tonality, but freely, and up until about 1960 his works were predominantly diatonic, with an occasional touch of bitonality. His harmonies are often quite compact, tending towards complex textures and a saturation of 3rds and 7ths. Classical and Romantic forms and genres employing, for example, variation technique and the dualism of sonata form, were his models, as were on occasion the styles of the Baroque era (Passacaglia op.31 and the Chamber Concerto op.52). To some extent he made use of the metamorphosis technique (in, for example, the Fourth Symphony op.55), but only in the late 1950s and early 60s was there a more regular stylistic fluctuation, with an increased use of chromaticism and a move towards 12-note saturation (e.g. *Propostae novae* op.129 for two pianos). His was not a strict dodecaphonic method, however, and he remained faithful, fundamentally, to tonality and his neo-classical ideals. In 1961 he began a series of symbiotic works, where symbiosis represents close co-existence with a number of great composers such as Chopin, Schumann and, above all, J.S. Bach. Of particular interest, and including some of the finest music of his maturity, is *Det tempererede klaver* ('The Tempered Klavier'), vols. i–xiii (1964–96), 13 hour-long collections each of which consists of 24 preludes and 24 fugues.

Alongside his traditional compositional activity Bentzon experimented with more unusual forms of expression such as 'happenings' (e.g. *Glarmesterattituder, happening i ti afnit med rekvisitter* ['Glazier attitudes, happening in ten sections with props'], op.191). For a number of years these regular links to alternative artistic milieux and his strong media consciousness made Bentzon something of a cultural phenomenon and the subject of much discussion and media coverage, inevitably obscuring the view of him as a 'serious' composer. For many years attitudes towards him have been ambivalent and uncertain, and the uneven quality of his music must shoulder part of the blame for this; he is, however, one of the most significant figures in modern Danish music.

WORKS
*(selective list)*

*for a complete list see Møllerhøj, 1980*

STAGE AND VOCAL

Operas: Faust III (K. Kroman, after J.W. von Goethe, F. Kafka and J. Joyce), Kiel, June 1964; Automaten (chbr op, M. Leinert, after E.T.A. Hoffmann), op.328, Kiel, 3 May 1974; Savonarola (chbr op, K. Jacobs) op.500, 1986

Ballets: Metaphor, op.58, 1950; Kurtisanen, op.89, *c*1952; Døren [The Door], op.141, 1962; Jenny von Westphalen, op.177, 1965; Duell, op.404, 1977

Orat: Torquilla (Bentzon), op.132, nar, solo vv, chorus, orch, 1961

Cant.: Bonjour Max Ernst (Bentzon), op.138, chorus, orch, 1961

ORCHESTRAL

Syms.: no.3, op.46, 1947; no.4 'Metamorphosen', op.55, 1948; no.5 'Ellipsen', op.61, 1950; no.7 'De tre versioner', op.83, 1952; no.8 'Sinfonia discrezione', op.113, 1957; no.9 'Aerøsymfonien', op.126, 1960; no.10 'Den hymniske', op.150, 1963; nos.17–22, opp.522–7, 1988–91

Concs.: Pf Conc. no.1, op.49, 1947–8; Chbr Conc., op.52, 3 pf, cl, bn, 2 tpt, perc, db, 1948; Triple Conc., op.94, fl, ob, bn, str, 1953; Pf Conc. no.4, op.96, 1954; Vc Conc. no.1, op.106, 1956; Brillantes concertino on 'Ein Mädchen oder Weibchen', op.108, pf, orch, 1956; Conc. for Str, op.114, 1957; Vn Conc. no.2, op.136, 1961; Fl Conc., op.147, 1963; Pf Conc. no.5, op.149, 1963; Cl Conc., op.269, 1970–71; Conc., 2 pf, op.482, 1985

Other works: Variazione breve, op.75, 1951; Sym. Variations, op.92, 1953; Pezzi sinfonici, op.109, 1956; Mutationer, op.123, 1959–60; 5 mobiler, op.125, 1960; Ostinato, op.133, 1961; Sinfonia da camera, op.139, 1962; Kronik om René Descartes, op.357, 1975–6

CHAMBER AND SOLO INSTRUMENTAL

Str qts: no.3, op.72, 1951; no.6, op.124, 1960; no.7, op.165, 1964; no.8 'Dartmouth', op.228, 1968; no.9, op.232, 1968; no.14, op.519, 1988; 8 others

Other works: Prelude, Intermezzo and Fugue, org, 1942; 6 Variations, op.17, fl, pf, 1942; Pf Trio, op.25, 1943; Kvadratrod 3 [Square Root of 3], op.35, vn, pf, 1944; 2 Pieces, op.41, ob, pf, 1946; Sonata, op.47, hn, pf, 1947; Mosaique musicale, op.54, fl, pf trio, 1950; Sonata, op.63, cl, pf, 1950; Sonata, op.71, eng hn, pf, 1951; Trio, op.82, bn, hn, tpt, 1952; Variations, op.93, fl, 1953; Variations, op.103, org, 1955; Sonata, op.110, vc, 1956; Wind Qnt no.5. op.116, 1958; Sonata no.6, op.280, vn, pf, 1972; Emil Kraepelin, op.287, vn, 1972; Variations on 'The Volga Boatmen', op.354, vc, 1974; Sonata, op.478, s sax, pf, 1985

PIANO

Sonatas: no.2, op.42, 1946; no.3, op.44, 1946; no.4, op.57, 1948–9; no.5, op.77, 1951; no.6, op.90, 1952; no.7, op.121, 1959; no.8, op.193, 1965; no.9, op.194, 1965; no.18, op.459, 1983; no.19, op.460, 1983; no.29, op.627, 1996; Sonata, op.51, 2 pf, 1948

Other works: 7 Little Pieces, op.3, 1940; Toccata, op.10, 1941; Passacaglia, op.31, 1944; Partita, op.38, 1945; Concert Etude, op.40, 1945; Sonatina no.2, op.62, 1950; Traesnit [Woodcut], op.65, 1950; Kaleidoskop, op.86, 1952; Det tempererede klaver, 13 vols., 1964–96; Paganini Variations, op.241, 1968; Hoffmann Sonata, op.248, 1969; Propostae novae, op.129, 2 pf, 1960

BERTEL KRARUP

**Benua, Aleksandr Nikolayevich.** *See* BENOIS, ALEXANDRE.

**Benucci, Francesco** (*b* *c*1745; *d* Florence, 5 April 1824). Italian bass. He sang at Pistoia in 1769, then more widely in Italy, appearing as the leading character *buffo* in Venice (1778–9), and singing in Milan (1779–82) with great success and in Rome (1783–4). He first appeared in Vienna in 1783 and became the leading member of the celebrated company there, creating Tita in Martín y Soler's *Una cosa rara* and four Salieri roles including Trofonio and Axur. Described by Mozart as 'particularly good' (letter of 7 May 1783), he sang Figaro at the première of *Le nozze di Figaro* (1786), Leporello in the first Vienna performance of *Don Giovanni* (1788), when Mozart composed an extra duet for him, and Guglielmo in the première of *Così fan tutte* (1790). In 1789 he went to London where he sang Bartolo in Paisiello's *Il barbiere di Siviglia* and appeared in Gazzaniga's *La vendemmia* opposite Nancy Storace, with whom he had sung in Vienna. They introduced the first piece from any Mozart opera to be heard on the London stage, the duet 'Crudel! perchè finora' from *Figaro*. Benucci returned to Vienna later in 1789, remaining until 1795. His last great triumph was to create Count Robinson in Cimarosa's *Il matrimonio segreto* in 1792. He had a round, beautifully full voice, more bass than baritone; probably he was the finest artist for whom Mozart wrote, and as a *buffo* outshone his contemporaries as singer and actor.

CHRISTOPHER RAEBURN

**Benvenuti, Arrigo** (*b* Buggiano, Pistoia, 2 May 1925; *d* Florence, 29 Dec 1992). Italian composer. He studied at the Florence Conservatory and with Dallapiccola, who steered him towards dodecaphony. With his ironic, restless character Benvenuti preferred a free use of 12-note technique employing permutation and aleatorism to obtain original results. But aesthetically, he followed his teacher's ideas, art for Benvenuti being a deep expression of liberty inseparable from that of constraint. Later he started using avant-garde devices including tape and a moderate degree of indeterminacy and improvisation. In 1954 he founded, with Bartolozzi, Bussotti, Company, Prosperi and Smith Brindle, the Schola Fiorentina, a group of musicians interested in the practice and theory of new musical trends. From 1961 he directed the Bruzzichelli publishing firm promoting among others Prosperi, Bussotti, Evangelisti, Guaccero and Barraqué. Benvenuti composed symphonic and chamber music, but he was particularly committed to dramatic genres. He was married to the soprano Liliana Poli.

WORKS
(*selective list*)

Dramatic: La seconda età (drama), 1950; Racconto I (drama), 1956; La bottega delle idee, 1961–71; Night Club (opera socchiusa), 1979–81

STEFANO A.E. LEONI

**Benvenuti, Giacomo** (*b* Toscolano, 16 March 1885; *d* Barbarano di Salò, 20 Jan 1943). Italian musicologist and composer. He studied first with his father, the organist and composer Cristoforo Benvenuti, then with Vincenzo Sacchi and Paolo Chimeri at Brescia. He took a diploma in composition in 1909 at the Liceo Musicale at Bologna, where he studied with Torchi and Bossi; he also attended lectures in musicology by Sandberger in Munich. His first musicological studies were editions of sinfonias and sonatas by Sammartini, toccatas by Frescobaldi and ricercares by Cavazzoni; he also performed early music,

training the singers and orchestra himself (he was a gifted organist and conductor). His interest in Monteverdi resulted in editions, recordings and concerts of his music. Benvenuti initiated the series Istituzioni e Monumenti for Ricordi, editing *Andrea e Giovanni Gabrieli e la musica strumentale in San Marco* and providing a lengthy preface on the Venetian school, then an unfamiliar subject. He instigated the series I Classici Musicali Italiani, planned 60 volumes for it and contributed those on Cavazzoni, Fogliani, Segni, Marcello's cantatas and *Gioàz*, Piccinni's *La buona figliuola* and Monteverdi's *Orfeo*. His first compositions, a series of piano pieces, were published by Schott (1908–11), later works (*Cinque canti a una voce*, *Frammenti lirici*, *Tre quartine di Omar Kajam*) in Italy. His unpublished compositions include an overture, a quartet, the opera *Juan José* and works for piano and voice.

CAROLYN GIANTURCO

**Benvenuti, Nicola** [Niccolino] (*b* Pisa, 10 May 1783; *d* Pisa, 14 Aug 1867). Italian composer and organist. He was the son of Santi Benvenuti, organist at Pisa Cathedral, from whom he had his first music lessons. He then studied composition and the organ under Filippo Gherardeschi, *maestro di cappella* at the church of the Cavalieri di S Stefano, which had a fine organ by Azzolino della Ciaia; in 1804 he was appointed organist there and gained great renown as a virtuoso. In 1808 he was named *maestro di cappella* at the cathedral, but he took up the post only in 1810, holding it until his death. The Grand Duke of Tuscany later appointed him music teacher to the grand ducal family and *maestro di camera* in their palaces at Florence and Pisa. In 1824 he founded a music school, supported by the municipal government, in which he trained many fine organists. Benvenuti is still remembered in Pisa and known there by the diminutive 'Niccolino'.

In 1806 Benvenuti's cantata *Il ratto di Proserpina* for three solo voices and chorus was performed at Pisa. He wrote arias, duets and trios for the theatre, and in 1810 his *Arianna e Teseo* (G.R. Niccolini), an *azione drammatica*, and *Werter*, a one-act *farsa*, were performed. In 1812 Gervasoni listed among his works 12 symphonies for full orchestra, sonatas for piano and organ, variations and six solemn masses for four and six voices with orchestra. Four masses, eight hymns, 18 introits, lamentations, four motets, nine psalms and a sacred symphony for orchestra are in the Pisa Cathedral archives.

FRANCO BAGGIANI

**Benzi, Roberto** (*b* Marseilles, 12 Dec 1937). French conductor of Italian birth. The son of a music teacher, he took lessons from the age of three and made his conducting début in July 1948 at the Théâtre Municipal, Bayonne. In addition to his career he pursued general and musical studies until 1958 (as a pupil of Cluytens, 1947–50). He made his opera début in 1954, and in 1959 appeared successfully at the Paris Opéra with *Carmen* (new to the Opéra repertory) and toured Japan with this production in 1961. Benzi has also toured in western and central Europe, North Africa and North and South America, making his first appearance in Canada in 1966, and in the USA in 1971 with the Philadelphia and Concertgebouw orchestras. He made his début at the Metropolitan Opera in 1972 with *Faust*. From 1973 to 1987 he served as founding music director of the Orchestre National Bordeaux-Aquitaine and from 1991 to 1996 as director of the Netherlands National Youth Orchestra.

Benzi began his career as a child prodigy and appeared in two films (*Prélude à la gloire*, 1949, and *L'appel du destin*, 1950). Unlike many such children, however, he has since brought his talent to maturity. He conducts with an expressive, supple style and a keen concern for tempos; his early concentration on Italian repertory has given way to a preference for the German Romantics, French music, opera and oratorio.

**Beolco, Angelo** [Ruzante] (*b* Padua *c*1496; *d* Padua, 17 March 1542). Italian playwright, actor, singer and poet. His plays are remarkable for their innovative use of popular Paduan genres combined with pastoral eclogue and learned comedy in imitation of antiquity. In the plays 52 songs, mentioned or sung, divide scenes or carry the action, as in *L'Anconitana*, where a Paduan servant named Ruzante holds a song contest with his Venetian master. Speaking the dialect of the Paduan countryside, Ruzante appears in most of Beolco's plays. The playwright-actor performed Ruzante's role and adopted his character's name. Modern critics have identified the author with his character, whose polemics against the rustics' historical antagonists, whether Venetian merchants, Paduan noblemen or proponents of a Tuscanizing academic culture, inform Ruzante's theatre. Not least, Ruzante satirizes the country figure he impersonates.

Ruzante was also renowned for his singing voice. In addition to the songs in the plays, nine extant canzoni are attributed to him. Settings by Willaert of *Zuogia zentil*, *Quando de ruos'e d'oro* and *Occhio non fu zà mai* survive

incomplete; there is also a setting of the last by Filippo Azzaiolo.

**Bequadro** (It.). *See* NATURAL.

**Berain, Jean** (bap. Saint-Mihiel, Lorraine, 6 June 1640; *d* Paris, 24 Jan 1711). French designer. After beginning his career in Paris as an engraver, he was summoned to Versailles in 1674 to work on the festivities celebrating the conquest of the Franche-Comté. That year he was appointed Dessinateur de la Chambre et du Cabinet du Roi, succeeding Henry Gissey. Thereafter he was to provide all the models of costumes for the operas performed at the royal residences and on the operatic stage of Paris, replacing Carlo Vigarani as designer of the sets and stage effects there in 1680. Until at least 1707 he prepared designs at the Académie Royale de Musique for the works of Lully and his successors, Collasse, Marin Marais, Charpentier, Desmarets, Elisabeth-Claude Jacquet de la Guerre, Campra, Destouches and Jean-Féry Rebel (for illustration *see* BALLET DE COUR, fig.3).

Berain won fame in other areas as well, notably in naval decoration and 'grotesques' (styles of ornament widely diffused through engravings) and many of his designs for operatic performances have survived in collections in Paris, Stockholm and London. He drew inspiration for his scenery from the Italians Torelli, Grimaldi, Burnacini and Vigarani, although he was less of an innovator than the Galli-Bibienas; he continued to respect the principle of frontal representation, with regular and symmetrical disposition of the lateral frames, and never used the oblique perspective known as *per angolo* that was already in use in Italy. However, he brought operatic costume to a state of perfection unequalled in the Europe of the time.

While Berain sometimes turned to Gissey's models, he gave his costumes unusual refinement, striving for diversification in their cut and the details of their ornamentation. Like Gissey he attempted to make costumes appropriate to the roles, and was careful to give a good idea of the characters suggested in the librettos. When he was designing Lully's *Amadis*, with its subject taken from a chivalric romance, he did research of a kind unusual for the time to achieve historical authenticity, turning to the fashions of the Middle Ages and the Renaissance. Berain exerted great influence on his immediate successors at the Académie Royale de Musique – his son Jean, Claude Gillot, Jean-Baptiste Martin and Louis-René Boquet. The younger Jean is known to have worked there until his death in 1726.

For further illustrations *see* LULLY family, (1).

JÉRÔME DE LA GORCE

**Beranek, Leo (Leroy)** (*b* Solon, IA, 15 Sept 1914). American acoustician. He gained his BS after studying at Cornell College, Iowa, and subsequently gained his doctorate under the supervision of F.V. Hunt. During the Second World War Beranek worked in the Cruft Acoustics Laboratory at Harvard University and later at the MIT. In 1948 he founded a company of acoustics consultants (Bolt, Beranek and Newman, Inc.) which quickly established an international reputation. Before writing his seminal book, *Music, Acoustics and Architecture* (1962), he travelled through 20 countries, listening and making measurements in many halls and consulting many acousticians. This preparation preceded the final designing of the Metropolitan Opera House, New York, for which he and his firm held the acoustic consultancy. Beranek has been responsible for the acoustical design of many major concert halls, and through his writings has contributed greatly to the dissemination of good practice in the design and construction of buildings intended for musical use. He was president of the Acoustical Society of America (1954–5), which awarded him the Wallace Clement Sabine Medal in 1961, the Gold Medal in 1975 and Honorary Fellowship of the Society in 1994.

MURRAY CAMPBELL

**Béranger, Pierre-Jean de** (*b* 1780; *d* 1857). French songwriter. Son of a petit bourgeois who tried to make his way in the banking world, he was employed for a number of years as a clerk at the University of Paris. He had close friends among the upper bourgeoisie (notably the banker Laffitte). During the last years of Napoleon's Empire, he joined the 'Caveau moderne', a singing club whose members devoted their verses to traditional praise of wine, women and song. In 1813 he published his first political chanson, *Le roi d'Yvetot*, a satire on the Napoleonic Empire; it soon became one of the best-known songs in the country. With the restoration of the Bourbon royalty the next year, Béranger found no lack of subjects for his vivid and elegant pen. At times his songs expressed explicit support for a return to republican government (*Ma république*, *Le vieux drapeau*). His songs were considered so subversive that he was twice jailed (1822, 1828). The July Revolution of 1830 brought many of his wishes to fulfilment, but he was dismayed by the series of workers' uprisings and violent repressions that

took place in succeeding years. He avoided any direct involvement in politics himself. From 1834 he published almost no songs, although an enormous body of chansons appeared posthumously.

Béranger did more than anyone else to revive and legitimize the French political chanson (*see* REVOLUTIONARY HYMN). Like so many of his predecessors, he used pre-existing tunes (*timbres*) that were well known rather than compose new ones of his own. (Génin gives the few known exceptions: three graceful, even fragrant tunes that Béranger composed himself.) He is one of the few songwriters of any era to express, with a pen of professional and artistic cunning, a feeling for the desires of the popular masses. The uncrowned national bard of France and, in particular, the voice of the liberal and republican opposition during the Bourbon restoration, he lived to see his works sung and read throughout Europe, drawing praise and in some cases imitation from Goethe, Heine, Thackeray, Garibaldi and many of the progressive Russian writers. Various of his songs were subsequently set to music by professional composers. Some of these new settings were simple, intended for performance in the parlour or by amateur choruses, notably the Orphéon; others (e.g. Berlioz's *Le cinq mai*) were much more elaborate, being performed in public by professional musicians. Both in general and in many specific details, Béranger set the pattern for activist songwriters of the 19th and 20th centuries, but most directly for the working-class songwriters who were his contemporaries and fellow Parisians (Charles Poncy, Gustave Leroy, Eugène Pottier). His songs remain a powerful example of the role that music can play in the propagation of social and political ideology.

RALPH P. LOCKE

**Bérard, Jean-Antoine** [not Jean-Baptiste] (*b* Lunel, 1710; *d* Paris, 1 Dec 1772). French *haute-contre* singer, music teacher, cellist and composer. His début in 1733 at the Paris Opéra, according to La Borde, was in the monologue of Pélée, 'Ciel! en voyant ce temple redoutable' from Act 3 of Collasse's *Thétis et Pélée* (1689). He soon joined the Italian troupe, performing in divertissements between the acts of operas. After three years he returned to the Opéra and took several minor roles between 1737 and 1745 in Rameau's works: Un Athlète in *Castor et Pollux* (1737), Un Songe in *Dardanus* (1739), Lycurgue in *Fêtes d'Hébé* (1739), and Tacmas (replacing the well-known *haute-contre* Tribou) in the third entrée of *Les Indes galantes* (1743 revival). In 1743 he sang the title role in the première of Boismortier's *ballet-comique*, *Don Quichotte chez la Duchesse*, with the famous soprano Marie Fel as Altisidore. Two years later he retired from the opera to devote himself to teaching and playing the cello. He became first cellist of the orchestra at the Comédie-Italienne in 1762 and the same year married Mlle Deschamps (*b* 1730), an actress at the Opéra-Comique. He was a 'bon musicien' (La Borde), played the guitar and harp and was the author of a collection of *Airs pour la guitarre* (Paris, *c*1775, now lost).

In his treatise, *L'art du chant* (Paris, 1755), dedicated to Mme de Pompadour, he discussed the physical and anatomical aspects of tone production. He divided sounds into two different classes, the first including those that are 'violens', 'entre-coupé', 'majestueux' and 'étoufés', and the second those that are 'légers', 'tendres' and 'manièrés'. He emphasized the importance of the character of each sound and of appropriate ornamentation, appending valuable examples from the works of Lully, Campra, Mondonville, Rameau and others, in which he indicated the desired tone and appropriate ornaments using signs of his own invention. The Abbé Joseph Blanchet, author of *L'art ou les principes philosophiques du chant* (Paris, 1756), accused Bérard of incorporating portions of his manuscript. While many passages of the two works are exactly the same, La Borde discounted the accusation and criticized Blanchet's work for its inaccuracies in other parts. La Borde thought highly of Bérard's treatise and recognized it as a summation of vocal practice for the era of Lully to Rameau:

> on trouve de bonnes choses, mais dont la plus grande partie sont inutiles aujourd'hui, ne pouvant convenir au nouveau goût de chant que l'on a adopté, & qui a détruit presqu'entièrement celui qui pendant plus de cent ans avait fait les délices de Paris & de toute la France.

MARY CYR

**Berardi, Angelo** (*b* S Agata, *c*1636; *d* Rome, 9 April 1694). Italian theorist, composer and organist. He was one of the most prominent Italian theorists of the later 17th century and is specially important for his writings on counterpoint.

1. LIFE. Much of the information about Berardi's life derives from his published works. His place of birth is given on the title-pages of four of his theoretical works but it is yet to be established from which of the many S Agatas in Italy he originated. He was a pupil of Marco

Scacchi, who lived at Gallese near Viterbo, from about 1650 until his death. Since Berardi's op.4 (1667) cites him as *maestro di cappella* of Viterbo Cathedral he must have studied with Scacchi at some time between 1650 and 1667. According to Radiciotti he was a *maestro di cappella* and organist at Tivoli from 21 September 1673 to 1679. When he published *Ragionamenti musicali* in 1681 he was 'professor of music' and *maestro di cappella* of Spoleto Cathedral. At the time of the publication of his next two theoretical works, *Documenti armonici* (1687) and *Miscellanea musicale* (1689), he was a canon at the college of S Angelo, Viterbo. The title-page of *Il perchè musicale* (1693) cites him as canon and *maestro di cappella* of S Maria in Trastevere, Rome. At the time of his death he was stated to be about 58.

2. WORKS. Although Berardi's first treatise, *Dicerie musicali*, is lost, some idea of its contents may be derived from his references to it in his first extant treatise, *Ragionamenti musicali*. He referred to it for more thorough discussions of such subjects as the solmization syllables, modes and consonances and for a brief description of all musical instruments. If this is a representative sample of its contents it appears to have contained little information not found in his other treatises.

*Ragionamenti musicali*, which is in dialogue form, is the most traditional of Berardi's extant treatises. The subjects covered in it include the definition, division and origin of music, its noble nature, the music of the spheres and the diversities of musical styles. The final dialogue seems to have been an afterthought; it is described as 'aggiunta' and has its own title-page and dedication. In the third dialogue Berardi divided music into three styles, *da chiesa*, *da camera* and *da teatro*; he divided each of the first two categories into sub-groups and identified composers whose music falls into them. As composers in the *da chiesa* tradition he named Josquin Des Prez, Palestrina, G.M. Nanino and Carissimi; he included Marenzio, Monteverdi and Luigi Rossi in the *da camera* tradition and Peri, Monteverdi and Cesti as composers in the *da teatro* style. The same dialogue ends with a list of 136 writers on music, many of whom he designated as speculative or practical or both.

The most important aspect of Berardi's theoretical writings is his systematic description of contrapuntal composition. *Documenti armonici* and *Miscellanea musicale* provide a complete description of counterpoint as practised in the 17th century. *Documenti armonici* is in three books. The first begins with the basic types of counterpoint. Here Berardi explained the practice of composing 'con l'obligo', in which the composer adheres strictly to the consistent use, or avoidance, of a specific compositional device. The music examples include a four-part fugue in which one or more parts may be omitted, one four-part composition with a crab canon in the two upper parts which may be performed in 14 different ways, and another in which each performer may choose whether to use B♭ or B♮. The salient features of the first book are, however, a clear explanation of double fugue and a preference for having the stretto at the end. At the end of the first book Berardi printed two motets by Scacchi and Willaert's chromatic duo *Quid non ebrietas*, explaining in detail how to compose such pieces. In the second book he gave rules for composing canons at every interval from the unison to the octave and included his own circular canon for 32 sopranos. He discussed *soggetto cavato* technique and mentioned Josquin's *Missa Hercules Dux Ferrariae*. The book closes with a discussion of counterpoint at the octave, 10th and 12th; this can be seen as completing the study of counterpoint begun in *Miscellanea musicale*, which had still to be published. The third book concentrates on tied notes or suspensions. Berardi again went from the simple to the complex; the result is a comprehensive study of dissonance treatment.

The first of the three parts of *Miscellanea musicale* is primarily speculative. One interesting discussion is centred on the *seconda pratica*. Berardi mentioned the use of the tritone in expressing a text, and listed works by Rore, Marenzio, Nenna and Monteverdi in which it is employed; he always gave the words on which it appears. In the second part, attention is again focussed on the chromatic experiments of the Renaissance period. Berardi mentioned Aristoxenus ('who divided the tone into two equal semitones') and again included Willaert's chromatic duo, along with modulatory pieces by Alfonso del Violino and Romano Micheli (see Lowinsky). Berardi later outlined the rules governing various types of two-part counterpoint. The third part gives rules for three-part counterpoint, as well as a definition of the modes and an explanation of how they may be transposed using up to three sharps or flats.

In his last two treatises, *Arcani musicali* and *Il perchè musicale*, Berardi filled in gaps left by the other treatises and emphasized again some topics that he considered important. He devoted almost half of the 30-page *Arcani musicali* to a discourse on friendship. This leads into another discussion of modulatory works in which he again printed music by Micheli and Alfonso del Violino. The rest of the treatise demonstrates how to write an *a cappella* mass in the style of Palestrina and how to write for several choirs. The most interesting part of *Il perchè musicale* probably lies in two letters discussing the *seconda pratica*. Perhaps somewhat surprisingly for a contrapuntist, Berardi readily admitted its existence, but he warned against calling the *prima pratica* old and the *seconda pratica* new: since they used the same materials he felt that they co-existed.

Berardi was also a prolific composer, almost entirely of church music. His style, though indebted to Palestrina, is less conservative than his theoretical writings might suggest. His use of continuo, chromatic third relationships, modulation to keys distant from the church modes, *concertato* writing, melodic devices and performance instructions can all be classed Baroque characteristics.

WORKS

Missa pro defunctis, 5vv, ?op.1 (Rome, 1663)
Libro III de motetti, 2–4vv (Bologna, 1665); cited in *FétisB*

ARVED M. LARSEN III

**Beratha, I Wayan** (*b* Belaluan, Denpasar, 1924). Balinese performer, teacher, composer and choreographer. At the time of his birth, Belaluan's acclaimed gamelan group, directed by his father Madé Regog, had been among the first to import the nascent *kebyar* style to the south of the island from its area of origin in the north. Beratha's musical talent was evident early, and by the age of ten he had mastered the sacred *lalambatan* repertory and was a proficient drummer.

While young he taught village ensembles throughout Bali and continued studying dance and music with the major figures of the day. His first dance composition, *Yudha Pati*, was introduced in 1958, and the instrumental *Swa Buana Paksa* a year later. Travelling widely, he performed for Sukarno in the 1950's and was in residence at the 1964–5 New York World's Fair. When the first Balinese KOKAR (Konservatori Karawitan) opened in 1960 in Denpasar, Beratha joined the faculty and from this influential centre greatly shaped Balinese music during the ensuing decades.

Like other Balinese composers, his works involve borrowing, reworking pre-existing materials and collaboration as well as original music. He made significant contributions to the *sendratari* (dance-drama), to the *kebyar* instrumental genre *tabuh kreasi* and to the modernized *kebyar lalambatan*. Since retiring from teaching in the late 1980s Beratha has been active as a builder, tuner and merchant of gamelan instruments.

WORKS
(*selective list*)

ALL FOR BALINESE GAMELAN GONG KEBYAR

Yudha Pati, 1958; Swa Buana Paksa, 1959; Jaya Semara, 1963; Ramayana (sendratari [dance–drama]),1966; Rajapala (sendratari [dance-drama]), 1966; Palguna Warsa, 1968; Kosalia Arini, 1969; Panyembrahma, 1971; Bangun Anyar, 1978; Mie Ing Segara, 1982; Citta Uttsawa, 1983

MICHAEL TENZER

**Berberian, Cathy** [Catherine] (*b* Attleboro, MA, 4 July 1925; *d* Rome, 6 March 1983). American singer. Varied training and early experience helped to equip this versatile artist: courses in mime, writing and opera at Columbia and New York universities; Hindu and Spanish dancing; work as a soloist with an Armenian dance group and in summer repertory; and vocal study in Milan with Giorgina del Vigo. She made her début in Naples in 1957, at an Incontri Musicali concert. The following year, at a John Cage concert in Rome, she sang his *Aria with Fontana Mix*. Her American début was at Tanglewood, in 1960, with Berio's *Circles*. Berio, to whom she was married from 1950 to 1966, in a series of works (notably *Circles*, *Sequenza III*, *Visage* and *Recital I*) inspired by her vocal virtuosity, darting, witty intelligence and vivid presence, in effect limned the voices, styles and temperament of this remarkable performer. The long list of composers who wrote for her includes Stravinsky (*Elegy for JFK*), Henze, Haubenstock-Ramati and Bussotti. Her repertory embraced 17th-century opera (she had a particular affinity with Monteverdi), folksong of all countries and the salon *morceaux* – ranging from exquisite miniatures to such *trouvailles* as Griepenkerl's vocal version of the 'Moonlight' Sonata – gathered in her recital 'Une Soirée chez Mme Verdurin'. Her compositions include *Stripsody* for solo voice (1966) and *Morsicat(h)y* for piano (1971). A special issue of *Symphonica*, the magazine of Radiotelevisione della Svizzera italiana (no.30, Sept 1993), contains essays by and about Berberian, an interview with Berio and a discography.

ANDREW PORTER

**Berber music.** *See under* MOROCCO.

**Berberov, Rostislav Nikolayevich** (*b* Kondrovo, 28 March 1921; *d* Moscow, 12 June 1984). Soviet musicologist. He gained his early musical education at the Gnesin Academy of Music before going to study musicology in 1941 at the Moscow Conservatory. During the period of evacuation to Saratov, he was a member of the intimate circle of Boleslav Yavorsky and later a pupil of Mazel′. On the grounds that he did not conform adequately to the tenets of Marxism-Leninism, he was not allowed to take his final examinations and instead had to spend ten years working without the requisite diploma in the music theory department at the October Revolution Music College. He was finally awarded his diploma in 1957, and in 1970 was appointed lecturer at the Gnesin Academy of Music, where he specialized in the formal theory of music analysis.

Berberov was a principal representative of the Soviet school of music analysis. During the 1960s he formulated a complex and structured system of integral analysis that was built upon Kurth's, Asafjev's and Bobrowski's ideas concerning the temporal development of musical form in an individual work and distinguished between the constructive and destructive formants of musical development. He also adopted ideas from Riemann on types of

representation as conditioned by motif and phrase. He later examined the structure of the musical motif from the point of view of association-dissociation and developed the idea of a logical ictus within the structure resulting in a relationship between metrical and logical feet. He saw the complicated relations between the logical, compositional and organizational parameters as constituting the individuality of a musical work and formed connections between this individuality and elements of genre. His publications include *Spetsifika strukturï khorovogo proizvedeniya* ('Specifics of the Structure of a Choral Work', Moscow, 1981) and the important monograph *'Ėpicheskaya poėma' Germana Galïnina: estetiko-analisticheskiye pazmïshleniya* ('The *Epic Poem* of German Galïnin: Aesthetic-Analytic Reflections', Moscow, 1986), in which he demonstrates his analytical method. He also wrote introductions to a number of editions of Tchaikovsky's works and edited the second volume of the complete collected works of Tchaikovsky, *Polnoye sobraniye sochineniy* (Moscow, 1950).

GRIGORY PANTYELEV

**Berbigant.** *See* BARBINGANT.

**Berbiguier, Antoine (Benoît) Tranquille** (*b* Caderousse, Vaucluse, 21 Dec 1782; *d* Pontlevoy, Loir-et-Cher, 20 Jan 1838). French flautist. Though in youth intended for law he devoted much time to music and, having taught himself the flute, violin and cello, he left home at the age of 23 and entered the Paris Conservatoire. From 1813 to 1815 he served in the Gardes du Corps and thereafter lived in Paris as a soloist without any orchestral appointments of importance. Berbiguier strongly advocated a larger flute sound than was usual in France. The perfection of his technique was admired, as was the sweetness of his tone, although at least one of his pupils regarded it as rather coarse. His adherence to the Bourbons led him to flee Paris during the Revolution of 1830 and he settled in Pontlevoy, remaining there until his death. Berbiguier, like several others of his time, was a left-handed player. He composed prolifically for his instrument; among his published works are several good instruction books dating from 1818 to 1838, the last issued posthumously; partial translations into English were also published.

PHILIP BATE

**Berceuse** (Fr.: 'cradle', 'lullaby'; Ger. *Wiegenlied*). A gentle song intended for lulling young children to sleep. In instrumental music the term usually refers to a character-piece for piano. The defining work of the genre is Chopin's Berceuse in D♭ major op.57 (1843–4), a model imitated by several other composers. Its most notable characteristics are compound time, a quiet dynamic level, a tonic pedal bass and a 'rocking' accompaniment oscillating between chords I and V, over which Chopin places a simple melody later varied with a profusion of filigree passagework.

The first version of Liszt's Berceuse (1854), also in D♭ major, is indebted to Chopin's, but the revised version (1862) is much more elaborate, featuring complex chromatic excursions and an extended coda. The 'rocking' feel of compound metre is here achieved by the use of triplets within 4/4 time; the same is true of the berceuse from Gounod's opera *La reine de Saba*, which Liszt freely arranged as a piano berceuse (1865). The 'Berceau' section of Liszt's symphonic poem *Von der Wiege bis zum Grabe* (1881–2) was originally written as a berceuse for piano solo, but departs further from the Chopin model, displaying the austerity of Liszt's later style. Other examples of the piano berceuse are by Balakirev (again in D♭) and Debussy (*Berceuse héroïque*). Ravel composed a *Berceuse sur le nom de Gabriel Fauré* for violin and piano, while Busoni's *Berceuse élégiaque* op.42 and the 'Berceuse' from Stravinsky's *The Firebird* are scored for orchestra. One of the most beautiful and sophisticated vocal berceuses is Brahms's *Geistliches Wiegenlied* op.91 no.2; a famous operatic berceuse is in Benjamin Godard's opera *Jocelyn* (1888).

KENNETH L. HAMILTON

**Berchem, Jacquet de** (*b* Berchem-lez-Anvers, *c*1505; *d* Monopoli, before 2 March 1567). South Netherlandish composer, active in Italy. Prominent in the early development of the 16th-century madrigal, he is often confused with his like-named contemporaries Jacquet of Mantua, Jacques Buus and Jacques Brunel. Nothing is known of his early years. By the 1530s he was in Venice, probably as a protégé of Willaert. Most of his music was published there from 1538 on, some of it in tribute to local nobility; the motet *Unica lux Venetum* salutes Marcantonio Trevisan, statesman and noted music patron later elected doge, and Jacquet dedicated his first book of madrigals (1546) to Giovanni Bragadin, one of the great heroes of the Republic. He became an important figure in a regional circle (Willaert, Nasco, Parabosco, Ruffo and Camaterò) drawn to the new secular form, the madrigal. Frequent printings of his music extended his reputation rapidly. Antonfrancesco Doni praised him in the *Dialogo* and *Lettere*, and Rabelais counted him among the celebrated musicians of the age. In 1546 Jacquet was elected *maestro di cappella* of Verona Cathedral, a post he may have held until about 1550. The *Capriccio* (published in 1561 but probably composed much earlier) was dedicated to Alfonso II d'Este, not by the composer but by the publisher Gardane. So far as we know, Jacquet's grand scheme to create music for Ariosto's poetry produced indifferent response from the family most frequently extolled in its pages. Nonetheless, when Jacquet was seeking employment in the 1550s, he may have made inquiries of Alfonso, but his name does not then appear in surviving Este paylists. In any event, Jacquet went farther south to arrange himself an advantageous marriage and to put down family roots.

At the end of his quest, he introduced the 1555 madrigal book and a new roster of patrons: he acknowledged service not to the Este family but to Andrea Marzato, governor of Monopoli. Similarly, *Glorioso pastore*, one of the 1555 madrigals, addresses an unidentified prelate, not Ippolito II d'Este (whose uncle was Ariosto's chief patron), but more likely Juan Alvarez de Toledo, Inquisitor-General at Rome, or Ottaviano Preconio, Bishop of Monopoli. Further suggestion of his relocation are madrigals issued at Rome between 1555 and 1565. Either Marzato or Preconio was in a position to introduce Jacquet to Giustina de Simeonibus, a member of a local noble family, and to promote the couple's marriage, which took place by 1553. Giustina bore Jacquet two children. In addition to whatever salary he received from

cathedral and governor was joined his wife's income. Their joint resources must have afforded them a comfortable life. Jacquet died in Monopoli before 2 March 1567; Giustina survived a further three years.

More than 200 secular vocal works by Jacquet survive. Three volumes of his madrigals were published at Venice in 1546, 1555 (reprinted 1556) and 1561, and individual pieces were included in numerous secular anthologies well into the following century. The most popular (*O s'io potessi donna* and *Con lei foss'io*, stanza 6 of *A qualunque animale*) were also favourite subjects for instrumental intabulation. He brought a fresh, individual touch to the madrigal. Texts usually convey light, amorous situations arising typically from unrequited love. His favourite authors were Petrarch, Ariosto, Cassola and Tansillo. He was one of the first to attempt an extended setting of Ariosto; his *Capriccio*, a setting of 91 stanzas from *Orlando furioso*, is a striking example of his tendency to organize series of related texts into broad formal units. In fact, he may have originated the concept of a madrigal cycle with *Alla dolc'ombra*, printed in 1544, in which he also introduced the practice of varying the number of voices (from three to six) for successive stanzas. Jacquet also appears to have been the first to use 'capriccio' as a musical title. His madrigals show an interaction of styles. In the five-voice collection of 1546, the Netherlandish contrapuntal manner predominates, but in later works (usually in four voices) this style yields to syllabic, chordal declamation and the animated rhythms of *note nere* writing. He relied often on borrowed materials to define his forms, for example by transplanting the superius of De Ponte's *Con lei foss'io* as the superius of his own *A qualunque animale*. Elsewhere a given 'melody' may turn out on scrutiny to be a lightly elaborated intonation taken from the traditions of poetic recitation or religious chant. In joining music to units of poetry, he chose the mode most appropriate for the text on the basis of its expressive power. Repeated formulae affirm a consistent modal organization and guide the flow of internal cadences.

The chansons and religious works reveal some of the same characteristics, but here Jacquet's contributions are few, some borrow elements from other works, and in general they evoke popular examples of the genre. In some sources, sacred works are attributed variously to him, to Jacquet of Mantua, or simply to an unspecified Jacquet; only two masses and nine motets can safely be ascribed to Jacquet de Berchem. As both masses are based on chansons beginning with the word 'mort', they may have some extra-musical relationship. In the motet *Peccantem me*, he may have intended musical homage to Josquin: the *Miserere* ostinato of the *sexta vox* recalls Josquin's famous setting of Psalm 1. In contrast to the freedom and originality of the madrigals, however, the motets generally adopt a conservative approach to the time-honoured constructivist techniques of cantus firmus, ostinato and canon.

SACRED

Missa 'Mort et fortune', 4vv, 1544[1] (on Gombert's chanson)
Missa 'Mort ou merci', 5vv, 1540[3]
Motets: Ave virgo gloriosa, 5vv, 1539[7]; Factum est verbum, 6vv, Z 75; Hodie in Jordane, 6vv, 1555[12]; In te signis radians, 6vv, Z 12; O felix regina, 5vv, 1539[7]; O lux et decus Hispaniae, 5vv, 1539[7]; Peccantem me quotidie, 6vv, Z 109; Qualis es dilecta mea, 6vv, 1539[3]; Unica lux Venetum, 4vv, 1549[12] (tribute to Marcantonio Trevisan)

SECULAR

Madrigali a cinque voci di Giachetto de Berchem ... libro primo (Venice, 1546), *SCMad*, i (1993) [1546]
Il primo libro de gli madrigali a quatro voci di Jachet Berchem (Venice, 1555) [1555]
Chansons: Celle qui est, 4vv, 1540[13]; Jehan de Lagny, 4vv, E 9; Las que mon dueil, 4vv, 1540[16]; Las qu'on, 5vv, *D-Mbs* 1508; L'aultre jour, 4vv, M xxiv, 20; Ma fille disoit, 4vv, *Mbs*; Plus ne suis, 4vv,*Mbs*; Que feu craintif, 4vv, E 11; Si envuieulx, 4vv, *Mbs*; Sur tous amans, 4vv, 1540[17]; Ung moins amant, 5vv, *Mbs*; Veu le grief, 5vv,*Mbs*
Madrigals: Alla dolc'ombra (Petrarch sestina), 3–6vv, 1544[22]; Alma diletta sposa (Cassola), 4vv, 1555; Al più cocente raggio, 4vv, 1555; Altro non è 'l mio amor (Cassola), 4vv, 1539[24]; Amar un solo amante (Cassola), 4vv, 1546[15], H i, 200; A qualunque animale (Petrarch sestina), 4vv, 1555, stanza 6, H i, 148; Aspro cor'e selvaggio (Petrarch), 4vv, 1561[15]; Ben mille volt'al ciel (Cassola), 4vv, 1555; Chiunque in petto, 4vv, 1555; Chi vuol veder, 4vv, 1546[15], H i, 195; Cogliete delle spine, 4vv, 1555; Come del gran pianet', 5vv, 1546; Come havrà vita amor (Cassola), 5vv, 1546; Con pura bianca neve, 5vv, 1546; Consumandomi vo (Petrarch), 5vv, 1538[20]; Così ti donn'il ciel, 5vv, 1546; Crudel tu per me vedi, 5vv, 1546
Deh cara la mia vita, 5vv, 1546; Deh com'è spenta, 5vv, 1546; Deh perchè così presto, 4vv, 1555; Dolor ch'hai fatto, 4vv, 1555; Donna che veramente, 5vv, 1546; Donna se voi volete, 4vv, ed. in *Einstein IM*, iii; D'un altro fuoco, 5vv, 1546; Fuggite 'l sono (Petrarch), 5vv, 1546; Giovene donna (Petrarch), 4vv, 1555; Glorioso pastore, 4vv, 1555; Hai lasso io mi credea (Tansillo sestina), 5vv, 1555[25]; Hor cruda, hor pia, 5vv, 1546; Hor date orecchie, 5vv, 1546; Hor mi scacci, 5vv, M xi, 25; Hor vedi amor (Petrarch), 4vv, 1555; Il sol giamai non vidde, 6vv, 1546[19]; Io mi sento (Cassola), 4vv, 1555; Io non saprei mai dir (Cassola), 4vv, 1555; Ite caldi sospiri (Petrarch), 5vv, 1540[18]
L'alto mio amor, 5vv, 1546; Lasso che desiando (Petrarch), 5vv, 1544[17]; L'infinità beltà, 5vv, 1546; Madonna poi ch'uccider, 5vv, 1563[11]; Madonna se volete, 6vv, 1541[16]; Mai non vo più cantar (Petrarch), 5vv, 1546; Ma non me 'l tolse (Petrarch), 5vv, 1546; Misero lui sopra tutti, 4vv, 1558[13]; Nasce dal pensier mio, 4vv, 1555; Non muto qualità, 4vv, 1555; Non vidd'il sol giammai, 4vv, 1555; O amorose mamelle, 5vv, 1538[20]; Occhi pianget'e tu (Cassola), 4vv, 1555; O dolci sguardi (Petrarch), 4vv, 1555; O felici occhi miei, 5vv, 1546; O s'io potessi donna (i), 4vv, S 84; O s'io potessi donna (ii), Primo ... libro del capriccio (see below)
Perchè non date voi, 4vv, S 86; Perchè non sono, 5vv, 1546; Poi che tante nemiche, 5vv, 1546; Pungente dardo, 4vv, S 90; Qual anima ignorante, 4vv, 1542[17]; Qual iniqua mia sorte, 5vv, 1542[16]; Qual mort'è strana più (Cassola), 5vv, 1546; Quando fra l'altre donne (Petrarch), 4vv, 1555; Quando son più lontan, 4vv, 1542[17]; Quante lagrime lasso (Petrarch), 4vv, 1540[20]; Quei bei pensier, 5vv, 1546; Quell'ardente desir (Cassola), 4vv, 1546[15], Hi, 204; Quel rossignol, 5vv, M xi, 29; Questi ch'inditio fan (Ariosto), 5vv, 1546
Ragion è ben (Petrarch), 4vv, S 108; S'amor non è (Petrarch), 6vv, 1546[19]; Sapete amanti, 4vv, S 111; Scende da bei vostri occhi, 5vv, 1546; Se la mia donna (Cassola), 4vv, 1555; Se una fede amorosa (Petrarch), 5vv, 1540[20]; Si è debile il filo (Petrarch), 5vv, J1546; Si vario 'l mio pensiero, 4vv, 1555; Troppo scarsa madonna, 4vv, 1542[17] (also attrib. to Yvo); Vagh'augelletto (Petrarch), 4vv, 1555; Vist'ho più volt' (Cassola), 4vv, 1555; Voi ch'ascoltate (Petrarch), 5vv, 1546; Voi pur udite, 4vv, J1555; Volgendo gli occhi (Petrarch), 5vv, 1538[20]; Vostra fui e sarò, 4vv, S 133
Primo, secondo et terzo libro del capriccio di Jachetto Berchem con la musica da lui composta sopra le stanze del Furioso, 4vv (Ariosto: *Orlando furioso*, cantos 1, 8, 17, 23, 24, 30, 32, 38, 39, Venice, 1561); 5 madrigals ed. in University of Western Australia Music Series, x (Adelaide, 1978)

DOUBTFUL WORKS

Acquiesce Domine, 5vv, 1559[1] (probably by Jacquet of Mantua)
Angelus Domini apparuit Zachariae, 5vv, *I-TVca 5* (probably by J. Lupi)
Apri, apri la porta, 4vv, 1542[17] (probably by Ivo Barry)
Canamus et bibamus, 4vv, 1531[4] (probably by Jacquet of Mantua)
Che giova saettar, 4vv, 1542[17] (probably by Naich)
Doulce espérance, 4vv, 1544[9] (probably by Jacquet of Mantua)
Expurgate vetus fermentum, 5vv, 1552[2] (probably by Gombert)
Inclina Domine, aurem tuam, 5vv, 1552[2] (probably by Gombert)
In illo tempore ... non turbetur cor vestrum, 5vv, 1553[17] (probably by Jacquet of Mantua)
In te Domine, speravi, 5vv, 1553[17] (probably by Jacquet of Mantua)
Io mi son giovinetta, 4vv, 1596[19] (probably by A. Ferrabosco (i))
Non più ciance, 4vv, 1539[22] (by Arcadelt)
Novo piacer, 4vv, 1542[17] (incorrectly attrib. Berchem in 1558[11], probably by Acradelt)
Poi che 'l fiero destin, 4vv, 1539[22] (probably by Arcadelt)
Se foste voi dal mondo, 5vv, 1540[20] (probably by Jacquet of Mantua)
Vostre dolce parole, 4vv, 1534[16] (probably by Jacquet of Mantua)

GEORGE NUGENT

**Berchenshaw** [Berkenshaw], **John.** *See* BIRCHENSHA, JOHN.

**Beregan** [Berengani, Bergani], **Nicolò** (*b* Vicenza, 21 Feb 1627; *d* Venice, 17 Dec 1713). Italian lawyer, poet and librettist. He was one of the best-known lawyers in Venice and was widely respected as a literary figure and classical scholar. Between 1656 and 1660 he was exiled because of a personal vendetta against a German merchant. He was a member of three academies: the Dodonei in Venice, the Concordi in Ravenna and the Gelati in Bologna. During his period of activity as a librettist he was in contact with the musically italianate imperial court and corresponded with Duke Johann Friedrich of Hanover, a principal military and musical supporter of the Venetians. Beregan's librettos, generally in a heroic vein, were set by some of the best-known composers of the time, and were revised or drawn upon by other librettists. *Genserico* (1669) was the source for the libretto of Handel's uncompleted opera of that name; and Handel also set Pariati's 1724 revision (for Rome) of Beregan's *Giustino* (1683, ed. R. Strohm (Milan, 1991)). Domenico Scarlatti wrote an opera based on *Giustino* to a text by Convò.

WILLIAM C. HOLMES

**Beregovsky, Moisey (Yakovlevich)** [Aron-Moysha] (*b* Termakhovka, Kiev Province, 28 Dec 1892; *d* Kiev, 12 Aug 1961). Ukrainian ethnomusicologist. From 1915 to 1920 he studied composition at the Kiev Conservatory with Yavorsky; he also led choirs and taught music in Jewish schools. He continued his composition studies at the Petrograd Conservatory with Steinberg (1922–4) and from 1927 he concentrated on the methodology of folklore studies with Kvitka at the musical ethnography department of the Ukrainian SSR Academy of Sciences in Kiev. From 1929 to 1949 he headed the department for musical folklore at the Institute of Jewish Proletarian Culture of the academy (in 1936 the Institute was reduced to the Cabinet of the study of the Jewish language, literature and folklore; in 1949 it was liquidated). He undertook numerous expeditions to transcribe Jewish musical folklore (1200 recorded cylinders, 4000 transcriptions), and he collected and transcribed Ukrainian, and later Bashkir folklore material. He also taught at the Kiev Conservatory (1937–41), where he headed the department for musical ethnography. He began work in 1930 on his five-volume study (of which only one volume has been published), *Yevreyskiy muzïkal'nïy fol'klor* ('Jewish musical folklore') and defended his *Kandidat* dissertation on Jewish folk instrumental music at the Moscow Conservatory in 1944; he also took part in expeditions to collect the musical folklore of the Jewish ghettos in 1944. A victim of Stalin's anti-Semitic campaign, he was arrested on 18 August 1950; on 7 February 1951 he was accused of 'group anti-Soviet agitation' and sentenced to ten years imprisonment in Siberia. He was released in 1955 and rehabilitated in 1956 (Shostakovich played an important role in his rehabilitation). Beregovsky's papers are held in the Russian Institute for the History of Arts in St Petersburg.

G.V. KOPÏTOVA

**Beregszászy, Lajos** (*b* Békés, 1817; *d* Budapest, 4 April 1891). Hungarian piano maker. He learned his trade in Temesvár (now Timisoara, Romania), Pest, Vienna, Hamburg (1839–40), London (from 1840) and Paris. He settled in Vienna in 1844, where he won an exhibition medal in 1845. His firm transferred to Pest in 1846. Until 1879 he produced many pianos for both western and eastern Europe. Among his inventions was a curved sounding board, the so-called 'Beregszászy system', the patent for which was bought by Bösendorfer. His pianos were honoured at the London Exhibition in 1862 and the Paris Exhibitions of 1856 and 1867.

DEZSŐ LEGÁNY

**Bereketes, Petros** [Bereketēs, Petros; Byzantios, ho Melōdos, Glykys, Tzelepēs, Kouspazoglou] (*b* Constantinople, ?1665; *d* ?1725). Romaic (Greek) composer and cantor. Though undoubtedly influenced by the works of PANAGIOTES THE NEW CHRYSAPHES, GERMANOS OF NEW PATRAS and BALASIOS, he appears never to have been directly associated with the patriarchal court that nurtured his older colleagues. His own substantial contributions to their continuing renewal of Byzantine chanting were made instead from the Constantinopolitan parish church of St Constantine (in the district of Hypsomatheia), where Bereketes held successively the offices of reader, *domestikos* and *prōtopsaltēs*.

Among the traditional repertories, Bereketes virtually ignored the stichērarion and heirmologion recently 'beautified' by Panagiotes, Germanos and Balasios in order to focus his compositional skills on the more structurally malleable chants of the Papadikē. He also brought the newer paraliturgical genre of the kalophonic *heirmos* to its highest point with the composition of 45 *heirmoi* for use in monastic refectories or during the distribution of *antidoron* (blessed bread) at the conclusion of the Divine Liturgy. Cultivating what Chatzēgiakoumēs and Stathēs have described as a comparatively popular style of liturgical music, he occasionally composed works incorporating elements of the Arabo-Persian tradition of Ottoman secular music. Among his chants for Orthros are settings of the first and second *polyeleoi* (Psalms cxxxiv, cxxxv), the Marian *polyeleos* (Psalm xliv, ed. Phōkaeus, 1834), nine responsories with *kratēmata* for the Matins Gospel lection, Lenten *troparia* for Psalm l, eight *Magnificat* verses for the 9th ode of the kanon, and modally ordered series of eight Great Doxologies and of eight melismatic Trisagia for the Great Doxology. His eucharistic chants include 20 Cherubic Hymns (Liturgy of St John Chrysostom) and sets of communion verses for Sundays, weekdays and feasts. (For a fuller list of works see Stathēs, 1995.)

Bereketes was the first composer of Byzantine chant to have had his complete works transmitted posthumously as a unit. Despite their transcription into Chrysanthine notation by both GREGORIOS THE PROTOPSALTES and CHOURMOUZIOS THE ARCHIVIST, his complete works began to be published only in the late 1990s (see Karakatsanēs). Consequently, with the notable exception of his kalophonic *heirmoi*, which were transcribed into the New Method by Gregorios (ed. Phōkaeus, 1835), only a few of his chants have circulated widely in printed editions. The most popular of these is a massive setting in all eight modes for antiphonal choirs of the vigil hymn *Theotoke parthene* ('Virgin Mother of God') that lasts at least 40 minutes in Chrysanthine transcription (ed. Phōkaeus, 1824).

ALEXANDER LINGAS

**Berengerius de Orehem.** *See* BERNGER VON HORHEIM.

**Berenguier de Palazol** [Parazol, Pararol, Pararols, Palaol, Palaiol, Palon] (*b* ?Palol, nr Elna [Elne]; *fl* 12th century). Troubadour. He is traditionally considered to be one of the first Catalan troubadours. He was born in the comté of Roussillon, and was in the service of Jaufre III, Count of Roussillon, who died in 1164. Although names similar to Berenguier's appear in documents between 1196 and 1209, it seems that the name was fairly common, so these may not be references to the troubadour. 12 of his poems have survived, eight of which have melodies transmitted by a single manuscript, *F-Pn* fr.22543, f.36–7. The melodies are in a simple style but only four are in a conventional *AAB* or through-composed form. *Domna, si totz temps vivia* consists of ten heptasyllabic lines grouped into three sections: *abba cca dda*. This division is followed by the music which progressively varies the opening section: *ABCD* $B^1C^1D^1$ $B^2C^2D^2$. A similar technique is found in *Domna, la gensor qu'om veja*.

IAN R. PARKER

**Berens, (Johann) Hermann** (*b* Hamburg, 7 April 1826; *d* Stockholm, 9 May 1880). Swedish composer and pianist of German origin. He first studied music with his father, Karl Berens, a flautist and composer, and later with Karl Reissiger in Dresden. In 1847 he settled in Sweden, where he soon made a name for himself as a pianist, playing in chamber music concerts in Stockholm. He was music director to the hussar regiment at Örebro from 1849 to 1860. He then returned to Stockholm to become music director at the Mindre (or Nya) Teatern (Dramatiska Teatern after 1863). He was appointed teacher of composition at the Swedish Royal Academy of Music in 1861 and professor in 1868; for a time he was also Queen Lovisa's piano teacher. His musical style ranges from a Schumannesque expressive depth to an elegant salon flavour; his stage works follow Lortzing's vein.

KATHLEEN DALE/MARTIN TEGEN

**Berenstadt, (Sebastiano) Gaetano** (*b* Florence, 7 June 1687; bur. Florence, 9 Dec 1734). Italian alto castrato. His German father Giorgio was timpanist to the Grand Duke of Tuscany. Gaetano apparently sang in 55 dramatic works, 33 of which were freshly composed, during his 27-year career. Since 'Gaetano Beynstetter' first appears in Vignola's revision of *Le regine di Macedonia* (1708, Naples), he might have originally studied at a Neapolitan conservatory. He also studied with Pistocchi in Bologna, and his next known appearances were at the feast honouring St Gaudentius in Novara (1711), where Pistocchi was the leading alto castrato, and in Predieri's new opera *La virtù in trionfo, o sia La Griselda* (1711, Bologna). After appearing in two pasticcios at Florence during Carnival 1712, he obtained a post at the court of the Palatine elector in Düsseldorf, where he presumably sang cantatas and serenatas as well as roles in von Wilderer's new *Amalasunta* (1713) and in the anonymous *Annibale pacificatore* (1715). After the elector, Johann Wilhelm, died in June 1716, Berenstadt went to London, where he performed in four operas during the first half of 1717: *Rinaldo* (a Handel revival), *Pyrrhus and Demetrius*, *Vincislao, re di Polonia* and *Tito Manlio* (a new work by Ariosti). During this London trip Berenstadt wrote the first of his 42 extant letters (1717–33) to Zamboni, a Florentine merchant and diplomat who lived in London. Berenstadt's correspondence (especially his letter of 1724 to 'maestro' Pistocchi) reveals his great love of books and the visual arts. He bought and sold many rare books and unique works of art in order to earn money, and assembled a fine library including many incunabula. In 1718 Apostolo Zeno recommended him as a 'worthy professor of music' who had 'an excellent knowledge of our best authors and superb taste in the realms of Italian poetry and eloquence'.

No Italian operas were performed in London between June 1717 and April 1720, and Berenstadt moved in September 1717 to the court of the elector of Saxony, Friedrich August I (King August II of Poland). During his year there he sang in Lotti's new *Gl'odi delusi dal sangue* at Dresden and was handsomely paid 600 louis d'or plus living expenses. In 1719 he performed during Carnival at Rome in Gasparini's new *Lucio Vero* and *Astianatte*, during spring at Bologna in two revivals, then in August at Brescia in an unidentified work. At Bologna he was admitted to the Accademia Filarmonica on 3 July 1719. In 1720 he sang at Rome during Carnival in Gasparini's new *Amore e maestà* and *Faramondo*, then at Florence in his *Lucio Vero*. In 1721 he was at Milan during Carnival for two revivals, then at Padua for a summer production of Chelleri's new *Temistocle*. His only appearances in Venice were for three newly written scores of 1721–2: Antonio Pollarolo's *Plautilla*, Capelli's *Giulio Flavio Crispo* and a collaboration (*Venceslao*) between these two composers and Porta.

Berenstadt then returned to London for two seasons with the Royal Academy of Music. In 1722–4 he performed in new works by three composers: Handel's *Ottone, re di Germania*, *Flavio, re di Longobardi* and

*Giulio Cesare in Egitto*; Ariosti's *Caio Marzio Coriolano*, *Vespasiano* and *Aquilio consolo*; and Bononcini's *Erminia*, *Farnace* and *Calfurnia*. In summer 1724 he and four other singers from the Royal Academy performed Handel's *Ottone* and *Giulio Cesare* in Paris. His main operatic role throughout his career was that of a powerful man whose insidious machinations keep young lovers scurrying suspensefully until the happy ending. Metastasio affirmed this in a letter of 1732, when he said that the downright detestable Learco in his new *Issipile* would be a fine part for Berenstadt. He never portrayed a woman, perhaps because he had a 'huge, unwieldy figure' (Burney), which is clearly visible in John Vanderbank's engraving of June 1723 (see illustration) and in Ghezzi's caricature of 17 May 1725 (*I-Rvat*). His arias are usually blustery, filled with jagged leaps and with melismas of only moderate length. Languishing solos and stepwise passagework are avoided. His range is usually an 11th (*a* to *d''*) and rarely a 13th (*g* to *e''*). In Italy he sang from four to eight solos or duets in each opera, while at London in 1722–4 he usually performed only three solos.

After a 'sabbatical' in 1725, he began to sing music by the best-known *galant* composers. At Rome in 1726 he sang in three new works: Vinci's *Didone abbandonata* and Sarri's *Valdemaro* and *Il sacrificio di Jefte*. During the rest of 1726 and Carnival 1727 he appeared in four new works at Naples: Hasse's *Sesostrate* and *Astarto*, Vinci's *Ernelinda* and Sarri's *Siroe re di Persia*. During Carnival 1728 he sang at Florence in two revivals of Vinci scores. The following year he once again sang in new works at Rome: Auletta's *Ezio* and Vinci's *Semiramide riconosciuta*. Since his father had died, he and one of his sisters moved to Naples in mid-1728; but there he failed to obtain a court appointment and by 1730 he was back in Florence, where during Carnival 1730 he sang in one Pasticcio and in Porta's new *Il Gran Tamerlano*. Between October 1730 and Carnival 1731 he sang in three revivals at Livorno. His edition of Benvenuto Cellini's *Vita* was published at Florence in 1731. At Rome during Carnival 1732 he sang in the revival of the *Didone abbandonata* he had helped to create in 1726 and in Giai's new *Demetrio*. His final two productions were revivals at Florence during Carnival 1734. He suffered increasingly from rheumatism during his last years.

LOWELL LINDGREN

**Beretta, Bonaventura** (*b* Saronno, nr Milan; *fl* 1635). Italian composer and organist. In 1635 he was *maestro di cappella* and organist of the Basilica di S Antonio, Padua. He is known by a set of vesper psalms for two to four voices, *Clio sacra Davidicos psalmos vespertinis horis adscriptos, notis musicis decantans* (Venice, 1635 [one partbook dated 1636]). A collection of solo motets was listed in Vincenti's catalogue of 1658 (*MischiatiI*). He may have been related to the composer Lodovico Beretta (*fl* 1604), known only by *Il primo libro delle canzoni* for four to eight instruments (Milan, 1604).

□

**Beretta** [Beretti, Berretta], **Francesco** (*b* ?Rome; *d* Rome, 6 July 1694). Italian composer and cleric. There is no evidence that he was related to Bonaventura or Lodovico Beretta. From May 1657 until October 1664 he was organist and *maestro di cappella* of Tivoli Cathedral. By 1675 he was *maestro di cappella* of Santo Spirito in Sassia, Rome, where he remained a canon regular. He is listed as *maestro di cappella* for the fourth oratorio of the Arciconfraternita del SS Crocifisso in the church of S Marcello, Rome, on 2 April 1677. The following year he became *maestro* of the Cappella Giulia in S Pietro, a post he held until his death. Three of G.B. Caifabri's sacred collections (RISM 1667[1], 1675[3], 1683[1]) each contain a piece by him. This small representation in contemporary prints suggests that he had no great reputation in his own time. However, Fétis claimed that polychoral masses, psalms and motets for six to 24 voices in four to six choirs by Beretta survive in the Vatican archives and that a number of eight-part settings of psalms are in the Santini Collection (*D-MÜs*): certainly settings of four works for eight voices in two choirs survive in the library of the Cappella Giulia. Charpentier copied and annotated Beretta's *Missa mirabiles elationes maris* for 16 voices in four choirs (*F-Pn* Vm[1] 260).

JOHN HARPER

**Berettari, Aurelio** (*fl* Fiesole, 1654–61). Italian composer. He was a member of the Congregation of S Girolamo, Fiesole, as is stated on the title-pages of his three surviving publications: *Motetti a voce sola* op.1 (Venice, 1654); *Compieta da capella a otto con il basso per l'organo a beneplacito, con le letanie a otto voci concertate con otto istromenti e ripieni a beneplacito* op.3 (Venice, 1656); and *Liber primus missarum*, for four and five voices, op.4 (Milan, 1661). In op.1 the continuo part, for organ, plays a prominent role: the organist is directed to improvise short interludes between the vocal sections, and several of the bass lines are elaborate and include passages in dialogue with the vocal part. Op.3, which is all for double chorus, contains five psalms and a hymn as well as the litanies, which, by virtue of the additional instrumental parts – eight concertante lines as well as the optional doubling of the voices – form the most immediately impressive section.

GIUSEPPE VECCHI

**Berezovsky, Boris** (*b* Moscow, 4 Jan 1969). Russian pianist. He studied at the Moscow Tchaikovsky Conservatory with Elizabeth Virsaladze. In 1987, aged 18, he won fourth prize in the Leeds International Piano Competition. A critically acclaimed Wigmore Hall recital followed in 1988, and in 1990 he won first prize at the Tchaikovsky International Competition. He excels in repertory calling for the highest virtuosity, such as Liszt's Transcendental Studies, Chopin's 24 Etudes and much of the Russian Romantic repertory. He has also performed major works by Bach, Beethoven, Schubert and others. His innate modesty is countered by formidable reserves of power and a capacity to rise to the greatest technical challenges with seeming nonchalance. His recordings include Rachmaninoff's D minor Sonata and Variations on a Theme by Chopin, and a recital of Musorgsky, Rachmaninoff, Balakirev, Medtner and Lyadov. He has also recorded with the Russian violinist, Vadim Repin.

BRYCE MORRISON

**Berezovs'ky, Maksym Sozontovych** (*b* Hlukhiv, 16/27 Oct 1745; *d* St Petersburg, 24 March/4 April 1777). Ukrainian composer and singer. The scantly documented facts of his life have to be gleaned from early biographies and contemporary accounts of performances in St Petersburg and Italy. He began his musical training early, possibly at the Hlukhiv choir school, a source of many singers for the St Petersburg court, or at the Kiev Academy. He reportedly began composing three- and four-part motets when still a boy. On his arrival in St Petersburg, probably in the first half of 1757, he was employed by the court of Peter III as a principal singer at the Oranienbaum theatre, where he played the role of Poro in Francesco Araja's *Alessandro nell'Indie* in 1759 and that of Ircano in Vincenzo Manfredini's *Semiramide riconosciuta* in 1760. (Uncertainty as to whether these were soprano or tenor roles has led to some doubt about his age at the time and hence about the ascribed year of his birth.) After Catherine the Great assumed the throne in 1762, Berezovs'ky remained as a court singer but no longer sang principal operatic roles; this may have been because his voice had broken, or due to a change in policy in favour of foreign musicians.

In the early 1760s Berezovs'ky began more intensive study of composition, first under Francesco Zoppis and later under Galuppi. Several choral works are documented from this period. He was then sent (perhaps in autumn 1766) to continue his studies in Italy, where he became the first eastern Slavic composer to be sent to study music in Western Europe and to be admitted to the Accademia Filarmonica of Bologna (15 May 1771). Several letters from the Russian court to Padre Martini indicate that Berezovs'ky may have studied with Martini in Bologna. Berezovs'ky was also the first Eastern Slav to compose an Italian *opera seria*; his *opera seria Demofoonte* was successfully performed in Livorno during Carnival 1773 and was repeated in Florence in the following November.

During his stay in Italy Berezovs'ky also composed a violin sonata and possibly some choral works.

By October 1773 he had returned to St Petersburg, and despite his successes in Italy, he was assigned a humble post in the imperial court chapel. This appointment has been attributed variously to Catherine the Great's preference for Italian musicians, to her reputed antipathy towards Ukrainian-born ('little Russian') musicians and to the style of Berezovs'ky's music, which was not sufficiently 'Classical' or international for Catherine's taste. For several years Berezovs'ky continued to compose sacred music for the court, but he was never promoted. The prominent statesman Grigory Potyomkin promised him the directorship of his projected music academy in Kremenchuk, but before these plans could be realized, Berezovs'ky died, at the age of 32, in abject poverty and apparently as a result of suicide. A letter from the court official Yelagin to the empress states that there was insufficient money left in Berezovs'ky's estate to pay for a proper burial.

Both Berezovs'ky's meagre recognition in St Petersburg and the questions surrounding his death have inspired much literary embroidery. Among the representations of his life are a three-act play by P.A. Smirnov (1841); a novella by the poet Nestor Kukol'nik (1844); an essay in a collection on historically prominent Ukrainians, *Neopalyma kupyna* ('Burning Bush', 1968); and a veiled reference to him in Andrey Tarkovsky's film *Nostalgia* (1983).

Few of Berezovs'ky's works survive. Only four arias remain from *Demofoonte*, and out of a total of up to 40 choral works noted in 19th-century catalogues and advertisements approximately half survive, some of them recovered only in recent years. His choral music is nevertheless regarded by Russians and Ukrainians as providing an important link, in their musical history, between the Baroque style of his predecessor Mykola Dilets'ky and the Classical style of his successor Dmytro Bortnyans'ky. The choral concerto *Ne otverzhi mene vo vremya starosti* ('Forsake me not in my old age'), in particular, is a mainstay of the Russian and Ukrainian choral repertories.

WORKS
*only those extant*

SACRED CHORAL

Edition: ed. M. Yurchenko (Kiev, 1995) [Y]
*for SATB unless otherwise stated*

Obednya (Cycle of hymns from the Liturgy of St John Chrysostom): 1 Slava inynye, Yedinorodnïy Sïne [Glory to thee, only-begotten son]; 2 Priidite, poklonimsya [Come, let us bow down]; 3 Izhe kheruvimï [Cherubic Hymn]; 4 Vyeruyu [Credo], J; 5 Milost' mira [A mercy of peace]; 6 Dostoyno yest' [It is truly meet]; 7 Otche nash [Our Father], B part only, *RUS-Mcm*; entire cycle transcr. for TTBB (St Petersburg, 1914); Y

Comm anthems: Blazheni yazhe izbral [Blessed are those whom You have chosen], *RUS-SPia*; Chashu spaseniya [Cup of salvation]; Khvalite Hospoda s nebes [Praise the Lord from the heavens], 3 versions, *SPia*; Raduytesya pravednii [Rejoice O ye righteous], *SPia*; Tvoryay anhelï svoya dukhi [He has made His angels spirits]; V pamyat' vechnuyu budet pravednik [In eternal memory the righteous shall be], *SPia*; Vo vsyu zemlyu [Their sound is gone out into all lands], J; Znamenasya na nas [There has been signed on us], *SPia*

Choral concs.: Boh sta v sonme Bohov [God stands in the assembly of Gods], Y; Da voskresnet Boh [Let God arise], *SPia*; Dokole, Hospodi, zabudesh' imya moye [How long, O Lord, will you forget my name], *SPia*; Hospod' votsarisya [The Lord is become king], misattrib. T. Traetta in a 1793 catalogue, pubd in anthology (St Petersburg, 1903), Y; Ne otverzhi mene vo vremya starosti [Forsake me not in my old age], 2 versions, 1st version, 8vv, lost, 2nd version, SATB, *GB-Lbl*, ed. V. Morosan (Washington DC, 1991)Y; Tebye Boha khvalim [Te Deum laudamus], *A-Wh*; Unser Vater (Leipzig, 1813)

15 others mentioned in some sources, all doubtful/lost

Hic vir despiciens, cantus firmus motet, *I-Bc** [submitted to Accademia Filarmonica, Bologna]

OTHER WORKS

Demofoonte (os, 3, P. Metastasio), Livorno, carn. 1773, 4 arias extant: Mentre il cor con meste voci, Misero pargoletto, Per lei fra l'armi, Prudente mi chiedi? *I-Fc*, all ed. M. Yurchenko, and V. Belyakov (Kiev, 1988)

Sonata, C, vn, hpd, 1772, *F-Pn*, ed. M. Stepanenko (Kiev, 1983)

MARIKA KUZMA

**Berezowsky, Nikolai** [Berezovsky, Nikolay Tikhonovich] (*b* St Petersburg, 4/17 May 1900; *d* New York, 27 Aug 1953). American composer, conductor and violinist of Russian birth. He studied at the court chapel in St Petersburg (1908–16) and played the violin at the Saratov opera (1917–19) and the Bol'shoy (1919–20). In 1920 he left the USSR; he studied violin with Robert Pollack in Vienna and in 1922 reached New York, where he was a member of the New York PO (1923–9). In 1927 he held a fellowship to study composition with Rubin Goldmark and violin with Pawel Kochański at the Juilliard School; he also conducted the Atwater Kent Radio Concerts (1926–7). In 1928 he became an American citizen. The following year he left the USA to live in Europe, but returned after two years and from 1935 to 1940 was a member of the Coolidge String Quartet; he was also assistant conductor at CBS radio (1932–6 and 1941–6). He received a grant from the National Institute of Arts and Letters (1944) and a Guggenheim Fellowship (1948). His style blended Russian folk melos, Rimsky-Korsakovian orchestral expertise and mild dissonance. The palatable symphonies, championed by Koussevitzky, won immediate critical acclaim, as did the concertos introduced by Primrose and Piatigorsky. His children's opera *Babar the Elephant* was widely performed.

WORKS
(*selective list*)

*dates in parentheses are those of publication, others are those of first performance*

Orch: Introduction and Allegro, op.8, small orch (1945); Sym. no.1, op.12, 1931; Vn Conc., op.14, 1930; Sinfonietta, op.17, 1932; Sym. no.2, op.18, 1934; Conc. lirico, op.19, vc, orch, 1935; Sym. no.3, op.21, 1937; Sym. no.4, op.27, 1943; Va Conc., op.28, 1941; Cl Conc., op.29 (1941); Hp Conc., op.31, 1945; Passacaglia, theremin, orch, 1948

Vocal: Gilgamesh, cant., op.32, nar, solo vv, chorus, orch, 1947; Babar the Elephant (children's op., 1, D. Heyward), op.40, 1953

Chbr: Thème et variations, op.7, cl, str, pf, 1926; Str Qt, op.16 (1933); Duo, op.15, va, cl (1941); Suite, op.22, wind qnt (1941); Brass Suite, op.24, 7 brass (1942); Fantasy, op.9, 2 pf (1944); Sextet Conc., op.26, str (1951)

Principal publishers: Boosey & Hawkes, Edition Russe

ROBERT STEVENSON

**Berg, Adam** (*d* Munich, 1610). German printer. He took over the Schobser publishing house in Munich in 1564 and by 1568 had expanded it sufficiently to necessitate the purchase of a larger building. Under the patronage of the Bavarian Dukes Albrecht V and his son Wilhelm V, it soon became the most important business of its kind in Bavaria. Apparently not a native of Munich, Berg was Protestant, but, after having been jailed for his religious beliefs in 1569, he became a Roman Catholic and served the Counter-Reformation which his patrons enthusiastically supported. After his death his widow, Anna, ably managed the business until 1629, when she turned it over to their son Adam (*d* 1634). However, the lead in music publishing had been taken over by Berg's son-in-law and main competitor in Munich, NIKOLAUS HENRICUS.

An expert craftsman, Berg became the leading Bavarian printer of the Counter-Reformation and one of the most important German printers of his time. In addition to the official notices and reports required of him as court printer, he published a variety of books on religious and scientific topics and in the fields of literature and particularly music (which accounts for over 80 of his some 300 publications). His great interest in music reflects the brilliance of the musical establishment at the Bavarian court under the direction of Orlande de Lassus. Berg published a variety of motets and German lieder by Lassus himself and by other composers who worked in southern Germany, including Ivo de Vento, Jacobus de Kerle, Johann Pühler and Georg Victorinus. His *Gesang und Psalmenbuch* (1586) was the first book of German hymns published in Munich, and he also issued the second and third volumes of Michael Herrer's *Hortus musicalis* (1609). Berg is best known for his publication of Lassus's *Patrocinium musices* in the large choirbook format generally reserved for manuscripts, using single-impression type and decorating the pages with handsome woodcut initials.

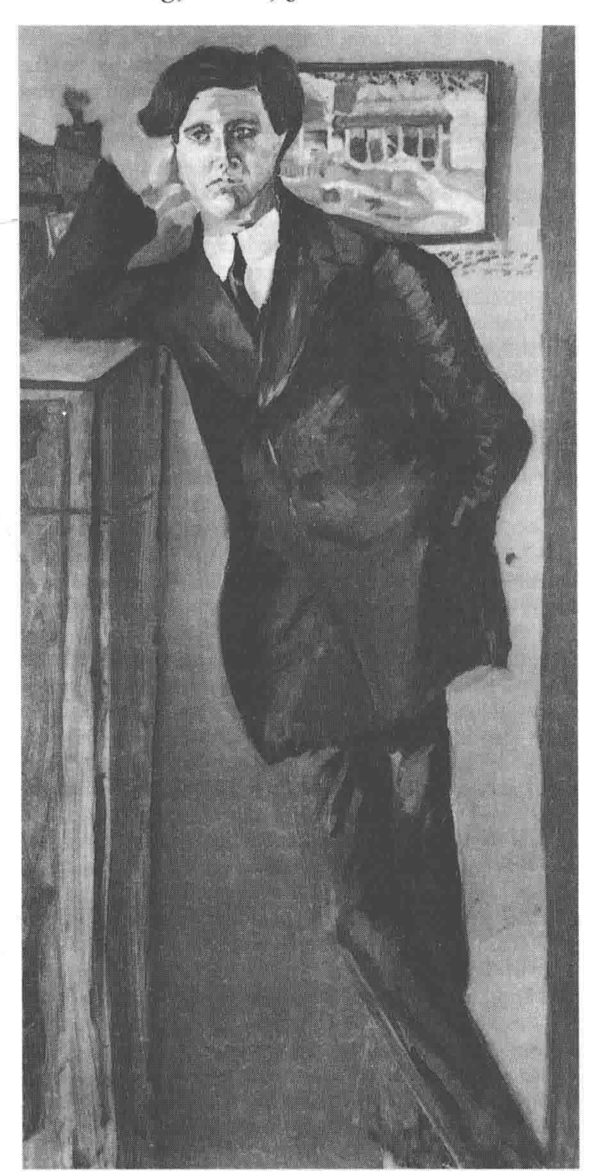
MARIE LOUISE GÖLLNER

**Berg, Alban (Maria Johannes)** (*b* Vienna, 9 Feb 1885; *d* Vienna, 24 Dec 1935). Austrian composer. Along with his teacher Arnold Schoenberg and fellow pupil Anton Webern in the years before and immediately after World War I, he moved away from tonality to write free atonal and then 12-note music. At once a modernist and a Romantic, a formalist and a sensualist, he produced one of the richest bodies of music in the 20th century, and in opera, especially, he had few equals.

1. 1885–1911. He was the third of four children of Johanna and Conrad Berg, at 8 Tuchlauben in the central district of Vienna, a few hundred yards from the Stephansdom. With an estate in Carinthia (the Berghof), a number of properties in Vienna and the income from a thriving export business, the Berg family lived comfortably until the death of Berg's father, in 1900, ushered in a difficult time for the family as a whole and for the young Berg in particular. A disastrous school career culminated in his having to repeat both his sixth year in 1901–2 and later his seventh year before he was finally able to pass the necessary exams, while an early sexual relationship with Maria Scheuchl, the kitchen-maid at the Berghof, resulted in the 17-year-old Berg becoming the father of an illegitimate daughter.



All four Berg children had been taught the piano by their governess, and the young Alban had already begun to compose for performance in the family circle; a number of piano duets and almost 80 songs, the earliest of them dating from 1901, were written before he began his studies with Schoenberg. Though passionately interested in music, he was, at that time, little more than an enthusiastic amateur. Clearly unsuited to an academic career, uninterested (unlike his two elder brothers) in business and without qualifications to enter the conservatory, he had little choice, on leaving school, but to take an unpaid post as a trainee civil servant. Not until October 1904, when, as a result of his sister and brother replying to a newspaper advertisement, he became a pupil of Schoenberg, did he receive any formal musical training, and not until two years later, as a result of his mother inheriting both money and property on the death of her unmarried sister, was he able to give up his work with the civil service and concentrate on music.

He studied with Schoenberg from 1904 to 1911, first as a student of harmony, counterpoint and music theory (though he continued to write songs during this period), then from 1907 onwards as a composition student. Writing to his publisher Emil Hertzka in 1910, Schoenberg observed: 'Alban Berg is an extraordinarily gifted composer, but the state he was in when he came to me was

such that his imagination apparently could not work on anything but lieder. Even the piano accompaniments to them were songlike. He was absolutely incapable of writing an instrumental movement or inventing an instrumental theme'. It was a flaw Schoenberg sought to correct in the first years of Berg's composition studies, during which he was required to write a host of minuets, variations, scherzos, impromptus and other small-scale instrumental pieces. Among these early pieces are the drafts (all of them incomplete) of five piano sonatas dating from 1907–8. It is a measure of how far and how rapidly Berg's musical language had developed in the previous four years that – unlike the fluctuating mixture of Brahms, Schumann, Debussy and Wolf that had characterized the pre-Schoenberg songs – the musical language of the five sonatas is that of their op.1 successor, and so close to that of Berg's maturity that he was to use the opening of the fourth as the theme of the D minor interlude in Act 3 of *Wozzeck*.

Of the works published during his lifetime, the *Sieben frühe Lieder* date from the beginning, and the single movement Piano Sonata op.1, the Four Songs op.2 and the String Quartet op.3 from the close of his time with Schoenberg. The *Sieben frühe Lieder* (1905–8) reveal the impact of Schoenberg's teaching and of Berg's growing acquaintance with music. Still essentially diatonic (though the first song, *Nacht*, strikes a balance between diatonic and whole-tone writing), even the earliest of the set – *Im Zimmer* (1905) and *Die Nachtigall* (?1905–6) – demonstrate a piano style far more idiomatic than anything in earlier songs, and whereas the piano accompaniments of the pre-Schoenberg songs frequently lack distinctive melodic figurations, here the handling of motivic ideas is skilful and highly developed. The motivic concentration of *Liebesode* (1907), for example, in which the right hand of the piano part is restricted to a single three-note figure and its inversion, or *Traumgekrönt*, which concentrates on a single melodic idea and a four-note cell, looks forward to the motivic complexity not only of the Piano Sonata but also of the mature Berg.

Though the String Quartet op.3 was the last work Berg wrote directly under his teacher's guidance, the Piano Sonata was in effect his graduation piece, the work in which he set out to demonstrate what he had learned from both Schoenberg's teaching and Schoenberg's music. The period of Berg's studies was a particularly important time in Schoenberg's own creative development, during which he produced the First Quartet (1905), the first *Kammersymphonie* (1906) and the Second Quartet (1908–9) – a series of works which, with their exploration of cyclic forms and their concentrated motivic and intensely contrapuntal textures, were to have a lifelong influence on the younger composer. Among the most immediate lessons Berg learned from these pieces, and from the *Kammersymphonie* in particular, were how to handle an extended harmonic language that combined post-Wagnerian chromaticism with quartal, whole-tone and similar tonally ambiguous, 'floating' harmonies and how to structure a large-scale instrumental movement in such a way that it was both formally clear and thematically integrated. One of the basic tenets of Schoenberg's teaching was the necessity of what he would later call 'developing variation', the belief that the logic and coherence of a work depended on all its aspects being derived from a single basic idea. It was a belief that Berg

*1. Alban Berg: portrait by Arnold Schoenberg, c1910 (Historisches Museum der Stadt Wien)*

would later pass on to his own students, as his pupil T.W. Adorno confirmed when he wrote: 'The main principle he conveyed was that of variation: everything was supposed to develop out of something else and yet be intrinsically different' (Adorno, Eng. trans., 33). It is a principle that stands at the heart of both the Piano Sonata, in which, within the confines of a clearly defined sonata structure, a wealth of distinctive thematic ideas is generated from a minimum of motivic material, and the two-movement String Quartet.

Between these works came the *Vier Lieder* op.2, the last of which marks the point at which Berg's music moved from the extended tonal language of the Sonata to the free atonality of the following works. The *Vier Lieder* also, for the first time, reveal some of the compositional preoccupations that became a feature of Berg's later music: the linking of the movements of a multi-movement work through harmonic, melodic and rhythmic motifs in

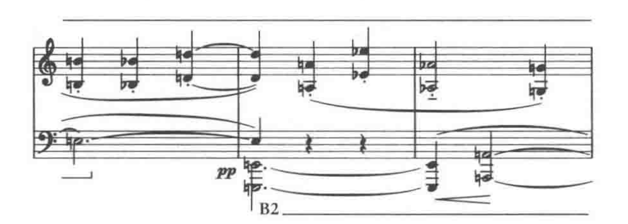
such a way as to form a single entity, the fondness for retrogrades and palindromic designs (the final bars of the first song are a retrograde restatement of the opening bars) and a fascination with the structural potential of interval cycles. Much of the second song, for example, is concerned with exploiting the structural and cyclic possibilities inherent in the French 6th chord, with the opening bars systematically transposing the chord halfway around the cycle of 5ths (at which point the original collection of notes is reinstated), the following bars recapitulating the same chord sequence in retrograde (but with the spacing changed so as to emphasize the two major 3rds in the chord) and the final six bars demonstrating that the sequence produced when the chord is transposed around the semitone cycle is identical to that resulting from the original cycle of 5ths transposition. What is equally characteristic of the later Berg is the fact that what, when described, seems a calculated and abstract procedure should produce a piece whose most immediately striking feature is its emotional spontaneity.

Berg's formative years coincided with one of the most exciting periods in Viennese cultural life. In his autobiography *Die Welt von Gestern* Berg's Viennese contemporary Stefan Zweig described the passion for art and literature that seized him and his classmates in their mid-teens, a passion 'to discover the latest, newest, the most extravagant, the unusual which had not yet been dwelt on at length, particularly by the official literary circles of our daily newspaper . . . . We were the vanguard and shock troops of every sort of new art merely because it was new'. Even before meeting Schoenberg, Berg had, like his siblings, cultivated a lively interest in everything that was new in the arts, attending Mahler's performances at the opera, seeing new plays and reading Ibsen, Strindberg and the newly published *Reigen* of Schnitzler and *Erdgeist* of Wedekind (the first of the two plays that would later form the basis for *Lulu*). Once released from the drudgery of school, as a pupil of the man at the centre of one of the most radical musical developments of the period and the colleague of fellow students of the calibre of Webern, Wellesz and Jalowetz, Berg threw himself with enthusiasm into all artistic activities. He attended the first Vienna production of Wedekind's second Lulu play, *Die Büchse der Pandora* in 1905, travelled to Graz the following year to hear the Austrian première of Strauss's *Salome* and became acquainted not only with musicians of the standing of Zemlinsky and Schreker but also with Peter Altenberg, Gustav Klimt (with whom he attended the great Kunstschau exhibition in 1908), Karl Kraus, Adolf Loos and other leading figures in Vienna's artistic and literary circles. He also, at the end of 1906, met for the first time Helene Nahowski, herself a friend and dedicatee of two of his Altenberg poems, whom, after a difficult courtship in the face of opposition from her family, Berg married on 3 May 1910.

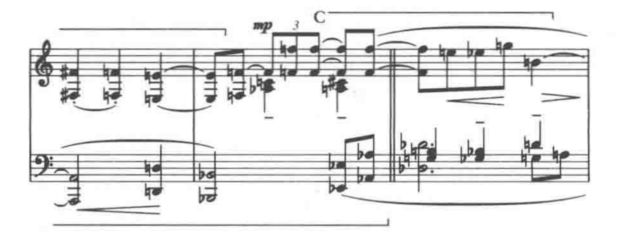
Berg was, said Schoenberg in the letter to Hertzka cited above, 'enthusiastic and uncritical, receptive of the beautiful whether old or new, whether music, literature, painting, sculpture, theatre or opera'. The enthusiasm and the curiosity were to last throughout his life, so that he remained in touch with, and receptive to, the influence of, areas of music, literature and theatre by which Schoenberg and Webern remained unaffected. It is indicative of the range of his interests that he was familiar with the music of Debussy at a time when Schoenberg hardly knew the work of the French composer, that he went to the first Vienna performance of Büchner's *Woyzeck* (the name then misread as 'Wozzeck'), and that later in life he showed an interest in jazz and the 'new opera' of Weill and Brecht.

2. 1911–1914. Berg's relationship with his teacher was and remained a difficult one. Schoenberg became a father figure whose approval he craved and whose disapproval or interference he dreaded for many years after his studentship had ended. The years following Schoenberg's move to Berlin in 1911 were particularly difficult, with the newly married Berg, still painfully conscious of his own lack of practical professional skills, torn between awareness of his debt to Schoenberg and the need to assert his personal and artistic independence.

Even when no longer in Vienna, Schoenberg expected his students to carry out various musical and non-musical tasks on his behalf, and the majority of letters from Schoenberg to Berg during this period consist of abrupt and peremptory demands requiring Berg to oversee various domestic tasks, run errands and organize his teacher's musical and financial affairs in Vienna, while frequently complaining about Berg's inefficiency and untrustworthiness in these matters. Berg's long and rambling replies (about both the nature and the illegibility of the handwriting of which Schoenberg also complained) are witness to his desperate desire to please his teacher. The growing personal difficulties between the two finally came to a head in late 1915 when communication more or less ceased for a while. The rift was gradually healed over the next three years, but it remained a thorny relationship, on both a personal and professional level; it was, Berg told his friend Soma Morgenstern 'the great problem of my life – a problem that I've carried around for decades without being able to solve and which will be my downfall' (Morgenstern, 1995, p.41). The letters between Berg and Schoenberg only begin to acquire the feeling of correspondence between equals in the late 1920s, when Berg had achieved some measure of international fame with the success of *Wozzeck* and the *Lyrische Suite*, but it is indicative of the continuing unease of the relationship that, while Webern was allowed to address Schoenberg by the familiar 'Du' in 1912, Berg had to wait until 1918 before being granted the privilege, and that while Schoenberg dedicated his Violin Concerto to Webern, and Berg dedicated four works to his teacher, there is not a single work by Schoenberg dedicated to Berg.



During the years from 1911 to 1915 Berg was devoting much of his time to paid and unpaid efforts on Schoenberg's behalf. His income came partly from administering the family properties, partly from private teaching and partly from his work for music publishers Universal Edition – work which included correcting the parts for and making a piano reduction of Schoenberg's *Gurrelieder* in advance of its 1913 Vienna première, preparing an index for Schoenberg's *Harmonielehre* and a guide to the *Gurrelieder*, and making piano arrangements of, among other things, the third and fourth movements of Schoenberg's Second Quartet. But despite the fact that Schoenberg's constant demands left him little time for his own work, he found it possible in the summer of 1912 to start work on a new composition, the *Fünf Orchesterlieder nach Ansichtkartentexten von Peter Altenberg* op.4.



The first of Berg's works to be written without Schoenberg's guidance, this remains one of Berg's most perfect scores and his greatest achievement before *Wozzeck*. Uncharacteristically brief (even the two longest songs, the first and last, are only 38 and 55 bars long respectively), the cycle nevertheless contains large-scale dramatic and emotional gestures that are typically Bergian. Equally so is the formal and motivic complexity of the work, which is bound together by a host of recurring harmonic, melodic and rhythmic figurations.

Formally the set has an overall arch shape, with the first and last songs, though very different, having a large part of their musical material in common. Ex.1 shows the opening bars of the final song, a passacaglia. Theme A of the example has already appeared (with the same pitches but a different rhythm) as the main thematic idea of the first song, where it originally emerged out of the 'snowstorm' of overlapping ostinatos that formed the introduction; theme B2 is a motif that has also been heard in the introduction to the first song and appeared briefly in the second song, while theme B1 determined the transpositional levels of the motif in the upper part of the introduction to the first song, appeared on the celesta as the final melodic gesture of that song and reappeared in the fourth number. The climax of the introduction to the first song is marked by a harmonic shift from a vertical statement of B1 to a chromatic expansion of the same chord (with the four upper notes ascending and the lowest note descending a semitone); the final moments of the last song have this same chord sequence in reverse. This larger arch shape, resting on the relationship between the two outer songs, is reflected in the individual symmetrical formal designs of the three central songs. Especially interesting is the use of a rhythmic motif (embodied in theme C in the above example) that, originally announced as a repeated single note, acquires a number of thematic shapes during the course of the work. A similar rhythmic motif had made a fleeting appearance in the op.2 songs as a way of binding the set together; the more extensive use of such a motif here looks forward to the use of such independent structural rhythms (or 'Hauptrhythmen', to use his own term) in Berg's later works. Significantly, in view of what was to happen, both the complexity of the formal design and the brevity of the individual songs militate against their being performed other than as a complete cycle.

Ex.1 *Altenberg Lieder*, final song

There is, in much of the work of the Viennese artists of the period, a distinct desire to shock – a reaction, perhaps, to the complacent philistinism of Viennese bourgeoise cultural life. Berg's later decision to set Wedekind's scandalous Lulu plays is symptomatic of this reaction. Certainly his choice of Altenberg's aphoristic and slightly scurrilous texts, at a time when the poet was known to be in an asylum, was a provocative gesture, as was the musical language of the songs, their employment of so large an orchestra for such tiny poems and their use of unusual orchestral effects such as the *col legno* open string *bariolage* and the 'noises' (a glissando in harmonics on the violins and an effect on low strings produced by bowing on the holes of the tailpiece) that end the first number. The imagination, subtlety and sure-footedness of the instrumentation of the songs seem little short of miraculous in a composer's first work for orchestra. At the time even Schoenberg expressed doubts about what he called 'their too overt striving to employ new orchestral effects'. Whether or not Berg intended the songs to be provocative, he was unprepared for the public reaction that greeted a performance of two of them in Vienna on 31 March 1913, in a programme Schoenberg conducted that also included Zemlinsky's Maeterlinck Lieder, Schoenberg's own first *Kammersymphonie*, the first performance of Webern's op.6 and Mahler's *Kindertotenlieder*. The concert, in which the performance of Berg's songs led to a riot, with fisticuffs in the hall, the police called in and the concert organizer arrested, has gone down as one of the great musical scandals of the 20th century.

Two months after the 'Skandalkonzert', on the last day of a visit to Berlin, Schoenberg took Berg to task about the 'insignificance and worthlessness' of his recent compositions. The exact nature of Schoenberg's criticisms is unclear, though it has generally been assumed that Schoenberg criticized the brevity of his pupil's pieces. In the wake of the public reaction, Schoenberg's criticism provoked a crisis of confidence and destroyed what was left of Berg's belief in the Altenberg songs: 'My self doubt', he wrote to Schoenberg, ' is so strong that the least criticism from you, who alone are qualified to give it, robs me of almost all hope' (*The Berg–Schoenberg Correspondence*, 257). He never published or tried to have the songs performed in their entirety in his lifetime. The fifth song appeared in vocal score in 1921 as a supplement to the Dresden periodical *Menschen*, but there was no complete performance until 1953.

The precise date of Berg's next composition, the *Vier Stücke* op.5 for clarinet and piano, is unclear. The score gives spring 1913, early writers (including Reich and Redlich) summer, Berg himself, in a chronology written in a letter to his wife, June 1913. The pieces, which are even shorter than the Altenberg songs, were probably written before the traumatic discussion with Schoenberg

in Berlin in the early summer of that year. Like the Altenberg songs, the clarinet pieces again compress large-scale dramatic gestures into tiny forms (many writers have described the work as a miniature four-movement sonata); unlike the songs, with their intricate motivic structure, the op.5 pieces represent the furthest step Berg took in renouncing distinct thematic and motivic features in favour of a music whose material is generated from the manipulation of small cells, and where various more or less systematic techniques (wedge formations, interval series, progressive transformations) govern smaller, and in some cases larger, structures.

If Schoenberg's criticism of the Altenberg songs centered on their brevity, Berg's next work, the *Drei Orchesterstücke* op.6, was a deliberate answer, the model for which lay immediately to hand in Mahler's Ninth Symphony, whose first performance Berg had heard in June 1912. The pieces, on which he worked from the summer of 1913 until the autumn of 1915, are Berg's most Mahlerian work, adopting not only the ländler and march idioms that characterize so much of Mahler's music but also, in the final piece, the hammer blow of the finale of the Sixth Symphony. Like the Altenberg songs and the movements of the op.3 quartet, the three pieces ('Praeludium', 'Reigen' and 'Marsch') are linked by a network of recurring themes and motives – including a purely rhythmic theme – that binds the set into a single entity and provides a series of audible signposts within the proliferation of apparently new thematic ideas to which the constant motivic development gives rise. Much of the most important material in all three pieces grows initially from the basic three-note cell (the minor 3rd and semitone E–G–A♭) that emerges to form the opening themes of both the 'Praeludium' and 'Reigen' and that starts the 'Marsch', but the complexity of the transformation processes and the profusion of seemingly new ideas result, especially in the 'Marsch', in what is perhaps the most texturally, motivically and thematically complex of all Berg's works.

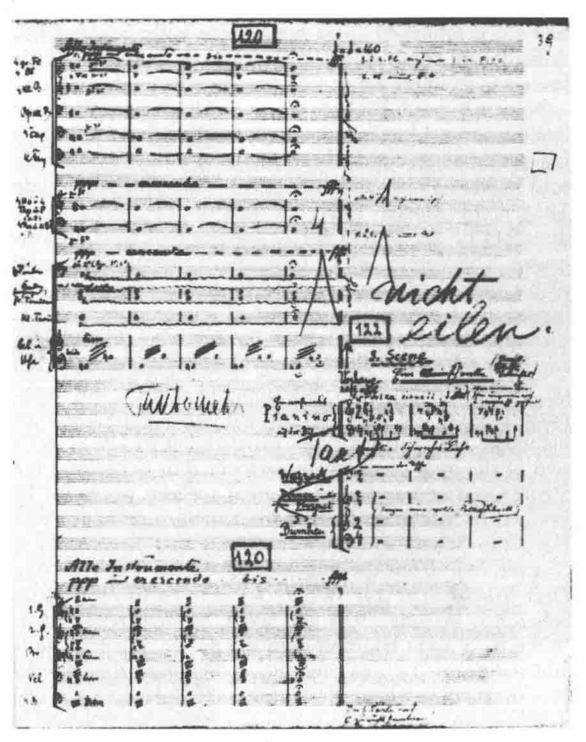
3. 'WOZZECK'. By the time he was working on the 'Marsch' of op.6 Berg had already decided on his next work. On 5 May 1914 he had seen *Wozzeck* and immediately determined to write an opera on the play. An acquaintance, who had sat a few rows in front of Berg at the performance, later remembered how, at the end of the play: 'Indescribably excited and enthusiastic I stood amidst wild applause and met Alban Berg a few steps behind me. He was deadly pale and perspiring profusely. "What do you say?" he gasped, beside himself, "Isn't it fantastic, incredible?" then already taking his leave, "Someone must set it to music".' Though he began making preliminary sketches for the opera almost at once (some of the earliest appear on the same sheets of manuscript paper as material for the 'Marsch'), work had to be laid aside when, following the outbreak of World War I, Berg was called into the Austrian army in June 1915 (fig.2). After spending a month training at the army camp at Bruck an der Leitha his health gave way, and he was transferred to guard duty and eventually to an office job in the War Ministry, where he served until 1918.

While not as overtly political as many of his acquaintainces, Berg was undoubtedly attracted to *Wozzeck* because of its socio-political message, which coincided with his own views (described by Adorno as 'socialist in so far as in the 20s it behoved an orthodox reader of the *Fackel*'). He also, perhaps, saw in the play other features

*2. Alban Berg as a cadet officer, c1915*

with which he identified. 'There is something of me in this Wozzeck', he observed in a letter to his wife Helene, a remark that on one level refers to the similarity between the situation of Wozzeck, the poor downtrodden army batman terrorized by his superior officer and the butt of absurd dietary experiments by the sadistic army doctor, and his own during his spell at the army training camp. Writing to his pupil Gottfried Kassowitz on various occasions during his stay as a reserve at Bruck an der Leitha, Berg commented on the sound made by a room full of sleeping men and complained of the injustices of the system, the inefficiency of the camp doctor and the disgusting mutton that was served every week – remarks echoed in the libretto of *Wozzeck*. At the same time, it is unlikely that Berg would not also have recognized the similarity between Wozzeck, as the father of an illegitimate child to a woman called Marie, and himself. From *Wozzeck* onwards all his works have autobiographical connotations.

In his 1928 article 'Das "Opernproblem"' (Reich, 1937, p.175), Berg observed:



> Never in my wildest dreams would I have wished to reform the art-form of opera with the composition of *Wozzeck*. . . . Apart from my desire to make good music, to fulfil musically the spiritual content of Büchner's immortal drama, to transpose his poetic language into a musical one – apart from these things I had nothing else in mind when I decided to write an opera . . . than to return to the theatre what is the theatre's.

Despite the modesty with which Berg disclaimed any seeking after originality, *Wozzeck* was an epoch-making work that broke new ground musically, emotionally and

dramatically. If Büchner's play was discovered and first performed at a time when its techniques and concerns seemed strikingly contemporary, it also appeared at a moment when its extreme states were peculiarly suited to Berg's musical language – an atonal language that, constantly hovering on the edge of tonal confirmation, becomes a perfect musical metaphor for the emotional and mental state of the opera's chief protagonist. The world that the opera presents is a projection of the tortured mind of Wozzeck himself: a world without normality or humanity and peopled by grotesques, a haunted world of strange, hallucinatory voices and visions and of natural phenomena indifferent to the human tragedy being played out. Only at the very end of the opera is this viewpoint abandoned, when, after Wozzeck's death, the music of the final cathartic orchestral interlude achieves D minor and, with the theatre curtain down, steps outside the drama to reflect on the significance of what has happened.

Every critic and commentator on *Wozzeck* has discussed the formal structure of the opera; indeed, it is the aspect of which Berg himself was most proud and to which he drew attention in his pre-performance lectures. As one might expect in an opera written by an Austrian composer in the first quarter of the 20th century, the most immediately audible formal and unifying device in the work is a system of recurring leitmotifs (and, on a larger scale, of recurring sections), the reappearance of which underlines dramatic associations and parallels within the opera. Less immediately audible are the strict formal designs within which these leitmotifs operate. The opera is conceived as a single closed formal entity, with each act, and each scene within each act, forming a self-contained structural unit. Act 1, which is the exposition of the drama, consists of five character pieces – a suite (scene i), a rhapsody (scene ii), a military march and lullaby (scene iii), a passacaglia (scene iv) and a rondo (scene v) – each of which introduces one of the main characters and delineates his or her relationship to Wozzeck. The second act is designed as a five-movement symphony, consisting of a sonata form (scene i), a fantasia and fugue (scene ii), a largo slow movement (scene iii), a scherzo with two trios (scene iv) and a rondo (scene v). Act 3 consists of five 'inventions' each based on a single musical element: a theme (scene i), a single note (scene ii), a rhythmic pattern (scene iii), a six-note chord (scene iv) and a single note-value (scene v). The final orchestral interlude, which sums up the main motivic material of the opera and also, as the only orchestral interlude to have its own distinctive thematic material, stands as a self-sufficient musical structure, forms a sixth invention, an 'invention on a key'.

The choice of formal designs for the different scenes is determined by dramatic considerations. In some cases the musical material or form is of a sort traditionally associated with the kind of activity depicted on stage – a ländler and a waltz for the tavern scene, Act 2 scene iv, for example, or a military march and lullaby in Act 1 scene iii. In other scenes Berg arranged his libretto so that the text defines a dramatic structure corresponding to an accepted musical form. In the sonata movement or the fantasia and fugue of Act 2, for example, the appearances and recurrences of musical ideas correspond exactly to the appearances and recurrences of verbal and dramatic ideas. Elsewhere, musical form symbolizes the psychological kernel of the scene. This is true of Act 1 scene iv, where the constantly repeated passacaglia theme stands as a symbol of the Doctor's manic obsession – his hopes of achieving immortality through the absurd and sadistic scientific experiments to which he submits Wozzeck – and becomes general in the final act, where the domination of each scene by a single musical element represents the obsessions dominating Wozzeck's thoughts. Thus the single note B, present throughout the murder scene, Act 3 scene ii, moves up and down the score, receding into or emerging out of the orchestral texture as the idea of murder grows or diminishes in intensity in Wozzeck's mind. The orchestral interlude that follows this scene consists of two crescendos also on B (fig.3), separated by a fortissimo drum statement of the rhythm that will form the basis of the next scene, in which the constant presence of this single rhythmic pattern stands as a symbol of Wozzeck's memory of the crime, while the individual statements of the rhythm, adapting themselves to the moment-to-moment contingencies of the text, mirror Wozzeck's hesitations and unpredictable outbursts and the increasingly insistent accusations of Margret and the chorus. The unceasing quaver movement of the final scene suggests the indifference of the children, intrigued but unmoved by the discovery of Marie's body and the revelation of what has occurred. It is difficult to exaggerate Berg's achievement in this extraordinary work. In his first opera he not only reconciled but fused the demands of the dramatic and musical structures, and in so perfect and so personal a way that he himself was the only composer able to go further, in *Lulu*. He completed *Wozzeck* in short score in the middle of October 1921. The full score was finished in April 1922, and the vocal score, made under his supervision by his pupil Fritz Heinrich Klein, in

June of the same year. Without a publisher, and unable to bear the expense himself (he had earlier managed to pay for the printing of his opp.1 and 2 only by selling some family furniture), he was forced to borrow money from a friend of his sister Smaragda in order to finance the publication of the vocal score; the loan was later repaid thanks to the efforts of Alma Mahler, to whom he dedicated the score as a token of gratitude. He then set about creating interest in the opera by advertising its publication and sending copies to opera companies and critics. Although these efforts resulted in a number of press articles, no company expressed more than a passing interest in the work. Indeed, it would have been surprising had any established opera house been willing to stage so difficult and complex an opera by a composer then little known even in his native city, let alone beyond.

Now in his mid-30s Berg was still eking out a precarious livelihood teaching, managing the family property (including acting as steward of the Berghof, which was finally sold in May 1920) and acting, from its inception in late 1918 until March 1921, as one of the performance directors of the Verein für Musikalische Privataufführungen. The Verein, which took up an enormous amount of his time, had been founded by Schoenberg with the intention of promoting interest in contemporary music through closed performances (critics were banned) of carefully rehearsed pieces. Berg himself was represented on the programmes by his opp.1–3 and 5, but these performances did little to promote public recognition of his music. The turning-point came rather in 1923, when two of the op.6 pieces were performed in Berlin and the String Quartet was played, to great acclaim, at the ISCM Festival in Salzburg. Among the Salzburg audience was Hermann Scherchen, who suggested that Berg make a concert suite from the music of *Wozzeck*. The resulting *Drei Bruchstücke aus 'Wozzeck'* were performed under Scherchen in June 1924 and were, as Berg reported to Webern, 'a great triumph with the public, the musicians and the press'. By this time, however, Erich Kleiber, the new music director of the Berlin Staatsoper, had already declared his intention of staging *Wozzeck*. Kleiber, a passionate admirer of the Büchner play, had already seen a vocal score, and during the autumn of 1923 made his interest in the piece known to a number of Berg's acquaintances. In 1924, when in Vienna for a few days, he requested that the entire opera be performed for him by the pianist Ernst Bachrich; Berg, who was not an accomplished pianist, helped out in the more difficult parts of the score. By the time the first two scenes had been played to him Kleiber had already decided to mount the work in Berlin – even, he joked, if it cost him his job. *Wozzeck* duly received its première in Berlin on 14 December 1925, and the conductor's little joke almost proved prophetic.

The Berlin Staatsoper was at that time passing through a particularly turbulent period in its history. The position of the general administrator, Max von Schillings, had been insecure for some time, and became increasingly so as his relations with the Minister of Culture grew progressively worse during the spring and summer of 1925. When Schillings was finally dismissed in November 1925 ideological groups on right and left, the press, the staff of the opera house and almost every interested party became involved in a bitter political dispute at the centre of which was *Wozzeck*, whose first performance had taken place on the very day the Schillings affair had come to a head with a heated debate in the Landstag. But in spite of the extended press campaign waged against the opera by Kleiber's enemies (in which, among other things, it was falsely suggested that the piece had required 137 rehearsals and that the open dress rehearsal had led to riots in the opera house), the first night of *Wozzeck* was a critical success (fig.4). The piece received ten performances in Berlin, with Leo Schützendorf in the title role, and then made its way slowly into the world, only fully establishing itself on its fourth production, at Oldenburg in 1929. Coming after a production in Prague which had to be cancelled after two performances because of political protests by Czech nationalists, and a successful but little-noticed production in Leningrad, the Oldenburg staging showed it was possible for a small provincial opera house to mount this 'unplayable' work with only 32 rehearsals. What Johannes Schüler, the conductor of the Oldenburg *Wozzeck*, called 'the myth of the insurmountable difficulty of the opera' was disproved and, as Josef Lex, who sang the title role, observed, the success of the production 'broke like a hurricane and signified the final victory of the work'. The success of *Wozzeck* brought Berg not only

recognition as a composer of international standing but also a degree of financial stability, and royalties from the opera, along with income from private teaching, enabled him to devote himself to composition.

4. THE 'KAMMERKONZERT' AND 'LYRISCHE SUITE'. Though some of the themes in *Wozzeck* contain all 12 notes (the passacaglia of Act 1 scene v, for example, or the second theme of the variations of Act 3 scene i), the opera is not in any sense a 12-note composition. The two works that followed – the *Kammerkonzert* for violin, piano and 13 wind instruments and the *Lyrische Suite* for string quartet – are transitional, in that they mark Berg's gradual adoption of the 12-note system.

The *Kammerkonzert*, more than any other work, demonstrates Berg's love of intricate formal designs and his interest in using apparently abstract, mathematical schemes as structural determinants. It is, perhaps, both the most forbidding and one of the most fascinating works in his output. The scherzando first movement, for solo piano and wind, superimposes variation and sonata forms. A theme on the wind instruments alone is followed by a set of five variations: the first for solo piano is a reprise of the original theme; the next three, based on the retrograde, the inversion and the retrograde inversion of the theme respectively, constitute a development section; the last variation is a recapitulation of the original theme in canon. The design of the theme itself, with the harmonic structure of its constituent sections systematically based on chains of major 3rds, perfect 4ths, semitones, minor 3rds and whole tones, demonstrates Berg's abiding interest in interval cycles. (Material based on such interval cycles is a constant feature of his music from the op.2 songs to *Lulu* and the Violin Concerto.) The adagio second movement, for solo violin and wind, is based on a series of 12-note themes – employed as melodic elements rather than as 12-note rows – that determine the harmonic structure. Formally the movement consists of two halves, the first of which is an *ABA* structure (in which the second *A* is the inversion of the first) while the whole of the second half is the retrograde of the first. Despite their very different characters and forms (and indeed playing time) the first two movements have a number of proportional features in common, notably their overall number of bars and the structural break at the centre of each. The reasons for this structural relationship – which, as the profusion of formal and proportional sketches for the piece show, Berg went to enormous trouble in order to achieve – becomes clear in the finale.

In Act 3 scene iii of *Wozzeck* Berg had written a piece in which rhythm was the chief organizational feature and in which leitmotifs and material heard earlier reappeared rhythmically transformed by the application of a single 'Hauptrhythmus'. The last movement of the *Kammerkonzert* radically extends this idea. In terms of pitch the movement consists entirely of simultaneous reprise of the first two movements; the thematic identity and the definition of the formal structure (a fusion of sonata and rondo) of the movement thus rest not on pitch but on rhythmic elements, most notably on the handling of three independent rhythmic patterns (one of which has already appeared as the 'Hauptrhythmus' of the second movement and now generates a variety of rhythmic cells) which are superimposed on the existing pitch material.

The *Kammerkonzert* is the first of Berg's instrumental works in which important structural elements are determined by extra musical programmatic considerations. Berg himself touched on some of these in his dedicatory 'open letter' to Schoenberg, in which he revealed that the motto theme which opens the work is built of the musical letters in the names 'ArnolD SCHönBErG', 'Anton wEBErn' and AlBAn BErG', and that the number three, representing the three members of the Schoenberg school, was with its multiples a factor determining the length of sections, the metronome marks, the nature of the instrumental body and many other aspects of the work. Berg's own sketches, however, show that the programmatic elements in the work extend far beyond those discussed in his 'open letter' and that, among many other things, each of the variations of the first movement (entitled 'Friendship' in the sketches) depicts a different member of the Schoenberg circle, the second movement ('Love'), with its quotation from Schoenberg's *Pelleas und Melisande* and its use of a musical cipher based on the name 'Mathilde', portrays the relationship between Schoenberg and his wife, and the kaleidoscopic last movement portrays 'the World'.

From the *Kammerkonzert* onwards all Berg's works have such 'secret' programmes, by means of which private, subjective elements – most often numbers that he regarded as having a particular significance or musical ciphers derived from the letters in people's names – are transformed into objective compositional constraints. In this, as in other respects, *Wozzeck* had marked a turning-point in his career. In *Wozzeck* he had set himself the task of imposing 'abstract' instrumental forms on an existing narrative in such a way that those forms would embody the largest and smallest details of the drama while at the same time retaining their integrity and autonomy as self-sufficient structures. The comparable task in the post-*Wozzeck*, non-operatic works would be to devise 'secret' narratives that would give rise to and be compatible with similarly 'abstract' formal structures.

Thanks to George Perle's discovery in 1976 of a score in which Berg had annotated the details of the autobiographical programme, the *Lyrische Suite*, the work following the *Kammerkonzert*, is the most completely documented demonstration of the extent to which such extra-musical considerations act as compositional determinants. Scholars had known that some kind of programmatic reference occasionally occurred in Berg's music long before the publication of Perle's discovery – Willi Reich's description of the programme of the Violin Concerto and Berg's own 'open letter' on the *Kammerkonzert* had made that much clear – and such things as the sequence of tempo directions that head the movements of the *Lyrische Suite* (Allegretto giovale, Andante amoroso, Allegro misterioso and Trio estatico, Adagio appassionato, Presto delirando, Largo desolato) had suggested the presence of some extra-musical programme. As early as 1957 Hans Redlich had hinted at 'the enigmatic undercurrents of Berg's life and the fascinating contradictions of his personality' (Redlich, Eng. trans., 217), yet such speculation was, by its nature, unprovable. The publication of Perle's articles on the annotated score supplied, for the first time, concrete evidence of the programme of what Adorno had called 'a latent opera'. The annotated score reveals that the six movements of the *Lyrische Suite* document the love affair between Berg and Hanna Fuchs-Robettin, the wife of a wealthy Prague businessman and the sister of Franz Werfel, from their

first meeting (Allegretto giovale), through a portrait of Hanna and her two children (Andante amoroso), their declaration of love (Allegro misterioso – Trio estatico) and a subsequent Adagio appassionato, to a depiction of the 'horrors and pains' of the following days and nights (Presto delirando) and an acceptance of the affair's hopelessness in the final Largo desolato, a secret setting of Stefan George's translation of Baudelaire's *De profundis clamavi*.

The most remarkable aspect of Berg's secret programme for the *Lyrische Suite* is not so much the presence or the nature of the programme itself – Janáček's Second Quartet, written three years after the Berg, has a similar one – but the extent to which Berg transforms details of this programme into elements that determine not simply the mood and character but the technical and formal details of the music. Thus, as in the *Kammerkonzert*, the names of the main actors are converted into musical notation, so that the most important musical material of the work – a four-note collection consisting of the notes A, B♭, B, F – is derived from the initials of Alban Berg and Hanna Fuchs, while both the formal proportions and the metronome markings of the whole work are based on the numbers 23 and 10, which Berg believed had a particular significance for himself and Hanna respectively.

The design of the Allegro misterioso, almost every aspect of which is determined by extra-musical considerations, may be taken as an example of Berg's methods. In the annotated score the movement is headed by the date '20.5.25' – presumably the date when Alban and Hanna first declared their love. The choice of note row, row forms and transpositions in the outer 12-note sections is limited to those forms that keep the four notes of the A–B♭–B–F cell next to one another; the movement is an *ABA* structure in which the *B* section is a Trio estatico and the second *A* a shortened retrograde version of the first, the negation metaphorically associated with such retrogrades in Berg's music being explicitly indicated by the annotation 'Vergessen Sie es . . .!' ('Forget it . . . !') above the point at which the music starts to run backwards; the proportions of the movement are based on multiples of 23, Berg's fateful number, with the first *A*section having 69 bars, the trio 23 and the reprise of *A* 46 bars, while the metronome marks are based on multiples of Hanna's number 10. Even the instrumentation, which requires the four strings to play muted throughout (even when playing *fortissimo*) as a symbol of the secret, repressed nature of Alban and Hanna's love for each other, is determined by programmatic considerations.

In form the work is, as usual with Berg, labyrinthine. The tempos of the six movements from a gradual expanding wedge in which fast movements, each faster than the last, alternate with slow movements, each slower than the last. Within this scheme each movement quotes (sometimes at length) from its predecessor. The sixth movement, which dies away into nothingness, quotes not only from the fifth but also from the first, and thus closes the circle.

Berg's earliest 12-note composition had been a setting of the short poem *Schliesse mir die Augen beide*, a text he had already set before and chose to reset using the row he was to use in the *Lyrische Suite*, whose first movement became his first extended 12-note composition. Though only the first and last movements of the quartet are entirely 12-note (the outer sections of the third movement and the central part of the fifth are also 12-note, the remainder being free), the work already demonstrates the features that distinguish Berg's handling of the 12-note system from that of Schoenberg or Webern. The first movement alone has what, in terms of interval sequence (that is to say, in orthodox Schoenbergian terms), are three different rows. All three are, however, related harmonically, in that their hexachords are identical in content. Each hexachord is a rearrangement of a segment of the cycle of 5ths, and as the work progresses these diatonic collections become increasingly chromatic as more notes are exchanged between the hexachords.

The third and fifth movements also continue, and expand into new areas, the rhythmic explorations of *Wozzeck* and the *Kammerkonzert*, the fifth by imposing on many passages a durational formula which determines the presentation of material in the *tenebroso* sections, the third by using, as the main rhythmic determinants of the outer sections, two rhythmic cells that arise from a particular method of partitioning the row according to its registral presentation. The use of more than one row and the derivation of both new rows and rhythmic patterns through registral presentation of a basic set were to be features of *Lulu*. Equally significant for Berg's later development is the large-scale temporal organization of the *Lyrische Suite*. The fact that the metronome markings of the different movements share a common numerical basis (as multiples of 23 or 10) is not simply a conceit but has the effect of interlinking the different tempos in the work. Berg had employed such interlinked tempos (which make it possible to move from one precise metronomic tempo to another by a process that has since become known as 'metric modulation') in sections of *Wozzeck* and had even, in sketches for the *Kammerkonzert*, experimented with the possibility which such relationships afford of having different layers of music moving at different tempos simultaneously. Such methods of organizing tempos, metres and rhythms underpin large sections, and even whole scenes, of *Lulu*.

5. 'LULU' AND THE FINAL YEARS. After the successful première of the *Lyrische Suite* in January 1927, Berg began to search for a subject on which to base another opera, eventually deciding on Wedekind's two Lulu plays. The 1905 performance he had seen of *Die Büchse des Pandora*, produced by Karl Kraus and with Wedekind himself in the role of Jack the Ripper, had been private, since the play was still under consideration on an obscenity charge (and was eventually banned) by the Royal Court in Berlin. To the 20-year old Berg, as to many of his generation, Wedekind represented the 'really new direction in modern art' and, fired by Kraus's introductory lecture to the Vienna performance, his enthusiasm for the play stayed with him for the rest of his life. By 1928, when he began work on *Lulu*, Wedekind's plays were no longer banned (censorship was abolished in Germany in 1918), but they remained controversial and were still widely regarded as obscene. In choosing, despite the advice of many of his friends, to base his opera on Wedekind's plays, Berg was making a deliberately provocative choice. Just how provocative would only become clear five years later, when the Nazis came to power.

As a composer of international standing Berg now spent much of his time travelling to attend performances or serving on various juries and committees, and work on

*Lulu* progressed slowly. It was also twice interrupted by commissions. The first, in the summer of 1929, resulted in the concert aria *Der Wein* for the Czech soprano Růžena Herlingerová, and was undertaken partly because Berg needed a new work to keep his name before the public while he worked on the opera (the same period saw the orchestral arrangements of the *Sieben frühe Lieder* and the string orchestra arrangement of three movements from the *Lyrische Suite*) and partly because the aria gave him the opportunity to explore in advance some ideas for *Lulu* in terms of the handling of voice and orchestra, the use of a jazz idiom and the creation of a sound world characterized in particular by piano and saxophone – though the vibraphone, the sound of which is so prominent in the *Lulu* orchestra, is absent from *Der Wein*. Above all, the composition of the aria gave Berg the chance to experiment with ways in which new, subsidiary rows might be derived from a single basic row. The row of *Der Wein* (ex.2), like that of the later Violin

Ex.2 Note row from *Der Wein*

Concerto, is based on one of the two most characteristic key-defining patterns of tonal music: in the case of *Der Wein*, an ascending minor scale. While such a row naturally gives rise to horizontal figurations reminiscent of tonal music, the production of tonally orientated vertical formations remains problematic. The most important harmonic (and some melodic) features of *Der Wein* are derived from the basic set by processes of extraction: by systematically extracting alternate notes (to produce a new row that consists of notes 1–3–5–7–9–11–2–4–6–8–10–12 of the original), by partitioning the set into four three-note collections which are then superimposed (in effect presenting vertically a new row that consists of notes 1–4–7–10, 2–5–8–11, 3–5–9–12) and by extracting three non-adjacent tritones (notes 4–7, 8–10, 11–3) so as to leave a residue of two three-note chromatic figures. Such methods of deriving subsidiary rows and further extensions of these methods (by the systematic extraction of every fifth or seventh note, for example) were to play an important role in *Lulu*.

*Lulu* represents the culmination of the technical and structural preoccupations of Berg's works from the op.2 songs onwards. In particular, the ingenious knitting together of dramatic and musical demands, already demonstrated in *Wozzeck*, is here taken a number of steps further. At the most detailed level *Lulu* is a 12-note work – the first 12-note opera, just as *Wozzeck* was the first, full-length atonal opera. Like the *Lyrische Suite*, *Lulu* uses a number of different rows, all of them, as sketches show, derived precompositionally from a single 12-note set in a number of intricate ways. The basic set of the whole opera (ex.3) and a few of the motifs that run

Ex.3 Note row from *Lulu*

throughout the work – most noticeably the four-note figuration on trombone that begins the whole piece and a short fateful rhythmic pattern that underlies every significant event in the drama – operate independently of the characters on stage. For the rest, the rows and the characteristic harmonies and themes to which they give rise (and also, in some cases, rhythms, metres and instrumental timbres) function as leitmotifs linked to particular characters and particular ideas in the text. This leitmotif system works within an intricate, multi-layered formal design.

On one level *Lulu* is a number opera consisting – as is appropriate for an opera in which one subject is the writing of an opera – of a sequence of arias, ensembles, cavatinas, ballades and other forms traditionally associated with vocal music, all of them clearly identified by Berg in the score. At the same time, each of the three acts has within it a single large-scale form. The different sections of the form are scattered throughout the particular act in a mirroring of the main dramatic development. Act 1, for example, is dominated by a sonata form, associated with Dr. Schön's attempts to break free of Lulu; the exposition and first reprise appear in scene ii, and the development and recapitulation in scene iii. In Act 2 the large-scale form is a rondo (continually interrupted in scene i but heard in its entirety in scene ii), which is associated with Alwa's declarations of love for Lulu, while in Act 3 a set of variations, based on a cabaret song by Wedekind himself, charts Lulu's descent into prostitution.

Unlike the self-sufficient musical forms of *Wozzeck*, which follow one another in sequence, the musical forms of *Lulu* are interpenetrated and interrupted. At the highest structural level is the large-scale symmetrical relationship between the two halves of the opera, the dramatic and musical fulcrum of which is the orchestral film-music interlude linking the two scenes of Act 2. Constructed as a musical palindrome and designed to accompany the showing of a silent film (itself palindromic since each shot in the first half mirrors a shot in the second), the interlude marks the turning point of Lulu's career – the point at which begins her descent into the nightmare world of the final scene. The symmetrical musical-dramatic structure of the opera is emphasized by the relationship between the two scenes of Act 2 (the only scenes to share the same set) and, most importantly, by the extent to which large blocks of music from the first half of the opera increasingly reappear, until the final scene consists almost entirely of music that has been heard earlier. In some cases the return of music is occasioned, as one might expect, by a desire to underline dramatic similarities. Thus, to cite one of many examples, the return of the music of the duettino of Act 1 scene i as part of the cavatina of Act 2 scene i ironically anticipates Schön's fate by drawing attention to the fact that he, like the Painter earlier, is beginning to take Lulu for granted.

More generally, the reappearance of large blocks of music underlines a unique feature of the opera: the reappearance of certain performers in different roles. The largest and most important of these musical reprises are determined by the doubling of the roles of Lulu's three clients in the final scene with those of her three husbands in the earlier part of the opera: the Medical Specialist, the Painter and Dr. Schön, who comes back as Jack the Ripper. Similarly, the roles of the Prince in Act 1, the Manservant in Act 2 and the Marquis in Act 3 are sung by the same performer and share the same music, though the bit parts of the Wardrobe Mistress, the Schoolboy and the Groom, while also taken by a single performer, are not associated musically. The doubling of the roles of Lulu's husbands and clients is the key to both the musical

5. *Act 2 scene i of the original production of Berg's 'Lulu', Zürich, 1927; Lulu (Nuri Hadžić) prepares to leave after shooting Dr Schön (Asger Stig), watched by Geschwitz (Maria Bernhard) and the Schoolboy*

structure and the dramatic meaning of the opera. In his introductory lecture to the 1905 Vienna performance of the second play Kraus had described the final scene of the work as 'a men's world brashly taking revenge for its own guilt'. Berg's doublings not only symbolized this revenge strikingly but also, by equating the characters who inhabit the respectable bourgeois world of the first half with the shady inhabitants of the demi-monde depicted in the final act, draw attention to the sexual hypocrisy which is the subject of the work, and which gives it a wider moral and social significance.

With the exception of the two months in the summer of 1929 spent on *Der Wein*, Berg worked on the composition of *Lulu* from mid-1928 until the spring of 1934, by which time the whole opera was complete in short score. He then began to orchestrate the work, starting with those sections he intended to form part of a concert suite, the *Symphonische Stücke aus 'Lulu'*. Having completed the suite he went back to the Prologue and scored the rest of the opera in order, pausing only for a period of about four months in the summer of 1935 to compose the Violin Concerto, the commission for which, from the American violinist Louis Krasner, he had initially accepted out of financial necessity. With the coming to power of the Nazi party in Germany in January 1933, performances of his music became rare in both Germany and Austria, and he grew desperately short of money – so short that he was even, at one point, forced to consider selling the Waldhaus, the retreat at Velden in Carinthia he had bought in 1932. The emotional and artistic stimulus for the concerto – the death from poliomyelitis of the 18-year-old Manon Gropius, the daughter of Alma Mahler and Walter Gropius – only came after Berg had accepted the commission and begun work on the piece. On learning of Manon's death he resolved to dedicate the work to her memory ('To the memory of an angel') and create a tone poem which would paint her portrait.

The row of the Violin Concerto is based on a series of overlapping major and minor triads and a final whole-tone tetrachord, an ingenious set in which the inversion on B♮ is identical to a cyclic permutation of the prime form in retrograde. In *Der Wein* Berg had derived harmonies from a scale-like row by systematically extracting notes; in the Violin Concerto he arrived at non-triadic figures by the opposite method of inserting notes: the long lamenting solo line in the final section of the work, for example, is produced by systematically alternating notes from three different row forms. The overtly tonal implications of the set also enabled Berg to include a number of diatonic references, some to particular sources (a Carinthian folksong and Bach's harmonization of the chorale *Es ist genug*), others to genres such as the ländler

*6. Alban Berg, 1909*

and the Viennese waltz. Written at a time when his music, labelled as a manifestation of 'cultural bolshevism', was no longer played in Germany or even in his native Austria, and when he himself was no longer regarded as an indigenous composer, the Violin Concerto, with its overt references to the Austro-German tradition, is perhaps as much a rejection of that narrow nationalism which denied him and other composers a place in their tradition as it is a depiction of the life and death of a young girl.

Shortly after completing the concerto Berg received an insect sting which formed an abscess. Returning to Vienna from the Waldhaus in November 1935 he was able to attend the Vienna première of the *Symphonische Stücke aus 'Lulu'*, but was rushed to hospital shortly after, and died there during the night of 23–4 December. The Violin Concerto had not yet been performed or published; as to *Lulu*, Acts 1 and 2 had been scored, together with the first 268 bars of Act 3 and the two later sections (the orchestral variation interlude and the final 70 bars) that appear in the *Symphonische Stücke*, leaving 940 bars unorchestrated. The world première of the opera took place in Zürich in 1937, when, as a 'temporary' solution pending the expected – and, indeed, announced – publication of a complete Act 3, the opera was presented as a two-act torso, with the last moments acted to the music of the final Adagio of the *Symphonische Stücke*. The 'temporary' two-act version held the stage for 40 years, as Berg's widow gradually became more and more convinced that the opera should remain unfinished and refused all access to the sketches and short score. Only after her death in 1976, and after a court action instituted by the foundation set up by her to manage the Berg estate had attempted and failed to stop the performance, was it possible to perform the complete opera with Friedrich Cerha's brilliantly realized orchestration of Act 3 and thus finally, after almost half a century, to appreciate the full stature of Berg's final achievement.

6. CONCLUSION. Though Berg was always the most popular of the three Viennese composers with concert and opera audiences, his posthumous critical standing fluctuated considerably. Until the 1960s, when Perle published his first articles on *Lulu*, there had been little detailed study of Berg's music, and it was generally accepted that he was the least strict, the least systematic and the most conservative and backward-looking of the composers of the Second Viennese School. Whether his supposed lack of system and of modernist conviction was seen as an asset or a failing depended on the writer's attitude to what was happening in contemporary music. To Boulez and other young composers who spearheaded the period of total serialism in the Europe of the 1950s, and for whom Webern was the most important of the three Viennese composers, Berg's attachment to tradition was a sign of an unacceptable willingness to compromise. 'Dodecaphony', wrote Boulez of the Violin Concerto, 'has more pressing duties than to tame a Bach chorale'.

But such views of Berg were based on mistaken premisses. His 'free' music has been revealed as at least as systematic as – and, in some ways, more systematic than – that of his colleagues and contemporaries, involving methods of organizing pitch, metre, rhythm and proportion that seem strikingly relevant to what has happened in music since his death. That such innovative and apparently 'abstract' organizational procedures take place within, and indeed give rise to, an intensely expressive music invoking the emotional world of *Tristan*, Mahler and the late Romantics is one of the many paradoxes that underlie Berg's music. The bringing together of elements that would normally be regarded as mutually exclusive – tonality with atonality, subjective autobiographical elements with objective compositional constraints, quotation and reference to popular style with rigorous and integrated handling of all musical parameters – is a constant feature of Berg's music. It is perhaps the rich resulting ambiguity that makes Berg so important an influence on more recent composers, whether modernist or postmodernist. As the 20th century closed, the 'backward-looking' Berg suddenly came as Perle remarked, to look like its most forward-looking composer.

WORKS

Early works: *c*80 songs, 1v, pf, 1901–8; sonata fragments, variations, etc., pf; variations, str; for detailed list see Hilmar (1980), only those pubd listed below

op.

— Jugendlieder, i, 1901–4, 1v, pf (1985): Herbstgefühl (S. Fleischer), Spielleute (H. Ibsen), Wo der Goldregen steht (F. Lorenz), Lied der Schiffermädels (O.J. Bierbaum), Sehnsucht I (P. Hohenberg), Abschied (E. von Monsterberg-Muenckenau), Grenzen der Menschenheit (J.W. von Goethe), Vielgeliebte schöne Frau (H. Heine), Sehnsucht II (Hohenberg), Sternefall (K. Wilhelm), Sehnsucht III (Hohenberg), Ich liebe dich! (C.D. Grabbe), Ferne Lieder (F. Rückert), Ich will die Fluren meiden (Rückert), Geliebte Schöne (Heine), Schattenleben (M. Greif), Am Abend (E. Geibel), Vorüber! (F. Wisbacher), Schummerlose Nächte (Greif), Es wandelt, was wir schauen (J.F. von Eichendorff), Liebe (R.M. Rilke), Im Morgengrauen (K. Stieler), Grabschrift (L. Jakobwski)

— Jugendlieder, ii, 1904–8, 1v, pf (1985): Traum (F. Semler), Augenblicke (R. Hamerling), Die Näherin (Rilke), Erster Verlust (Goethe), Süss sind mir die Schollen des Tales (K.E. Knodt), Er klagt das der Frühling so kortz blüht (A. Holz), Tiefe Sehnsucht (D. von Liliencron), Über den Bergen (K. Busse), Am Strande (G. Scherer), Winter (J.

DOUGLAS JARMAN

**Berg, George** [?Georg] (*b* ?1730s; *d* London, 1775). English composer and organist of German origin. He may also have been a chemist who experimented in musical glassmaking. It is strange that a composer who published so much should be mentioned so little by his contemporaries and not at all by Burney or Hawkins. Sainsbury, whose other information is incorrect, said in his *Dictionary of Music* that he was German, and W.H. Husk (*Grove1*) said that he was a pupil of Pepusch. Berg probably played either the organ or the violin at Ranelagh Gardens in the late 1750s; he published six books of Ranelagh songs then, many of them for John Beard to sing. The scarcity of surviving copies may suggest that they were never very popular. No doubt Berg's op.1 concerti grossi were also written for Ranelagh; though rather conventional as music, the idiomatic violin writing suggests a composer-performer. As 19 organists in the London area subscribed to this publication, Berg was also clearly popular in the organ world and may have already held a church appointment. He was elected a member of the Royal Society of Musicians in 1763, and in the same year was listed in Thomas Mortimer's *The Universal Director* as 'composer & teacher on the harpsichord, Lincoln's Inn Fields'. By 1771 he was organist at St Mary-at-Hill in the City of London. Thereafter he published no more music. Following his death, his extensive music library was sold by Christie's (1776), in a joint sale with the business effects of the keyboard instrument maker Samuel Gillespy.

Nothing survives of Berg's operas, his oratorio, *The Cure of Saul*, or of his ode, *The Invitation*, but he published some glees, and in 1763 won a prize with one, *On softest beds*. His op.7 sonatas were among the earliest to be published as for harpsichord or piano, but their style is less progressive than their title suggests. The *galant* works are somewhat clichéd, with numerous Alberti basses; the more traditional sonatas, however, have greater individuality. Each sonata has three movements, and seven of the ten end with minuets.

ROGER FISKE/GERALD GIFFORD

**Berg, Gunnar (Johnsson)** (*b* St Gallen, 11 Jan 1909; *d* Bern, 25 Aug 1989). Danish composer. His father died in 1914, and his upbringing in Switzerland, with a period in Copenhagen between 1921 and 1924, was marked by serious illness, with time spent in sanatoriums and in a children's home. He began piano instruction at the age of 14. In 1928, after a short visit to Paris, he moved to Copenhagen. In 1931 he chose to make his life in music; he managed to attend the Salzburg Summer Festival in 1932 and 1935, and private tuition with, among others, Jeppesen led him to enter the Royal Danish Conservatory in 1936. He left after only one year, disappointed in the conservatory's lack of interest in the new musical trends in central Europe. He studied the piano with Koppel (1938–42) and theory with Rosenberg. From 1944 to 1947 he took further piano instruction with Elisabeth Jürgens, who was to encourage him througout his career. In 1945 he introduced his freely atonal compositions in Copenhagen; they were received very negatively by Danish critics, and after a series of piano recitals in refugee camps in Denmark and another concert of his music in 1947 in Copenhagen, Berg left for Paris in 1948. There he studied for a short period with Honegger, but of greater influence was his contact in the French capital with the musical avant garde, in which he found a kindred musical thinking. In 1950 he attended the American Seminar in Salzburg, and in 1952 – the first Danish composer to do so – he visited Darmstadt, together with the French pianist Béatrice Duffour, whom he married the same year. In 1953 there was a concert devoted to Berg's works in Paris, and his ballet *Mouture* was given several times in the Netherlands in 1956. Berg and his wife toured in several European countries introducing avant-garde music, supported by the French Ministry of Foreign Affairs. In 1957 they moved to Denmark and, through their many lectures and concerts at the Folk High Schools, were among the first to introduce the music of the avant garde to the country. In 1965 Berg received a lifelong artist grant from the Danish Ministry of Culture and was made a Knight of the Order of the Dannebrog. In 1966 the Bergs settled near Horsens in East Jutland. Béatrice died in 1976 and in 1980 Berg moved to Switzerland, where he found interest in his music slowly growing.

Berg was a respected but isolated figure in Danish musical life with neither position nor pupil, and his music, which has only rarely been performed, still awaits its deserved acknowledgement. Never compromising in his style, nor publishing analyses – and very seldom writing or speaking about his own music – Berg was not good at promoting his works. His music was accepted only by a limited audience, although *Essai accoustique III* (1954) and *Aria* (1981) received nominations for the Nordic Council Music Prize. His first compositions from the mid-1930s relate him more to a central European style in the tradition of Bartók, Honegger and Stravinsky than to the Nielsen tradition prevalent in Denmark, from which his personal creative approach was quite different. He was fascinated by the static aspects of the musical gesture and had an urge for innovation. Inspired by the Parisian avant garde, he became the first Dane to compose serial music with his Suite for cello (1950); in the Suite he used traditional 12-note technique, but in the trio *Filandre* (violin, clarinet and flute, 1953) all musical parameters were predetermined. Since then a personal kind of serial technique has enabled him to bring the various musical parameters into a new, different and unique relationship in his work. Characteristic of the compositions before the serial turning-point of 1950 is a highly constructed, dissonant harmonic structure with a tendency towards tone clusters, a specific, 'turning' melody and an extremely elaborate rhythmic design. From about 1950 his style ranged from a totally static music without gesture or inner dynamic tension, through quiet vegetation to violent eruption. There are similarities to the work of Stockhausen and Boulez, but Berg's work is differentiated by its meditative, lyrically introverted sound.

JENS ROSSEL

**Berg, Joachim.** *See* BERGEN, GIMEL.

**Berg, Johann vom** [Montanus; vom Perg, Johann; von Berg, Johann] (*b* Ghent, ?*c*1500–15; *d* Nuremberg, 7 Aug 1563). German printer. He studied in Paris, and after becoming a Protestant emigrated to Nuremberg in a state of penury. He there was befriended by Veit Dietrich, the powerful preacher at St Sebald and important Reformation theologian; Berg later printed virtually all of Dietrich's writings. The earliest extant documentary evidence concerning him is the Nuremberg record of his marriage in 1541 to the widow Katherina Schmidt (née Bischoff); he was granted citizenship shortly thereafter. With Ulrich Neuber he founded a printing house on his wife's property, known (according to the firm's colophon) as 'auf dem Neuen Bau, bey der Kalkhütte', in 1541 or 1542. A daughter, Veronica, was born in 1545. In 1549 the firm acquired additional premises, and the colophon changed to 'auf dem zwölf Brüder Platz, bey dem Cartauser Closter'.

The firm of Berg and Neuber was one of the most prolific publishers of polyphonic music in the 16th century, and is known to musicologists primarily for its editions of motet anthologies. It published at least 122 editions of music, including Latin motets, German polyphonic lieder, Kirchenlieder and treatises, besides works of literature and books on theology, mathematics, astronomy and medicine. It also sold books published by other firms. The firm's first volume of music was Hans Gamersfelder's *Der gantze Psalter Davids in Gesangwies gestellt* (1542); its earliest identified volume of polyphonic music is Hans Ott's *Hundert und fünfftzehen guter newer Liedlein* (RISM 1544[20]). Berg apparently acted as editor for most of the volumes of sacred polyphony printed by the firm, particularly the enormous motet anthologies which characterized its output. He was a friend of Adrianus Petit Coclico, who lodged in his home for at least two years (1550–52) during the Augsburg Interim. Berg and Neuber also had a fruitful relationship with Lassus, printing his first book of motets in 1562; there is every reason to believe that Berg was a trained musician as well as a printer and publisher. At the time of Berg's death, the firm was the largest in Nuremberg as well as one of the most important and prolific in Europe. The printing dynasty founded by Berg and Neuber continued, with the Gerlach and Kauffmann firms, well into the 17th century and eventually dominated the Nuremberg printing market.

SUSAN JACKSON

**Berg, Josef** (*b* Brno, 8 March 1927; *d* Brno, 26 Feb 1971). Czech composer. He studied composition with Petrželka at the Brno Conservatory and musicology with Jan Racek at Brno University (both 1946–50). After a period as a music editor for Czech Radio in Brno (1950–53) he lived as a freelance composer, being a member of Tvůrčí Skupina A ('Creative Group A') from 1963. He also wrote criticism for the specialist and daily press (*Hudebni rozhledy*, *Host do domu*, *Rovnost*, *Práce*), but his literary talent found its best expression in the texts he wrote for his own works.

Berg's early compositions, such as the First Symphony, were influenced by neo-classicism and Stravinsky. In the 1950s he turned in the direction of Moravian folk music and Janáček, composing folksong arrangements and suites for the Brno Orchestra of Folk Instruments. He adjusted to the ideas of socialist realism in several romanticized programme compositions, such as the overture *Lidé bděte* ('People, Be on Guard') and the Third Symphony, but these tendencies slowly gave way to a subjective lyricism which reached its peak in the cycle *Písně nového Werthera* ('Songs of the New Werther') of 1963.

Around that time Berg began to compose under the stimulus of new western European music and to concentrate on chamber pieces. Several of his instrumental compositions of this period are marked by lingering neo-classical traits and a clearly defined timbral drama; examples include the Sextet, the Nonet, the *Sonata in modo classico* for harpsichord and piano, and *Snění* ('Dreaming') for chamber orchestra. At the same time he began to use collage and the superimposition of different layers to reveal new meanings. His principal development, however, was of a theatre of alienation in his dramatic works, following Brecht's ideas. All the resources of the stage and of (12-note) music are involved in social criticism expressed in terms of irony, grotesquerie and the absurd, which was pursued in the 'happenings' of Berg's last years, in which his many talents (as writer, as composer, as dramatist and as provocative *animateur*) came together. Using new methods with a cheerful inventiveness and a contempt for technical dogmatism, Berg established himself as an outstanding representative of the Czech avant garde in a vibrant period of Brno's musical history. The flowering of his art coincided with the political liberalization which culminated in the Prague Spring of 1968, his early death with the realities of 'normalization'.

OLDŘICH PUKL/R

**Berg** [Rexroth-Berg], **(Carl) Natanael** (*b* Stockholm, 9 Feb 1879; *d* Stockholm, 14 Oct 1957). Swedish composer. He studied singing and a little counterpoint at the Stockholm Conservatory (1897–1900); otherwise he was self-taught. When Berg was a young man, a patron offered him a large sum on condition that he also find himself non-musical work. Berg therefore studied to become a veterinary surgeon, and worked as such in the army (1902–39). He associated with Atterberg, Rangström and Lindberg in reaction against earlier Swedish music; his Straussian style was more cosmopolitan than the nationalist Romanticism of his colleagues, although his music tended increasingly towards pathos and was at times bombastically patriotic. His orchestration was skilfully adapted to dramatic, sometimes melodramatic, programmes and his taste was often for fragile romantic subjects. After *Höga visan* ('Song of Songs', 1925) his technique grew more refined. The central works are the operas; those to his original texts concern Engelbrekt, the 15th-century Swedish champion of liberty, and St Birgitta. Berg was founder-chairman of the Society of Swedish Composers (1918–25).

ROLF HAGLUND

**Bergamasca** [bergamasco, bergomask] (It.). A tune widely used for instrumental variations and contrapuntal fantasias in the late 16th century and the 17th. It was probably based on a folksong or folkdance, and its name suggests a connection with the district of Bergamo in northern Italy. The tune was usually associated with the recurring harmonic scheme I–IV–V–I (ex.1).

Chordal accompaniments for the bergamasca appear in many Italian tablatures from Montesardo (1606) to G.P. Ricci (1677). Some keyboard variations retain the harmonic scheme in the manner of an ostinato (see Samuel Scheidt's set in *H-Bn* 26). Others, however, simply use the melody of the first half of ex.2 without the bass formula, as in Frescobaldi's bergamasca from *Fiori musicali* (1635), Giovanni Salvatore's *Canzone francese sopra un ballo detto la Bergamasca* (1641) and G.B. Fasolo's *Fuga prima sopra la Bergamasca* as well as in some ensemble pieces by Viadana (1610) and Giamberti (1657).

In Italy bergamasca variations were also written for keyboard by Bernardo Pasquini (*D-Bsb* L.215); for ensemble by Salamone Rossi (1622), Marco Uccellini (1642) and Gasparo Zanetti (1645); and for lute by

Ex.1 *Bergamasca*, opening phrases, *US-LAu* MS 51/1

Abondante (1587), Rasponi (1635), Alessandro Piccinini (1639) and Bernardo Gianoncelli (1650). Anonymous bergamascas in manuscript include works for violin (*HR-Zaa* I.a.44), keyboard (*I-Rvat* Chigi Q.IV.28) and lute (*US-SFsc*, Bentivoglio MS M.2.1.M3; *I-Lg* 774; and one transcr. Chilesotti in *Da un codice Lauten-buch del cinquecento*, Leipzig, 1890). Earlier pieces bearing the name 'bergamasca', such as Gorzanis's *Saltarello dito il bergamasco* for lute (1564), two *villotte* by Filippo Azzaiolo (1569) and Barbetta's *Moresca quarta deta la Bergamasca* (1585), are unrelated to the bergamasca melody, and only Barbetta's *Moresca* follows the harmonic pattern I–IV–V–I.

Ex.2 A bergamasca melody from Matteo Coferati: *Corona di sacre canzoni . . . seconda impressione* (Florence, 1689) on the top staff, with a chordal guitar accompaniment from *Fior novello, libro primo* (Bologna, 1627) by Fabrizio Costanzo on the lower staff (notes indicate major triads; the stems show the direction the hand strums the chords)

Examples in French lute tablature may be found in Besard's *Thesaurus harmonicus* (1603) and *Novus Partus* (1617) as well as in *D-Ngm* 33748, *D-Hs* B/2768 and the Thysius Lutebook (*NI-Lu*). English bergamascas (sometimes called 'bergomask') include settings by Bull and Holborne; in Shakespeare's *A Midsummer Night's Dream* a 'Bergomask Dance' is performed by rustics (Act 5 scene i). In Germany the first half of the tune, which became associated with the text *Kraut und Rüben*, occurs in the quodlibet of Bach's Goldberg Variations (1742).

In the 19th century the term was used for a fast dance in 6/8, which served as a model for Alfredo Piatti's *Bergamasca* for cello and piano (op.14). Other 19th- and 20th-century compositions have titles based on 'bergamasca', such as Debussy's *Suite bergamasque* (1890–1905) and Fauré's *Masques et bergamasques* (1919), but with no evident connection to the traditional tune or the harmonic scheme.

RICHARD HUDSON/GIUSEPPE GERBINO, ALEXANDER SILBIGER

**Bergamo.** City in Lombardy, Italy, *c*50 km north-east of Milan, below the first foothills of the Alps. Its principal church, S Maria Maggiore, built in the 12th century, was administered from 1449 by the Misericordia Maggiore, whose *consorzio* (council) had conducted its liturgy and given alms since 1265. The Misericordia introduced music into the service and began to keep records, a practice which continued into the late 19th century. The first records of payments to singers date from 1361. Instruction in singing and playing was instituted in 1449, with two teachers serving under the *maestro di cappella*; these courses were then connected to the Accademia di Lettere, thus establishing a school of music. The first organ, a positive, was installed by 1402, and by 1527 instrumentalists were regularly employed at the church. The post of *maestro di cappella* was held by Franchinus Gaffurius in 1483; his 16th-century successors included Gasparo Alberti, who was attached to the *cappella* in several capacities during the period 1514–60, Pietro Pontio (1565–7), Pietro Vinci (1568–80), Ippolito Chamaterò (1580–81) and Giovanni Cavaccio (1598–1626). Among the students of the *cappella* was the composer Antonio Scandello, cornettist in the years 1541–7. As in Venice (Bergamo belonged to the Venetian Republic from 1430), there was a choir supported by two organs, brass and viols, appropriate especially to Renaissance double-choir music such as Alberti's.

During the 17th century the musical forces were reduced and performed simple, though no less festive, concertato music. From the 1620s, and notably after the plague of 1630, the use of string instruments acquired a new importance, and some of the most progressive composers of Italian instrumental music were active in the *cappella*. The principal *maestri* of the 17th and 18th centuries

included Alessandro Grandi (i) (1627–30), Tarquinio Merula (1631–2), G.B. Crivelli (1642–8), Filippo Vitali (1649), Maurizio Cazzati (1653–7), P.A. Ziani (1657–9) and G.B. Bassani (1712–16). Among the other musicians employed there were Giovanni Legrenzi (organist, 1645–55) and C.A. Marino (violinist, 1683–96 and 1700–05). Though it was never again as important, music continued at S Maria Maggiore: Simon Mayr was *maestro* in the early 19th century, with an ensemble of six solo voices, organ and orchestra. His successor, Alessandro Nini (1847–77), enlarged the group of performers to 19th-century proportions. Towards the end of the century the *maestri di cappella* were well-known opera composers, Ponchielli (1882–6), Cagnoni (1886–90) and Pizzi (1897–1900).

The Cathedral of S Alessandro, situated in the old town next to S Maria Maggiore and strictly speaking attached to it, was musically less significant; among the *maestri di cappella* there were Cavaccio (1581–98) and Merula (1638–46), following his dismissal from S Maria Maggiore. S Alessandro della Croce and S Alessandro in Colonna, which served two Renaissance suburbs of Bergamo, had modest musical establishments in the early 17th century, including voices, strings and an organ. These churches all exchanged musicians with S Maria Maggiore for special celebrations.

During the 18th and 19th centuries the celebrated Serassi family of organ builders worked in Bergamo in competition with the already established firm of Antegnati at Brescia; the organ at S Alessandro in Colonna (1781) is one of Giuseppe Serassi's most brilliant creations.

The earliest documented opera performance in Bergamo was of Cazzati's *Ercole effeminato*, at the Palazzo della Ragione in 1654. The Teatro Riccardi, Bergamo's earliest permanent opera house, was begun in 1786 and opened on 24 August 1791 with a performance of Piccinni's *Didone*. It burnt down in 1797 but was rebuilt within two years. During the period 1801–9 the repertory was dominated by Mayr's operas, and later Bellini and Verdi staged and conducted their works there; the first Italian performance of Meyerbeer's *L'étoile du nord* was given in 1879 and the repertory also included works by Donizetti and Rossini. The name of the theatre changed to Donizetti to mark the centenary year, 1897, of the city's most famous native composer. In 1937 it achieved greater national importance with the institution of the Teatro delle Novità, a scheme which aimed to stage at least three new Italian operas each year (a list of premières is in *ES*). The Teatro Cerri was constructed of wood in 1797 within the precincts of the Palazzo Vecchio; after ten years it was replaced by the Teatro Sociale, which flourished in the early 19th century under Mayr as an aristocratic venue for residents of the old town (the Società dei Nobili Signori).

Mayr's presence transformed Bergamo's musical life. He came to the city to study with Carlo Lenzi in 1789; Canon Pesenti from Bergamo supported him financially during his studies in Venice, and he became *maestro di cappella* of S Maria Maggiore in 1802, a position he held until his death in 1845. He started by reorganizing the vocal and instrumental ensemble of the church (one soprano, one alto, two tenors, two basses, organ, two first and two second violins, viola, double bass, two oboes and two horns); in 1805 he founded the Lezioni Caritatevoli di Musica, which, after various changes of name, became the Istituto Musicale Gaetano Donizetti in 1897, when it ceased to be attached to the *cappella* of S Maria Maggiore. Mayr's organization of this school established the pattern for music schools throughout Italy. The most famous students included Donizetti, the tenor G.B. Rubini and the cellist Alfredo Piatti. From 1809 to 1824 Mayr was also director of the Teatro Sociale, where he conducted and staged his operas. He promoted performances by amateur chamber musicians (in which he took part himself) and founded the Unione Filarmonica in 1822; it met in the Teatro di S Cassiano (later the Teatro G.S. Mayr). A later chamber music society, the Società del Quartetto, was founded in 1904 as a continuation of the Unione Filarmonica. The Festival Pianistico Internazionale (held in cooperation with Brescia) began in 1964 and the Festival Donizettiano in 1982.

The Museo Donizettiano, founded in 1897 by the Bergamo scholar Cristoforo Scotti, houses autograph scores and early and recent editions of Donizetti's operatic and instrumental music, the house of his birth is also a small museum. The Biblioteca Civica A. Mai contains important early music prints and manuscripts (described in the library's bulletin *Bergomum*, lxxxvii (1992), 67–91 and 157–75; lxxxix (1994), 89–102), and some from the archives of the Misericordia Maggiore, as well as Mayr's personal library, rich in 18th-century manuscript opera scores and his own compositions.

The most important composers born in Bergamo besides Donizetti were P.A. Locatelli and Antonio Lolli.

JEROME ROCHE/RODOBALDO TIBALDI

**Bergamo, Petar** (*b* Split, 27 Feb 1930). Croatian composer. He studied in Split with Josip Hatze, then at the Belgrade Academy with Rajičić (composition), graduating in 1960, with further studies until 1964, including conducting with Zdravković. From 1965 to 1972 he was an assistant and later lecturer in composition and instrumentation at the Belgrade Academy. He was a music editor at Universal Edition in Vienna from 1973 to 1976. In 1983 he settled in Zagreb.

Bergamo's early music is romantic in style but always guided by a firm structural discipline. The Symphony no.1 (rewritten from an earlier piano sonata) and the overture-fantasy *Navigare necesse est* show his classical leanings, but the strong harmonic language indicates further developments. These were largely realized in the ironical and harsh Symphony no.2 and *Musica concertante*, works notable for their striking atonal harmony, a strong and sometimes violent dramatic sense and brilliant orchestration. Also noteworthy is Bergamo's excellent orchestration of Vojislav Vučković's ballet *Čovek koji je ukrao sunce* ('The man who stole the sun', 1966).

WORKS
(*selective list*)

Dramatic: U zemlji lazji [In the Land of Lies] (radio op, 1, D. Lukić), 1954
Orch: Navigare necesse est, ov.-fantasy, 1960; 2 syms., 1961, 1963; *Musica concertante*, 1962; Arco per archi, str orch, 1985; Sax Conc., 1991–3
Choral: Bezimini [The Nameless] (J. Kaštelan), suite, 1954; Rastanak i Podgorski mornari [Farewell and Sailors of Podgora], diptych, 1955; Spiriti eccellenti (M. Čapalija), female chorus, ob, 2 tpt, bells, perc, 1994–6
Chbr and inst: Pf Sonata, 1957; Variazioni sul tema interotto, pf, 1957; Str Qt, 1958; Canzone antiche, wind, 1962; Conc. abbreviato, cl, 1966; Gloria, alla memoria Vincenzo Bellini, 13 str, 1966–84; Espressioni notturne, pf trio, 1967; I colori d'argento, conc., fl, hpd, ens, 1967; Ritrovari per tre, pf trio, 1967; Concerto per una voce, bn, 1975; Canzona da sonar, vn, 1976; Domande senza ripostà, sax, pf, 1996
Songs, children's songs, film scores, incidental music for radio
Principal publisher: Udruženje kompozitora Srbije

NIALL O'LOUGHLIN

**Bergani, Nicolò.** *See* BEREGAN, NICOLÒ.

**Berganza (Vargas), Teresa** (*b* Madrid, 16 March 1935). Spanish mezzo-soprano. She studied in Madrid with Lola Rodriguez Aragon, a pupil of Elisabeth Schumann. She made her début in 1957 as Dorabella at Aix-en-Provence, returning as Rosina, Purcell's Dido, Cherubino, Octavia (*L'incoronazione di Poppea*) and Ruggiero (*Alcina*). In 1958 she sang Isolier (*Le comte Ory*) at the Piccola Scala and Cherubino at Glyndebourne, and made her American début at Dallas as Isabella (*L'italiana in Algeri*). She first appeared at Covent Garden in 1960 as Rosina, then sang

*Teresa Berganza in the title role of Rossini's 'La Cenerentola'*

Cherubino and, during La Scala's 1976 visit, the title role of *La Cenerentola*. She sang at Chicago, the Metropolitan (1967–8), Vienna, Paris and Salzburg; her roles included Cesti's Orontea, Mozart's Sextus and Cherubini's Neris (*Médée*). Her rich creamy voice with its great agility, perfect for the Rossini mezzo-soprano roles, developed a heavier tone and a more dramatic style appropriate to Carmen, which she sang at Edinburgh (1977–8) and repeated at Hamburg, San Francisco, Covent Garden and Paris; and to Charlotte, which she sang at Zürich (1979). She appeared as Zerlina in Joseph Losey's film of *Don Giovanni* (1979). In the 1980s she sang mainly in concerts, and in 1992 she took part in the gala ceremonies in the Olympic Games in Barcelona. Among her many recordings are memorable interpretations of Sextus (*La clemenza di Tito*), Carmen, Rosina and Cenerentola, operas by Falla and a delightful recital of Spanish song. A volume of memoirs, *Flor de soledad y silencio: meditaciones de una cantante*, was published in Madrid in 1984.

HAROLD ROSENTHAL/R

**Berge, Håkon** (*b* Stavanger, Norway, 22 April 1954). Norwegian composer. He embarked on his career as a composer for the theatre, arranger and conductor even before he graduated from the conservatory in Stavanger and received his diploma in composition from the Norwegian Academy of Music (1986). He has collaborated with leading directors at all the major theatre companies in Norway and also several abroad. He has written music for more than 70 plays. For some years he was also active at the Norwegian Broadcasting Televi-

sion's group for experimental music production and presentation. The group was awarded several prizes, and Berge's TV opera *Gagarin* (1990) on scenes from the life of the first Soviet cosmonaut won acclaim both for its music and innovative use of the visual medium. Berge has been instrumental in moulding Norwegian cultural policy and has held a number of important positions, among which was his chairmanship of the Norwegian Composers Association from 1991 to 1997.

WORKS

Dramatic: Movement from Eclipse, ballet, 1984; Gagarin (TV op, J. Bing and T.Å. Bringsvaerd), 1990; Bakkantinnene (incid music, Euripides), 1997

Orch: Coriolan, conc., tpt, sym. band, 1981; Landskap. Åpent. Stille [Landscape. Open. Quiet], 1982; Signal, chbr orch, tape, 1986; Trombel, trbn, brass band, 1990; (four unexpected dances), brass band, 1994; The Great Color-Gobbler March, brass band, 1996; Indian Song Book, S, orch, 1996

Chbr: Suite, brass qnt, 1978; Wave, trio, ob, vc, hpd, 1983; Rain-Dance, ob, cl, bn, 1985; Signal II, 14 brass insts, perc, 1986; Girlander, accdn, 1991; Shimmer: Erindring, pf, chbr ens, 1993; Nanawatai, 3 perc, 1994

Vocal: Kitairon (Sophocles), male chorus, tape, 1985; Windows, choir, tape, 1986

ARVID O. VOLLSNES

**Bergeijk, Gilius van** (*b* The Hague, 7 Nov 1946). Dutch composer. From 1966 to 1972 he studied the oboe and the alto saxophone at the Hague Conservatory; there he also studied composition with van Baaren and electronic music with Raaijmakers. In 1972 he began lecturing on electronic music at the Conservatory. He has also held various administrative positions in the field of Dutch music. In 1987 he was awarded the Ooyevaer Prize.

Van Bergeijk has composed both instrumental and electronic music including works for ballet, film and theatre. His music, often tragic and bitter in its effect, often uses deconstructive procedures and he often selects well-known works for this treatment in order to make the process understandable to the listener. *Demontage*, for example, incorporates themes by Handel and Thelonious Monk, while *Over de dood en de tijd* is based on Schubert's *Der Tod und das Mädchen*. Instead of using modern digital techniques in his electronic pieces he restricts himself to analogue splicing methods. He does this out of a craftsmanlike conviction that the imperfection of manual work gives the music its necessary vitality.

WORKS
(*selective list*)

Stage: Opwaartsche wegen [Ascending Roads] (ballet), 1972; De Indianen (music-theatre piece), 1976; Dulcinea, Dulcinea (music-theatre piece), 1990; Tables d'amour (ballet), 1994–5

Inst: Pianomuziek I–IV, pf, 1967; In memoriam Thelonious Monk, wind ens, 1983; Ondergang, 24 wind, 1984; Tussen twee werelden, orch, 1986, collab H. Emmer; Symphonie joyeuse, ens, 1987–93

El-ac: Over de dood en de tijd (after Schubert: *Der Tod und das Mädchen*), A, pf, org, elecs, 1980; De roep [The Shout], 1982; Pro juventute, 1985; Sym. der duizend, (alfabetisch), 1992; Een lied van schijn en weezen [A Song of Appearance and Essence], 1993; You are my Fairy Queen Dearest (van Bergeijk), 1v, pf, 1995

Other: D.E.S., tape, 1967–8; Demontage, 6 pieces, 1993–8

Principal publisher: Donemus

JACQUELINE OSKAMP

**Bergen.** City in Norway. During the 16th century art music there was cultivated by the church, the grammar school and the official town musicians. Nils Mogensson (*c*1530–66) was the first organist at the cathedral. The first known contract for a town musician is dated 1591, although the post seems to have been well established by that time. Of the 18 town musicians appointed before 1848 (when the appointment was discontinued) the following were outstanding: L.J. Nattheide (appointed 1591), Povel Krøpelin (1669; *d* 1706), Rudolph Grip (1685; *d* 1716), O.P. Rødder (1789; *d* 1806) and F.G. Schediwy (1837–48). In 1671 Bergen appointed its first director of music, Peder Mogenssøn Wandel, who was succeeded by Søren Pedersen (from 1681), Anders Eckhoff (*d* 1718), Peder Stub (from 1719; *d* 1747) and Diderich Warnicke (*d* 1766). From the 16th century to the 18th the church choir consisted of grammar school pupils. Under Søren Linstrup (headmaster from 1696 to 1702) a series of church music dramas was performed.

In 1765 the Harmonien music society founded its own orchestra in Bergen, the Harmoniske Selskab (Harmonic Society), the first of its kind in Norway. Initiated by Jens Boalth and Claus Fasting, the orchestra had 20 members and gave weekly concerts of symphonies, chamber music and choral works. The first conductor was Samuel Lind (1765–9); his successors included Rødder (1785–1805), Ferdinand Rojahn (1856–9), A. Fries (1859–62 and 1864–73), Grieg (1880–82), Halvorsen (1893–9), Harald Heide (1905–48), Olav Kielland (1948–52), Arvid Fladmoe (1958–61), Karsten Andersen (1964–84), Aldo Ceccato (1984–90) and Dmitri Kitaienko (from 1990). In 1987 the orchestra (until then called the Musikselskab Harmoniens Orkester) was reorganized as the Bergen PO, with its own choir; in 1995 the orchestra and choir each had about 90 members. The orchestra has toured in Italy and elsewhere in Europe, as well as in the USA and Japan (1993).

The theatre Den Nationale Scene was founded in 1850 by the violinist and composer Ole Bull, and until the end of the 19th century many music dramas and operas were performed there by visiting companies. From 1894 Den Nationale Scene and Harmonien collaborated closely. The theatre had its own orchestra from 1902 to 1918. Opera Bergen, established in 1982, presents two major productions a year, using both professional and amateur performers.

The Bergen Festival was inaugurated in 1953. Each year a number of symphony, chamber, church and jazz concerts are held, as well as theatre and ballet performances, folklore and art exhibitions, in which both Norwegian and foreign artists participate. In 1953 the festival consisted of 22 events, but by the 1990s the annual number of events had risen to about 100. The director from 1994 was Ole Wiggo Bang. A large concert hall, the Grieghal, was opened in 1978.

The Bergen Musikkonservatorium was opened in 1905, on the initiative of T. Castberg. The first Norwegian music college was founded in Bergen in 1852 by the German-Norwegian composer Friedrich Vogel. The teacher-training college in Bergen opened a music department in 1958.

The city has several chamber music groups, including the Bergen Kammermusikforening (Chamber Music Society, founded 1935). The ensemble BIT20, established in 1989, specializes in contemporary music. Amateur music societies include the Bergen Handelsforenings Orkester (Trade Union Orchestra, 1941), and a number of choral societies, among them the Bergen Haandverks og Industriforbunds Sangforening (1847), the Søraas Kor (1882) and the Concordia society (1923). The Bergen Domkantori choir (founded 1971) has won prizes in Norway and

abroad. The city also has several military bands. A piano factory was opened in Bergen in 1896 by Jakob Knudsen.

Composers who have worked in Bergen include Bull, Grieg, Sverre Jordan and Harald Saeverud. Troldhaugen, Grieg's home, was completed in 1885, and remains as it was during the composer's lifetime, as a museum, augmented by a visitor centre and a recital hall, where chamber concerts are held during the annual festival. A collection, established in 1906, of Grieg's manuscripts and letters is in the Bergen public library (*N-Bo*). The 150th anniversary of Grieg's birth in 1993 prompted a series of cultural events.

KARI MICHELSEN

**Bergen, Gimel** [Berg, Joachim; Montanus] (*b* Lübeck, *c*1540; *d* Dresden, 1597). German printer. After apprenticeship with Jakob Lucius in Rostock and Johann Eichorn in Frankfurt an der Oder, he moved to Dresden, working at first with Matthäus Stökel. His music printing began in 1570 with vocal collections by Matthaeus Le Maistre and Antonio Scandello, followed by several Lutheran hymnals. After his death the press was continued by his widow and heirs, including his son Gimel II (*fl* 1610–37, made Hofbruckdrucker in 1616), then Gimel III (*fl* 1640–43), Christian and Melchior (*fl* 1643–88), Melchior's son Immanuel (*fl* 1688–93) and eventually Melchior's son-in-law, Johannes Riedel (*fl* 1688–1716). Their most ambitious and best-executed printing coincides with their finest music. Editions of Heinrich Schütz began to appear in 1618, including the *Psalmen Davids* (1619) and the second and third parts of the *Symphoniae sacrae* (1647, 1650, the first having been issued earlier in Venice). Other major works are the dance music (1527–8) of Carlo Farina and the dialogues (1645–71) of Andreas Hammerschmidt, the latter often with the printer Georg Beuther in nearby Freiberg. Wolfgang Seiffert (*fl* 1624–55), who married Hedwig Bergen, Gimel II's daughter, and his son Gottfried (*fl* 1655–*c*1662) are named in joint imprints and alone on works of Farina, Hammerschmidt and Schütz, notably Schütz's *Psalmen Davids* of 1661. (*BenzingB*)

DONALD W. KRUMMEL

**Berger, Andreas** (*b* Dolsenhaim, nr Altenburg, Saxony, 1584; *d* Ulm, 10 Jan 1656). German composer, singer and teacher. His father having left him little in the way of worldly goods, he went as a young man to Schwandorf, Nördlingen, and then to Augsburg, where his first publication appeared in 1606. The title 'Kaiserlicher Notar', which he held from 1624, indicates a legal training. At the end of 1606 he was appointed a tenor in the Stuttgart court chapel and in 1608 acted also as composer to the duke, Johann Friedrich; however, his application for the post of Kapellmeister was unsuccessful. Despite a contemporary report that he was 'a good musician and a fine composer', he was dismissed in 1612 when the number of singers in the chapel was reduced. After this he appears to have employed his talents in various directions. Until 1624 he worked as *Präzeptor* and music director at Bopfingen, near Nördlingen; then for ten years he was Kapellmeister and probably also official scribe to Count Ludwig Eberhard of Öttingen before returning to Augsburg in 1634 to become the town's official secretary. He was town clerk of Leutkirch, near Memmingen, from 1635 until in 1641 he moved to Ulm, where he worked as clerk of the court until his death.

Berger composed both sacred and secular vocal music. The 1606 book of *Harmoniae* contains 32 motets in four to eight parts, of which those for fewer voices adhere strongly to the polyphonic style of the late 16th century. Those based predominantly on flowing counterpoint are musically the most effective, for Berger's attempts to use shorter, pointed motifs as a basis for imitation are less successful. However, he handled other progressive features more ably; these include passages of homophony, which are specially strong when used antiphonally in the double-choir pieces; some imaginative word-painting, including quite startling discords; and an extensive use of sequences showing tonal feeling, which are found alongside traces of modal influence. The general layout of these motets shows a certain affinity with similar works by H.L. Hassler that were published in Augsburg at the time. Berger wrote his collection of secular lieder of 1609 to compensate for what he felt to be a comparative lack of German songs, as opposed to those in Latin and Italian; they are simple strophic pieces. The ten-part antiphon setting *Da pacem, Domine* of 1635 is his most mature surviving work; it displays effective contrasts in sonority and texture and in the treatment of the text, as well as strong reminders of the polychoral style of Giovanni Gabrieli.

WORKS

Harmoniae seu cantiones sacrae, 4–8vv (Augsburg, 1606); 3 motets, 8vv, also in 1618[1]

Threnodiae amatoriae, das ist: Neue teutsche weltliche Traur- und Klagelieder, 4–8vv (Augsburg, 1609); canzone, 8vv, ed. H. Schultz, Reichsdenkmale des Erbes deutscher Musik, 1st ser., xiv/2 (Hanover and Leipzig, 1941); O Trauern, Angst und Klagen ed. in Volksliederbuch für die Jugend, x, nr.521 (Leipzig, 1930)

Da pacem, Domine, 10vv (Augsburg, 1635)

Magnum tricinium tergeminum (Ulm, *c*1648), lost

**Berger, Arthur (Victor)** (*b* New York, 15 May 1912). American composer and critic. Between the ages of 11 and 16 he studied the piano and his first compositions were written while he was in high school. From 1928 to 1930 he attended the City College, CUNY; he received his first formal instruction in composition at New York University (BS 1934). In these years he became acquainted with the avant garde (Ives, Varèse, Cowell) and joined the Young Composers Group, formed by Copland. As a

fellowship student he enrolled in the Longy School of Music (1935–7) and concurrently attended Harvard (MA 1936), where he was taught by Piston, A.T. Davison and Leichtentritt. During the years 1937–9 he studied in Paris with Boulanger. He then taught at Mills College (1939–42) and also studied composition with Milhaud, who helped him secure a commission to write a woodwind quintet for members of the San Francisco SO. Berger subsequently taught at Brooklyn College (1942–3), the Juilliard School and Brandeis University (from 1953); in 1979 he became a member of the faculty of the New England Conservatory, from whose composition faculty he retired in 1998. Long active as a writer and editor, he has been music critic for the *Boston Transcript* (1943–7), *New York Sun* (1943–6) and *New York Herald Tribune* (1946–53); served as editor of the *Musical Mercury* (1934–7) and *Perspectives of New Music* (1962–3), of which he was a co-founder; and contributed articles to many journals, notably *Modern Music*, *Saturday Review*, *Atlantic Monthly*, *High Fidelity* and *Score*. He also wrote a monograph on Copland (1953). Among his awards have been an American Council of Learned Societies grant (1936), a Fulbright scholarship (1960), and a Guggenheim Fellowship (1975–6). He is a member of the American Academy of Arts and Sciences and of the Institute of the American Academy and Institute of Arts and Letters.

While in Paris (1937–9) Berger's interest in Stravinsky's music was heightened and this had considerable influence on the development of his style, leading to the publication of several articles on Stravinsky's music. Berger is almost invariably categorized as a Stravinskian neo-classicist with regard to his music of the period 1940–57 and as a serial or post-Webern composer for his later works. Although he has admitted the early influence of Stravinsky and Schoenberg, particularly of the latter's *Die glückliche Hand* and Piano Suite op.25, it is simplistic to classify him in this way, for he has developed his own procedures that lend special and highly effective qualities to his music. Paramount is a concern with musical space, both vertical and horizontal. To maintain the clarity of vertical pitch relationships he uses a lean, spare texture; horizontal connections are delineated by wide-spaced leaps. In his vocabulary of linear procedures, 7ths and 9ths are commonplace and function as they would in traditional tonal music; they are not used 'as a means of speaking in a raised voice' (Berger). Rhythmically fragmented lines also contribute to the openness of the textures. Berger's concern with the structuring of musical space does not spring from an interest in the abstract, nor is it the result of formulaic manipulations; he believes simply that such treatment enhances the beauty of pitch relationships and sonorities.

During the early 1950s Berger's harmonic idiom was essentially diatonic, but because he often displaced the elements of chords, exploding them by means of fragmentation, vertical octave spacings, or delayed progression, his music hardly seemed diatonic. Comparisons with Webern undoubtedly stemmed from his use of such techniques, yet the diatonic skeleton of his music provided a connection with Stravinskian neo-classicism; indeed, Babbitt used the term 'diatonic Webern' in a review of the Duo for cello and piano (1951) and Berger himself hinted at a merging of the two styles in his work when he described the Chamber Music for 13 players (1956) as 'neoclassic twelve-tone'. His Five Pieces for piano (1969) display a sophisticated arsenal of procedures, including the use of combinatorial sets as well as refined techniques of pitch selection and registration. In a number of works he has used a group of five source-trichords whose pitch classes both provide vertical sonorities and are arpeggiated as melodic fragments.

Since 1961, when he wrote the Three Pieces for two prepared pianos, Berger's music has tended to be less rigorously systematic in its serialism. In his words, 'cells, often of a tone-cluster variety', are used to create vertical organization in which individual pitch classes are dispersed by means of widely shifting octave dispositions. Since 1958 his output has not been large; at the same time he has shown increasing stylistic independence. Having ended his reliance on dodecaphony and neo-classicism, he derives new constraints and assumptions for each work in order to replace those previously provided by external procedures. Indeed, an increased attention to the use of instrumental colour has been noted by his friend, the artist Robert Motherwell.

Later in life Berger has paid considerable attention to the revisions of earlier works, utilizing a variety of techniques which range from re-composition to the simultaneous overlay of new materials. He considers these revisions to be collages based on the earlier pieces.

CHARLES H. KAUFMAN

**Berger, Christian** (*b* Freiburg, 13 Dec 1951). German musicologist. He studied the violin and music education at the Musikhochschule in Freiburg and musicology at Freiburg University with Eggebrecht. After completing the state examination at the Hochchule in 1975, he continued his musicological studies with Dahlhaus and Rudolf Stephan in Berlin and with Reckow and Krummacher in Kiel, where he worked as an assistant (from 1980) and later senior assistant (until 1994). He took two postgraduate degrees at Kiel: the doctorate in 1982 with a disseration on Berlioz's *Symphonie Fantastique*, and the *Habilitation* in 1989 with a study on French 14th-century chanson. In 1995 he was appointed professor and head of the music department at Freiburg University and he became an editor at the *Musikforschung* in 1998. His research focusses on late medieval music, late Baroque instrumental music, 18th- and 19th-century French music, Liszt's symphonic poems and Webern. One of his major achievements has been exploring the implications which the medieval hexachord-based teaching system has for the polyphonic writing of the Middle Ages. Based on his investigations of this neglected area of medieval music history, he has been able to provide new and often surprising insights into the compositional processes of this repertory.

LORENZ WELKER

**Berger, Erna** (*b* Cossebaude, nr Dresden, 19 Oct 1900; *d* Essen, 14 June 1990). German soprano. After studying in Dresden, she was engaged by the Dresden Staatsoper, making her début as First Boy (*Die Zauberflöte*) in 1927. She sang at Bayreuth (1929–33) as the Shepherd in *Tannhäuser*, the First Flowermaiden and the Woodbird. Her first Salzburg appearance (1932) was as Blonde, her last (1953–4) as Zerlina. She made her Covent Garden début in 1934 as Marzelline, returning in 1935 and 1938, when she sang Queen of Night, Konstanze and Sophie. She sang again in London in 1949, and in that year made her Metropolitan début as Sophie (performance preserved on disc). She continued to appear in Germany and Austria until the end of the 1954–5 season. On her retirement from the stage she devoted herself to lieder, giving her final public recital in Munich in 1968. Berger's voice retained its youthful freshness throughout her career; her Queen of Night and Konstanze were considered peerless, and her purely sung, innocent Gilda was one of the best of its day. Among her recordings are the Queen of Night, Gilda and Zerlina (on film, 1954); she also made many notable recordings of lieder.

HAROLD ROSENTHAL/ALAN BLYTH

**Berger, Francesco** [Francis] (*b* London, 10 June 1834; *d* London, 26 April 1933). English pianist and composer. The son of a businessman from Trieste, Berger's early teachers in London were Adolf Gollmick (piano) and Raffaello Paravivini (composition). In 1848 he went to Trieste where he studied piano with Aegidius Karl Lickl and composition with Luigi Ricci. Together with Alberto Randegger, Giuseppe Rotta and Alberto Zelman (all pupils of Ricci), he composed an opera, *Il lazzarone*, which was produced at the Teatro Mauroner in Trieste on 23 August 1851. During his time in the city he composed a comic opera, *I ciarlatani*, and a mass with orchestral accompaniment which was performed in the cathedral of S Giusto, and also produced operas by Bellini and Donizetti in his role as *maestro concertatore* at one

of the theatres. In about 1852 Berger decided to continue his studies in Leipzig, and took private lessons there with Moritz Hauptmann and Louis Plaidy. In 1855 he returned to London and established himself as a teacher of piano, appearing as soloist in concerts in London and the provinces. He became a friend of Charles Dickens, and composed the music for Dickens's productions of two plays by Wilkie Collins, *The Lighthouse* (1855) and *The Frozen Deep* (1857). In August 1857 *The Frozen Deep* was performed in Manchester with Berger conducting. He married the contralto Annie Lascelles (*d* 1907) in 1864. Between 1868 and 1908 Berger organized unique classes in London for the study of chamber music with piano, known as the 'Après-midi instrumentales'. From 1886 he was on the staff of the RAM and from 1887 he also taught at the GSM. He was a member of the Philharmonic Society from 1871, a member of its directorate (1880–1912) and its honorary secretary (1884–1911).

Berger composed over 100 light piano pieces, and almost the same number of short vocal pieces. His partsong *Night, lovely night* had a considerable vogue, and his *First Steps at the Pianoforte* (1894), published in Novello's series of music primers, was popular as a piano method. He left two books of memoirs, *Reminiscences, Impressions and Anecdotes* (London, 1913) and *97* (London, 1931), which contain many interesting sketches of contemporary musicians personally known to him. He also published a useful book of musical expressions with translations into French, German and Italian (London, 1921).

ROSEMARY WILLIAMSON

**Berger, Ludwig** (*b* Berlin, 18 April 1777; *d* Berlin, 16 Feb 1839). German composer and pianist. The son of an architect, he spent his youth in Templin and Frankfurt, where he studied the flute and piano and composed over 100 pieces, most of them songs. In 1799 he undertook a composition course with Gürrlich in Berlin; a projected course under J.G. Naumann in Dresden two years later was prevented by the latter's death, and Berger composed a cantata in his memory. On his return to Berlin he became friendly with Clementi, with whom he visited Russia in 1804. Berger remained in St Petersburg for eight years, learning much from a close acquaintance with the music of Field. There he also married, but his wife died within a year. In 1812, Napoleon's advancing army forced him to flee to London. The public received his piano playing enthusiastically, but homesickness drew him back to Berlin in 1815 when the Treaty of Versailles had been signed. He lived there until his death, an eminent teacher whose pupils included the young Mendelssohn, as well as Taubert and Henselt, but an increasingly embittered man: his career as a virtuoso had been curtailed in 1817 by a nervous disorder of the arm, and his music never attained the popularity he felt it deserved. In 1819 he founded the Jüngere Berlin Liedertafel with B. Klein, Ludwig Rellstab and G. Reichardt, in opposition to the earlier Berlin Liedertafel of C.F. Zelter.

As a composer Berger made his chief mark as a later exponent of the Berlin Song School, and he published over 160 solo songs. He was the first to set Wilhelm Müller's texts for 'Die schöne Müllerin' in 10 Gesänge op.11, as a participant in Müller's original Liederspiel. His works, extending to 55 opus numbers, also include a piano concerto in C, seven piano sonatas, partsongs, 29 studies (the 12 Etudes op.12 being the best known), a quantity of didactic piano works, variations, marches and rondos, and even unfinished operas. His piano style, especially in the works written between 1800 and 1810, reflects that of Beethoven; the *Sonata-Pathétique* in C minor op.7, for example, not only borrows title and key from Beethoven's op.13, but also adopts his scheme of interpolating its slow Introduzione into the subsequent Allegro. Berger's Sonata op.18, also in C minor, is based entirely on a six-note motif pervading all three movements with an insistence that quickly becomes wearisome; that the experiment was made at all, however, indicates an original mind and a willingness to attempt complex technical problems. In his later works, lyricism supersedes motivic preoccupations, and it is in his capacity as a 'singing' piano composer that his greatest influence on Romantic piano music can be seen: Mendelssohn's *Lieder ohne Worte* stem directly from Berger's Etudes, opp.12 and 22, as a comparison between Berger's op.12 no.11 in G minor and Mendelssohn's op.38 no.2 in C minor confirms.

RICHARD KERSHAW/MICHAEL MUSGRAVE

**Berger, Roland** (*b* Berlin, 16 June 1937). Austrian horn player. The son of Hans Berger, first horn player in the Vienna PO, he studied with Gottfried von Freiberg, whom he was to succeed as the orchestra's principal horn in 1962. He established his reputation leading the horns in Solti's recordings of Wagner's *Ring*; his rendering of the solo horn call in Act 2 of *Siegfried* was recognized as a definitive interpretation. Paradoxically, in Wagner and Bruckner he was to specialize not as first horn but as leader of the Wagner tuba quartet. His playing of the Vienna F horn was marked by great strength, solid warmth and a declamatory exactness; the standard of playing he set on this instrument, which is notably more unpredictable than one of more modern design but whose tonal qualities are unrivalled, has ensured the F horn's survival (at one time under threat) as the instrument of the Vienna PO. Berger retired from the orchestra in 1992 to devote himself to passing on the Vienna horn tradition as professor at the Vienna Hochschule für Musik.

OLIVER BROCKWAY

**Berger, Roman** (*b* Cieszyn, 9 Aug 1930). Slovak composer, writer on music and pianist of Polish birth. During his schooling in Český Těšín he took theory, piano and organ lessons with Jan Gawlas. He entered the Katowice State Higher School of Music in 1949, and from 1952 continued his piano studies under Kafenda and Štefan Németh-Šamorínsky at the Bratislava Academy of Music and Dramatic Art. After a period working as a pianist and

piano teacher, he returned to the Academy in 1961 to study composition with Dezider Kardoš; his graduation piece, *Transformácie* (1965), became one of the most important Slovak works of the 1960s. He then worked as a piano teacher at the Conservatory in Bratislava and as a sound technician for Czechoslovak television; he was a lecturer at the Academy of Music (1969–71), and in 1976 he joined the staff of the Institute of Art History at the Slovak Academy of Sciences. The period of 'normalization' in Czechoslovakia after 1968 barred Berger from suitable employment in the years 1971–6. He remained at the Institute until 1991 when he joined the board of the contemporary music festival Melos-Ethos. In 1988 he was awarded the Herder Prize for his achievements in composition and music theory.

All his early works, without exception, are for piano, and are inspired above all by music of the Second Viennese School, and the ideas of Boulez and Adorno. His student compositions, in particular *Suita v starom slohu* ('Suite in Olden Style') and *Transformácie*, display considerable maturity and individuality. Within the four-movement symphonic structure of the latter piece, Berger tackled the problem of integration as viewed by the avant garde: the issue of strict organization versus random structure, and of rational construction versus intuitive composition. The three solo pieces that followed – *Konvergencie* I–III (1969–75) – seemed to focus on reconstructing the compositional process itself: they feature the audible transformation of a sequence of randomly selected notes. In addition to defining the space between music and non-music, Berger sought to bridge the gap between traditional and avant-garde approaches. In his unpublished theory of modern harmony, 'Logické základy harmonického systému', he sought, following the example of Xenakis, to systematize algebraically the harmonic series, an exercise that had direct bearing on *Memento po smrti Miroslava Filipa* ('Memento on the Death of Miroslav Filip') for orchestra (1973).

During the late 1950s and early 60s Berger also developed an interest in experimental music. One of the earliest exponents of electronic music in Slovakia, he realized a number of scores for radio and film before creating his first independent piece for the medium, *Elégia in memoriam Ján Rúčka* (1969), which was conceived during the heyday of the Experimental Studio at Czechoslovak Radio. His greatest achievement using electronics, however, is *Epitaf pre Mikuláša Kopernika* ('Epitaph for Nicolaus Copernicus', 1972), which combines orchestral sounds with their electronic transformation.

During the period of 'normalization' and beyond, Berger slowly rejected the ideas and principles of the avant garde in favour of a more semantic approach. His organ pieces *Exodus* II and IV ('Finale', 1981–2) represent the culmination of this development on a purely musical level. Another work from this period, *De profundis* for bass voice, piano, cello and live electronics (1980), is a setting of verses which treat of the moral dilemma of 20th-century man who is forced by circumstance to become both executioner and victim. Later works have meditative qualities, and some a harmony that suggests sacredness.

VLADIMÍR GODÁR

**Berger, Theodor** (*b* Traismauer, Lower Austria, 18 May 1905; *d* Vienna, 21 August 1992). Austrian composer. He studied at the Vienna Music Academy (1926–32), where his teachers included Franz Schmidt and Hubert Kessler. Understanding music to be a state of nature or a portrayal of experiences in the natural world, he composed sound pictures linked to clearly defined instrumental ensembles. His melodies developed as the result of the

sounds involved, rather than vice versa. 'Scivolando', for example, the first movement of the *Sinfonia parabolica* (1956), portrays skiing; *Hydromelos* (1965), reproduces sounds heard when diving. Although Berger wrote almost exclusively for the orchestra, his occasional use of the voice (*Frauenstimmen im Orchester*, 1959) was consistent with his emphasis on tone colour. After moving to Berlin during the 1930s, he adopted some of the ideas of the Neue Sachlichkeit, particularly those that accommodated his fondness for motor rhythms ('Sägewerk' and 'Werkstattrhythmen' from *Impressionen*, op.8, 1938). He returned to Vienna in 1939. His music did not receive its greatest exposure, however, until after World War II. Wilhelm Furtwängler and Karl Böhm were among his supporters.

SIGRID WIESMANN

**Berger, Wilhelm (Reinhard)** (*b* Boston, 9 Aug 1861; *d* Jena, 15 Jan 1911). German composer, pianist and conductor. He was taken to Germany at the age of one and grew up in Bremen, his father's native town, where he studied the piano and harmony with Wilhelm Kallmeyer. From 1878 to 1882 he attended the Berlin Hochschule für Musik, studying composition with Friedrich Kiel, the piano with Ernst Rudorff and score-reading with Woldemar Bargiel. As early as 1878 some of his lieder and piano works were published by Praeger and Meier in Bremen. In 1888 he married the singer Isabella Oppenheim and became a teacher at the Klindworth-Scharwenka Conservatory. He made successful appearances as a concert pianist and as the conductor, from 1899, of the Musikalische Gesellschaft in Berlin. In 1903 he became a member of the Berlin Akademie der Künste and succeeded Fritz Steinbach (on Steinbach's own recommendation) as court Kapellmeister at Meiningen. The stimulating activities of that post were troubled, after 1906, by his strained relationship with Duke Georg III. Max Reger became Kapellmeister on Berger's death.

As a composer Berger represents a link between the harmonic language of Brahms and that of Reger. In his day he was known chiefly for his lieder, choral works and piano muisc; he gained recognition for his work in 1898, when his chorus *Meine Göttin* and his String Quintet won prizes and his Symphony no.1 was performed in Meiningen under Steinbach. Some of his chamber music was performed at the Monday Popular Concerts in London in January 1904. His chamber music has recently been revived, but his works for chorus and orchestra, praised by his contemporaries, are forgotten.

R.J. PASCALL/IRMLIND CAPELLE

**Berger, Wilhelm Georg** (*b* Rupea, Braşov district, 4 Dec 1929; *d* Bucharest, 8 March 1993). Romanian composer and musicologist. He studied at the Bucharest Conservatory with Alexandru Rădulescu (viola), Ion Şerfezi (theory and solfège), and Vancea (history); he also took private lessons with Cecilia Niţulescu-Lupu and Anton Adrian Sarvaş (violin) and Benjamin Bernfeld (chamber music). After beginning his career as a violinist in the Enescu PO (1948–58) and the Composers' Union Quartet (1953–6) he turned to musicology and composition. He received national and international prizes for composition, and in 1968 he was elected secretary of the Romanian Composers' Union. As a composer he was quick to acquaint himself with new developments, but his work remained rooted in the Romanian national tradition, with dominant neo-classical and lyrical traits. The symphonies show a

continuing search for variety; their dramatic moments are sometimes pushed to the monumental, as in the Third and the Fifth. His chamber works and concertos alike display virtuoso writing for the violin. Some of his most specifically Romanian music is in the works to texts by Mihai Eminescu. During his later years he embarked on a prolific study of aesthetics and musical form, producing over 20 publications.

VIOREL COSMA

**Bergerette (i)** (Fr.: 'little shepherdess', 'pastoral song'). (1) A kind of song in the 15th century, first found in a text manuscript (*GB-Lbl* Add.15224 (*c*1430)), which gives the heading 'Bergerete chantee' to 13 poems with no apparent common features; the heading 'Bergerette' appears in another manuscript (*F-Pn* fr.2230 and fr.19182) for virelais. Descriptions of the term in several literary treatises of the 15th century show no clear consistency of meaning.

(2) In common parlance the word is often used to denote a virelai setting from the second half of the 15th century, in the erroneous belief that its single-stanza form is not found among virelais of the 14th century. In this sense it is treated as a *forme fixe* (*see* FORMES FIXES); and the word appears to lie at the root of the Italian word BARZELLETTA, which does (in music) denote a *forme fixe*.

DAVID FALLOWS

**Bergerette (ii)** (Fr.: 'little shepherdess', 'pastoral song'). In the 18th century the word, alongside 'bergerie', is given to folksong-like *airs* of a pastoral and amorous nature.

DAVID FALLOWS

**Bergerette (iii)** (Fr.: 'little shepherdess', 'pastoral song'). A shepherd-dance, the title given to four dances in Susato's *Het derde musyck boexken* (Antwerp, 1551); that three of them are in triple time but the other in duple, and that their formal designs have nothing in common, suggests that the title is just a broad characterization.

DAVID FALLOWS

**Berggreen, Andreas Peter** (*b* Copenhagen, 2 March 1801; *d* Copenhagen, 8 Nov 1880). Danish folklorist, teacher and composer. He began composing and playing the flute while still in school. After his matriculation he studied law for a time, but influenced by the composer C.E.F. Weyse he soon dedicated himself to music and attracted attention in 1823 with a cantata for the 200th anniversary of Regensen, the students' college in Copenhagen. Over the next few years he composed several more cantatas as well as incidental music for the Royal Theatre. From 1838 he was organist at the Trinitatis Kirke, and from 1843 singing master at the metropolitan school. He held both posts until his death; they led him to an intensive occupation with church and school singing. He composed a notable set of hymn melodies, many of which are still used in the Danish Church, and edited many collections of partsongs for schools, containing several of his own compositions. He also made an important collection of Danish and foreign folksongs and melodies. In 1858 he was appointed honorary professor and in 1878 granted an honorary doctorate by the University of Copenhagen. From 1859 he was inspector of singing in the Danish schools. Although a self-taught musician, he became a distinguished teacher of music theory; among his pupils were Gade and Peter Heise. Late in life he published his complete songs and some other earlier vocal compositions. He also wrote a biography of Weyse and edited the periodicals *Musikalsk Tidende* and *Heimdal*.

Berggreen's original compositions are strongly indebted to Viennese Classical models. His folkloristic work was bound to the musical point of view of his time: he attempted to arrange folk melodies according to the traditional harmonic system, often at the expense of their original melodic character. Although his collections are thus without the scholarly method one finds in modern research, they have been valuable in stimulating interest in early folk music and for the Scandinavian peoples' consciousness of their musical roots.

SIGURD BERG

**Bergh, Gertrude van den** (bap. Cologne, 21 Jan 1793; *d* The Hague, 10 Sept 1840). Dutch pianist and composer. A child prodigy, she studied the piano with Ferdinand Ries and composition with J.A.F. Burgmüller. Her sonata for piano was published by J.J. Hummel when she was nine years old. By 1813 she had moved to The Hague, where she was especially renowned for her interpretation of Beethoven, and was also one of the earliest 'revivalists' of J.S. Bach's music. She was the first Dutch woman to publish a manual on the fundamentals of music theory, *Principes de musique* (*c*1830). Besides conducting several choirs, she supported herself by teaching members of the Dutch royal family. Her sweetly romantic *Lied für Pianoforte* was probably the earliest 'Song without Words' to be written in the Netherlands. She also composed virtuoso works, such as the *Rondeau pour le pianoforte* op.3 (*c*1820–21). Manuscript works, including her string quartet and preludes and fugues, are lost. In 1830 she was made an honorary member of the Maatschappij tot Bevordering der Toonkunst (Association for the Promotion of Music).

HELEN METZELAAR

**Berghaus, Ruth** (*b* Dresden, 2 July 1927; *d* Berlin, 25 Jan 1996). German director. She studied dance at the Palucca School in Dresden from 1947 to 1950. Her career as a choreographer began in 1964 with the Berliner Ensemble, of which she was later Intendant (1971–7), and she also staged productions of a strongly ideological character at the Deutsche Staatsoper, including a famous *Il barbiere di Siviglia* (in German) that remained in the repertory for 25 years. From 1980 to 1987 she worked under the Gielen-Zehelein regime at the Frankfurt Opera as one of a team of guest directors (which also included Alfred Kirchner, Christof Nel and Hans Neuenfels) who presented a series of challenging, radical stagings that put the house in the front rank of innovation.

In her production of *Die Entführung* (1981) the physical and psychological confinement of the harem was represented by an empty white, box-like set which at critical moments heaved and rolled. The staging was at once richly comic and a powerful theatrical realization of the notion that *Die Entführung* advocates freedom of choice for women as well as for men. Among Berghaus's other productions – which included *Die Zauberflöte* (1980), *The Makropulos Affair* (1982), *Parsifal* (1982) and *Les Troyens* (1983) – that of Wagner's last opera stood out as a bold attempt to address the 'regeneration' ideology that lies behind it. The Grail community was presented as a sinister gang of hoodlums with shaven heads and dark glasses, a depraved society in dire need of redemption. That process was aided by Kundry herself, who ultimately joined the knights in their apparently voluntary self-annihilation – a symbolic enactment of the passing away of the old, corrupt order.

The climax of Berghaus's work at Frankfurt came with her *Ring* (1985–7), a demythologized, deconstructionist production that could similarly be understood as a confrontation with the Wagnerian ethos and legacy. Her repertory of frequently shocking images and bizarre gestures made a subliminal appeal to the imagination; her stage conventions owed something to the theories of Brecht and something to Beckett and the Theatre of the Absurd. Her *Don Giovanni* for the WNO (1984) was similarly notable for its arresting, if enigmatic, images and vibrant symbolism: crucifix-like swords shuddering in the ground fused the phallic with the religious. In a brilliant *coup de théâtre*, the swaddling-clothes caressed by Elvira unravelled to reveal that her baby was but a phantom; they then became a nun's headdress – a telling combination of erotic longing and religious fervour. Ottavio's isolation and frigidity were neatly represented by a snowfall.

Other notable productions include *Lulu* at Brussels, *Tristan* at Hamburg and Schubert's *Fierrabras* in Vienna (all 1988) and *Elektra* at Dresden (1995). Berghaus's surreal acting style, and even specific images, can be traced in the work of the next generation of directors.

BARRY MILLINGTON

**Berghe, Frans van den.** Baptismal name of TIBURTIUS VAN BRUSSEL.

**Bergholz** [Perdeholtz, Perkholtz], **Lucas** (*fl* 1520–51). German composer. In 1539 he matriculated at the University of Wittenberg. Three of his compositions are extant: a Latin motet for six voices and two German psalm motets for four voices (in *D-Dl* 1/D/3 and *Z* 73). His German works follow the tradition established by Thomas Stoltzer, and are distinguished by careful text setting and a fine understanding of imitative techniques. It is likely that Bergholz was acquainted with Sixt Dietrich, who taught music at Wittenberg in 1540, and with Johann

Reusch, a prominent composer and theorist in the Wittenberg circle of Lutheran adherents.

CLEMENT A. MILLER

**Berghout, Phia** [Sophia] (**Rosa**) (*b* Amsterdam, 14 Dec 1909; *d* Doorn, 22 March 1993). Dutch harpist. A student of Rosa Spier at the Royal Conservatory in The Hague, she made her début in 1926. She performed widely as a soloist and in chamber music, and with her help and encouragement many Dutch composers, including Badings, Flothuis and van Delden, wrote solo works for the harp. From 1933 to 1959 she was harpist with the Concertgebouw Orchestra, and after the death of its conductor, Eduard van Beinum, she established a foundation in his name, organizing courses and an international centre for musicians at Huis Queekhoven, Breukelen (1960–74). Particularly notable were the famous harp weeks (jointly led by Maria Korchinska) which eventually led to the establishment of both the World Harp Congress and its triennial international festivals. The first of these was held in 1983 in Maastricht, where Berghout settled after her retirement and continued to teach at the Conservatory.

ANN GRIFFITHS

**Bergier, Nicolas** (*b* Reims, 1 Mar 1567; *d* Reims, Aug 1623). French historian and theorist. He trained in law and was appointed a professor of law and then syndic in Reims, where he was a popular representative. He acquired a lasting reputation as a historian, due to the success of his principal work, *Histoire des grands chemins de l'empire romain* (Paris, 1622). He published other works on diverse subjects and also left a number of important works in manuscript, including the treatise *La musique speculative* (*F-Pn* fr.1359; ed. with Ger. trans. E. Jost, Cologne, 1970), in which he sought to distinguish between poetic and musical rhythm, stressing that musical rhythm had to be flexible in order to accommodate the poetry. His views on certain topics (such as the musical proportions) are similar to those of Salinas. The treatise ends with proposals for assessing the effects of rhythm. For further discussion see P. Vendrix: 'Nicolas Bergier: le dernier théoricien de la Renaissance en France', *'La musique de tous les passetemps le plus beau. . .': hommage à Jean-Michel Vaccaro*, ed. F. Lesure and H. Vanhulst (Paris, 1998), 369–86.

PHILIPPE VENDRIX

**Bergijk, Johannes van.** *See* ORIDRYUS, JOHANNES.

**Bergiron** [Bergiron de Briou], **Nicolas-Antoine,** Seigneur du Fort Michon (*b* Lyons, 12 Dec 1690; *d* Lyons, before 27 April 1768). French composer and co-founder of a concert academy in 18th-century Lyons. The son of Antoine Bergiron (1654–1731), advocate of the Paris Parlement and one of Louis XIV's hunting organizers, he studied classics and law, matriculating at the University of Paris in July 1715. Two years earlier his father lamented his son's 'fatal and violent stubbornness for music', reflected in his collaboration with the scientist J.P. Christin (inventor of the mercury thermometer) in organizing the Académie des Beaux-Arts to give regular concerts of vocal and instrumental music.

His first surviving composition was an entertainment for the Marshal of Villeroy, Governor of Lyons and favourite of Louis XIV and Mme de Maintenon, performed at the Académie in August 1714. The work opens with a typical Lullian overture and intersperses dances (minuets, sarabande etc.) and *symphonies* between the *airs tendres* and *airs guerriers*: Campra's *Les fêtes vénitiennes* (1710) was a clear model, and many passages rework themes by him. Bergiron composed a number of similar divertissements during the next decade, including *La chasse* (1723) based on excerpts from works by Louis Lully, Montéclair, Gervais, the Duke of Orléans, Desmarets, Lacoste, Salomon and Campra. He also attempted opera and was one of a group who early in 1739 attempted to reorganize and restore the Lyons opera to its former glory with a performance of Montéclair's *Jephté*. His reputation as a composer, however, rested mainly on his motets and cantatas, which provided the academy's staple diet throughout his life. Although he ceded the direction of the largely amateur orchestra and choir to Jacques David in 1718, he remained attached to the academy as inspector (*officier du concert*) and succeeded Christin as copyist and librarian after the latter's death in 1757; he was still concert director in 1763–4 and his obituary in the Lyons *Petites affiches* of 27 April 1768 refers to him as 'Examinateur et Censeur des ouvrages destinés au Théâtre'. The leading figure in the academy's activities for over half a century, he won the praises of distinguished visitors, including Bernier and Rameau.

WORKS

Ops: Aréthuse, 1722–3, lost; Pentezilée, 1722–3, *F-LYm*

Divertissements: Impromptu divertissement en musique (Bordes), Lyons, Académie des Beaux-Arts, 1 Aug 1714 [autograph]; Le retour de la paix; Hipermenestre et Lincée; La jalousie; Thétis et Pélée; Les fêtes de l'amour: all *F-LYm*; L'apothéose d'Hercule; La pastorale; La fête marine; Le désespoir; Les vendanges de Neuville, Lyons, 15 April 1722; La chasse (pastiche), Lyons, 10 Feb 1723: all lost

Cants.: Cantates françoises [Les Sirènes, Le supplice de Cupidon, Le songe d'Anacréon, Narcisse, La lire d'Orphée en Astre, Bacchus et l'Amour], 1v, insts (Lyons, 1729); others cited in Vallas (1908), lost

Grands motets: Misericordias Domini, *LYm*; In te Domini speravi, Jubilate Deo, Dies irae, Salvum me fac: all lost

FRANK DOBBINS

**Bergkreyen.** *See* BERGREIHEN.

**Berglund, Paavo (Allan Engelbert)** (*b* Helsinki, 14 April 1929). Finnish conductor. He studied the violin from the age of 11, and joined the Finnish RSO in 1949. Three years later he and several colleagues formed the Helsinki Chamber Orchestra to broaden the scope of musical performance in the city, and he became its first conductor. Soon after, he was appointed assistant conductor of the Finnish RSO, and was its chief conductor, 1962–71. He improved the orchestra's standard, and toured with it to the USSR, Germany and Britain. His début in Britain was with the Bournemouth SO in 1965, conducting Sibelius

centenary concerts; Berglund then became a frequent guest conductor at Bournemouth and, as well as giving the first performances outside Finland of Sibelius's *Kullervo* symphony in Bournemouth and London in 1970, he made the first recording of the work with the Bournemouth SO and Finnish singers. After Silvestri's death, Berglund succeeded him as principal conductor at Bournemouth, 1972–9, becoming, in addition, musical director and principal conductor of the Helsinki PO, 1975–9. Subsequently he was principal conductor of the Royal Stockholm PO, 1987–91, and from 1993 to 1996 was principal conductor of the Royal Danish Orchestra, with whom he recorded an invigorating set of the six Nielsen symphonies. His other recordings include ruggedly impressive series of Sibelius and Shostakovich symphonies. He has written *A Comparative Study of the Printed Score and the Manuscript of the Seventh Symphony of Sibelius* (Helsinki, 1970).

NOËL GOODWIN

**Bergman, Erik (Valdemar)** (*b* Uusikaarlepyy, 24 Nov 1911). Finnish composer. He studied musicology with Ilmari Krohn and literature with Yrjö Hirn at Helsinki University (1931–3) and attended the Helsinki Conservatory (1931–8) as a pupil of Erik Furuhjelm and Bengt Carlson (composition) and Ilmari Hannikainen (piano). In addition, he studied composition with Heinz Tiessen at the Berlin Hochschule für Musik (1937–9, 1942–3) and 12-note techniques with Wladimir Vogel in Ascona (1954). He has taken a particular interest in non-European cultures and religions, especially those of north Africa and the Near East, and has travelled extensively in all continents, listening to traditional music and collecting instruments. Until the mid-1960s he devoted much time to conducting choirs, including that of the Roman Catholic church in Helsinki, the Sällskapet M.M. and the Akademiska Sångförening. From 1945 to 1981 he was a music critic for the Helsinki newspapers *Nya pressen*, *Svenska pressen* and *Hufvudstadsbladet*, and he was professor of composition at the Sibelius Academy (1963–76). His many honours include membership of the Royal Swedish Academy of Music (1961), honorary membership of the Academy of Finland (1982) and honorary doctorates at the Åbo Akademi (1978) and the University of Helsinki (1982).

Bergman's first important compositions date from the later 1940s, when he abandoned the Romantic idiom and was drawn towards neo-classicism; at the same time he was searching for new constructive methods, which gradually led him to serialism. In the early 1950s he became the first Finnish composer to adopt the 12-note method (in *Espressivo*, 1952, and *Three Fantasies*, 1954), used in an increasingly complicated but unorthodox and individual manner. More used as a device to control intervallic 'colour' than as a thematic principle, his 12-note music is comprised of rows that are unusually homogeneous in intervallic content and symmetrical in structure. Permutation technique is used, but in such a way that the original form is not greatly altered; the unifying factor is the intervallic colour even when new melodic and harmonic ideas are unfolded. In some works, such as *Aubade* (1958), the rhythm is controlled by serial principles, and occasionally this extends to the dynamics (*Simbolo*, 1960). Polyrhythm, variable metre and simultaneous use of different tempi also contribute to the rhythmic elasticity of his works during this period.

At the end of the 1960s Bergman abandoned strict serial procedures for a freer technique involving elements of improvisation and aleatory writing within oscillating tone-fields but retaining a strict control over form. This approach, as shown in, for example, *Colori ed improvvisazioni*, is reminiscent of Lutosławski's 'aleatory counterpoint'. A straight line of development runs from the 'neo-Impressionist' *Aubade* to the even richer yet more delicate scoring of *Colori ed improvvisazioni*. Bergman's main interest since the 1980s has been the more dramatic orchestral concerto. The period is also characterized by chamber music for various combinations of instruments.

Choral works occupy a central position in Bergman's output. His considerable experience of choral conducting has given him an extremely versatile technique in writing for voices. The melody is usually wide-ranging and he often employs various forms of Sprechgesang and speech (*Galgenlieder*, 1959–60), either for a whole piece or as a contrast with sung material, as well as other vocal techniques such as glissandos and microtones (*Lapponia*, 1975). In some works, for example *Bardo Thödol*, a continuum between instrumental and vocal sounds is created. Bergman's choice of texts includes classical and modern poetry in various languages, religious texts of different cultures and even meaningless phonetic elements.

WORKS

(*selective list*)

Opera: Det sjungande trädet [The Singing Tree] (2, B. Carpelan), op.110, 1988; Helsinki, 3 Sep 1995

VOCAL

Choral with orch/insts: Rubaiyat (O. Khayyam), op.41, Bar, male vv, orch, 1953; Aton (Ikhnaton), op.49, Bar, spkr, SATB, orch, 1959; Nox (S. Quasimodo, J. Arp, P. Eluard, T.S. Eliot), op.65, Bar, SATB, fl, eng hn, perc, 1970; Missa in honorem Sancti Henrici, op.68, S, A, T, B, SATB, org, 1971; Hathor-Suite (Ancient Egyptian, Ger. trans. S. Schott), op.70, S, Bar, SATB, fl, eng hn, hp, perc, 1971; Bardo Thödol (Tibetan Book of the Dead, trans. L. Govinda), op.74, spkr, Mez, Bar, SATB, orch, 1974; Noa (Heb. texts), op.78, Bar, SATB, orch, 1976; Preisungen (Old Testament), op.135, S, Bar, SATB, orch, 1996; Yö [The Night] (textless), op.139, a fl, Ct, male vv (1997)

Choral unacc.: 3 Galgenlieder (C. Morgenstern), op.51a, Bar, 2 spkrs, male vv, 1959; 4 Galgenlieder (Morgenstern), op.51b, 3 spkrs, SATB, 1960; Springtime (S. von Schoultz), op.60, Bar, SATB, 1966; Lapponia (textless), op.76, Mez, Bar, SATB, 1975; Tipitaka Suite (S. Nipáta, Pali, Swed. texts), op.93, Bar, male vv, 1980; Petrarca Suite (F.P. Petrarch), op.118, Bar, SATB, 1991; Tapiolassa [In Tapiola] (Kalevala), op.121, 2 S, A, girls' vv, 1992; Hommage à Béla Bartók (textless), op.132, SATB, 1995

Solo vocal (with insts): Triumf att finnas till [Triumph of Being There] (E. Södergran), op.87, S, fl, perc, 1978; Lament and Incantation (textless), op.106, S, vc, 1984; Die Blume (textless), op.115, Mez, perc, 1990; Den heliga oron [The Holy Restlessness] (von Schoultz), op.127, Mez, str qt, 1994; Ögonblicket [The Twinkling of an Eye] (von Schoultz), op.128, 1v, pf (1994); Aggadot (Heb. texts), op.129, 4 solo vv, fl, cl, bn, perc, 1994

INSTRUMENTAL

Orch: Aubade, op.48, 1958; Simbolo, op.52, 1960; Circulus, op.58, 1965; Colori ed improvvisazioni, op.72, 1973; Dualis, op.86, vc, orch, 1978; Birds in the Morning, op.89, fl, orch, 1979; Arctica, op.90, 1979; Cl. Conc., op.94, 1981; Ananke, op.97, 1982; Vn Conc., op.99, 1982; Tutti e soli, op.113, chbr orch, 1989; Poseidon, op.122, 1992; Musica marina, op.125, str, 1994; The Maestro and his Orchestra, op.136, vn, orch, 1996; Cadenza, op.137, ob, orch, 1996; Conc., op.140, chbr orch, 1997

Chbr: 3 Fantasies, op.42, cl, pf, 1954; Concertino da camera, op.53, fl, cl, b cl, perc, pf, vn, va, vc, 1961; Solfatara, op.81, a sax, perc, 1977; Dialogue, op.82, fl, gui, 1977; Silence and Eruptions, op.91,

fl, ob, cl, bn, perc, pf, str qt, 1979; Janus, op.92, vn, gui, 1980; Mipejupa, op.96, fl, a sax, gui, perc, 1981; Str Qt, op.98, 1982; Borealis, op.101, 2 pf, perc, 1983; Quo vadis, op.102, vc, pf, 1983; etwas rascher, op.108, sax qt, 1985; Karanssi, op.114, cl, vc, 1990; Mana, op.117, cl, vn, vc, pf, 1991; Quint-essence, op.123, sax qt, perc, 1993; Attention!, op.124, perc (5 players), 1993; Now, op.126, va, pf, 1994; Una Fantasia, op.130, str qt, pf, 1994; Musica concertante, op.138, str qt, 1997

Solo inst: Sonatina, op.36, pf, 1950; Espressivo, op.40, pf, 1952; Aspekter, op.63, 1969; Energien, op.66, hpd, 1970; A propos de B–A–C–H, op.79, pf, 1976; Midnight, op.83, gui, 1977; Omaggio a Cristoforo Colombo, op.119, 1991

ILKKA ORAMO

**Bergmann, Carl** (*b* Ebersbach, 12 April 1821; *d* New York, 16 Aug 1876). American conductor and cellist of German origin. He studied with Zimmermann at Zittau and Hesse at Breslau. Involved in the German Revolution of 1848, he emigrated to New York in 1849, having had orchestral experience in Breslau, Vienna, Pest, Warsaw and Venice. He joined the Germania Musical Society, serving for a time as cellist, then as conductor until 1854. In 1852–4 he also conducted the concerts of the Boston Handel and Haydn Society. When the Germania Society disbanded in 1854, he settled in New York, becoming conductor of the Männergesangverein Arion, cellist of the Thomas chamber ensemble and, in 1855, conductor (alternating with Eisfeld) of the New York Philharmonic Society orchestra. His surprising success in performances of the radical new music of Wagner (the overture to *Tannhäuser* on 21 April 1855, and other works later in the spring) led to his being appointed sole conductor for the 1855–6 and 1858–9 seasons of the Philharmonic. He then shared the conductorship with Eisfeld until the latter's retirement in 1865, after which he retained the post alone until failing health compelled his resignation in March 1876. He was also conductor for several years of the Brooklyn Philharmonic Society orchestra. One of his most noteworthy performances was that of *Tannhäuser* on 4 April 1859 at the New York Stadt Theater: it was the first hearing in America of a complete Wagner opera.

Among Bergmann's boldest New York ventures was a series of 11 concerts given in 1856 not by the Philharmonic but by his own smaller orchestra and including the American premières of Schumann's Fourth Symphony and Berlioz's overture *Le carnaval romain*; but it was Wagner whom Bergmann championed above all, conducting, besides the 1859 *Tannhäuser*, the first known American Wagner performance (1852) and the first all-Wagner concert in the USA (1853).

H. WILEY HITCHCOCK, JOSEPH HOROWITZ

**Bergmann, Walter (Georg)** (*b* Altona-Ottmarschen, 24 Sept 1902; *d* London, 13 Jan 1988). British editor and harpsichordist of German birth. He studied the piano and the flute at the Leipzig Conservatory, but turned from a musical career to the study of law, which he pursued at Halle and Freiburg. He qualified in 1930 and set up his own practice in 1933, often acting on behalf of Jews. In 1938 he was arrested by the Gestapo and imprisoned for three months; shortly after his release he emigrated to London. After internment on the Isle of Man Bergmann worked at Schott as a packer, eventually becoming their most distinguished editor. He brought much hitherto unknown Baroque music into the repertory, especially that of Telemann, for whom he had a special affinity. His many editions include recorder sonatas by Handel, Francesco Barsanti, Francis Dieupart and (with Frans Brüggen) J.C. Schickhardt, and music by Blow and Purcell. Associated with Tippett at Morley College in London in the 1940s, he later taught at the Mary Ward Settlement which stimulated his flair for working with children and amateurs. He also appeared frequently at Alfred Deller's Stour Festival. As harpsichordist he performed with Ilse Wolf, April Cantelo and many other artists, and accompanied Deller in several recordings of Purcell's music. Endowed with a rare generosity of spirit, he encouraged recorder players, such as Brüggen and Michala Petri, and young scholars, notably David Lasocki. He also composed two sonatas for recorder.

J.M. THOMSON

**Bergmans, Paul (Jean Etienne Charles Marie)** (*b* Ghent, 23 Jan 1868; *d* Ghent, 14 Nov 1935). Belgian musicologist and librarian. As a university student at Ghent, Bergmans attended piano and violin classes at Ghent Conservatory and had private lessons in music theory from Hendrik Waelput. In 1885, while still at university, he began to

write music criticism for *Flandre libérale* and continued to do so until his death. In 1892 he took a post as assistant librarian at Ghent University, where he remained for the rest of his professional life. He became principal librarian there in 1919 and in the same year accepted the chair of musicology at Ghent, the first to be established at a Belgian university. In the following year he became a member of the Académie Royale de Belgique. Bergmans was interested in all branches of history, not merely that of music, and with his training as a historian and librarian, had an exact and painstaking cast of mind. Throughout most of his life he played an important part in the commission for the *Biographie nationale de Belgique*, serving from 1889 as assistant secretary and from 1919 as secretary, and contributing numerous articles on musicians.

MALCOLM TURNER

**Bergna, Antonio** (*fl* probably at Ferrara, *c*1582–1587). Italian composer. He is mentioned among the musicians of Duke Alfonso II of Ferrara by Lazzari, Della Corte and Newcomb, on the basis of a single payment register which can be dated after 1582. His connections with Ferrara are supported by the fact that his only known work, *Ad vesperas omnes salmi falso bordonis concinendi* (Ferrara, 1587), for five voices, was published by Vittorio Baldini, the ducal printer.

IAIN FENLON

**Bergonzi.** Italian family of instrument makers, primarily luthiers. They were active in Cremona in the 18th and 19th centuries.

**(1) Carlo Bergonzi (i)** (*b* Cremona, bap. 21 Dec 1683; *d* Cremona, 9 Feb 1747). The first of three generations of the family who made violins, he was one of the greatest Cremonese masters, overshadowed only by his contemporaries Antonio Stradivari and Giuseppe Guarneri 'del Gesù'. The question of his early training has been a matter of speculation for two centuries. He was not born into a musical or artisan family: his father Michele was a successful flour miller and his mother, widowed in 1697, became an innkeeper. Early writers, including Count Cozio di Salabue, who had dealings with the Stradivari family, believed that Carlo Bergonzi was a pupil or assistant of one or more of the Stradivaris. However, more recent opinion has favoured Giuseppe Guarneri 'filius Andreae' as Bergonzi's possible teacher, though there is much evidence to suggest that Vincenzo Rugeri was his mentor during the early years of the 18th century. Whichever the case, Bergonzi had relationships with all three of these important families at different points in his life.

Carlo Bergonzi may have worked alone as early as 1720, but almost certainly not before. The fact that he began to label his own instruments comparatively late in life, towards 1730, is probably a reflection of his subordinate role in other workshops. His early violins are characterized by a delicacy of detail not found in the work of the Guarneris. This is particularly true of his scrolls, carved cleanly and with a symmetry that few violin makers have achieved. The form of his soundholes is influenced by Stradivari, while the waist of the soundbox is narrow and the upper corners project out squarely in Guarneri fashion. His finest instruments date from 1730 to 1740. Their character remains the same but the details gain in strength: the archings are broader and flatter, the soundholes more pointed, and the treatment of the edges heavier, at times massive. Made from unusually handsome wood and covered with a rich varnish, his violins stand

*Violin by Carlo Bergonzi, Cremona, 1740 (private collection)*

both tonally and visually almost unsurpassed. The very last violins are less inspired: his eldest son Michele Angelo was doubtless taking a greater part in their construction. In the 19th century, many of Matteo Goffriller's cellos were wrongly attributed to Carlo Bergonzi.

In 1745 Carlo Bergonzi and his family took up residence in the Casa Stradivari; this suggests that the Bergonzis had a close working relationship with the heirs of Antonio Stradivari, who were the owners of a considerable patrimony of instruments. Carlo's second son Zosimo (*b* 18 Nov 1724; *d* after 1773) is listed as a maker in many dictionaries but no instruments can be definitely attributed to him. Zosimo's second son Carlo (ii) (*b* Cremona, 29 Jan 1757; *d* Cremona, 12 March 1836), the last of the Bergonzi craftsmen, made a small number of violins and guitars.

(2) **Michele Angelo Bergonzi** (*b* Cremona, 29 Sept 1721; *d* Cremona, 24 June 1758). Son of (1) Carlo Bergonzi (i). Although he in no way equalled his father, he was a very good maker in his own right, and historically an important one. Still under the age of 25 when his father died, he remained a tenant in the former Stradivari house and workshop until his premature death. From 1747, the sole hope for the continuation of the Cremonese violin-making tradition rested on Michele's shoulders, for the previous decade had seen the demise of all the makers in the Stradivari and Guarneri families. Unfortunately he either failed to inherit, or chose to abandon, the varnish used by his predecessors, and the great secret was lost. Nevertheless his instruments are solidly crafted on the prototypes of his father, if at times less refined in the finer points of workmanship. His violins make good instruments for solo playing; his rare cellos are patterned after the smallest Stradivari form. A few mandolins are also known.

(3) **Nicola Bergonzi** (*b* 19 Feb 1754; *d* 23 Feb 1832). Grandson of (1) Carlo Bergonzi (i) and eldest son of Zosimo Bergonzi. He began making instruments in the late 1770s, shortly after his contemporary Lorenzo Storioni, to whom he can be compared in many respects. During the period 1787 to 1794, Nicola and Storioni lived and worked in very close proximity on Cremona's Contrada Coltellai, which may in part explain a certain resemblance in the choice of materials in their work. Nicola, however, was much less productive than Storioni and in 1804 he officially changed his profession to that of cloth merchant, though he had ceased making instruments a few years earlier. His violins, violas and double basses, which date from approximately 1777 to 1798, are well designed and of a flat model, sometimes covered in an attractive orange varnish. Nicola and two of his sons were amateur players of the *corno di caccia*.

(4) **Benedetto Bergonzi** (*b* Cremona, 8 Feb 1790; *d* Cremona, 30 Sept 1839). Horn player and composer. Son of (3) Nicola Bergonzi. He designed mechanical improvements to the *corno di caccia* which were recognized by the Royal Institute of Milan in 1824. Benedetto was apparently the source of some of the historical anecdotes on the great Cremonese violin makers published by Fétis in the 19th century.

CHARLES BEARE/DUANE ROSENGARD

**Bergonzi, Carlo (ii)** (*b* Vidalenzo, nr Cremona, 13 July 1924). Italian tenor. He studied at the Parma Conservatory, making his début as a baritone at Lecce in 1948 as Rossini's Figaro. After studying the tenor repertory he made a second début as Chénier at Bari in 1951. That year he was engaged by Italian radio to take part in performances to mark the 50th anniversary of Verdi's death. He first sang at La Scala in 1953, creating the title role of Napoli's *Mas'Aniello*, and appeared there for the next 20 years. He made his London début at the Stoll Theatre in 1953 as Don Alvaro, the role in which he first appeared at Covent Garden (1962); he returned as Manrico, Riccardo, Radames, Cavaradossi, Nemorino, Rodolfo (*Luisa Miller*) and Edgardo. He gave farewell recitals at Covent Garden (1992) and Carnegie Hall (1994), but continued to give occasional concerts in Italy. He made his American début in Chicago in 1955 in a double bill as Luigi (*Il tabarro*) and Turiddu, and sang regularly at the Metropolitan from 1956 for 30 years, making his last appearance there in 1988 as Rodolfo (*Luisa Miller*). In addition to the Verdi tenor repertory Bergonzi sang more than 40 roles, including Pollione, Enzo, Boito's Faust and Canio. His voice was of beautiful quality, well modulated and well defined; he used it with taste, discretion and an elegant sense of line. These qualities can be heard in his many recordings, most notably of Verdi. He continued to give recitals well into his 70s.

HAROLD ROSENTHAL/ALAN BLYTH

**Bergreihen** [Bergreyen, Bergkreyen] (Ger.). German popular songs, mainly of the 16th and 17th centuries, about various secular and sacred subjects. The term was originally used for dance-songs from the Erzgebirge in Saxony. The songs are strophic, and many were sung at mountain festivals, usually with instrumental accompaniment. The vogue for them began with W. Meierpeck's *Etliche Bergkreien geistlich und weltlich* (Zwickau, 1531) and continued into the 18th century, when the term was replaced by *Berglieder*. Only two printed collections of *Bergreihen* contain music. One, Erasmus Rotenbucher's *Bergkreyen* (Nuremberg, 1551), contains mostly sacred songs (possibly contrafacta of secular pieces), all for two voices. The other, Melchior Franck's *Musicalischer Bergkreyen* (Nuremberg, 1602), consists of four-part, primarily homophonic secular songs mostly in bar form; they begin with the tenor voice alone and include a few melismas, usually on the penultimate syllable of a verse, which may be only suggestions for improvised ornaments. For an edition, see G. Heilfurth and others, eds.: *Bergreihen, eine Liedersammlung des 16. Jahrhunderts*

(Tübingen, 1959). The rubric 'in the manner of *Bergkreyen*' occurs in the chorales of both Johann Walter and Caspar Othmayr and indicates the free, simple style of folksong. Many published collections of *Bergreihen* lack music, probably because it was meant to be improvised.

JOHN H. BARON

**Bergsagel, John D(agfinn)** (*b* Outlook, SK, 19 April 1928). Canadian musicologist of Norwegian descent, naturalized Danish in 1984. After graduating at the University of Manitoba in 1949, he studied musicology under Grout at Cornell (1950–53), then composition with Howard Ferguson at the RAM. He was assistant professor of musicology at the University of Ohio from 1955 until 1959, when he was elected Senior Arts Fellow of the Canada Council. With this award he went to Oxford to carry out research on early Tudor church music, working especially on the unpublished mass cycles of that period and the music of Nicholas Ludford. From 1962 he also undertook teaching duties at Oxford, and in 1966 was appointed to a lectureship at New College. The following year, however, he moved to the University of Manchester as lecturer (later senior lecturer) in the history of music; in 1970 he left England to teach at the University of Copenhagen, where in 1981 he became professor of musicology. From 1961 to 1973 he was the executive editor of the Early English Church Music series, in which capacity he supervised the production of the first 16 volumes, contributing two of them himself; thereafter he remained a member of the editorial committee until 1985. In 1993 he was appointed chairman of the editorial committee for the collected edition Monumenta Musicae Byzantinae, becoming director of the series in 1996. His research has been concerned with many aspects of English music, but has focussed increasingly on that of the Middle Ages and Renaissance. He has also developed an interest in Scandinavian music.

PAUL DOE

**Bergsma, William (Laurence)** (*b* Oakland, CA, 1 April 1921; *d* Seattle, WA, 18 March 1994). American composer. He studied at Stanford University (1938–40) and at the Eastman School (1940–44, BA, MA), where his principal composition teachers were Howard Hanson and Bernard Rogers. After teaching composition at the Juilliard School (1946–63) he joined the school of music at the University of Washington, Seattle, where he later became professor emeritus. He received numerous awards including two Guggenheim fellowships (1946, 1951), an NEA fellowship (1976) and the American Academy of Arts and Letters Award (1965).

When other 20th-century composers were abandoning tonality in favour of serialism, Bergsma remained unwaveringly conservative in his compositional style. This conservatism should not be mistaken for conventionality, however, for he was very successful in blending several styles into a highly individual compositional language. Predominately lyrical in nature, his music is resourceful and imaginative, employing long lines and transparent textures. His instrumental music (e.g. the *Concerto for Wind Quintet*, 1958) successfully infuses traditional formal frameworks with a clearly 20th-century use of melody, harmony, rhythm and metre. The early string quartets demonstrate the composer's skill as a contrapuntist. His two operas, *The Wife of Martin Guerre* (1956) and *The Murder of Comrade Sharik* (1973), deal with realistic issues and provide vivid social commentary. In later works, Bergsma explored elements of avant-garde compositional style, including aleatory techniques and a more dissonant harmonic language.

JAMES P. CASSARO (text, bibliography), KURT STONE (work-list)

**Bergson** [Bergsohn], **Michał** [Michel] (*b* Warsaw, 20 May 1820; *d* London, 9 March 1898). Polish pianist and composer. He took his first music lessons in Warsaw, later studying composition with F. Schneider in Dessau and with K.F. Rungenhagen and W. Taubert in Berlin. In 1840 he went to Paris, where he continued his piano studies. He spent the years 1846–50 in Florence, Bologna and Rome, and from 1850 to 1853 he was in Vienna, Berlin and Leipzig. He then settled in Paris, performing as a pianist at numerous concerts. In 1863 he was appointed professor at the Geneva Conservatoire, and later became its director. Late in life he moved to London and taught there privately until his death.

Bergson's works adhere strictly to the conventions of the period, particularly his pieces intended for domestic performance. These generally make few demands on the players and place great emphasis on cantabile melodic lines. Sometimes Bergson gave his pieces programmatic titles (e.g. *Un orage dans les lagunes*). Many of the piano pieces are in the style and forms of Chopin (e.g. *Impromptu Mazourka* op.35). Some works show the influence of national musical traditions, for example *I zingari: grand caprice hongrois* op.42 and *La tatamaque: danse havanaise*op.51. A large proportion of his work consists of pedagogical works (e.g. *12 nouvelles études caractéristiques* op.60 and *École nouvelle du mécanisme* op.65), operatic paraphrases and fantasias, and the popularity of his own music is attested by the number of arrangements that were made of it. He composed three operas: *Luisa di Montfort* was performed in 1847 in Livorno, Florence and elsewhere in Italy, and in 1849 in Hamburg; *Salvator Rosa* was not staged, but parts of a one-act operetta *Qui va à la chasse perd sa place* were given in Paris in 1859.

WORKS

JERZY MORAWSKI

**Bergt, (Christian Gottlob) August** (*b* Oederan, Saxony, 17 June 1771; *d* Bautzen, 10 Feb 1837). German composer. After studying various instruments with his father, he went first to the Dresden Kreuzschule and then to Leipzig as a theology student, continuing his music education especially with organ and composition. While acting as a family tutor he began composing, developed his organ playing and eventually in 1802 took up a full-time music post as organist of St Petri, Bautzen, where he was to remain all his life. In Bautzen he also taught, and founded a teachers' seminar and a Singverein. His *Briefwechsel eines alten und jungen Schulmeisters* (ed. C.G. Hering, Zittau and Leipzig, 1838) cast in the fashionable form of an exchange of letters, was a popular practical handbook for students and young church musicians; it includes a biography and list of works. As a member of the Dresden Liederkreis, he knew many of the city's poets and musicians, including Weber, who admired him. E.T.A. Hoffmann praised his Passion oratorio *Christus durch Leiden verherrlicht* in the *Allgemeine musikalische Zeitung*. Bergt wrote a large quantity of church music, including oratorios and cantatas, and Singspiels (including two settings of Goethe), instrumental music, chamber music and choruses. His sacred works in particular were at one time very popular in Germany and were also performed abroad.

JOHN WARRACK

**Bergwald, Victor von.** *See* MONTBUISSON, VICTOR DE.

**Beria, Giovanni Battista** (*b c*1610; *d c*1671). Italian composer, teacher and organist. With Ignazio Donati and others Beria was one of the Milanese school of early Baroque composers. He was organist at S Pietro, Lodi Vecchio near Milan in 1638; from 1647 to 1650 he was *maestro di cappella* and organist at S Lorenzo, Mortara, and from 1651 to 1671 first organist of Novara Cathedral. Nothing further is known of his life, but several testimonial poems in his publication of 1647 indicate that he had a significant reputation in northern Italy in the first half of the 17th century.

Beria's known music is entirely sacred and is typical of Italian church music of the period; many of his motets are for two voices deployed in dialogue fashion. He set both liturgical and paraliturgical texts, and, in the latter especially, used various standard expressive devices with good effect. (C. Sartori: *La cappella musicale del duomo di Milano: catalogo delle musiche dell'archivio*, Milan, 1957)

JOSEPHA KENNEDY

**Berigan, Bunny** [Roland Bernard] (*b* Hilbert, WI, 2 Nov 1908; *d* New York, 2 June 1942). American jazz trumpeter and bandleader. He began playing in local groups while a teenager, and in the early 1930s moved to New York as a freelance musician and sometime member of such important bands as those led by Hal Kemp, Paul Whiteman, the Dorsey Brothers, Benny Goodman and Tommy Dorsey. In 1933 he made a number of recordings under his own name, and from 1937 led his own successful big band. He rejoined Dorsey for a few months in 1940, then briefly led his own group until his death. Berigan and Bix Beiderbecke are often compared for the similarities of their lives and musical conceptions. As did many white trumpeters of his generation, Berigan showed the influence of Louis Armstrong in the variety of his timbre and attack, his wide range and his use of chromatic pitches. He showed too the influence of Beiderbecke in his use of 'ghost' notes, lengthy concentrations of quavers played with bell-like attack, and melodic lines that encompass more than one contrapuntal part. Berigan integrated these elements and a fine harmonic sense into a distinctive, uninhibited style, heard to advantage on Tommy Dorsey's recording of *Marie* (1937, Vic.).

JAMES DAPOGNY/R

**Berimbau** [*berimbau de barriga*, *urucungu*, *rucumba*]. A Brazilian MUSICAL BOW of African origin, with a single wire string and sometimes a gourd resonator. Despite its origin, in the north and north-east it takes a Portuguese name, the *berimbau* or *berimbau de barriga* (jew's harp of the belly), while it is called *urucungu* in the south. The *berimbau* is the principal accompanying instrument for Bahian *capoeira*, a stylized martial art of the region. A richly creolized product of the black world with several prototypes on both sides of the Atlantic, those in Brazil include several related to Kongo/Angolan bows. The most important found during the colonial period were the Luandan *hungu* and the *embulumbumba* of south-western Angola, brought as part of the slave trade.

The player holds a stick and a small wicker basket rattle, called *caxixi* in Bahia, in his right hand and percusses the string with the stick (see illustration). In his left hand he holds the bow and occasionally applies a metal coin to the string; the coin serves as a bridge, giving a second fundamental pitch perhaps a semi-tone or a whole tone above that produced from the open string. It is often played held against a naked body, specifically in *capoeira*, as the body serves as a resonating chamber, the gourd resonator actively manipulated against the stomach to shade the timbres of the instrument. According to Graham, 'pitch change occurs when the space between the gourd's opening and the player's stomach is altered, isolating select harmonies of the string's frequency swing. The performer's stomach operates in the same way as a trombone mute, its lesser resonating capacity being only secondary in importance' (p.4). By striking the bow's string at different heights, subtle variation in both pitch and timbre are obtained. The *caxixi* usually accompanies the strokes of the stick. The African mouthbow was adopted by Brazilian Amerindian tribes with, for example, the Angolan friction bow mouthbow *umgunga* reappearing in Brazil as an 'Indian' bow called *umcunga*. It is often played in ensemble context. For further information see R. Graham: 'Technology and Cultural Change', *LAMR*, xxii/1 (1991), 1–20.

*Berimbau (musical bow) with caxixi (small basket rattle), played by Nana Vasconcelos*

JOHN M. SCHECHTER/R

**Beringen.** French firm of printers. It was founded by Godefroy Beringen (*b* Germany, *fl* 1538–59; *d* ?Lyons), who was active in Lyons as a humanist; several Lyons intellectuals, including Etienne Dolet in 1538, addressed Latin verses to him. He began to print books in 1544. In

1545 he formed an association with his brother Marcellin Beringen which lasted until the latter's death in 1556. The Beringen brothers did not publish many titles but frequently reprinted those that were successful. Law, medicine, alchemy and the Roman classics dominated their production. They were in contact with Geneva through the poet Guillaume Guéroult and the musician Loys Bourgeois, and probably began printing music under their influence. Between 1547 and 1552 they issued a number of important music books, thus becoming the first music printers in Lyons to challenge the monopoly of Jacques Moderne. The Beringens were the first French music publishers to concentrate on issuing single-composer collections. The *Premier livre des chansons spirituelles* (1548) contained the first printing of Didier Lupi Second's four-voice setting of Guéroult's *Susanne un jour*, the tenor part of which was to be the source for about 40 different musical settings in the late 16th century. In September 1556, after Marcellin's death, Godefroy was forced to sell everything, including his six presses, to pay his debts. Nevertheless, two other books appeared under his name, in 1554 and 1559. The inventory for the sale in 1556 lists three sets of music type: 'noctes grandes d'Allemaigne', 'noctes petites gloses d'Allemaigne' and 'nocte de Louain à longue queue'. These music types were already used by German music printers, and the last by Phalèse in Leuven.

Unlike Moderne and the large Parisian music printers, the Beringens printed no anthologies but confined themselves mainly to separate publications of French psalms and chansons by three composers – Loys Bourgeois, Dominique Phinot and Didier Lupi Second. The repertory has a Protestant bias, and it may have been the Beringens' Protestant sympathies that caused Bourgeois to apply to them instead of to Moderne to print his psalms in 1547. There are 12 known books of polyphonic music and two psalters by Beringen.

**Beringer, Maternus** (*b* Weissenburg in Bayern, bap. 17 March 1580; *d* ?Neudorf, nr Pappenheim, after Aug 1632). German writer on music, schoolmaster and clergyman. He probably attended the Latin school in Weissenburg and may have been at a university for some time before he was appointed school clerk at Weissenburg in 1600. In 1601 he became Kantor and immediately afterwards took holy orders. Two petitions he submitted in 1605 and 1606 give evidence of the state of music in Weissenburg and of Beringer's own conditions. In the first document, he stressed the importance of music as a God-given remedy for troubled souls and as a symbol of unanimity. His main concern, however, was the deplorable state of church music at Weissenburg: the only bass singer had moved away and parents were withdrawing their sons from the school in order that they might learn more profitable trades. To secure the further performance of polyphonic music at feast days, he urged the mayor and council to employ a trombone player and a cornettist to support the few remaining singers. In the second petition he complained about his meagre income which, he feared, was to be further reduced at the appointment of another schoolmaster. His situation appears not to have improved, and in 1610 he left Weissenburg to take over a deaconry at Pappenheim and later worked as pastor at several villages within the county of Pappenheim. He probably eventually settled at Neudorf, and is last mentioned at Nördlingen on the occasion of his second marriage in September 1632.

Beringer published a short treatise, *Musica, das ist die Singkunst, der lieben Jugend zum besten in Frag und Antwort verfasset* (Nuremberg, 1605), in dialogue form to be used for elementary music education at school. Following Heinrich Faber and Johann Magirus (*Artis musicae*, Frankfurt, 1596), he dealt with fundamentals like note values, solmization syllables, letter notation, metre, proportion and the hexachord system. The second edition (*Musicae, das ist der Freyen lieblichen Singkunst erster und anderer Theil*, Nuremberg, 1610/*R*) included a second part on harmony and composition based chiefly on Magirus, whose systematization of the modes he took over, arranging them according to the position of the semitone. The music examples, mainly by Lassus rather than the Josquin generation, reveal a thorough knowledge of the contemporary motet repertory. The musical appendix consists of two- and three-part canons of increasing difficulty and 23 bicinia by Lassus, which are mostly excerpts from motets and *Magnificat* settings.

DOROTHEA SCHRÖDER

**Beringer, Oscar** (*b* Furtwangen, Baden, 14 July 1844; *d* London, 21 Feb 1922). English pianist, composer and teacher of German birth. His father was a political refugee who fled with his family to London in 1849. Having studied the piano with an elder sister, he performed during 1859–60 at the Crystal Palace and in 1861 made his first appearance at the Saturday Concerts. He studied from 1864 to 1866 under Moscheles, Richter, Reinecke, David and Plaidy at Leipzig, and then under Tausig, Ehlert and Weitzmann at Berlin. In 1869 he was appointed professor at Tausig's Schule des höheren Clavierspiels at Berlin, but in 1871 he returned to a concert life in England. After visiting Leipzig again in 1872 he founded in London in 1873 the Academy for the Higher Development of Pianoforte Playing, which was very successful until its closing in January 1897. In 1882 he gave the first English performance of Brahms's second concerto. He became a professor at the RAM in 1885. His compositions include an Andante and Allegro for piano and orchestra, other piano pieces and songs. He also wrote a set of *Daily Technical Exercises* (London, 1887, rev. 2/1915) and a *Pianoforte Tutor* (London, 1902), and produced several editions of piano classics.

WILLIAM BARCLAY SQUIRE/R.J. PASCALL

**Berinsky, Sergey Samuilovich** (*b* Novïye Kushanï, Moldova, 14 April 1946; *d* Moscow, 12 March, 1998). Russian composer. He graduated from the Gnesin Pedagogical Institute where he studied composition with Chugayev (1975). He became a member of the Union of Composers in 1979, was made an Honoured Representative of the Arts of Russia (1996) and was the founder of the Sergey Berinsky Music Club (1986). In 1990 he became an editor for the journal *Muzïkal'naya akademiya*. Berinsky wrote in a wide range of genres; his early works bring to mind the stylistic and aesthetic features of Romanticism (discord, sudden emotional swings, a tendency towards soliloquising and confession), while in the Sonata for viola and piano he turned to the forms and genres of the Baroque which may account for the peculiar compositional logic of this work in which improvisatory principles and spontaneity of expression are subordinated to sober calculation. He later came close to the aesthetics of Expressionism (the Second Quartet is dedicated to the memory of Janusz Korczak). Characteristic of the large-scale works of this and other periods is the juxtaposition of the tragic and the grotesque with intellectual concentration, contemplation and absorption in pastoral visions alongside philosophical generalities and subjective lyrical monologue. The symphonic principles behind his works is combined with features of the music drama; correspondingly, the attention is focussed on story, dramatic intrigue, and substance of the plot in the spirit of Mahler, Shostakovich and Schnittke.

Berinsky frequently resorted to potent *lexema* which conjure up momentary associations in the listener's mind; he drew on sound metaphors which have a pungent symbolic meaning (the *Dies irae* in the *Requiem*, the quotation from Mahler's *Kindertotenlieder* in the Sonata for violin and piano). Along with Schnittke, Gubaydulina, Denisov, Karayev and Kasparov, Berinsky has been labelled a 'citizen of the world' on account of his openness to eras, styles, languages and faiths, for his striving to recreate through music the tragedies and cataclysms of the 20th century, and his willingness to touch on the sensitive subjects of modern human existence. Without losing touch with his folklore and the traditions of his country and of his Jewish background, Berinsky made use of texts of various languages: in the *Motet on 7.12.88*, written in response to the Armenian earthquake of that date, the literary material comes from Church Slavonic, old Armenian, Jewish and Latin sources. Berinsky ran frequent seminars at the House of Creative Work in Ivanovo, as well as at the creative workshop attached to his own Club; he also took part in conferences and published articles.

ALLA VLADIMIROVNA GRIGOR'YEVA

**Berio, Luciano** (*b* Oneglia, 1925). Italian composer. At a relatively early stage in his career, he succeeded in transcending the closed world of the European avant garde to address a wider public. The vivid, gestural idiom that he developed in the 1960s, and the creative consequences that he drew from other, often extra-musical aspects of the culture around him, established for him a world-wide reputation that has sustained his subsequent exploration of a wide, and sometimes challenging, arc of musical resources. Of formidable creative energy, he has proved one of the most prolific composers of the later 20th century.

1. 1925–1971. 2. After 1971. 3. Text and commentary. 4. Orchestral works; sound in space. 5. Voice and theatre.

1. 1925–1971. He was born into a family of musicians working in the small but busy Ligurian port of Oneglia. Both his father (Ernesto) and grandfather (Adolfo) were organists and composers, and in consequence the young Berio received a thorough musical training at home. By the age of nine, he was participating, as a pianist, in his father's chamber music evenings, and by his early teens he was producing occasional compositions. But an injury to his right hand sustained while training as an unwilling conscript to the army of Mussolini's Republic of Salò changed the focus of his musical activities. When he entered the Milan Conservatory at the end of the war in 1945, it soon became plain that the consequences of his injury were such as to prevent a career as a pianist, and his studies centered increasingly on consolidating compositional technique.

Until the age of 20, Berio had written only a handful of compositions, and, living in the provinces amid the disruptions of war, he had had little contact with the musical thought of the previous 50 years. Now, like many

of his generation, he embarked upon a rapid and seminal series of discoveries. In his first year at the conservatory he was able to attend performances of works by Milhaud, Bartók, Stravinsky and Schoenberg, by whose *Pierrot lunaire* he was at first baffled. Alongside his technical studies in counterpoint with Paribeni, he was assimilating by imitation a whole range of compositional models (at this stage Ravel and Prokofiev in particular). In 1948 he joined Ghedini's composition class, and thereby encountered a major formative influence. Ghedini's acute sense of the achievements of Stravinsky, and his own fastidious grasp of instrumentation both imprinted themselves rapidly upon Berio's work. Although in this, his most radical period, Ghedini had only occasional resort to serialism, he did not discourage students who wished to explore its techniques more deeply. At the time the the most congenial example for many young Italian composers was the recent work of Dallapiccola. Accordingly, after completing his conservatory studies in 1951, Berio applied for a Koussevitzky Foundation bursary to study with Dallapiccola at the 1952 Berkshire Festival in Tanglewood, Massachusetts.

During his years in Milan, Berio had earned a modest living as an accompanist for singing classes. One of the many tasks that he undertook during 1950 was to act as the accompanist for a young American singing student, Cathy Berberian, then applying for a Fulbright Scholarship to continue her Milanese studies. She won the scholarship, and within a few months she and Berio were married. The première of Berio's most assured hommage to Dallapiccola, *Chamber Music* (1953), was her last performance before the birth of their daughter, Christina. For several years thereafter she withdrew from engagements (a few radio recordings apart), but her return to professional work from 1958 on was to prove seminal for Berio's own development.

Berio's trip to Tanglewood in 1952 had allowed him to be present at the Museum of Modern Art in New York on 28 October, when the first concert in the USA to include electronic music was given. Fired with enthusiasm, he determined to explore further, and seized the opportunity on his return to Milan by taking on work for RAI, the Italian radio and television network. In 1953 he was commissioned to provide the soundtrack for a series of television films, but at the same time he tried his hand at an autonomous tape piece (*Mimusique no.1*). That year he also began drafting proposals for an electronic studio at RAI, encountered Maderna for the first time, and attended a conference on electronic music at Basle, where he first met Stockhausen. Maderna and Berio were quickly drawn into a congenial collaboration in planning the proposed Milan studio. By the time the Studio di Fonologia finally opened in 1955, Maderna had agreed to join Berio as co-director. Soon it was accommodating projects from other composers: Pousseur came to work there in 1957, as did Cage the following year.

Working alongside Maderna opened a vast range of contacts for Berio; thus encouraged, he appeared at the 1956 Darmstadt summer school, where his first major orchestral work, *Nones*, was received with interest. He was to return in subsequent years – accompanied in 1959 by Berberian – but maintained a canny distance from the impassioned aesthetic and technical debates that typified the summer schools at that period. As was so often to be the case, he instead chose to pursue a parallel but

1. *Luciano Berio*

independent path. From 1956, he and Maderna began to plan concert series devoted primarily to contemporary music under the title Incontri Musicali, the first of which took place in Milan the following year. Berio additionally took on the editorship of a journal of the same name which published not only articles by his Milanese collaborators, but also Italian translations of major texts by Pousseur, Boulez and Cage. Four numbers appeared between 1956 and 1960.

Berio's taste for creative collaboration quickly affirmed itself. His work at RAI brought him into contact, and then enduring friendship, with Umberto Eco. Together they produced a radio programme on onomatopaeia, whose end-piece was a first version of *Thema (Omaggio a Joyce)* (1958). Over the next few years, Berio's music was to provide for Eco a cardinal example when developing his theory of the *opera aperta*, or open work. Eco instilled in Berio an abiding passion for Joyce; Berio introduced Eco to the subtleties of Saussure's linguistics. The broad field of semiotics into which the latter led Eco was to provide an inspirational framework for much of Berio's fascination with instrumental and vocal gesture over the coming years. Indeed, Berio's unusual delight in using the intellectual adventures of his contemporaries as an imaginative springboard has never left him.

The late 1950s were also a period of prodigious compositional productivity. A series of *Quaderni*, subsumed into *Epifanie* (1959–61, rev. 1965), set a seal on his grasp of the orchestra – which would remain a central medium for him. But Berio also began to concentrate on works for smaller groupings which, because they were more amenable to frequent performance, provided the basis for establishing his rapidly growing reputation in Europe and the USA. They include *Tempi concertati* (1958–9), *Différences* (1958–9), *Circles* (1960) and a

work for flute which was to initiate a long line of *Sequenzas* for solo instruments. The flute *Sequenza* (1958), written for Severino Gazzeloni, made explicit Berio's fascination with virtuosity, understood not merely as technical dexterity, but as a manifestation of an agile musical intelligence that relishes the challenge of complexity. It was the presence of just these qualities in Cathy Berberian's artistry that vivified Berio's work with her. After relaunching her singing career during the Naples Incontri Musicali of 1958, Berberian tempted Cage into devising for her the vocal and stylistic acrobatics of *Aria*. Her performance of the piece at Darmstadt the following year provoked widespread interest. Berio took note of these adventures, but bided his time. It was only once he felt able to marry the pleasures of rhetorical surprise and vocal agility to the intellectual discipline of articulatory phonetics, and to a sense of vocal line honed by many years of immersion in the Italian lyric tradition, that his own vocal style was to spring forth in full complexity with *Circles*.

Berio's growing reputation brought with it invitations to teach composition. He returned to Tanglewood in 1960, and in the following two summers taught at the Dartington summer school. These peregrinations, and others occasioned by increasingly frequent performances, persuaded him to resign from the Studio di Fonologia in 1961. In the spring semester of 1962 he substituted for Milhaud at Mills College, Oakland, California, and when this arrangement proved a success, agreed to do the same for the whole of the academic year 1963–4. During his first stay at Oakland, he met the psychologist Susan Oyama, then still a student. Their relationship flourished, and in 1965 they married. But if the intense but explosive relationship between Berio and Berberian had necessitated their divorce, their extraordinary professional rapport flourished unchecked. Some of its most enduring fruits were produced at this time: *Folksongs* in 1964, *Sequenza III* in 1965–6. In 1964, Oyama had begun her doctoral research at Harvard University, where Berio accepted a semester's teaching. He was subsequently awarded a grant from the Ford Foundation, which took him to Berlin at the end of that year, but by the autumn of 1965 he had negotiated a post at the Juilliard School of Music that he was to occupy for the next six years. At first he and his wife continued to live in Boston, while she completed her doctorate. A daughter, Marina, was born there in 1966. The family then moved to Hoboken, New Jersey, where their son Stefano was born in 1968. Although primarily concerned with the teaching of composition and analysis, Berio's work at the Juilliard included the founding of the Juilliard Ensemble, which promoted the performance of contemporary music. And although the east coast of America provided a professional and home base, throughout this period he was also constantly travelling and supervising performances on a worldwide front.

However variegated the surface detail of his life during the 1960s, Berio's experiences of the late 50s had equipped him with a fertile set of technical resources that provided a foundation for the brilliant and vivid works of this decade. His acute sense of the theatrical dimension latent in all performance, which came to the fore in works such as *Laborintus II* (1965), *Sequenzas III* (1965–6) and *V* (1966), and *Sinfonia* (1968–9), engaged listeners who normally felt neither affection nor curiosity for the works of their contemporaries. The imaginative framework for much of this work was still nourished by the structuralist tradition, particularly as reinterpreted by semiotics (of which Eco was becoming an inventive exponent). But Berio's craftsman-like confidence in the abundance that could be generated from parsimonious processes of melodic and harmonic transformation allowed him to retain control over his material, even as it gave rise to a dazzling and potentially diversionary display of gestural detail.

2. After 1971. The international attention commanded by Berio's music was, by the late 1960s, keeping him in constant travel – a circumstance that naturally posed problems for his teaching duties at Juilliard. In 1971 he resigned, and began the process of transferring back to Italy. Although the well-nigh continuous travel was to continue for some years, in 1972 he bought land and buildings at Radicondoli, a hilltop village near Siena. Restoration and the planting of vineyards and fruit trees proceeded apace over the next two years, and in 1975 he was able to move in. In 1977 he married his third wife, the Israeli musicologist Talia Pecker, and from then on Radicondoli became his family home. Two sons were born from the marriage – Daniel in 1978, Jonathan in 1980 – and although their educational needs, and Berio's own projects, dictated the acquisition in due course of an apartment in Florence, Radicondoli remained the gravitational centre of his work.

A second focus on his return to Europe was provided initially by his acceptance in 1974 of an invitation from Boulez to direct the electro-acoustic section of IRCAM in Paris. The major project that Berio supervised there was the creation, by the physicist Giuseppe di Giugno, of the 4X digital system that broke new ground by its ability to process and transform sound in 'real time'. Although Berio made cautious exploration of its potential in *Chemins V* (1980), which was subsequently withdrawn, the system achieved its first major showing in Boulez's *Répons* (1980–84). Berio resigned his post at IRCAM in 1980, and began protracted negotiations with the city council of Florence in the hope of creating a new research centre where he could further develop some of the implications of his work in Paris. This finally bore fruit in 1987, with the creation of Tempo Reale, based in the Villa Strozzi. Meanwhile engagement with the cultural life of the region was further developed by Berio's acceptance of the artistic directorship of the Orchestra Regionale Toscana in 1982, and that of the Maggio Musicale Fiorentino in 1984.

To those accustomed to the surface exuberance of the scores that Berio produced during the 1960s, the restraint and focus of those of the early 70s came as something of a shock. The success of such works as *Sinfonia* (1968–9) did not tempt Berio to capitalize on his unusually wide popularity, but rather to pursue what had become the central problem of his musical thought: that of reclaiming the fundamental role of harmony in musical structure. The device whereby he helped himself, and his listeners, to keep a hold on this venture was initially a central line that ran up and down a slowly evolving fixed field of pitches, from which selective resonances and anticipations were sustained to spell out a selection of the harmonic consequences. Such studies in harmonic listening reached an exemplary formulation in *Points on the Curve to Find . . .* (1974). Having thus consolidated a grasp on this notoriously daunting and amorphous field, he was able

*2. Scene from Berio's 'Un re in ascolto', Covent Garden, London, 1989, directed by Graham Vick, with Donald McIntyre as Prospero*

to move into the sophisticated harmonic flux of such works as *Il Ritorno degli snovidenia* (1976–7).

The later 1970s also saw confirmation of Berio's appetite for the challenge of working on a large time-scale, and with the full resources of opera house and concert hall, notably in the hour-long *Coro* for 40 vocalists and 40 instrumentalists (1975–7), and in the two-hour opera *La vera storia* (1977–81). In neither case were such time-spans achieved by interweaving or juxtaposing independent compositional projects, as had been the case in *Epifanie* (to a certain extent) and *Sinfonia*. Instead, Berio invented for each work a global musico-dramaturgical structure, as befitted the traditions of large-scale public art. *Epifanie* and *Sinfonia* had incorporated passing verbal challenges to the autonomy and self-sufficiency of art. But from *Coro* on, each major work – and above all *Outis* (1995–6) and *Cronaca del luogo* (1999) – has found its own way of reforging the link between public aesthetic experience and the shared ethical responsibilities of the humanist tradition.

Berio's collaborator in *La vera storia* was Italo Calvino, who had taken a technician's delight in finding words to fill a pre-established musico-dramatic structure, often already fully composed. Calvino now proposed a new libretto based upon the fable of a king making sense of his world, and the collapse of his kingdom, through listening. But as many of his collaborators have ruefully noted, Berio can only allow musical priorities to take possession of verbally formed ideas and structures by dismembering them. A (frequently heated) creative dialogue ensued, but the stage work which eventually resulted, *Un re in ascolto* (1979–84), stood at many removes from Calvino's original proposition. It conflated an apparently unlikely amalgam of sources (notably W.H. Auden's *The Sea and the Mirror* and a Singspiel libretto based on *The Tempest*) into an intensely personal synthesis. However, unlike Berio's major theatre works before and since, the piece revolved around an empathetic central narrative – the story of an old impresario striving to realize his vision of 'another theatre' before he dies – and as a result it has proved his most resilient contribution yet to the contemporary operatic repertory (fig.2).

With two major music-theatre works complete, Berio was able to return his concentration to the research group assembling at his institute, Tempo Reale, in the Villa Strozzi. The first fruit of their work was a sound-location system, TRAILS, that could process and move live sound within an aural space that was not necessarily defined or limited by the acoustic characteristics of a given performing space. Berio offered his first demonstration of the artistic potential of such mobile, three-dimensional sound projection in *Ofanim* (1988). But although such explorations have continued to maintain a presence in more recent works, such as *Outis* (1995–6), they have yet to

resume centre stage: Berio's profound commitment to the performing body has continued to assert its primacy.

Although from the pragmatic viewpoint a gamble – few full-scale 20th-century operas have gained an established hold – since the mid-1970s Berio has pursued his vision of musical theatre unswervingly. But the success of *Un re in ascolto* did not deflect him into a more compliant dialogue with the expectations of opera-lovers. After a protracted search for an appropriate collaborator, Berio encountered the classical scholar and translator Dario del Corno, and moved swiftly to the completion of a major *azione musicale*, *Outis*, first performed at La Scala, Milan in 1996. This proved the most forthright and powerful realization yet of his theatrical vision. Narrative, never a central presence in his theatrical work, here gives way to highly structured mixture of verbal and visual imagery that presents – often in starkly confrontational fashion – the global interconnectedness of what might otherwise seem merely co-existent facets of contemporary experience. (To take but one example, the third cycle of the work throws into disconcerting juxtaposition the consumerist seductions of the supermarket and the concentration camp – not only as agonized holocaust memorial, but also as contemporary Bosnian reality – to underline that there are more ways than one of obliterating, or failing to cherish, human individuality.)

The formidable creative energy that has sustained decades of production has not failed to focus the attention of those responsible for honours and prizes. In 1989 Berio received the Siemens-Musikpreis; in the academic year 1993–4 he was Norton Professor of Poetry at Harvard University, and in 1996 he received the Praemium Imperiale conferred by the Japan Art Association. He has also received honorary doctorates from City University, London (1980), and the University of Siena (1995).

3. TEXT AND COMMENTARY. The many continuities that underlie Berio's work are most strikingly embodied in the ongoing series of virtuoso solo *Sequenzas*. The first, for flute, established many of the characteristics that have endured throughout the series. The 'sequence' of the title is, broadly, that of harmonic fields: fixed pitch resources that are each explored for their melodic and harmonic potential in turn. The ways in which this conception is realized vary widely from one *Sequenza* to the next. They serve a virtuosity that, as Berio has often emphasised, is not merely that of flying finger or agile tongue. The composer also requires a virtuosity of 'sensibility and intelligence' that often entails a thoroughgoing understanding of the history of the instrument: most explicitly in *Sequenza VIII* for violin (1976–7), but also, for instance, in the characterization of registers in *Sequenza XII* for bassoon (1995). Indeed, the piece may become an essay in the instrument's social history, as in *Sequenza XIII* for accordion (1995–6), which creates an amalgam of echoes from tango, work-song, cabaret and other forms of popular entertainment. In certain cases, where history has consigned to an instrument an excessively constricted range of characteristics, Berio may write *à rebours*. Both *Sequenza II* for harp (1963) and *Sequenza VI* for viola (1967) invest their instruments with an unwonted ferocity.

Berio's engrossed exploration of the physical details of performance (fingering patterns in *Sequenza VI* for viola, sequences of resonance points in the mouth in *Sequenza III* for voice (1965–6), different uses of the tongue to modify airflow in *Sequenza XII* for bassoon) engendered solo works of singular density and extent. (Most last between eight and ten minutes; the bassoon *Sequenza* is much the longest at twenty-six.) It is little wonder, therefore, that Berio has chosen to return to some of these works, and subject them to further scrutiny in the form of a superimposed commentary – the adding of extra layers to a pre-existent core so as to create new perspectives and balances. This possibility was in fact first explored by extraction rather than addition: the harp *Sequenza* grew out of preparatory work on a harp concerto, which subsequently formed itself around the solo line as *Chemins I* for harp and ensemble (1964). Once envisaged, the principle took on explosive life in *Chemins II on Sequenza VI* (1967), where a harmonic and textural core that sustains the solo viola line throws out an extraordinarily dense web of accretions. This in turn engendered an orchestral layer in *Chemins III on Chemins II* (1968). The series has always drawn strength from the fundamentally harmonic underpinning of the solo *Sequenzas*, as is made obvious by the harmonic backdrop provided by the ensemble in *Chemins IV on Sequenza VII* for oboe and strings (1975) or indeed *Corale on Sequenza VIII* (1980–1). But the variety of ways in which this principle could inflect the global import of the *Sequenza* upon which it is based has become evident in the additions to the series in the 1990s: *Chemins V on Sequenza XI* for guitar and chamber orchestra (1992), *Kol-Od (Chemins VI on Sequenza X)* for trumpet and chamber orchestra (1995–6), and *Récit (Chemins VII on Sequenza IXf)* for alto saxophone and orchestra (1996).

The principle of reworking by adding extra layers is not confined to the *Chemins* series. A range of further possibilities was opened up in Berio's most frequently performed orchestral work, *Sinfonia* (1968–9). Here *O King*, a work for voice and chamber ensemble completed in 1968, underwent a subtle harmonic transformation as the second movement of *Sinfonia*. The third movement took a radical step, treating the scherzo of Mahler's Second Symphony as its core 'text', on top of which fragments from a range of other repertory works, chosen to represent a wide range of harmonic densities (the maximum being provided by Berio's own chromatically saturated block chords), were superimposed. The appearance of many of these fragments was triggered by association, echoing some feature of Mahler's original even as they blocked it out. Such a process – not unlike the wild puns of Joyce's *Finnegans Wake* – can proliferate in all directions, and indeed in the final movement of *Sinfonia* the same interactions multiply, but now between the materials of all the previous movements.

Yet more radically, Berio experimented with the possibility of composing out the interaction of two completed 'texts', when the soft, dense staccato chords of *Still* (1973, subsequently withdrawn as a separate work) were made to interact with the core melodic line of *Bewegung* (1971) to form *Eindrücke* (1973–4). Although this was an extreme instance, the looser principle of 'intertextual' exploration has remained strong: for example, materials from Part 1 of *La vera storia* converge upon the central scene v of Part 2; in *Un re in ascolto*, the three 'auditions' fuse into the protagonist's fifth aria. Complete works have also continued to be reviewed in a new context, *Points on the Curve to Find. . .* becoming the basis for the central section of *Concerto II (Echoing*

*Curves)* (1988–9), the orchestral *Continuo* (1989) proliferating into *Ekphrasis (Continuo II)* (1996).

4. ORCHESTRAL WORKS; SOUND IN SPACE. Since the later 1950s, Berio's commitment to the inheritance of the symphony orchestra has been unwavering. An eager student of the great orchestrators from the decades surrounding the turn of the century, including Mahler, Ravel, Debussy and Stravinsky, he has exercized himself in the medium with a consistency not easily matched among his major contemporaries. Although many of his devices (such as the momentary colouring of one instrumental line by other instruments) reflect and extend the achievements of his mentors, Berio's orchestra typically uses timbrally unified layers of sound superposed upon one another (the inspiration for which had been his experiences with the superposition of complex sounds in the electronic studio). From *Epifanie* on, his scores display families of instruments in choirs of four, five or six voices. Often, associated choirs can determine a characteristic sound-world: flutter-tongue flutes and trumpets in *Epifanie* A, clarinets and saxophones in *Outis* (1995–6). One further 'choir', that of eight amplified solo voices, was used to startling effect in *Sinfonia* as an integral part of his orchestral resources, and remained a crucial resource in the pit orchestra of ensuing theatrical works, such as *Opera* (1969–70), *La vera storia* and *Outis*.

In all of these instances, questions of 'foreground' and 'background' remain constantly malleable, as befits a medium dedicated to the ideal of 'sounding together'. Only in isolated examples does a single instrument or line split off to pursue its own agenda – the flute line in certain works of the 1960s, such as *Laborintus II* or *Sinfonia*, or the 'stratospheric' violin lines of many works from the mid-1990s on. But even where Berio turns to the inherently dramatized opposition of soloist and orchestra, he shows a marked fondness for mediating the opposition by echoing soloistic timbre and gesture in the orchestra. Two orchestral harps respond to the harp soloist in *Chemins I*, an orchestral pianist echoes the two soloists in the Concerto for two pianos and orchestra (1972–3), the viola and cello similarly echo the viola soloist in *Chemins II*.

The fact that layers of sound potentially dramatize musical space (a possibility first explored through the multi-track tape works of the late 1950s) has also never been far from Berio's mind. After the 'sound in the round' experiments of *Allelujah II* (1957–8), Berio has, for practical reasons, kept his orchestra on the traditional platform. However, he has repeatedly devised new seating patterns for his performers so as to dynamize acoustic space within that confine. These range from the 'echo-chamber' provided by a third group of violins seated at the back (*Epifanie*, *Sinfonia*) to the radical rearrangements of *Formazioni* (1985–7) or *Concerto II (Echoing Curves)*. Nevertheless, only by electronic means has he been able to reclaim music's potential 360°. The resultant tension between the physically performing body, and the disembodied, roving sound of the TRAILS system (or its more economically viable successors), made explicit in *Ofanim* (1988), remains vivid and unresolved.

5. VOICE AND THEATRE. Within Berio's output, quantitively the human voice has shared no more than equal honours with instrumental music. However, in terms both of public perception and personal history, its role has been seminal. No Italian of his generation (save, for many years, Donatoni) could escape transaction with that country's lyric tradition. But Berio found means, through his extraordinary collaborations with Berberian, of complicating and challenging it from within, incorporating every form of vocal behaviour that it had traditionally excluded. To do this he had to find an approach to the performed text that bestrode conceptual distinctions between word as sign, and as musically structurable sound. In *Circles*, the Cummings poems that Berio set already acknowledge this dimension typographically, and such poetically familiar devices as assonance could be allowed to ramify into analogous relationships between voice and ensemble. The tension between the formal musical potential that grows autonomously out of these materials, and the text's linear semantic structure, has remained a cardinal source of strength in Berio's vocal writing. It has led him towards authors undismayed by challenges to conventional semantic order – pre-eminently Edoardo Sanguineti, from whom he learnt how well it serves that tension to 'cut and paste' text: most notably, and radically, in *Un re in ascolto* and *Outis*.

*3. Luciano Berio, 1982*

The vocal idiom of *Circles* or *Sequenza III*, or its multi-voiced equivalents in *Passaggio*, *Laborintus II*, and *Sinfonia*, was exuberantly inclusive, but never negated its roots in the lyric tradition. Once that period of creativity had run its course, Berio was thus able to fall back on vocal writing – characteristic of his mature theatre works from *La vera storia* on – whose arching lines overtly proclaim that tradition. At first, sheer experience gave

him a surer hand in creating a complex lyrical idiom for female performers: Leonora and Ada in *La vera storia*, the singers of the three audition pieces, and the Protagonist whose aria summates all three, in *Un re in ascolto*. The creation of an equally convincing male-voice idiom proceeded more cautiously. But if the arias sung by Prospero in *Un re in ascolto* are of rather muted lyrical eloquence (in part so as to give due resonance to Calvino's remarkable texts), the protagonist of *Outis* is given a starkly expressive line whose parsimony is profoundly telling.

Barberian's theatre of masks – each *persona* had momentarily assumed with blazing conviction – had demanded a psychological as well as a physical virtuosity that tended, in other hands, to become coldly brilliant acrobatics (although available as a potent signifier of psychological distress for the character of the third passer-by of *La vera storia* in part 2). But Berio had other counterbalances to the lyric tradition to hand. Popular singing styles of many traditions had fascinated him for many years. As with the tradition of *opera lirica*, he sought to extend imaginatively the resources that he found there. So *E vo'* (1972) uses with remarkably sustained intensity the melodic characteristics of Sicilian folksong (a consistent source of inspiration for Berio), but articulates a large melodic sweep whose roots are plainly in the concert hall and opera house. This process of assimilation is pursued on a characteristically ambitious scale in *Coro* (1975–6), where, in one of his most audacious rearrangements of concert-hall resources, each of 40 voices is coupled with (and sits next to) an orchestral melodic instrument. Thus the succession of individual sections, based on different popular singing styles, can create a kaleidoscope of different chamber ensembles, with massed tuttis in between to set them off.

From *La vera storia* (1977–81) on, lyric and popular traditions have jostled for position in a typically all-inclusive mix. In that work – as in its successors – each singing style is developed in a separate 'number'. But the vertiginous *volte-faces* of the idiom that Berio created for Berberian, and of the multi-voiced works that grew from it, created a perceptual superabundance, an aural jungle full of half-grasped gestures in the face of which listeners must piece together their own sense of subjective continuity as best they can. By contrast, Berio's work from the late 1970s on restores to music its established function of knitting together a span of theatrical experience within which the most challenging diversities may be affirmed as 'belonging together'. His instinctive distrust of the well-rounded story echoes the conviction of the modernist tradition at large that the artist's most urgent task consists in making a path into areas of experience about which there is not yet a coherent story to be told. Works such as *Passaggio*, *Opera* and *La vera storia* have shown that this is a task for which musical theatre, with its capacity for holding together things which, from the point of view of 'common sense', would otherwise fly apart, is uniquely suited. This understanding of the potential of musical theatre reached its most remarkable embodiment in the non-narrative counterpoint between word, music and visual symbol in *Outis* – a manifestation of Berio's fundamental and enduring mission to articulate, and thus to place in the realm of the humanly shared, perceptions for which there is as yet no code.

## WORKS

*for further details of incomplete and unpublished works see Karlen (1988)*

### STAGE

Tre modi per supportare la vita (Mimusique no.2) (azione scenica, 3, R. Leydi), 1952–5, Bergamo, 1955
Allez-Hop! (racconto mimico, I. Calvino), 1952–9, Venice, Festival, 23 Sept 1959; rev., Bologna, 1968
Passaggio (messa in scena, 1, Berio and E. Sanguineti), 1961–2, Milan, Piccola Scala, 6 May 1963
Esposizione (azione scenica, Sanguineti), 1963, Venice, 1963; destroyed
Opera (3, Berio, after U. Eco, F. Colombo, A. Striggio, S. Yankowitz, with Open Theatre of New York), 1969–70, Santa Fe, 12 Aug 1970; rev., Florence, Comunale, 28 May 1977
Per la dolce memoria di quel giorno (ballet, after Petrarch, choreog. Béjart), tape, 1974, Florence, 1974
Linea (ballet, choreog. F. Blaska), 2 pf, mar, vib, 1974, Grenoble, 1974
La vera storia (op, 2, I. Calvino and Berio), 1977–81, Milan, La Scala, 9 March 1982
Un re in ascolto (azione musicale, 2 pts, Berio, after Calvino, W.H. Auden, F. Einsiedel, F.W. Gotter), 1979–84, Salzburg, Kleines Festspielhaus, 7 Aug 1984
Outis (azione musicale, D. Del Corno, Berio), 1995–6, Milan, La Scala, 2 Nov 1996
Cronaca del luogo (azione musicale, T. Pecker-Berio), 1998–9, Salzburg, Felsenreitschule, 24 July 1999

### ORCHESTRAL

Preludio a una festa marina, str, 1944
Concertino, cl, vn, cel, hp, str, 1949
Mimusique no.2, 1952–3 [concert version of azione scenica]
Variazioni, chbr orch, 1953–4
Nones, 1954
Allelujah I, 6 groups, 1955; rev. as Allelujah II, 5 groups, 1957–8
Variazioni 'Ein Mädchen oder Weibchen', 2 basset hn, str, 1956
Divertimento, 1958, collab. Maderna; nos.2 'Scat rag' and 3 'Rhumba-ramble' [from Mimusique no.2] by Berio
Tempi concertati, fl, vn, 2 pf, small orch (in 4 groups), 1958–9
Quaderni I, 1959, II, 1961, III, 1961–2; incl. in Epifanie
Chemins I on Sequenza II, hp, orch, 1964
Chemins III on Chemins II, va, 9 insts, orch, 1968
Chemins IIb, small orch, 1969–70 [rev. of Chemins II]
Bewegung, 1971
Chemins IIc, b cl, small orch, 1972 [rev. of Chemins IIb], withdrawn
Concerto, 2 pf, orch, 1972–3
Still, 1973, withdrawn
Eindrücke, 1973–4
Après Visage, orch, tape, 1974, withdrawn
Points on the Curve to Find . . ., pf, 23 insts, 1974
Chemins IV on Sequenza VII, ob, str, 1975
Corale on Sequenza VIII, vn, 2 hn, str, 1975
Selezione, pf, chbr orch [from Conc., 2 pf, orch], withdrawn
Il ritorno degli snovidenia, vc, 30 insts, 1976–7
Encore, 1978
Requies, 1983–5
Formazioni, 1985–7, rev. 1988
Conc. II (Echoing Curves), pf, orch (in 2 groups), 1988–9 [incl. rev. pts of Points on the Curve to Find. . .]
Continuo, 1989
Schubert-Berio: Rendering, 1989 [on frags. of sym. by Schubert]
Festum, 1989
Chemins V on Sequenza XI, gui, chbr orch, 1992
Compass, ballet-recital, pf, orch, 1994
Vor, während, nach Zaide, 1995 [with projections of texts by Arruga]
Notturno, str, 1995 [after chbr work]
Re-Call, 23 insts, 1995
Kol-Od (Chemins VI on Sequenza X), tpt, chbr orch, 1995–6
Ekphrasis (Continuo II), 1996
Récit (Chemins VII on Sequenza IXb), a sax, orch, 1996
Alternatim, cl, va, orch, 1996–7

### VOCAL

*vocal-orchestral*

L'annunciazione (R.M. Rilke), S, chbr orch, 1945; unpubd
Magnificat, 2 S, SSAATB, orch, 1949

Epifanie (M. Proust, J. Joyce, A. Machado, C. Simon, B. Brecht, Sanguineti), Mez, orch, 1959–61, rev. 1965; rev. 1991–2 as Epiphanies
Traces (S. Oyama, after J. Baldwin), S, Mez, 2 actors, chorus, orch, 1964, withdrawn
Sinfonia (C. Lévi-Strauss, S. Beckett, Berio), 8 amp vv, orch, 1968–9 [incl. arr. of solo vocal work O King]
Air (Striggio), S, orch, 1969 [from stage work Opera]
Laborintus II (Sanguinetti), 3vv, 8 actors, spkr, ens, tape, 1965
Ora (Berio, M. Essam, after Virgil), S, Mez, small chorus, fl, eng hn, 12 insts, orch, 1971, withdrawn
Bewegung II (Virgil), Bar, orch, 1971 [after orch work]
Coro (folk texts, P. Neruda), 40vv, 40 insts, 1975–6, rev. 1977
Calmo (Homer), Mez, small orch, 1989 [based on Calmo, S, ens, 1974]
Shofar (P. Celan), SATB, orch, 1995

OTHER VOCAL

Due cori popolori, chorus, 1946, unpubd
O bone Jesu, chorus, 1946, unpubd
Tre canzoni popolari, female v, pf, 1946–7, rev. as Quattro canzoni populari, 1946-7, rev. 1973
Tre liriche greche, 1v, pf, 1946–8
Due canti siciliani, T, male chorus, 1948
Ad Hermes, 1v, pf, 1948
Due pezzi sacri, 2S, pf, 2 hp, timp, bells, 1949
Tre vocalizzi, 1v, pf, 1950
Deus meus, 1v, 3 insts, 1951
El mar la mar (Alberti), 2 S, fl, cl, gui, accdn, db, 1952; red. for 2S, pf, 1952; arr. for S, Mez, fl, 2 cl, hp, accdn, vc, db, 1969
Chamber Music (Joyce), female v, cl, hp, vc, 1953
Circles (e.e. cummings), female v, hp, 2 perc, 1960
Rounds (M. Kutter), 1v, hpd, 1964, withdrawn
O King, 1v, fl, cl, vn, vc, pf, 1967–8; arr. incl. in Sinfonia
Prayer-Prière (Calvino), 1v, 1968 [for 40th birthday of K. Stockhausen]
Questo vuol dire che (various), 3 female vv, small chorus, insts, tape, 1968–9
Melodrama (Berio), T, fl, cl, perc, vib, elec org, vn, vc, db, 1970 [from stage work Opera]
Agnus, 2 female vv, 3 cl, drone (elec org/other sound source), 1971; incl. in rev. of Opera
E vo' (anon.), S, fl, ob, 3 cl, tpt, trbn, perc, pf, elec org, vn, va, vc, db, 1972; incl. in rev. of Opera
Recital I (for Cathy) (Berio, A. Mosetti, Sanguineti), 1v, 17 insts, 1972
Cries of London, 6 solo vv, 1973–4, rev. for 8 solo vv, 1975
Calmo (Homer), S, insts, 1974
A-ronne (Sanguineti), 8vv, 1975 [version of tape work]
Ecce: musica per musicologi (d'Arezzo), vv, bells, 1987
Ofanim (Bible: *Ezekiel, Song of Solomon*), female v, children's chorus, 2 inst groups, live elecs, 1988
Canticum novissimi testamenti, (S, S, A, A, T, T, B, B)/SATB, 4 cl, 4 sax, 1989
There is No Tune (Pecker-Berio), chbr chorus, 1994
Twice upon. . ., 6 groups children's vv, ob, cl, hn, tpt, trbn, vn, va, kbd, 1994

OTHER INSTRUMENTAL
*2 or more instruments*

Toccata, pf 4 hands, 1939
Divertimento, str trio, 1946
Tre pezzi, 3 cl, 1947
Str Trio, 1948
Wind Qnt, 1948
Opus Number Zoo (R. Levine), spkr, 2 cl, 2 hn, 1950; rev. wind qnt, 1951; rev. 1970
Wind Qt, 1950
Due pezzi, vn, pf, 1951
Sonatina, fl, 2 cl, bn, 1951
Study, str qt, 1952
String Quartet, 1955–6
Serenata I, fl, 14 insts, 1957
Différences, fl, cl, hp, va, vc, tape, 1958–9, rev. 1967
Sincronie, str qt, 1963–4
Chemins II on Sequenza VI, va, 9 insts, 1967
Memory, elec pf, elec hpd 1970, rev. 1973
Autre fois: berceuse canonique pour Igor Stravinsky, fl, cl, hp, 1971
Musica leggera, fl, va, vc, 1974 [for 70th birthday of G. Petrassi]
34 duetti, 2 vn, 1979–83
Accordo, 4 groups wind insts, 1980–81
Voci, va, 2 inst groups, 1984
Call, brass qnt, 1985
Terre chaleureuse, wind qnt, 1985 [for 60th birthday of P. Boulez]
Naturale, va, tam-tam, tape, 1985–6
Ricorrenze, wind qnt, 1985–7
Notturno (Str Qt no.3), 1993
Glosse, str qt, 1997

SEQUENZAS

Sequenza I, fl, 1958
Sequenza II, hp, 1963
Sequenza III, 1v, 1965–6
Sequenza IV, pf, 1965–6
Sequenza V, trbn, 1966
Sequenza VI, va, 1967
Sequenza VII, ob, 1969
Sequenza VIII, vn, 1976–7
Sequenza IX, cl, 1980, transcr. as Sequenza IXb, a sax, 1981
Sequenza X, tpt, pf resonance, 1984
Sequenza XI, gui, 1987–8
Sequenza XII, bn, 1995
Sequenza XIII, accdn, 1995–6

OTHER SOLO INSTRUMENTAL

Pastorale, pf, 1937
Petite Suite, pf, 1948
Cinque variazioni, pf, 1952–3, rev. 1966
Rounds, hpd, 1964–5, arr. pf, 1967
Wasserklavier, pf, 1965 [orig. for 2 pf]
Gesti, rec, 1966
Erdenklavier, pf, 1969
Fa-Si, org, 1975
Les mots sonts allés, vc, 1978
Chemins V, cl, digital system, 1980, withdrawn
Lied, cl, 1983
Luftklavier, pf, 1985
Comma, E♭-cl, 1987
Feuerklavier, pf, 1989
Psy, db, 1989
Leaf, pf, 1990
Brin, pf, 1990

TAPE

Mimusique no.1, 1-track, 1953; other early pieces
Ritratto di città, 1-track, 1954, collab. Maderna
Mutazioni, 1-track, 1955
Perspectives, 2-track, 1957
Thema (Omaggio a Joyce), 2-track, 1958
Momenti, 4-track, 1960
Visage, 2-track, 1961
A-ronne (radiophonic documentary, Sanguinet), 1974
Chants parallèles, 1974–5
Diario immaginario (V. Sermonti), chorus, orch, tape, 1975 [radio work]
Duo (teatro immaginario, Calvino), 2 vn, chorus, orch, tape, 1982 [radio work]

ARRANGEMENTS

Folk songs, S, 7 insts, 1964; also version for S, orch, 1973
C. Monteverdi: Il combattimento di Tancredi e Clorinda, S, T, Bar, 3 va, vc, db, hpd, 1966
J. Lennon and P. McCartney: Michele, 1v, fl, hpd, 1967, version for 1v, ens; Ticket to Ride, 1v, ens, 1967; Yesterday, 1v, fl, hpd, 1967
The Modification and Instrumentation of a Famous Hornpipe as a Merry and Altogether Sincere Homage to Uncle Alfred, fl/ob, hpd, perc, va, vc, 1969 [after H. Purcell, for 80th birthday of A. Kalmus]
K. Weill: Le grand lustucru, Mez, 12 insts, 1972 [from Marie galante]
K. Weill: Surabaya Johnny, Mez, 9 insts, 1972 [from Happy End]
K. Weill: Ballade von der sexuellen Hörigkeit, Mez, 8 insts, 1975 [from Die Dreigroschenoper]
L. Boccherini: Ritirata notturna di Madrid, orch, 1975

DAVID OSMOND-SMITH

**Bériot, Charles-Auguste de** (*b* Leuven, 20 Feb 1802; *d* Brussels, 8 April 1870). Belgian violinist and composer. He studied with J.-F. Tiby, and later with André Robberechts. In 1821 he travelled to Paris and played for Viotti, who encouraged him with these words: 'You have a fine style; endeavour to perfect it. Hear all men of talent – profit by all but imitate no one.' Unable to obtain lessons from Viotti, who was then director of the Paris Opéra, Bériot turned to Baillot. For a few months he attended Baillot's violin class at the Paris Conservatoire but could not submit to the academic discipline. It is known that Baillot disliked the technical 'eccentricities' which were characteristic of Bériot's style. Shortly after-

wards, Bériot made a highly successful début in Paris, meeting with equal acclaim in London, where he played his own Concertino at the Philharmonic Society on 1 May 1826. After his return to Brussels, he was named solo violinist to King William I of the Netherlands at a salary of 2000 guilder, but the appointment was terminated by the revolution of 1830.

In 1829 Bériot met the famous singer Maria Malibran. For the next six years they travelled together, giving joint concerts in Belgium, England, France and Italy. This liaison led to their marriage on 29 March 1836. Less than six months later, Maria died unexpectedly in Manchester, shortly after appearing at a concert. The grief-stricken Bériot returned to Brussels and temporarily left the concert platform.

He resumed his career in 1838 when he undertook a concert tour to Austria and Italy with the singer Pauline Garcia, the younger sister of his late wife. Spohr heard one of their concerts in Karlsbad and praised Bériot's playing, although he disliked his compositions. In 1840, while playing again in Vienna, Bériot married Marie Huber, the daughter of an Austrian magistrate. That year he played in Russia. In 1842 he was offered a professorship at the Paris Conservatoire as successor to Baillot. However, he declined, preferring to accept an appointment to the Brussels Conservatory. Here he served as head of the violin faculty from 1843 to 1852, when he was forced to retire because of failing eyesight. He became totally blind in 1858 but continued to be active as an author.

Bériot occupies an important place in the history of violin playing. He adapted the technical brilliance of Paganini to the elegance and piquancy of the Parisian style. Thus he modernized the classical French school, established by Viotti and perpetuated at the Conservatoire by Rode, Kreutzer and Baillot. Not being a true disciple of that school, Bériot was able to break the stranglehold of tradition and developed a new, essentially Romantic, approach, known as the Franco-Belgian School. Much of Bériot's technique – harmonics, left-hand pizzicato, ricochet, even scordatura – was influenced by Paganini; this is particularly evident in Bériot's Second Violin Concerto, first played by the composer in London in 1835. On the other hand, Bériot's characteristic style of sweetness and elegance was already formed in the 1820s, before he met Paganini, as can be seen in his early *Airs variés* and the First Violin Concerto. Bériot's success was not based merely on technical brilliance; he could play with such melting warmth as to make Heine exclaim, 'It seems as if the soul of his late wife sings through his violin.' As a composer, Bériot aimed at effect rather than depth; his melodies are sweet and sentimental, his technical display is ingenious and sparkling though basically less difficult than that of Paganini. His concertos and shorter pieces were widely popular in their time; today they are used mainly for study purposes. The elegance and elfin grace of Bériot helped initiate a new approach to the violin, and reflections of his style can be found in Mendelssohn's Violin Concerto. He was a methodical teacher and left several useful instruction books (*Méthode de violon*, 1858; *Ecole transcendante de violon*, 1867). His most famous pupil was Henry Vieuxtemps.

BORIS SCHWARZ

**Bériot, Charles-Wilfrid** (*b* Paris, 12 Feb 1833; *d* Sceaux-en-Gatinais, 22 Oct 1914). French pianist and composer, son of CHARLES-AUGUSTE DE BÉRIOT and Maria Malibran. He was an excellent pianist and pedagogue. In 1887 he was appointed to the piano faculty of the Paris Conservatoire where he taught for many years. Among Bériot's works are four piano concertos, chamber music and various orchestral and vocal compositions. With his father he wrote *Mélodies élémentaires, ou méthode d'accompagnement ... pour piano et violon* (Paris, 1854) and *L'art de l'accompagnement appliqué au piano* (Paris, n.d.).

BORIS SCHWARZ

**Berkeley.** American city in California, near San Francisco. It has its own symphony orchestra (founded 1970) and opera company and is one of the seats of the University of California; *see* SAN FRANCISCO, §§1, 3 and 5.

**Berkeley,** Sir **Lennox** (**Randall Francis**) (*b* Boars Hill, Oxford, 12 May 1903; *d* London, 26 Dec 1989). English composer. From the same generation as Walton and Tippett, he has little connection with national traditions represented by them or by Elgar and Vaughan Williams earlier. This is partly because of his French ancestry and temperament which made him closer to Fauré, and to Ravel and Poulenc who were both personal friends. Berkeley admired Mozart above all, then Chopin, Ravel and the neo-classical Stravinsky. His own idiom is built from an overt melodic expression, usually rooted in tonality and allied to a fastidious command of harmony and orchestral texture. Religious subjects in particular invariably gave rise to vocal music of unusual spiritual intensity, a mood also reflected in his instrumental slow movements.

1. LIFE. Berkeley was born into an aristocratic family. His grandfather was George Lennox Rawdon, Seventh Earl of Berkeley and Viscount Dursley, who married Cecile, daughter of Edward Drummond, Comte de Melfort, a family of French and Scottish origin. The composer's father, Captain Hastings George FitzHardinge Berkeley, was the eldest son, but, born before his parents were able to marry, he was legally unable to inherit the title and estates to which Lennox, as his only son, would have succeeded. Berkeley's childhood was spent in or near Oxford and was affected by listening to his father's

*Lennox Berkeley 1978*

collection of piano rolls; visits to the family of his mother, Aline Carla Harris, who lived in France where her father was British consul at Nice; a godmother who had studied singing in Paris at the turn of the century; and an aunt who was a salon composer. He attended the Dragon School, Oxford; Gresham's School, Holt, where he was followed by W.H. Auden and Britten; and St. George's School, Harpenden, where one of his first compositions was performed.

Berkeley went to Merton College, Oxford, where he read French, Old French and Philology, and took the BA in 1926. Then, on the suggestion of Ravel to whom he showed some of his scores, he studied with Boulanger in Paris, where he was based until 1932. In many ways Berkeley was the quintessential Boulanger pupil, responsive to her passion for music and her rigorous demands in strict counterpoint; with her he effectively undertook his professional training; in this context, too, in 1928, he became a Roman Catholic, which profoundly affected both his life and work. After the prolonged influence of Boulanger the next landmark was not until Berkeley's meeting with Britten at the ISCM Festival in Barcelona in 1936. They immediately collaborated on the orchestral suite, *Mont Juic*, and became close friends as well as colleagues. Even though Berkeley was ten years older the two composers found they had much in common and they influenced each other. Berkeley was the first to set the poems of his Oxford contemporary, W.H. Auden (early songs now lost). Britten admired Berkeley's 1930s music and later conducted the Stabat Mater, which was dedicated to him; Berkeley eagerly awaited each of Britten's new works. During World War II Berkeley worked at the BBC in London as an orchestral programme builder and it was there that he met Elizabeth Freda Bernstein, whom he married in 1946; their happy domestic life proved an ideal background for his creative work.

From 1946 to 1968 Berkeley was professor of composition at the RAM, where he exercised an influence on later generations which was no less significant for being unobtrusive. His later pupils included Bedford, Bennett, Mathias, Maw and Tavener: they have all paid tribute to his sensitive guidance and personal generosity. Berkeley's honours have included the CBE (1957), the Cobbett Medal (1962), the Ordre National du Mérit Culturel de Monaco (1967), the Papal Knighthood of St Gregory (1973) and a knighthood (1974). Many universities and other organizations have granted him honorary status too, among which doctor of Oxford University (1970), fellow of Merton College (1974), fellow of the RNCM (1975), professor of Keele University (1976–9), member of the American Academy and Institute of Arts and Letters (1980), Member of the GSMD (1980), Member of the Académie Royale, Belgium (1983) and doctor of City University (1984). From 1975 to 1983 he was President of Honour of the PRS and from 1977 to 1983 he was president of the Cheltenham Festival.

2. WORKS. Berkeley lacked confidence in most of his early works written while he was studying with Boulanger and many of them disappeared, some to be rediscovered later. His first published composition, however, had been written at Oxford, a polished song with piano in G major, *D'un vanneur de blé aux vents*. Soon after he reached Paris his style changed: *Tombeaux* – five songs to poems by Jean Cocteau – for example, draws on bitonality of the kind then fashionable amongst the composers of Les Six. Berkeley had opportunities for performances of works on a larger scale too with his orchestral Suite given its première in Paris as early as 1928 and at the Proms in London the following year. He came into greater prominence with the oratorio *Jonah*, when it was broadcast by the BBC in 1936 and given at the Leeds Festival a year later, conducted by Berkeley himself. However, despite Britten's admiration for the work it received a mixed response, and Berkeley withdrew it (it was revived in London in 1990). The score is permeated with Stravinskian neo-classicism – in some ways it seems to anticipate

*The Rake's Progress* – and its construction in separate numbers derives from the Bach passions and cantatas.

Berkeley's first unqualified success was a work for string orchestra, the *Serenade* op.12, now a mainstay of the British repertory alongside Britten's *Variations on a Theme of Frank Bridge*, which was written just before it, and Tippett's *Concerto for Double String Orchestra* which came just after. Its four movements are in contrasted styles, though not as diverse as the Britten. The opening Vivace is an exhilarating *moto perpetuo* recalling the rhythmic energy of Bach's 'Brandenburg' Concertos; the following Andantino is a melancholy serenade with pizzicato strings suggesting guitars; the third movement is a kind of scherzo where, as often in Berkeley, the material is continuously developed rather than merely repeated; the final Lento strikes the most personal note. Berkeley began the *Serenade* at Snape in Suffolk, where he shared the Old Mill with Britten. By the time he was writing the last movement the war had started and the colleague whom he idolized had gone to the USA with Pears, circumstances which appear to be reflected in the music.

In 1940 Berkeley completed his First Symphony op.16, a spacious four-movement work lasting half an hour; but perhaps more characteristic is the Divertimento in B♭ op.18, for small orchestra, commissioned by the BBC and one of several works the composer dedicated to Boulanger. The layout of the Divertimento avoids the formalities of symphonic design. It opens with a Prelude in extremely compressed sonata form and follows it with a Nocturne, a beautiful piece of lyrical pacing, leading to the emotional climax of the whole work. The Scherzo is of larger proportions than either of the two outside movements, while the vivacious Finale is a cross between Haydn and Poulenc in Berkeley's own manner.

By the 1940s he had achieved real maturity. In particular, the *Four Poems of St Teresa of Avila* op.27, for contralto and string orchestra, first sung by Kathleen Ferrier, create in their religious intensity a strong impression; while the *Stabat mater* op.28, written for Britten's English Opera Group, is, if rarely heard, a work of comparable distinction. Of the many piano works from all periods the extended Sonata op.20 is a true landmark; outstanding too are the Six Preludes op.23, a kind of *Mikrokosmos* of Berkeley's compositional technique. The Concerto in B♭ for piano and orchestra op.29 is one of his most successful works written in a particularly felicitous form. The thematic layout of the first movement has a Mozartian elegance, while the second subject shows a blues influence which can be traced back to 1920s Paris, and which surfaces frequently in his melodic writing. The second movement, an Andante, is again typical in its introspective tranquillity and objective passion. The Finale combines the dry humour of Prokofiev with the high spirits of Les Six but given Berkeley's inimitable stamp.

In the 1950s he followed Britten's lead into the theatre with three operas: the grand opera *Nelson* op.41, a one-act comedy, *A Dinner Engagement* op.45 and a biblical tableau, *Ruth* op.50. *Nelson* was well received at Sadlers Wells in 1954 but not revived until a concert performance in London in 1988. By contrast, the sophisticated, witty *A Dinner Engagement* is regularly staged. *Ruth* is an expansion of the serious language of the *Four Poems of St Teresa* into a touching sacred drama, and, as with *A Dinner Engagement*, it showed Berkeley to be more at home with something less ambitious than grand opera, something more in keeping with his personal reserve. The later *Castaway* op.68 is a one-act treatment of the story of Odysseus and Nausicaa, while at the end of his life illness prevented the completion of the first act of another grand opera, *Faldon Park*.

In the early 1960s Berkeley began to show a remarkable ability to extend his musical language, and like other Boulanger pupils such as Copland and Carter he moved away from neo-classicism. As Copland took up 12-note rows, so did Berkeley, if in a much less systematic way. 'Aria 1' from the Concertino op.49 has a 12-note ground bass; there is a similar use of all 12 pitch classes in Boaz's recognition aria near the end of *Ruth* and in the Lento of the Violin Concerto op.59. Serial method in the Sonatina for oboe and piano op.61 is minimal, the row at the opening soon disappearing; but the Third Symphony op.74, by contrast, derives much of its taut cogency from manipulating a 12-note set divided into two hexachords. Connections with such techniques may not have been fundamental; he did, for example, continue to juxtapose tonal and atonal idioms in song cycles such as the *Chinese Songs* op.78, as he had done earlier in the *Five Poems of W.H. Auden* op.53. But, as with Copland, serial thinking had the effect of altering and extending Berkeley's harmonic means. When tonality was often regarded as exhausted, this was, then, a productive crisis for him, not least in the *Windsor Variations* op.75 which exhibits some of the abstract angularity of late Stravinsky. The new style is, perhaps, at its most impressive in a pair of atmospheric orchestral pieces: *Antiphon* op.85 and *Voices of the Night* op.86, as well as his last concerto, for guitar, op.88. In this he worked closely with Julian Bream, both performer and instrument being congenial and inspiring.

With his literary interests and melodic gifts, Berkeley naturally wrote outstanding songs to French as well as English texts: *Tant que mes yeux* op.14 no.2, a setting of Louise Labé, for example, is perfectly realised, as are the two sets of sonnets by Ronsard, op.40 and op.62. His choral music to religious texts was, like Poulenc's, close to the core of the man and to his faith. He defines his own terms at once in a simple anthem such as *Look up sweet Babe* op.43 no.2, to a text by Richard Crashaw; a liturgical work such as the *Missa brevis*; or something more ambitious such as *A Festival Anthem* op.21, no.2. As for chamber music, throughout his career it was precisely judged and idiomatic. The Second String Quartet op.15 is an accomplished example from the 1940s, as too is the String Trio op.19, while the String Quartet no.3 op.76 represents the later style. Berkeley wrote for some of the leading performers of the time, including Dennis Brain, for whom he composed the Horn Trio op.44; Colin Horsley, who was associated with much of his piano music; and Janet Craxton, who gave rise to the Sonatina op.61, the Oboe Quartet op.70 and the Sinfonia concertante op.84.

Late in life Berkeley struggled against Alzheimer's disease and completed nothing after 1983, but there was a perceptible decline before that. His Fourth Symphony op.94 lacked the concentration of his earlier orchestral works although late miniatures, such as the *Sonnet* op.102 (to words by Louise Labé again), and choral pieces to sacred texts remained strong. Though he was at his most distinctive in the 1940s and 50s, the achievement of his later extended language is not inconsiderable. His is an

enduring, cultivated and imaginative voice in 20th-century British music.

WORKS

DRAMATIC

Ops: Nelson (3, A. Pryce-Jones), op.41, 1949–54, London, Sadler's Wells, 22 Sept 1954; A Dinner Engagement (1, P. Dehn), op.45, 1954, Aldeburgh, Jubilee Hall, 17 June 1954; Ruth (3 scenes, E. Crozier), op.50, 1955–6, London, Scala, 2 Oct 1956; Castaway (1, Dehn), op.68, 1968, Aldeburgh, Jubilee Hall, 3 June, 1967; Falden Park (2, W. Dean), op.100, *c*1983, unfinished

Ballet: [untitled], 1932; The Judgement of Paris, London, Sadler's Wells, 1938; Serenade, op.12, 1939 [choreog. J. Jackson as Common Ground, 1984]; La fête étrange, London Arts Theatre, 1947

PETER DICKINSON (text, bibliography), JOAN REDDING (work-list)

**Berkeley, Michael (Fitzhardinge)** (*b* London, 29 May 1948). English composer and broadcaster, son of LENNOX BERKELEY. A chorister at Westminster Cathedral, he began composing at the age of six, enthused with a love of music by his father and his godfather Britten, whose choral works he often sang with the choir. After studies at the RAM in composition, piano and singing, Berkeley performed professionally as a baritone and as a rock musician. From 1974 to 1979 he worked as a BBC radio announcer, later becoming a leading freelance radio and TV broadcaster. His composing career was profoundly influenced by studies in the mid-1970s with Richard Rodney Bennett, from whom he acquired the techniques of serialism and logical thematic development demonstrated in the String Trio, the Oboe Concerto and the *Fantasia concertante*. In 1977 *Meditations* won the Guinness Prize, and in 1979 Berkeley was made associate composer to the Scottish Chamber Orchestra; but it was the compelling oratorio *Or shall we Die?* (1982) to Ian McEwan's anti-nuclear text that first attracted international attention. The climax of his first, broadly tonal stylistic phase, it was followed by a more searching, emotional idiom, with works that employed dissonant pitch-centred atonality, as well as aleatory and textural devices inspired by Lutosławski and Ligeti; such techniques are evident in *Fierce Tears I* (1984), the evocative, modally inflected Clarinet Quintet (1983), *Songs of Awakening Love* (1986) and *Coronach* (1988), a powerful work for strings based on a Scottish highland lament. The organ, clarinet and viola concertos (1987–94) continued to explore this expressive style with their combination of poetic intensity and expressionistic gesture.

Both the Clarinet Concerto and *Entertaining Master Punch* were preparatory essays for *Baa Baa Black Sheep*, Berkeley's highly acclaimed opera, which was later televised. Its libretto by David Malouf about the boyhood of Rudyard Kipling is set with keen musico-dramatic pacing and sharply drawn vocal characterizations. A similar concern with the private world of childhood imagination colours later works such as *The Secret Garden*, *The Garden of Earthly Delights* (aptly commissioned for the National Youth Orchestra's 1998 Prom concert) and a second opera, *Jane Eyre*, again to a libretto by David Malouf. Berkeley has championed new music as artistic director of the Cheltenham Festival and co-director of the Spitalfields Festival, London. In 1998 he was appointed chairman of the Royal Opera House Board. He has been a visiting professor at Huddersfield University and in 1996 was elected FRAM.

WORKS
(*selective list*)

VOCAL

Ops: Baa Baa Black Sheep (3, D. Malouf, after R. Kipling), 1993, Cheltenham, 3 July 1993; Jane Eyre (Malouf, after E. Bronte), 1998–

MALCOLM MILLER

**Berkeley Manuscript** (*US-BEm* 744). Late 14th-century French collection of five theoretical treatises. *See* ANONYMOUS THEORETICAL WRITINGS, Cat.no.46.

**Berken, Jo.** *See* VERBEN, JOHANNES.

**Berkenstock, Johann Adam.** *See* BIRKENSTOCK, JOHANN ADAM.

**Berkovec, Jiří** (*b* Plzeň, 22 July 1922). Czech musicologist and composer. He attended the Prague Conservatory (1941–8), read musicology and psychology at Prague University (1945–9) and concurrently studied composition privately with Antonin Modr. A trained pianist, Berkovec often took part in concerts of Přítomnost, the Prague contemporary music society, and also toured Italy in 1957. He was editor of chamber and orchestral music at Czechoslovak Radio (1945–64), a lecturer in musicology at Prague University (1952–7) and editor-in-chief (1964–76) at the State Music Publishers, or Supraphon, as it was known from 1967. Subsequently he became a research fellow at the Prague Institute for Theatre Studies.

Berkovec's music expresses optimism and exuberance. His early works show the influence of Josef Suk and Prokofiev. In the 1970s and 80s he assimilated new compositional techniques, though always with the aim of combining this with a classical sense of thematic development. His most successful achievements include the science-fiction opera *Krakatit* and pieces written for Concertino Praga (a competition for young performers). Berkovec's importance as a musicologist is principally in his works on the history of Czech music from the 17th to 20th centuries and on the composers Ryba, Dvořák, Suk and Smetana.

WORKS
(*selective list*)

Ops: 12 mesíčků [12 Months] (children's op, J. Dolina), 1957; Krakatit (2, Berkovec, after K. Čapek), 1960; Hostinec u kamenného stolu [Inn at the Stone Table] (3, Berkovec, after K. Poláček), 1961; Epopej [Epopee] ('tramp opera parody', 2, Berkovec, after V. Rada and J. Žák), 1976

Orch: Stříbrný vítr [Silver Breeze], sym. poem, 1945; Nastal nám den veselý [A Merry Day has Begun], sym. fantasia, 1951; Sonatina, orch, 1956; Sonatina, vn, orch, 1956; Conc., fl, hp, orch, 1966; Vivat musica, sym., 1974; Ov., 1977; Conc. grosso for Concertino Praga, 1977; Tavba [Smelting], sym. poem, 1977; Rozmarné léto [Whimsical Summer], suite, 1981; Brixiana, sym. fantasia, 1986

Vocal: Návrat [Return] (F. Halas), Bar, SATB, orch, 1973; Vítej, máji [Welcome, May] (folk texts, F. Hrubín), SA, pf, 1955; 2 písně [2 Songs] (J. Seifert), S, fl, pf, 1956; Milostné písně [Love Songs] (medieval Czech poetry), SATB, fl, gui, 1984

Chbr: Sonatina, vn, pf, 1947; Malá suita [Little Suite], fl, ob, cl, bn, hn, str trio, db, 1954; Pastorální suita, 2 fl, va, vc, gui, 1971; Kvartetino, str qt, 1975; Minitrio, ob, cl, bn, 1996

MOJMÍR SOBOTKA

**Berkshire Festival.** *See* TANGLEWOOD.

**Berkshire Music Center.** *See* TANGLEWOOD.

**Berl, Christine** (*b* New York, 22 July 1943). American composer of dual US and Italian citizenship. Her first music teacher was her father, Paul Berl, an accompanist for Victoria de Los Angeles and a founding member of the Mannes College of Music. Ernst Oster was also a

primary influence. She studied at Mannes (1961–4) with Nadia Reisenberg (piano) and Carl Schachter (theory) among others, and at Queens College, CUNY (MA 1970), where her teachers included Weisgall and Perle; she later studied privately with Henry Weinberg and Yehudi Wyner. She has received commissions from the Chamber Music Society of Lincoln Center (1989), Peter Serkin (1990) and Pierre Amoyal (1991). From 1980 to 1997 she taught composition at Mannes.

Berl's style has been described as free of both modernist abstraction and neo-romantic nostalgia. *Sonata quasi una fantasia* (1988) is in a one-movement cyclical sonata form that evokes Ives's *Concord Sonata*. *The Violent Bear it Away* (1989) bases its phrase structure on the Southern Baptist hymn *I'm Going Thro', Jesus*. *Dark Summer* (1989), written for Frederica von Stade, treats the voice operatically. Indian metric and modal structures feature prominently in *Lord of the Dance* (1989).

KURT VON FISCHER/R

**Berlengerius de Oreim.** *See* BERNGER VON HORHEIM.

**Berlijn, Anton** [Aron Wolf] (*b* Amsterdam, 3 May 1817; *d* Amsterdam, 18 Jan 1870). Dutch conductor and composer. He studied the piano and violin with B. Koch and theory with K.H.W.L. Erck in Amsterdam. In 1836 he continued his studies at Kassel with Spohr. In 1839 he went to Leipzig for counterpoint lessons with G.W. Finck. In 1840 he returned to the Netherlands and tried in vain to save Dutch opera with the composition of *Die Bergknappen*, performed in 1841 in Amsterdam in Dutch translation (as *De Bergwerkers*). After a visit to Fétis, Berlijn lived in Paris from 1845 to 1846, where he gave a concert with the orchestra of the Opéra-Comique and the choir of the Théâtre Royal Italien. When he returned to Amsterdam in 1846 he became conductor of the orchestra of the municipal theatre in Amsterdam, but he soon left that post, devoting himself to composition and to the direction of several singing societies, teaching in Hebrew schools, and directing the music in the synagogue, for which he made rhythmical settings of Hebrew verses in four parts. King Willem II made him a Knight of the Crown of Oak; he was also elected an honorary member of musical organizations in other countries, including the Accademia di S Cecilia in Rome (1844), and was decorated by several foreign monarchs.

Stimulated by Erck and J.B. van Bree, Berlijn composed at least six operas, in *opéra comique* style, between 1835 and *c*1841, including *Die Bergknappen* (also known as *Les mineurs* or *Runal*), *Lodoiska*, *Les méprises par ressemblance*, *Bianca Capello*, *Proserpina* and *Le lutin de Culloden* (performed in Amsterdam in 1842 and Paris in 1846). In the same period several of his ballets were performed. A *Grande ouverture triomphale* op.66, dedicated to Mendelssohn, was printed in Amsterdam in 1842; the oratorio *Moses auf Nebo* was performed there in 1843 and praised by Berlioz in 1846. His Symphony no.2 in D op.104 was given at Kassel in 1857 by Spohr (who had heard it earlier in Amsterdam), and published in Leipzig in 1858. Berlijn's other works include a symphonic cantata, a mass, orchestral fantasies and virtuoso concertos with dedications to Gade and Liszt, two string quartets, a nonet for wind instruments and double bass, many partsongs for male or children's voices, solo songs and salon music. Most of his more than 500 compositions remain in manuscript (in *NL-At*).

HERBERT ANTCLIFFE/JOHN LADE/JAN TEN BOKUM

**Berlin.** Capital city of Germany. It was capital of the German empire from 1871 to 1945 and afterwards politically divided until 1990; it was designated capital of a reunited Germany in 1991. The first record of the city was in 1237, and during the 13th century it grew rapidly from a fishing village to a leading economic centre of the Hanseatic League. The city became the residence of the electors of Brandenburg in 1448 but initially had only occasional periods of musical prosperity. After 1701, when Elector Friedrich III became king of Prussia, Berlin's cultural life assumed greater importance, though at first it was superficial and dependent on foreign talent. In the 19th century musical life grew increasingly independent of the local court and churches, being supported more by private initiative; as the capital of the German empire, Berlin was one of the major cultural centres of Europe, a position which has been maintained despite political division. In 1945 the city was divided into four sectors, each controlled by one of the victorious powers. After an unsuccessful blockade of the western sectors by the Soviets in 1948–9, the city was granted special status and associated with the newly established Federal Republic of Germany (BRD). The Soviet sector became the capital of the German Democratic Republic (DDR), created in 1949. Until 1961, when the Wall was erected, Berliners were free to move within the city, though subject to control by DDR officials. After this the city was absolutely divided until the Wall came down on 9 November 1989.

1. SACRED MUSIC. The earliest evidence of the practice of sacred music in Berlin dates from 1465, when five choristers were registered in the cathedral seminary. Greater activity resulted from the introduction of Lutheran Protestantism in 1539. The Brandenburg liturgies of 1540 and 1572 provide the first information about the

*1. Berlin Sing-Akademie: engraving by Finden after R.W. Klose, c1830*

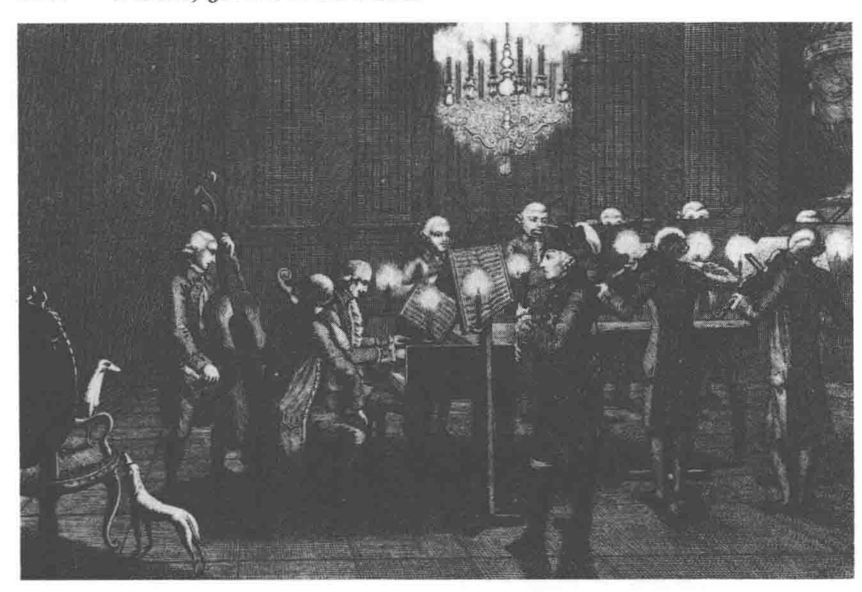
cultivation of sacred choral music; at the three principal churches, the Nikolaikirche, Marienkirche and Petrikirche, music was provided by the choirs of the city's two largest schools. In 1579 the first itinerant boys' choir was organized. The inadequate income from the church choirs often obliged impecunious choir directors to teach other subjects in grammar schools, in addition to composing music for both schools and churches: an example of this music is Johannes Crüger's *Hymni selecti* (1680).

During the 17th century sacred music reached its first zenith with the employment of Crüger (1622–62) and J.G. Ebeling (1662–8) as Kantors at the Nikolaikirche. Crüger's close associates included the composer Jacob Hintze and Paul Gerhardt, minister of the Nikolaikirche from 1657, who wrote many of the texts for Crüger's settings. Berlin's first collection of Protestant hymns, Crüger's *Newes vollkömliches Gesangbuch, Augspurgischer Confession* (1640), became one of the most popular hymnbooks of the time when it was published as *Praxis pietatis melica* (1647). After the conversion of the court to Calvinist Protestantism until the end of the Thirty Years War (1648), music in the cathedral declined; but in 1652 the elector charged Christoph Hasselberg with reviving the music of its services. Crüger's *Psalmodia sacra*, Berlin's first Protestant four-part hymn collection, was published in 1658 for use in the cathedral services. During the 18th century sacred music declined as musicians were increasingly attracted to secular organizations, and choristers joined the opera. R.D. Buchholz organized the first regular performances of sacred music at the Petrikirche, where he was musical director (1755–88); and J.G.G. Lehmann arranged church concerts by the combined choirs of the Nikolaikirche and Marienkirche (1778–1816). The repertory of the three major churches during the later 18th century consisted mainly of north German works.

The first concerts of sacred music presented outside the court and churches included those of an amateur chorus organized by the cathedral organist Gottlieb Hayne in the early 1720s. J.P. Sack (1722–63) continued this tradition and founded the Musikübende Gesellschaft (1749–63, about 20 members), which gave informal concerts in his house. In 1755 it gave the first performance of Carl Heinrich Graun's oratorio *Der Tod Jesu*, which was performed regularly on Good Friday in Berlin for the following century. After 1770 Handel's oratorios were included in both public and domestic concerts; J.F. Reichardt arranged the first Berlin performance of *Messiah* in May 1786.

The Sing-Akademie zu Berlin, established on 24 May 1791 as a weekly Singe Übung with amateurs and professionals by C.F.C. Fasch, is important in the city's history of choral music. It gave the first performance (Marienkirche, 1791) of sacred music in a Berlin church by a mixed choir; in 1793 it moved into the Akademie der Künste and assumed the name Sing-Akademie. Throughout its history it has been responsible for introducing significant works to the Berlin public. In the 19th century it presented mostly German and Austrian compositions, giving the first Berlin performances of Mozart's Requiem (1800) and Mendelssohn's *St Paul* (1838), but in the 20th century it included 18th- and 19th-century French and Italian sacred music in its programmes. In 1829 it moved into a new building next to the university which it occupied until after World War II (fig.1). Under its first directors, Fasch (1791–1800),

C.F. Zelter (1800–32), C.F. Rungenhagen (1833–51) and Eduard Grell (1853–76), the Sing-Akademie became one of the best vocal groups in Europe, a tradition that has been maintained. It was particularly important in the Bach revival, giving the first performances after his death of the *St Matthew Passion* (1829, conducted by Mendelssohn), the *St John Passion* (1833), the Mass in B minor (1834) and the *Christmas Oratorio* (1857). Georg Schumann, the chorus's director from 1900 to 1950, introduced Romantic repertory (including Verdi's Requiem in 1903) while maintaining the group's dedication to Bach and contemporary works. Under Schumann's direction the chorus began to tour, and by skilful negotiation he managed to keep it out of reach of the Ministry of Propaganda during the Third Reich and to prevent its dissolution after the war. He was succeeded by Mathieu Lange, who had a special interest in the Baroque repertory. Hans Hilsdorf (1930–99) was director from 1973 until his death, reviving the chorus's interest in the *a cappella* literature, with an emphasis on seldom performed sacred and secular works. The Sing-Akademie supported the Berlin PO from the orchestra's founding in 1882 by guaranteeing a series of annual concerts, a relationship which continued until 1990. After the destruction of its building in 1943 (later rebuilt by the Soviets as the Maxim-Gorki-Theater), the chorus had no permanent home until the new Philharmonie was built in 1963. The long-lost archive of the Sing-Akademie was rediscovered in 1999 in Kiev. A Berliner Sing-Akademie was founded in East Berlin in 1963; it was led by the distinguished choral conductor Helmut Koch, who was succeeded in 1989 by Achim Zimmermann.



The conservatism of the Sing-Akademie was balanced in the second half of the 19th century by the activities of the Sternscher Gesangverein (1847–1911), established by Julius Stern. His successors, who included Julius Stockhausen and Max Bruch, promoted the music of such contemporaries as Mendelssohn and Wilhelm Taubert as well as early music, and were encouraged by Joachim and Bülow. The Sternscher Gesangverein gave the first Berlin performances of many of Beethoven's sacred works, including the *Missa solemnis* (1856).

Despite the number of choirs active in Berlin in the 19th century, sacred music was performed only occasionally outside the church. However, it assumed a more important role in the city's concert life when the Lutheran Cathedral choir was reorganized by A.H. Neithardt (1843) and directed by Mendelssohn (1843–4) and Otto Nicolai (1847–9). By 1878 this choir numbered 50 boys and 15 men and consistently cultivated the tradition of male-voice settings. Under the direction of Hugo Rüdel (1903–33), who had become choral director at Bayreuth in 1906, the choir began to tour more frequently. After the fall of the monarchy, when court services at the cathedral (built 1894–1905) were discontinued, Rüdel prevented the choir's dissolution by persuading the city administration to take it over as the Staats-und Domchor, affiliated with the Berlin Hochschule für Musik (today the Hochschule der Künste). After the destruction of the cathedral in World War II, the mixed boys' choir sang in services in the cathedral crypt or in the Marienkirche until 1961. When the erection of the Wall forced the choir to suspend its activities (the churches were in the East, the Hochschule in the West), it moved to the Kaiser-Wilhelm-Gedächtnis-Kirche. With the rebuilt cathedral's re-dedication on 6 June 1993, the Staats- und Domchor (from 1973 under the direction of Christian Grube) returned to its former home.

The Catholic Hedwigskirche, consecrated in 1773, has had a choir since shortly after 1800. This has functioned as a cathedral choir since 1930, when the bishopric of Berlin was created and the church elevated to cathedral status. St Hedwig's was also destroyed in the war and seperated from its choir by the Wall. Karl Forster (1934–63) transformed the lay choir into an ensemble of international renown. His work was continued by Anton Lippe (1964–74) and Roland Bader (1974–91). Under Alois Koch (1992–8) the choir returned to its former home and merged with the cathedral choir founded in East Berlin in 1975. Since most of the singers did not accept the new Domkapellmeister Michael Witt, they founded in 1998 the Karl-Forster-Chor, led by Barbara Rucha.

The most important of the many choral societies founded in the 19th century include the Jähnsscher Gesangverein, established in 1845 by F.W. Jähns, who directed it until 1870; the Berliner Bachverein, a mixed choir founded in 1862 by Wilhelm Rust to promote early choral music and conducted by him until 1875; and the Cäcilienverein, which gave performances of exceptional quality from 1870 to 1902 under its director Alexis Holländer, concentrating on works by more contemporary composers, such as Brahms and Liszt (in 1872 it gave the first Berlin performances of Brahms's *German Requiem*, and in 1882 it performed Liszt's *Christus*).

2. Secular music. The first court ensemble was established early in the reign of Elector Joachim II of Brandenburg (1535–71) and had three organists in the 1540s. A wind ensemble, organized in 1542 with 12 trumpeters, one cornett player and one drummer, performed with the court band, chorus and organist both at the court and in the city churches. The first known court Kapellmeister, Johannes Wesalius, was appointed in 1572 by the Elector Johann Georg (1571–98); he was responsible for the introduction of the first string players into the court Kapelle (1582). During this time Hans Schreiber, the inventor of the contrabassoon (*c*1620), was engaged as instrument maker. A royal decree of 1580 acknowledged for the first time in Berlin the difference between sacred and secular music and announced that the elector expected a completely independent style at court. A library inventory of 1582 shows that, although German and French music was performed, the court repertory was dominated by the more popular Dutch composers. Although under Elector Joachim Friedrich (1598–1608) the court choir diminished to only three singers, the orchestra continued to expand, so that under Johann Sigismund (1608–19) it consisted of 37 musicians and was one of the largest orchestras of its time. From 1608 to 1611 the court employed the Protestant composer Johannes Eccard, a pupil of Lassus, and his successor Nikolaus Zangius (1612–18), introduced many English and Czech musicians. In 1619, when the famous English violinist and suite composer William Brade was there briefly, a violinist became Hofkapellmeister for the first time. Bartholomaeus Praetorius, whose collection *Newe liebliche Paduanen und Galliarden* was published in Berlin by Runge (1616), served as court musician and trumpeter (1613–20).

*2. Concert wth Frederick the Great as flute soloist: engraving by Peter Haas, late 18th century*

During the Thirty Years War the Kapelle deteriorated; by 1640 only seven musicians remained. However, by 1683 it had increased to 13, dominated for the first time by the strings. When Friedrich III (1688–1713) declared himself King Friedrich I in 1701, Berlin changed from an electorate to a royal residence and assumed correspondingly greater musical significance. The king enlarged the court orchestra, which by 1712 included 18 strings, eight wind and one harpsichord, occasionally augmented by the six brass of the hunting-band. The king's most lasting contribution to Berlin's cultural history was the establishment of the Akademie der Künste in 1696 for the promotion of Prussian arts, in which music was not included until the early 19th century. After the death (1705) of Queen Sophie Charlotte, who had enthusiastically supported Italian music and had herself frequently performed in numerous chamber concerts, French composers became more popular than Italian. During the reign of Friedrich Wilhelm I (1713–40), when Prussia was established through military strength and music at court became relatively unimportant, the orchestra was dispersed except for a few brass used for hunting and by the military; it was reassembled only on the accession of Friedrich II (Frederick the Great) in 1740.

At the court of Frederick the Great, music was integrated into court life to a greater extent than it had been before or was to be in the future. After his visit to Dresden in 1728 Frederick had had occasional flute lessons from Quantz, and after 1738 he also informally employed C.P.E. Bach, whom he engaged as principal harpsichordist when he became king. Bach remained until 1767, composing numerous works for the court, including the six 'Prussian' sonatas op.1 (1740–42), dedicated to the king. Christoph Nichelmann, a distinguished pupil of J.S. and W.F. Bach, served as assistant harpsichordist (1744–56) and was succeeded by C.F.C. Fasch. In 1741 Quantz became the king's flute teacher and organized regular evening house concerts, for which he composed almost 300 concertos and over 200 other works for flute. Frederick the Great also often performed in the concerts at Sanssouci, his castle in Potsdam (fig.2), and himself wrote over 120 flute sonatas for them. J.S. Bach wrote his *Musikalisches Opfer* as a result of his visit to the court in May 1747. Before 1750 the court orchestra was conducted by the violinists Franz and Johann Georg Benda, who with C.H. Graun also participated in the Potsdam chamber concerts.

The first initiative for public concerts in Berlin came from civic groups. As early as the 1720s the cathedral organist Gottlieb Hayne introduced public singing lessons. The court musician J.G. Janitsch organized private gatherings called 'Akademien', followed by C.F. Schale's Musikalische Assemblee; both gave small ad hoc performances of current instrumental music. Towards the end of Frederick the Great's reign, Berlin concert life began to be controlled by professional rather than amateur musicians as the demands and difficulties of the music increased. J.F. Agricola, C.L. Bachmann and the violinist J.F.E. Benda organized the Liebhaberkonzerte (1770), which continued for over 20 years, longer than any other contemporary musical organization. J.F. Reichardt established a series of *concerts spirituels* in 1783 on the Parisian model. J.C.F. Rellstab organized the Konzerte für Kenner und Liebhaber (1787), which presented sacred and secular, choral and instrumental works of popular mid-18th-century composers every fortnight in the homes of the group's members.

Berlin became the centre for a unique style of German lieder in the second half of the 18th century, practised by a group of composers which later became known as the Berlin Lieder School. The lieder were usually odes and strophic songs with simple piano accompaniment, some of which were collected by K.W. Ramler and C.G. Krause in *Oden mit Melodien* (1753–5) and by Marpurg in *Berlinische Oden und Lieder* (1756–63). A slightly more elaborate style was developed by the second generation – Reichardt, J.A.P. Schulz (*Lieder im Volkston*, 1782), F.L.A. Kunzler and Zelter (*Lieder, Balladen, und Romanzen*, 1810) – many of whose songs became popular throughout Germany. Zelter also established a Liedertafel (a group of 25 men who composed and performed works for each other) in 1809 which became a model for similar groups throughout Germany. In reaction to the exclusiveness of this organization, members of the third generation of the Berlin Lieder School, Ludwig Berger and Bernhard Klein, formed a Jüngere Liedertafel (1819) which included

such members as E.T.A. Hoffmann and achieved a notable standard.

In 1882 Siegfried Ochs founded a small choir to sing lesser-known choral works of Schubert, Brahms and Schumann; it expanded after six years and became the Philharmonischer Chor, and as the Hochschul-Chor (from 1920) it developed a reputation for precision (Klemperer was its director from 1928 to 1933). After the war it reassumed the name of Philharmonischer Chor and under Hans Chemin-Petit (appointed 1944) performed the standard repertory in West Berlin. Chemin-Petit was succeeded by Uwe Gronostay in 1981. The Bruno-Kittelscher Chor (1902–48), organized by Bruno Kittel and known after 1942 as the Deutsche Philharmonischer Chor, was also active in the performance of sacred music.

Of the numerous men's choruses founded in the 19th century, the Berliner Liedertafel and the Berliner Lehrergesangverein are both still active. The Liedertafel was formed in 1884 from a number of smaller groups. The Lehrergesangverein grew out of the singing section of the Berlin Teachers' Association and gave its first concert in 1887. From 1918 to 1934 it was directed by Hugo Rüdel. From 1962 it included women and in the 1990s under Erwin Gabrysch, it was a mixed chorus with the name Berliner Lehrerchor.

Among the many choruses formed since World War II, two deserve special mention. The Berliner Konzert-Chor (founded in West Berlin in 1954), especially during the long tenure of its director Fritz Weisse (1961–94), gave concert performances of seldom-performed operas, many of them broadcast on radio. A new chamber choir came into being in the early 1960s when Ernst Senff, choral director of the Städtische Oper, brought together a group of young singers from the Hochschule für Musik to explore the *a cappella* literature. In order to avoid confusion with the Hochschule's own choir, he called his group the Kammerchor Ernst Senff. It now includes professional and semi-professional singers and, though it gives no concerts of its own, is financed through performances with the large Berlin orchestras, in radio broadcasts and in recordings. Sigurd Brauns was appointed director of the Ernst Senff Choir in 1991.

Instrumental music was less keenly cultivated than vocal music during the early 19th century in Berlin. Karl Möser's soirées, in which members of the court orchestra played after 1816, introduced Beethoven's symphonies (the Berlin première of the Ninth Symphony was in November 1826). From 1801 the court orchestra gave two or three annual public concerts (Mendelssohn was its director in 1843–4). The court musicians Bohrer and Schick organized numerous private subscription concerts, as did the Blissener brothers early in the century; G.A. Schneider presented popular Musikalische Divertissements (1808–11) and Eduard Rietz founded a Philharmonische Gesellschaft (1826), an amateur orchestra which participated in the Sing-Akademie concerts. Despite the efforts of Wilhelm Taubert, who succeeded C.W. Henning (1840–48) as Kapellmeister and directed until 1883, and of his successors Ludwig Deppe (1870–88) and Joseph Sucher (1888–90), the court orchestra's repertory remained conservative throughout the 19th century. It became a fundamental part of the city's concert life under Felix von Weingartner (1892–1907), who added contemporary works to the programmes and raised the standard of performances. Between 1908 and 1920 the orchestra, called the Staatskapelle and remaining the orchestra of the Staatsoper after World War I, was directed by Richard Strauss. His successors, including Furtwängler (1920–22), Erich Kleiber (1923–34), Karajan (1940–44) and Barenboim (1992–), developed it into one of the major Berlin orchestras.

Although economic recessions of the early 19th century severely limited public musical performances, informal house concerts continued to flourish. In the first half of the century families such as the Mendelssohns and Nicolais arranged private performances; later Joseph Joachim and Clara Schumann organized private chamber concerts, and after 1869 Joachim gave public string quartet concerts. House concerts, which included a variety of solo works, chamber music and occasionally operas, became somewhat more formal in the early 20th century, with printed programmes available and audiences of up to 100. From 1914 to 1941 Marie von Bülow organized soirées at which most prominent musicians of the time appeared. From the early 19th century Berlin has been visited by almost every notable virtuoso and important soloist; for example, Paganini was enthusiastically received in 1829, Clara Wieck in 1835 and Joachim in 1853. In 1841 alone Liszt gave over 20 concerts there.

During the early 19th century the court's role as the main stimulus of Berlin's musical life was increasingly taken over by churches, schools and dilettante families. Foreign composers consequently became less popular and German music was more keenly promoted, though the city always remained cosmopolitan and musically eclectic. Some of the many private orchestras established during the 19th century achieved international recognition, particularly those of Josef Gung'l (1843–8), Karl Liebig (1843) – which from 1850 also accompanied the Sing-Akademie performances – and Wilhelm Wieprecht, who successfully led the Orchesterverein Euterpe. Benjamin Bilse formed the Bilsesche Kapelle (1867), which by 1882 numbered 70 professional musicians, of whom 54 then left to organize the Philharmonische Orchester, promoted by the impresario Hermann Wolf and directed by Franz Wüllner. This later became the Berlin PO. Joachim was appointed conductor (1884) and was succeeded by Bülow (1887); early guest conductors included Richard Strauss, Tchaikovsky, Grieg and Brahms.

The orchestra became the finest in Berlin with a large and varied repertory; under Arthur Nikisch (1895–1922; fig.3) it made several international tours and gained a reputation which was solidified by his successor, Wilhelm Furtwängler (1922–45). Furtwängler acquired a municipal subsidy, for which the orchestra had to give 20 popular annual concerts. After the destruction (1944) of its concert hall, the Philharmonie (fig.4), the orchestra played in the cathedral, the Beethovenhalle, the Admiralspalast (now the Metropol-Theater) and the Titania-Palast (a converted cinema). The last concert before the fall of the city was on 15 April 1945 but concerts began again as early as 26 May 1945 at the Titania-Palast, conducted by Leo Borchard. After Borchard's death (1945) the young Romanian Sergiu Celibidache came from the Hochschule für Musik to direct the orchestra. In 1947 Furtwängler returned to the orchestra and was appointed chief conductor for life in 1952. He was succeeded on his death (1954) by Herbert von Karajan, who until shortly before his death in 1989 maintained the ensemble as one of the major international orchestras,

* PHILHARMONIE. *

Montag den 14. October 1895, Abends 7½ Uhr sehr präcise

I. Philharmonisches Concert.

Dirigent:

**Arthur Nikisch.**

Solist: **Josef Hofmann** (Klavier).

PROGRAMM.

1. Ouverture zu: „Leonore" No. 3, C-dur . . . *L. v. Beethoven.*
2. Symphonie No. 5, E-moll, op. 64 (zum 1. Mal) . . . . . . . . . . . . *P. Tschaïkowsky.*
   Andante. Allegro con anima. — Andante cantabile, con alcuna licenza. — Valse. Allegro moderato. — Finale. Andante maëstoso.
3. Klavier-Concert E-moll . . . . . . *F. Chopin.*
   (Instrumentirt von Adam Müncheimer aus Warschau).
   Allegro maëstoso. — Romanze. — Rondo.
4. Ouverture zu: „Tannhäuser" . . . . *R. Wagner.*

**Concertflügel: BECHSTEIN.**

II. Philharmon. Concert: Montag den 28. October 1895.

Dirigent: **Arthur Nikisch.**

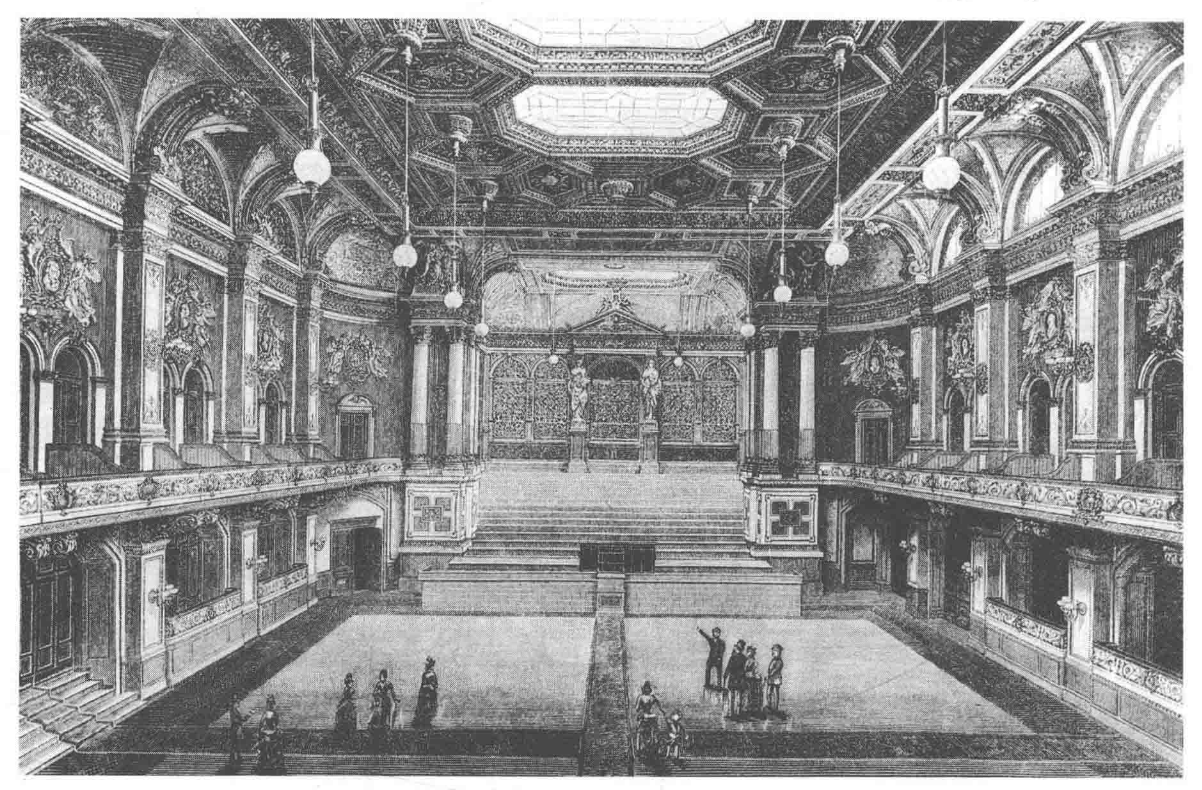
Solist: **Raimund von Zur-Mühlen.**

**Goldmark:** Ouverture zu „Sakuntala". — **Wagner:** Preislieder aus den Meistersingern. — **Bach:** Präludium, Adagio und Gavotte für Streichorchester (z. 1. Mal). — Lieder. — **Brahms:** Symphonie No. 2, D-dur.

*3. Programme of Arthur Nikisch's first concert as conductor of the Philharmonische Orchester, Berlin Philharmonie, 14 October 1895*

with a repertory primarily from the late 18th century to the early 20th. He conducted in the new concert hall of the Hochschule für Musik until 15 October 1963, when the orchestra moved into the new Philharmonie by the Tiergarten in the Kemperplatz: it was designed by Hans Scharoun, and is Berlin's largest concert hall (capacity 2440; fig.5). Claudio Abbado was appointed chief conductor in 1990. He was succeeded by Simon Rattle, as chief conductor and artistic director (effective from 2002).

By World War I Berlin was one of the major musical centres of the world, attracting leading soloists and orchestras and maintaining an unusually active concert life. In 1939 the city's 81 orchestras, 200 chamber groups and over 600 choruses performed in over 20 concert halls, numerous churches and homes. Since the 19th century the city has been the home of many smaller ensembles including the Blüthner-Orchester (founded 1907) and the Berlin Tonkünstlerorchester; some of these ensembles, such as the Barock Orchester, the Haydn-Kammerorchester and the Mozart Orchestra, continue to be active.



The most important ensembles established in divided Berlin were the Berlin Sinfonie-Orchester (Berlin SO) and the Symphonisches Orchester Berlin (SO Berlin, today the Berliner Symphoniker). The Berlin SO, founded in 1952 in East Berlin, is the resident orchestra of the rebuilt Schauspielhaus (known since 1984 as the Konzerthaus) on the Gendarmenmarkt. Under the direction of Kurt Sanderling (1960–77), the orchestra's repertory ranged from the Baroque to contemporary East German compositions. Michael Schönwandt was chief conductor from 1992 until 1998. He will be succeeded in 2001 by Eliahu Inbal.

The SO Berlin was established in the West in 1967 under the artistic direction of C.A. Bünte. In addition to subscription concerts in the Philharmonie and Konzerthaus, offering a broad programme at affordable prices, the orchestra presents family concerts, school workshops and performing opportunities for promising young talent; it also accompanies amateur choirs. Subsequent chief conductors have been Theodore Bloomfield, Daniel Nazareth, Alun Francis and, from 1997, Lior Shambadal.

The Berliner Funk-Orchester (Berlin RO) was the first German orchestra organized exclusively for radio and played in the first German broadcast on 29 October 1923. The current Rundfunk-Sinfonieorchester Berlin (Berlin RSO) considers itself the successor of this orchestra, whose chief conductors included Bruno Seidler-Winkler, Eugen Jochum, Sergiu Celibidache and Hermann Abendroth. It moved to the East German broadcasting house in 1952 and only in 1995 returned to its original home in Masurenallee. Rafael Frühbeck de Burgos was chief conductor from 1994 to 2000. The Deutsche Symphonie-Orchester Berlin (chief conductor, Kent Nagano) is the successor to the RIAS-Symphonie-Orchester Berlin, which was founded in 1946 by Walter Sieber. Among its principal conductors were Ferenc Fricsay (1948–54 and 1960–63), Lorin Maazel (1964–75) and Vladimir Ashkenazy (1995–9). Both this orchestra and the Rundfunk-Sinfonieorchester Berlin have also made many important commercial recordings.

The history of the radio choruses also dates from the beginning of broadcasting. After the Rundfunkchor Berlin was dispersed during the last year of the war, Helmut Koch re-established a group of solo singers in 1945 and then a large radio chorus in 1948; in 1974 the two ensembles, which served the East German Radio, were consolidated. The Rundfunkchor Berlin is directed by Robin Gritton. In 1946 Karl Ristenpart founded a radio chorus to serve RIAS Kammerchor, the forerunner of the RIAS, which has been a permanent ensemble since 1948. Under the direction of Günther Arndt (1954–72) it acquired international recognition, particularly for the performance of contemporary music. Marcus Creed was appointed director in 1986 and has emphasized authentic performances of Baroque music.

Through the presence of such composers as Schreker, Krenek, Schoenberg and Busoni, Berlin became an important centre for modern music in the years after World War I. Between 1933 and 1945 activities of progressive composers suffered from political suppression, but revived quickly after the war and the return to the city of Boris Blacher (1948) and Werner Egk (1950). After the war a new generation of composers was trained in both halves of the city, in the East principally by Rudolf Wagner-Régeny (whose most prominent pupil among today's Berlin composers is Siegfried Matthus), and in the West by Boris Blacher, whose most eminent Berlin pupil is Aribert Reimann. Through the efforts of the Akademie der Künste and the Gruppe Neue Musik Berlin has become more influential in the promotion of modern music; numerous studio concerts attract many composers to the city. In addition to the series of contemporary music concerts ('Musik der Gegenwart') at the Sender Freies Berlin (SFB), there are two important festivals of contem-

*4. Interior of the old Philharmonie: engraving by Emil Ost, 1889*

porary music: 'Insel-Musik' (its name inspired by the 'islands' from which the composers featured in the first festival came: Japan, Java and Berlin), which was founded in the early 1970s by the Berlin composer Erhard Grosskopf; and the Musik-Biennale, which has taken place since the 1960s in East Berlin and is now part of the Berliner Festspiele (Berlin Festival).

3. Opera. Dramatic presentations involving singers and instrumentalists are recorded in Berlin from the 16th century, when performances were given at the royal residence. In the early 17th century these events probably included Italian comic plays with music, for which the first Italian singers were brought to Berlin as early as 1616. However, appreciation of opera developed relatively late in the city, as it depended for its support on a monarchy that had little interest in the genre. After the Thirty Years War rapid population growth and the increased political power of the city led to further wealth among the nobility, creating a demand for music that local talent could not satisfy. At the court of Elector Friedrich III (from 1701 King Friedrich I of Prussia) Italian and French ensembles frequently appeared, and interest in the French ballet spectacles was great.

More significant developments were initiated by Friedrich's second wife, Sophie Charlotte, who was particularly fond of musical comedies; she introduced elaborate productions known as 'Wirtschaften', for which dancing-masters and stage and costume designers were employed. All performances took place on a temporary stage in the main palace until the queen had a small theatre built in the new Lietzenburg Palace (now the Charlottenburg Palace), completed in 1699. On 6 June 1700 the first Berlin production of an Italian opera, *Atys, o L'Inganno vinto dalla Costanza* by Ariosti, was staged there. Usually only selected members of the court (including the queen's tutor Leibniz) were allowed to participate; the queen herself frequently accompanied at the harpsichord, while other guests joined in the dancing and singing. These events also stimulated interest in circles outside the court; private performances for paying guests were occasionally arranged, for example at the home of the city treasurer Hessing (1702–7).

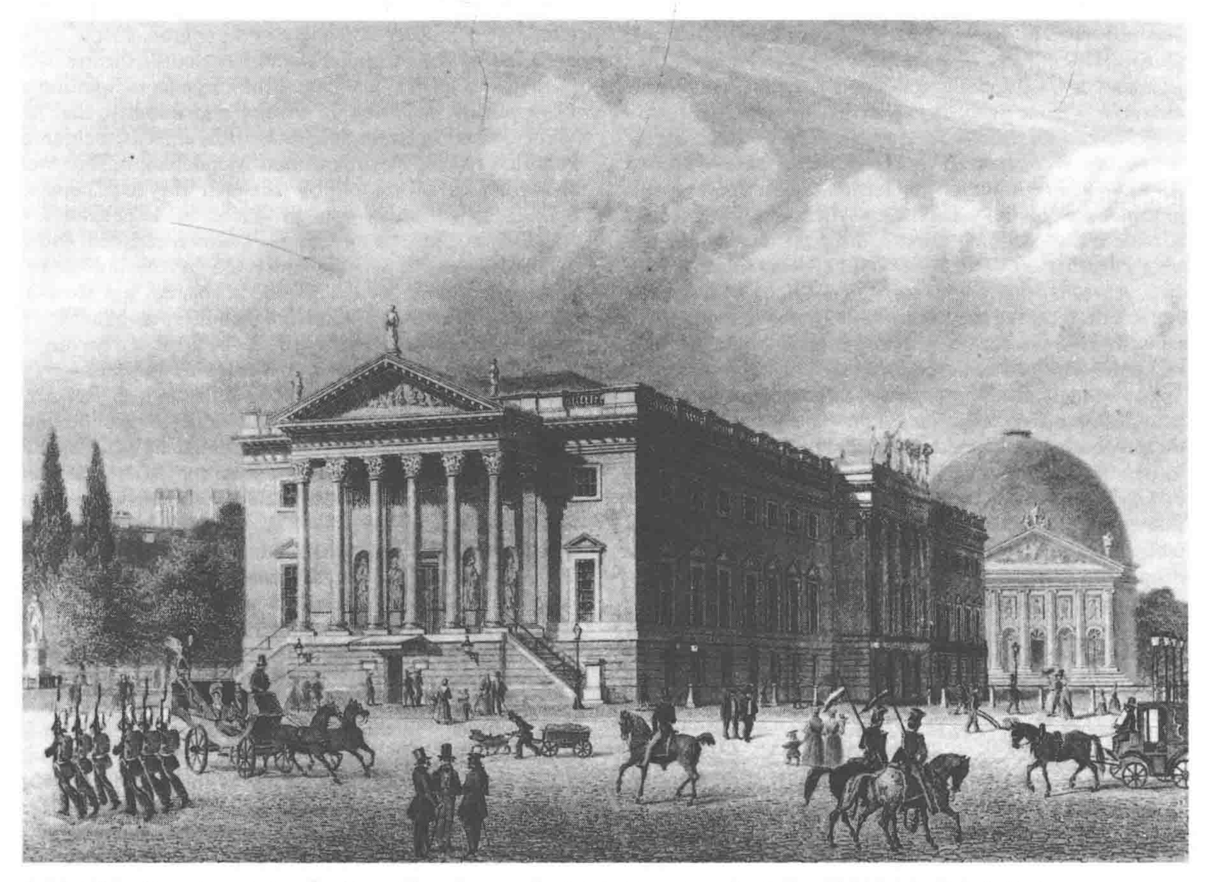
The death of Sophie Charlotte in 1705 ended the first period of musical prosperity, as her consort Friedrich I had less enthusiasm for music. Singspiel performances, including Ariosti's *Mars und Irene* (1703) and A.R. Stricker's *Der Sieg der Schönheit* (1706), continued in rooms of the residence. Under Friedrich's successor, Friedrich Wilhelm I, operatic life declined sharply as the king was interested mostly in hunting and military affairs and eventually forbade all performances by foreign ensembles. The theatre in Lietzenburg was initially used by performing acrobats and jugglers, but the king had it entirely dismantled in 1723.

As crown prince, Friedrich (later Friedrich II, known as Frederick the Great) had been impressed by a performance of J.A. Hasse's *Cleofide* in Dresden and resolved that his Berlin court would equal the brilliance of that city. Shortly after his accession (1740) he commissioned the architect Knobelsdorff to construct a new opera house. As early as July 1740 the newly appointed Kapellmeister C.H. Graun was sent to Italy to recruit singers, among them Giuseppe Santarelli, while dancers were sought in France. The king also ordered his architect to erect a stage in the royal palace, where on 13 December 1741 Graun's *Rodelinda* was presented. The new opera house opened on 7

*5. Interior of the new Philharmonie, opened 1963*

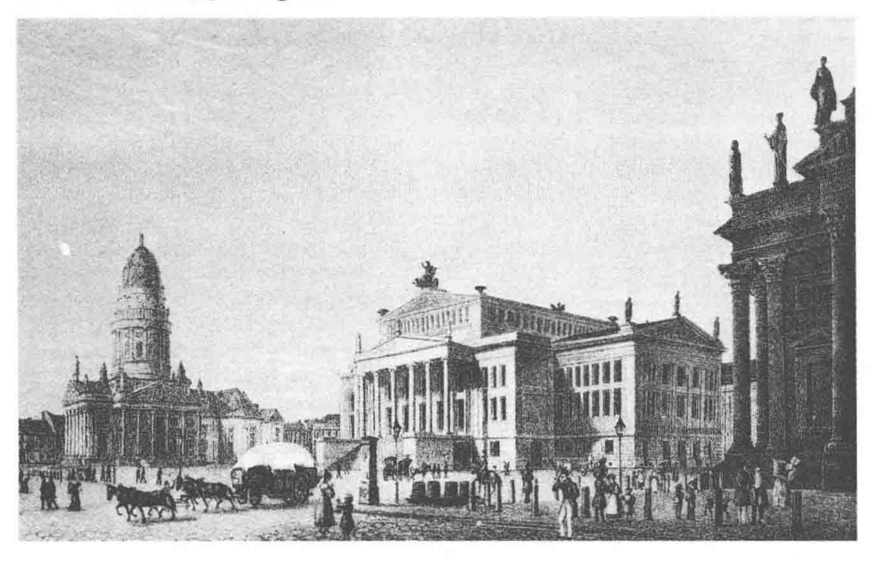
December 1742 with Graun's *Cleopatra e Cesare*. In the following years the opera season lasted from November to March, with performances twice a week and on special occasions; the operas were seldom repeated more than four times and two new works, usually by Graun, were introduced each season; he also conducted the orchestra (about 35 players) from the harpsichord. The audience was generally restricted to members of the court and their guests, but at Frederick's command all army officers attended, and properly dressed citizens were admitted. As Frederick retained his enthusiasm for Hasse's Italian operas, Graun modelled much of his music for the Berlin opera on them. Within 15 years 29 of Graun's works were staged, and many by Hasse. The king himself scrutinized all musical productions at court, selecting librettos, supervising the design of costumes and scenery and even writing arias for some productions, for example Graun's *Coriolan* (1749); he also wrote the libretto to Graun's *Montezuma* (1755) in French prose and had it translated into Italian verse by the court poet. The Berlin opera was recognized as one of the finest in Germany and enjoyed a period of grandeur that was not surpassed until the late 19th century. The company included such outstanding singers as Molteni, the castrato Salimbeni and the ballerina La Barbarina. Giuseppe Galli-Bibiena was set designer from 1751 until his death in 1756.

This period ended after Graun's last opera *Merope* (1756), when political events interrupted the city's cultural development. During the Seven Years War (1756–63) the opera house was closed and the ensemble dispersed. Graun died in 1759 and J.F. Agricola, a pupil of J.S. Bach, was appointed Kapellmeister after the war (1765). The opera house was reopened on 20 December 1764 with a revival of *Merope*, but from this point onwards interest in Italian opera declined. The appearance of the first German prima donna Gertrude Elisabeth Mara (née Schmehling) in 1771 and the appointment of J.F. Reichardt in 1775 did much to restore the distinction of the opera house.



Comic opera had a small but significant place in Berlin during Frederick's reign, though his partiality for *opera seria* prevented it from achieving the popularity it had enjoyed under Sophie Charlotte. In 1745 the king had a small theatre built in the Potsdam palace by Knobelsdorff, where comic opera was performed by travelling companies for royalty and nobility. In 1747 an Italian troupe was summoned and performed *opere buffe* (e.g. Pergolesi's *La serva padrona*, 1748); the success of these productions prepared for the introduction of Singspiel and hence the end of Italian operatic domination in Berlin. One of the first definite impulses to the new German opera came from England; in 1743 the ballad opera *The Devil to Pay* was presented in Berlin in German translation as *Der Teufel ist los*.

As German theatre became more popular in Berlin, Singspiel also gradually became established. Between



1771 and 1775 H.G. Koch produced 36 German and foreign plays with incidental music at a theatre in the Behrenstrasse, near the present site of the Komische Oper; on Koch's death in 1775 C.T. Döbbelin acquired both the theatre and privilege from Koch's widow. He established the first permanent Singspiel theatre in Berlin and produced such demanding works as Anton Schweitzer's *Alceste*, and *Belmont und Constanze, oder Die Entführung aus dem Serail*, written by the Kapellmeister Johann André for the theatre in 1781. By 1785 Frederick the Great was no longer attending the royal opera, and Berlin's nobility lost interest in Italian opera, preferring Singspiel; as a result the number and quality of performances by Döbbelin's ensemble rose in the next few years, eventually exceeding those of the Italian house. Frederick the Great had considered Gluck's operas worthless, but Döbbelin added them to the repertory in 1783. On his accession in 1786 Friedrich Wilhelm II allocated the disused French Theatre to Döbbelin and gave his troupe financial support. Named the Nationaltheater, it opened on 5 December 1786. Unlike the royal opera (which was closed for repairs from 1786 to 1788) this house did not specialize in Italian *opera seria*, and became the site of important developments in the city's opera history. Standards began to slip and Döbbelin was soon replaced by J.J. Engel, who worked vigorously to improve the musical and dramatic level of the Nationaltheater. Dittersdorf's *Doktor und Apotheker* was enthusiastically received there in 1787 and helped to make him the most popular composer in the city during his visit in 1789. The first Berlin performance of a Mozart opera, *Die Entführung aus dem Serail*, was mounted at the Nationaltheater in 1788 but was not well received. Mozart himself was only politely welcomed when he visited Berlin in the same year as Dittersdorf (1789), though the king offered him a position as Kapellmeister. In 1790 *Le nozze di Figaro* and *Don Giovanni* had successful performances at the Nationaltheater.

In the 20 years between the death of Frederick the Great and the French occupation of the city in 1806, German opera established itself firmly in this theatre, superseding *opera seria* at the royal opera house. This was largely due to B.A. Weber, Kapellmeister of the Nationaltheater from 1792 until his death in 1821, who keenly promoted operas by Mozart and Gluck; he himself composed numerous works. His productions of Mozart's *Die Zauberflöte* (1794; this has been the opera most frequently performed in Berlin) and of Gluck's *Iphigénie en Tauride* (1795) equalled the standard of the royal opera house and marked the end of Italian domination of Berlin opera.

The renovated Königliches Opernhaus (fig.6) reopened in 1788 with Reichardt's *Andromeda*. The composer had been retained by Friedrich Wilhelm II, who commissioned him to write several operas for the court. A performance of Dittersdorf's oratorio *Hiob* (1789) was the first occasion on which citizens were allowed to buy tickets for the court opera. Reichardt's most famous opera,

*6. Königliches Opernhaus, designed by Georg Wenceslaus von Knobelsdorff and opened in 1742, with (right) the Hedwigskirche: engraving, early 19th century*

*7. Schauspielhaus, Berlin, designed by Karl Friedrich Schinkel and opened in 1821, with (left) the German Cathedral and (right) the French Cathedral: lithograph, c1840*

*Brenno*, had a successful première on the queen's birthday that year; a concert performance in 1798 was the first time a complete opera in German was sung at the royal opera house. Although Reichardt followed the models of Graun and Hasse, his operas were appreciably less italianate, approaching the style of German works performed at the Nationaltheater, for which he also composed. He initiated a form which he called the Liederspiel, usually a comedy with popular songs which was produced informally in homes as well as in theatres. During Reichardt's absence in 1789 the Italian Felice Alessandri was appointed second Kapellmeister. Reichardt fell from grace in 1793; his opera *L'olimpiade* (1791) was his last work for the Berlin court opera. Alessandri was replaced by the more capable Vincenzo Righini (1793); however neither his Italian operas nor a notable production of Gluck's *Alceste* (1796) could stimulate the declining interest in *opera seria*. After the king's death in 1797 the opera house was again closed for two years. During the reign of Friedrich Wilhelm III, Reichardt returned to Berlin (1799) and Italian opera temporarily revived, but the lavish productions did not reach the standard achieved formerly.

The Königliches Opernhaus was closed during the two years of French occupation (1806–7), but the Nationaltheater, no longer dependent on royal subsidy, continued its productions in the Schauspielhaus, the new house built by Carl Langhans, which it occupied from 1802. In 1807 the royal opera and the Nationaltheater companies merged as the Königliche Schauspiele, but maintained the distinction between the two repertories. All performances were open to the general public. Under the direction of A.W. Iffland (1811–14) German opera was performed more frequently, though the royal opera house repertory was still entirely adapted to the king's wishes. Iffland supervised productions of Spontini's *La vestale* (1811) and *Fernand Cortez* (1814), Weber's *Silvana* (1812) and *Abu Hassan* (1813), as well as works by Méhul and Boieldieu. His successor, Karl von Brühl, was given the task of making the royal theatre the finest in Germany and at first received enthusiastic support from Friedrich Wilhelm III. Scenery and costumes became more realistic and productions more dramatic. Brühl was responsible for the Berlin première of Beethoven's *Fidelio* (1815), the world première of E.T.A. Hoffmann's *Undine* (1816, with sets by Schinkel), as well as revivals of works by Gluck. In the decade 1815–25 Rossini's works became the most popular in Berlin. Against the wishes of Brühl, who hoped to secure Weber as Kapellmeister, the king engaged Spontini and created for him the title of general music director in 1820. Only five weeks after the first performance of Spontini's *Olympia*, Brühl produced the successful world première of Weber's *Der Freischütz* (18 June 1821) under the composer's direction in the new Schauspielhaus designed by K.F. Schinkel (fig.7; Langhans's theatre had burnt down in 1817). Whereas the audience of Spontini's work mostly consisted of royalty and nobility, that of Weber's was largely made up of wealthy citizens, including Heinrich Heine, Hoffmann and Mendelssohn; this was symptomatic of the rivalry between the two houses. Spontini's *Nurmahal* was produced in 1822 and his *Alcidor* in 1825; although the works satisfied court demands, neither was well received by the public. As Spontini's popularity decreased, Brühl had less trouble asserting his wishes at the Königliches Opernhaus. Four years before his retirement in 1829 he arranged performances of Spohr's *Jessonda* and Weber's *Euryanthe*.

Despite Spontini's opposition, Wilhelm von Redern, Brühl's innovatory successor, was able to expand the repertory in both sections of the Königliche Schauspiele and included more operas by German composers. He was responsible for the successful Berlin premières of Spohr's *Faust* (1829) and Meyerbeer's *Robert le diable* (1832), as well as the world première of Marschner's *Hans Heiling* (1833). Works by Albert Lortzing, however, were first heard in this theatre some time after their first performance, *Zar und Zimmermann* in 1849 and *Hans Sachs* in 1851. Nevertheless, during the 1830s German works performed at the royal opera house remained in the minority, while those by the French (Auber and Méhul) and the Italians (Bellini, Donizetti and especially Rossini) took precedence.

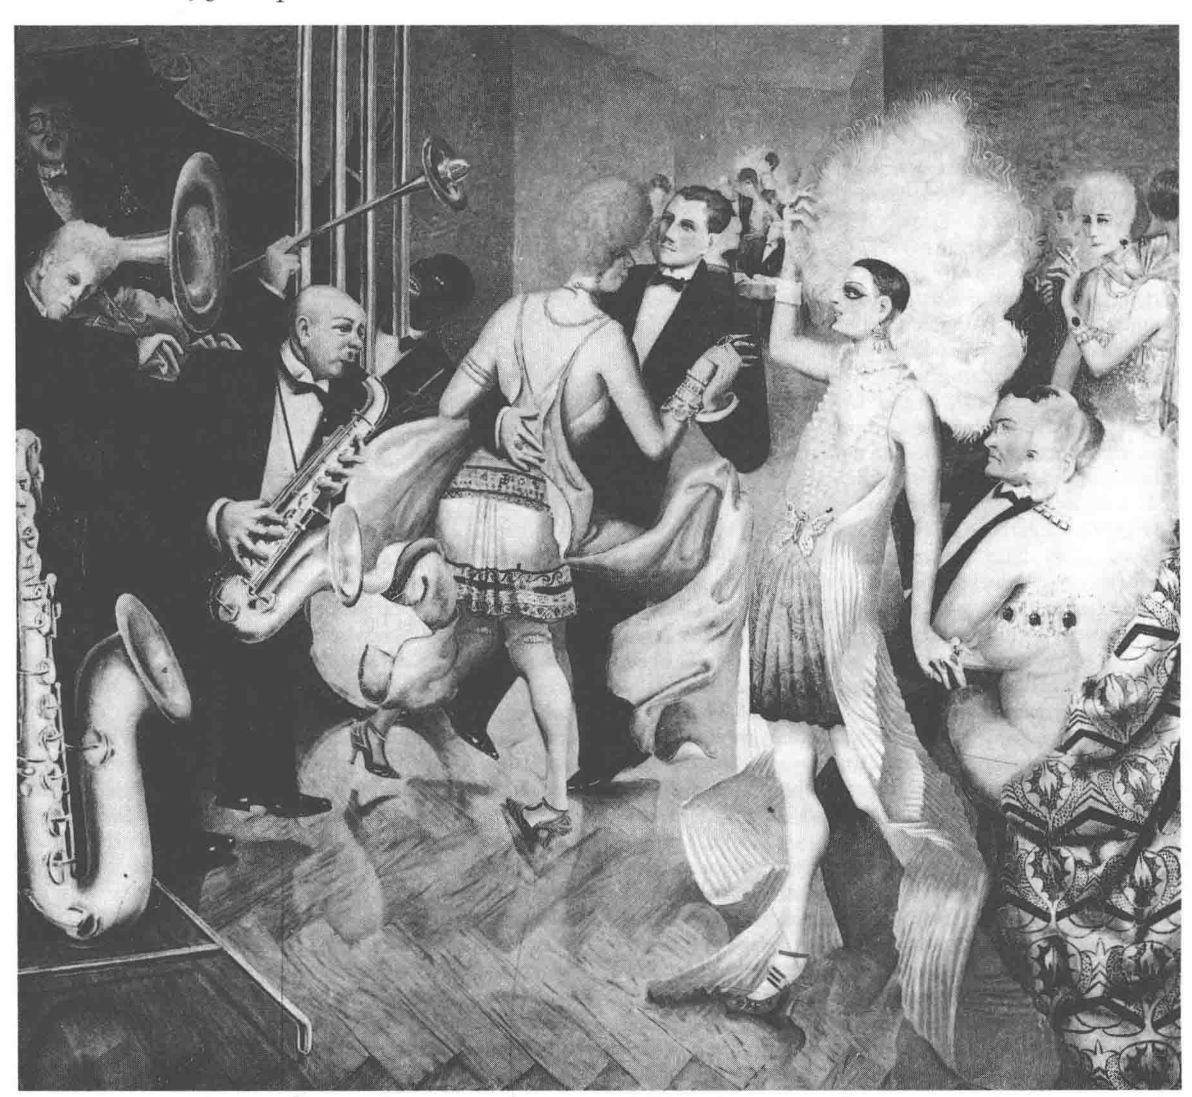
On the accession of Friedrich Wilhelm IV in 1840, Spontini lost his support at court and was dismissed in 1841. Lortzing, Marschner and Mendelssohn were considered for the position, but after an impressive production of *Les Huguenots* in 1842 Meyerbeer was named Spontini's successor. Spontini had enlarged the opera

orchestra from 78 to 94 members; Meyerbeer now secured greater financial benefits for the musicians. Also in 1842 Redern was appointed to the newly created position of general administrator of court music. The conservative K.T. von Küstner, who replaced him as director of the royal opera, was an administrator rather than a musician; he refused the world premières of *Der fliegende Holländer* and *Tannhäuser* and diminished the repertory during his nine years of service. However, this was partly because the audience now usually consisted less of royalty than of paying guests whom Küstner sought to please. On 18 August 1843 the Königliches Opernhaus burnt down, and performances were held in the Schauspielhaus during reconstruction. Lortzing's *Der Wildschütz* had its Berlin première there (1843), as did *Der fliegende Holländer* (1844), conducted by the composer (the first Wagner opera produced in Berlin). The new opera house, reconstructed, modernized (with gas lighting) and enlarged by C.F. Langhans the younger, was opened on 7 December 1844 with Meyerbeer's *Ein Feldlager in Schlesien*.

Two years later *Rienzi* was given its first Berlin performance; however, neither it nor *Der fliegende Holländer* was successful and both were removed from the repertory until the late 1860s. After an absence from the city of three years, during which Wilhelm Taubert had acted as general music director, Meyerbeer was finally dismissed from that post by the king on 26 November 1848. In the same year Otto Nicolai took up the appointment of Kapellmeister at the opera; Nicolai died on 11 May 1849, two months after the première of his *Die lustigen Weiber von Windsor*, and was succeeded by Heinrich Dorn.

Under Botho von Hülsen, who replaced Küstner as director in 1851, the royal opera began to prosper even more. Meyerbeer's grand operas and works by Italian and French composers dominated the repertory for the next three decades. Hülsen assembled outstanding singers (Lilli Lehman, Albert Niemann, Theodor Wachtel, Désirée Artôt and Adelina Patti), but performances suffered because of an inadequate orchestra until Carl Eckert replaced Dorn as Kapellmeister in 1869. As operatic tastes of both court and public became more conservative, Hülsen grew more cautious, retaining only well-established works in the repertory.

The production of *Tannhäuser* (1856) was the first successful performance of a Wagner opera in Berlin, and the production of *Il trovatore* at the royal opera (1857) marked the first performance of an opera by Verdi there. Although it was successful, later productions of Verdi's operas (*Rigoletto* and *La traviata*, 1860) were coolly received. In 1876, six years after a production of *Die Meistersinger von Nürnberg* had caused a scandal in the royal opera, Hülsen successfully staged the first Berlin performance of Wagner's *Tristan und Isolde*. As comic opera became more popular, works by Offenbach came to be regarded as fit for the court opera, and his operas were added to those of Rossini in the repertory. During the 1870s Berlin's population approached one million; the demand for opera increased and daily performances were instituted.



However, after Eckert's death in 1879 there was a dearth of good conductors; neither Robert Radecke nor Heinrich Kahl adequately fulfilled the demands of the post, and Bülow referred to the royal operas as 'von Hülsen's circus'. When Botho von Hochberg became director in 1886, he concentrated on improving this situation, and by the early 1890s the court opera had three good conductors, Weingartner, Carl Muck and Josef Sucher. Under Hochberg, Wagner's works became part of the standard repertory, partly as a result of the first performance in the royal opera of the *Ring* in 1888 (the Berlin première had been given at the Viktoria-Theater in 1881 by the Angelo Neumann touring company) and a spectacular production of ten Wagner operas from *Rienzi* to *Götterdämmerung* in chronological order in June 1889. Nevertheless, the staple of Berlin opera was still provided by Ponchielli, Verdi and Mascagni.

After Weingartner left the royal opera in 1898, Richard Strauss shared the position of First Prussian Kapellmeister with Carl Muck and added new works to the repertory. Hochberg and Emperor Wilhelm II had refused to mount the première of Strauss's *Feuersnot* in 1900, not realizing that Strauss was one of the most important composers of the day. Thereafter Strauss refused to allow a single first performance of his operas in Berlin. *Feuersnot* was presented in 1901, and *Salome* in 1906. That year Leo Blech joined Strauss and Muck as First Prussian Kapellmeister. In 1905 Strauss requested a reduction of duties to allow more time to compose and (following a year as Royal Prussian Generalmusikdirektor) in 1910 was released from his contract, although he continued to conduct (mostly his own operas) until 1920.

As at its beginning under Friedrich II, the last era of royal opera (1903–18) was characterized by the court's active participation in operatic administration. Wilhelm II took an interest in selecting the repertory and in stage design, and though the artistic quality of the productions occasionally suffered, stagings were always lavish and pompous. A result of this interest in opera was the commission of Leoncavallo's *Der Roland von Berlin*, first performed in 1904. In the previous year the emperor had welcomed the resignation of Hochberg and replaced him by Hülsen's son Georg von Hülsen-Haeseler, who remained until World War I disrupted operatic activity in the city. Under the new Intendant many older works were revived, while operas by Tchaikovsky, Puccini and Richard Strauss received their Berlin premières, including the successful production of *Der Rosenkavalier* in 1911.

During World War I performances continued at the Königliches Opernhaus (though somewhat less frequently than before) largely through the efforts of Strauss, who assisted the new director, Droescher, during the 1918–19 season, following Hülsen-Haeseler's resignation. Court opera in Berlin came to an end at the same time as the Prussian monarchy; in November 1919 it was placed under the administration of the Ministry of Culture and renamed the Staatsoper.

The modern golden age of the Staatsoper in Unter den Linden was unquestionably the period between the end of World War I and the rise of the Nazis in the early 1930s. Under the direction of the Generalintendant, Max von Schillings, the aristocratic house was successfully transformed into a company reflecting Germany's new democratic ideals. Without neglecting the classical repertory, he emphasized works of contemporary composers such as Busoni, Pfitzner (*Palestrina*, 1919) and Schreker. Before the unification of Germany in 1871 the Berlin opera had been the finest in Prussia; afterwards it became the best in the country, and after World War I it was among the best in Europe. There were only three premières

8. *'Metropolis': central panel from the triptych by Otto Dix, 1927–8 (Gallerie der Stadt Stuttgart)*

between 1850 and 1918, but 12 in the period 1919–32, including Schreker's *Der singende Teufel* (1928), Milhaud's *Christophe Colomb* (1930) and Pfitzner's *Das Herz* (1931). The repertory grew to be one of the largest anywhere; in the 1926–7 season 66 different operas were performed. One month after Schillings's resignation in November 1925, the Staatsoper gave the world première of Berg's *Wozzeck*, which Erich Kleiber conducted after nearly 100 rehearsals. Despite the ensuing controversy, this work received 23 performances, proving Berlin's open-minded attitudes to contemporary music. Both Leo Blech and Fritz Stiedry, who had conducted the opera from 1906 and 1916 respectively, left in 1923 and were replaced by Kleiber, Wohllebe, Szell, Ernst Praetorius and Selmar Meyrowitz. After a year of renovation and modernization, the Staatsoper reopened on 19 November 1927. Under its new Generalintendant Heinz Tietjen, who was to take a leading role in the operatic life of both Berlin and Bayreuth until the end of World War II, it performed mainly German works, especially those of Wagner, in some cases surpassing the precision of Bayreuth.

Whereas under the monarchy the opera had mostly reflected the wishes of the Prussian court, between 1933 and 1945 the Staatsoper, though intended to serve all Berlin's citizens, was strictly controlled by the Prussian state ministry under Göring. The Nazis' suppression of political dissent and their systematic anti-Semitism drove many of Berlin's leading performers into exile or early retirement. Kleiber resigned in 1934. The works of Musorgsky and Tchaikovsky were added to the repertory, but operas by other composers, notably Berg, Hindemith, Krenek, Schreker and Stravinsky, were prohibited. Nevertheless, ten important world premières took place during these 12 years, including Egk's *Peer Gynt* (1938) and Wagner-Régeny's *Die Bürger von Calais* (1939). Despite the depletion of the Staatsoper's ensemble, Tietjen maintained a large repertory and employed many outstanding singers and conductors; among the latter were Furtwängler (1933–4), Egk (1935–41) and Karajan (1939–45), while singers included Erna Berger, Maria Cebotari, Margarete Klose, Tiana Lemnitz, Viorica Ursuleac, Peter Anders, Rudolf Bockelmann, Willi Domgraf-Fassbaender,

Max Lorenz, Helge Roswaenge, Franz Völker and Marcel Wittrisch.

Following its destruction by bombs on 9 April 1941, the Staatsoper was reconstructed and reopened on 7 December 1942 with *Die Meistersinger von Nürnberg* under Furtwängler to celebrate the 200th anniversary of the company's forerunner; however, on 3 February 1945 it was again destroyed.

In June 1945 the ensemble was reassembled and Ernst Legal from the Kroll Opera (see below) was named Intendant of the new Deutsche Staatsoper Berlin; on 8 September the new company gave its first performance in the Admiralspalast, Gluck's *Orfeo ed Euridice* (given in German). In the next decade the major works of Wagner and Verdi were added to the repertory, conducted by such guests as Solti and Furtwängler. The division of the city, the deteriorating political situation and currency discrepancies inevitably harmed the company, and it was no longer able to attract outstanding singers and conductors as in the past. With the formal establishment of the DDR in 1949, the administration of the opera was placed under the Ministry of Culture and its financial support secured, although the direction was increasingly subject to ideological pressure. The company gave its first world première in March 1951 with Dessau's *Das Verhör des Lukullus* (revised later the same year as *Die Verurteilung des Lukullus*). It has since presented other world premières of East German composers, including Dessau's *Puntila* (1966) and *Einstein* (1974). Among later performances Udo Zimmermann's *Die wundersame Schustersfrau* (1983) and Siegfried Matthus's *Graf Mirabeau* (1989) stand out. In 1952 Legal retired as Intendant of the Staatsoper in East Berlin and Heinrich Allmeroth from Rostock succeeded him.

In 1955 the theatre, which had been rebuilt to Knobelsdorff's plans of 1742, reopened with a performance of *Die Meistersinger von Nürnberg*. Erich Kleiber refused to accept his appointment as Generalmusikdirektor in protest against the name Deutsche Staatsoper, which replaced the original Fridericus Rex Apollini et Musis. Franz Konwitschny conducted in his place, and subsequently directed the company until his death in 1962. His successors, Josef Keilberth, Horst Stein (Staatskapellmeister 1955–61), Leopold Ludwig and Lovro von Matačić, cultivated an international repertory. The harpsichordist and musicologist Hans Pischner, who had been DDR assistant minister of culture since 1956, was appointed Intendant of the Deutsche Staatsoper in 1963. The leading singers of the DDR, among them Peter Schreier and Theo Adam, belonged to the company. Ruth Berghaus's innovatory productions were a regular feature, notably her famous *Barbiere di Siviglia*. Daniel Barenboim became Generalmusikdirektor in 1992 after the reunification, assisted by Harry Kupfer, with whom he mounted a Wagner cycle based largely on their collaboration at Bayreuth. A new speciality is the interest in Baroque opera, initiated by Intendant Georg Quander, which is performed by ensembles under the direction of René Jacobs, beginning with a performance of Graun's *Cleopatra e Cesare* in 1992 to commemorate the 250th anniversary of the house's opening.

As well as the court and later municipal operas, Berlin has supported a number of theatres with varied artistic and financial success. In 1824 the Königstädtisches Theater opened, producing both popular drama and Italian and French opera, and soon became a serious rival to the court opera. The soprano Henriette Sontag made her Berlin début there before performing in the court opera. After the company closed in 1851 the theatre was used by visiting Italian opera companies.

In 1844 Josef Kroll opened a theatre which had an impressive role in early 20th-century Berlin opera. The first productions were of popular plays and puppet shows. Kroll's daughter Auguste was one of the leading Berlin impresarios in the 19th century. Her theatre grew from the hostelry entertainment initially provided by her father at Krolls Etablissement. Later, the Kroll theatre became a popular musical theatre with revues, *Spielopern* (such as the works of the Biedermeier composer Albert Lortzing) and operettas. In the late 1850s Offenbach's Bouffes-Parisiens company gave 'Gastspiele' with his one-act *opérettes Le mariage aux lanternes* and *Les deux aveugles*. Later still it was a receiving theatre for visiting companies such as that which hosted the Portuguese baritone Francisco d'Andrade in Mozart's *Don Giovanni* in 1889. In 1894 the theatre came under the direction of the Königliche Schauspiele, and was later renamed the Neues Königliches Operntheater.

In 1924 the Neues Königliches Operntheater was rebuilt and enlarged to a capacity of 2100. In 1926 Klemperer signed a ten-year contract and the new Kroll opera company opened as an autonomous part of the Staatsoper on 19 November 1927 with a highly controversial production of *Fidelio* that was seen as a declaration of intent, a radical gauntlet thrown down to the operatic conservatives of the city. A sequence of the classic ensued under Klemperer's direction in collaboration with Jürgen Fehling (*Der fliegende Holländer*), Ernst Legal (*Les contes d'Hoffman*) and the great German actor-director, Gustav Gründgens (*Le nozze di Figaro*). Teo Otto, Ewald Dülberg and Caspar Neher were the Kroll's preferred stage designers during this period.

As well as the strikingly theatrical productions of standard works, the Kroll championed new works and Klemperer (or his colleagues Zemlinsky and Zweig) conducted the Berlin premières of Stravinsky's *Oedipus rex*, Janáček's *From the House of the Dead*, Hindemith's *Neues vom Tage* and *Cardillac*, and Schoenberg's *Erwartung* and *Die glückliche Hand* in a double bill. Inevitably with a programme such as this – and a predominantly hostile conservative press – the box office was badly hit as the German economic crisis deepened in 1930. The Kroll Oper was identified by right-wing politicians as a centre of leftist propaganda and 'Kulturbolschewismus', and on 25 March 1931 they determined to close it down.

F.W. Deichmann established a small theatre in 1848 where he produced plays with music. After two years this theatre became the Friedrich-Wilhelmstädtisches Theater where Lortzing was briefly conductor. During the 1850s it developed into the city's first operetta theatre and gradually specialized in the works of Offenbach, who established himself as Berlin's favourite composer in the next decade after he conducted the successful Berlin production of *Orphée aux enfers* in 1860. The house became the Deutsches Theater in 1883, since when it has concentrated exclusively on spoken drama.

The large Viktoria-Theater was also constructed through private initiative in the three years before its opening in 1857 and equipped with modern stage machinery. As it was largely dependent on ticket sales,

the theatre presented mostly familiar Italian operas and operettas by guest ensembles and with well-known singers. New works were occasionally staged, however, such as *Rigoletto* (in its Berlin première) in 1860. This theatre was let in May 1881 and ironically became the site of the first Berlin production of Wagner's complete *Ring* cycle (produced by Angelo Neumann and conducted by Anton Seidl), attended by both the composer and Liszt.

The Theater des Westens was founded in 1896 under the direction of Alvis Pasch, and rapidly became distinguished through performances of guest singers, including Caruso in 1906. From 1903 to 1907 Pfitzner successfully conducted such performances as the Berlin première of Wolf-Ferrari's *Die neugierigen Frauen* (1904). The theatre was renamed the Grosse Volksoper in 1934. In the decade 1935–45, as the Institut der Arbeitsfront, it gave some notable performances conducted by Erich Orthmann. Between 1945 and 1961 the theatre served the Städtische Oper and has since been used for performances of plays, operettas and musicals. In 1961 it was renamed the Theater des Westens.

The Komische Oper, founded in 1905 by Hans Gregor and modelled on the Paris Opéra-Comique, provided the most modern theatre in Berlin. Gregor presented comic opera, operetta and works from Mozart to Puccini, excluding Wagner, also arranging the Berlin premières of Wolf's *Der Corregidor* (1906) and Debussy's *Pelléas et Mélisande* (1908), and the world première of Delius's *A Village Romeo and Juliet* (1907). He attempted a regeneration of theatre production but, as the theatre was unable to survive as a private enterprise, it closed in 1911. It was succeeded by the Kurfürstenoper which presented a similar repertory (until 1913) under Gregor's associate Viktor Moris, while Gregor succeeded Weingartner in Vienna.

Berlin's enthusiasm for the works of Dittersdorf and Rossini during the early 19th century was later transferred to the Parisian and Viennese operettas which then dominated the repertory of most Berlin opera houses. Offenbach's works were performed in almost all the city's theatres and even Johann Strauss was performed at the royal opera (*Die Fledermaus*, 1899, conducted by Richard Strauss). At the turn of the century Berlin developed its own style of musical comedy, created largely by Paul Lincke (*Frau Luna*, 1899) and Walter Kollo; works in this style were frequently produced at the Apollotheater, where Lincke was conductor after 1892. The Metropoltheater (built 1898, now the Komische Oper) subsequently became the chief theatre for popular operas and satirical revues, especially those of Victor Hollaender and Leon Jessel, in which Fritzi Massary first attracted attention; it continues to be a centre for the performance of operetta. After World War I operetta, musical theatre and revue were all eagerly cultivated in Berlin and encouraged the rise of Berlin CABARET in the 1920s with a strong element of political satire set off by music with a sweet-sour flavour strongly influenced by jazz; its most significant reflection was in Weill's *Dreigroschenoper* (1928).

With the Deutsche Oper, in former West Berlin and the Staatsoper in former East Berlin, the Komische Oper, also in the former East, is the city's third active opera company. It opened at the Metropoltheater on 23 December 1947 with *Die Fledermaus* and, largely through the imaginative work of its Austrian director Walter Felsenstein, who founded it as a postwar realization of the aborted Kroll experiment, it has developed into an internationally recognized company.

The Komische Oper was to be a radical extension of the Volksoper concept, in which works of modest proportions were to be treated as 'realistisches Musiktheater'. Felsenstein's productions of *Die Zauberflöte*, Offenbach's *Les contes d'Hoffmann* and *Barbe-bleue*, *Otello*, *The Cunning Little Vixen* and Britten's *A Midsummer Night's Dream* won international attention for their highly theatrical and psychologically penetrating 'Personenregie'. Felsenstein created a 'school' of East German opera production, whose most celebrated alumni are Joachim Herz (Intendant of the Komische Oper, 1976–81, in succession to the founder-director; fig.9), Götz Friedrich and Harry Kupfer, the Komische Oper's chief director, who succeeded Herz in 1981. The policy of the Komische Oper has remained true to the principles of Klemperer's Kroll Oper, with brilliantly acted – if moderately sung – performances of the medium-sized classics and new works, among them Udo Zimmermann's *Der Schuhu und die fliegende Prinzessin* and Siegfried Matthus's *Judith* (1985).

The most important addition to Berlin's operatic life in the first half of the 20th century was the Deutsches Opernhaus, which opened in the city of Charlottenburg with a capacity of 2300 on 7 November 1912 with a performance of *Fidelio*. Its first director, Georg Hartmann, maintained the standard repertory, especially Wagner, and in 1914 arranged the first Berlin performance of *Parsifal*, four days before the Staatsoper's. When Hartmann was dismissed in 1923 and the three resident conductors subsequently resigned, Leo Blech from the

*9. Poster for the first East Berlin production of the three-act version of Berg's 'Lulu', Komische Oper, 1980, directed by Joachim Herz*

Staatsoper became Generalmusikdirektor. Because the company had suffered irrecoverable financial losses during World War I, the city ministry took control of it in 1925 and renamed it the Städtische Oper. Performances at the Städtischer Oper, directed by Tietjen and conducted by Bruno Walter (1925–9), began to rival those at the Staatsoper. Along with operas by Wagner, Strauss and less familiar works, Mozart formed the core of Walter's achievement. New works by such composers as Busoni, Janáček, Zemlinsky, Krenek and Weill conducted by Fritz Zweig were also performed. Walter left in 1929. An interim period of two years followed with guest performances by La Scala and Toscanini as well as by the Diaghilev ballet. Blech returned as guest conductor, as did Furtwängler. After Tietjen joined the Staatsoper (1926), he continued as director of the Städtische Oper until 1930; after a short interim Carl Ebert took the position (1931–3). During his tenure Fritz Busch, Fritz Stiedry and Paul Breisach were conductors, and Rochus Gliese, Caspar Neher and Wilhelm Reinking introduced a new conception of stage design. Although the repertory consisted predominantly of standard works, operas by Braunfels, Schreker and Wellesz were performed, and the company produced important world premières including those of Weill's *Die Bürgschaft* and Schreker's *Der Schmied von Gent* (both 1932).

After Ebert's emigration, Max von Schillings was recruited by the Nazis as Intendant, but he was there only briefly before his death in the summer of 1933. The theatre was taken over by the German Reich as the Deutsches Opernhaus under the direct control of propaganda minister Goebbels in 1934, putting it into direct competition with the Staatsoper, which as the Preussisches Staatstheater was controlled by Göring. Political intrigue, however, managed to secure the continued existence of the theatre, whose ensemble had been decimated by emigration and forced resignations. As Intendant Hitler himself chose Wilhelm Rode, a singer he much admired, but of whom Goebbels thought little. Despite weak stagings that aimed at a naïve naturalism, high musical standards were maintained during the late 1930s by both singers (among them Michael Bohnen, Walther Ludwig, Karl Schmitt-Walter and Irma Beilke) and the conductors Artur Rother and Karl Dammer. Hans Schmidt-Isserstedt succeeded Rode as opera director, recruiting the director Günther Rennert and the conductor Leopold Ludwig. On 23 November 1943 the Deutsches Opernhaus was destroyed in a bombing raid. Productions continued in the Admiralspalast until 1944, when all German theatres were closed.

After World War II the company resumed its activity, thanks to the initiative of Michael Bohnen, who had been a member of the ensemble since 1935. Reverting to the name of the Städtische Oper, it found new accommodation in the Theater des Westens, which had suffered little damage, and opened on 4 September 1945 with *Fidelio*. Bohnen retired from the post of director in 1947, and there was a transitional period, during which modern opera appeared in the repertory with Britten's *Peter Grimes*. On 1 August 1948 Tietjen returned as director of the Städtische Oper. In his first season he presented two outstanding artists in the company's première of Verdi's *Don Carlos*: the conductor Ferenc Fricsay, who was music director of the theatre until 1952, and Josef Greindl, singing the part of Philip II. The young Dietrich Fischer-Dieskau, who had recently been engaged, sang Posa. After a ten-year break, Leo Blech returned in the 1949–50 season. On 23 September 1952 Boris Blacher's ballet-opera *Preussisches Märchen* was given its first performance. When Fricsay left, criticism of Tietjen's direction became increasingly open.

Tietjen left his post and was succeeded in 1954 by Carl Ebert, who had been forced to emigrate in the 1930s by the Nazis. Mozart and Verdi were the mainstays of his repertory. He engaged Wilhelm Reinking as principal designer; other designers who worked with him were Caspar Neher, Jean-Pierre Ponnelle and Ita Maximovna. As well as guest conductors such as Karl Böhm, André Cluytens, Hermann Scherchen and Vittorio Gui, Ebert brought young artists into the company, including Silvio Varviso and Berislav Klobučar. One of Ebert's significant achievements was the founding of an opera studio to train young singers. Under his direction the Städtische Oper became the leading company in Berlin and soon had a prominent position in international music. Among the most important artistic events of these years were the first performance of Henze's *König Hirsch*, under Hermann Scherchen, on 23 September 1956 and Gustav Rudolf Sellner's production of Schoenberg's *Moses und Aron* in 1959, also under the musical direction of Scherchen.

The new opera house in the Bismarckstrasse (1863 seats; designed by Fritz Bornemann) opened on 24 September 1961 with Mozart's *Don Giovanni*, and the company's occupation of the Theater des Westens came to an end. Carl Ebert directed the new production, with Fricsay as conductor and Dietrich Fischer-Dieskau in the title role. Sellner was appointed the new general director of the theatre, henceforth known as the Deutsche Oper Berlin, and held the post for 11 years, until 1972.

The opening production was followed by the world première of Klebe's *Alkmene* on 25 September 1961. Wieland Wagner brought dramatic emphasis to his production of Verdi's *Aida*. Among outstanding premières given by the company in the Sellner years were those of Aribert Reimann's *Melusine* (1971, première at Schwetzingen in the same year), Henze's *Der junge Lord* (1965), Isang Yun's *Der Traum des Liu-Tung* (1965), Haubenstock-Ramati's *Amerika* (1966) and Blacher's *Zweihunderttausend Taler* (1969). Under Sellner the theatre consistently encouraged contemporary operatic writing.

Egon Seefehlner took over as general director for the 1972–3 season. On 23 October 1972, at the Berlin Festival, the Deutsche Oper gave the first performance of Fortner's *Elisabeth Tudor*. In 1976 Egon Seefehlner moved to Vienna; his successor in Berlin was the cellist Siegfried Palm, an outstanding interpreter of new music. His appointment was controversial, and the innovations he was expected to make did not materialize. In 1981 Götz Friedrich, a pupil of Felsenstein, under whom he had worked at the Komische Oper in Berlin for many years, became general director of the Deutsche Oper. He opened the repertory to a wide range of works and innovative stagings and engaged singers of international repute. This cosmopolitanism bore fruit in the first performances of Antonio Bibalo's *Frøken Julie* in the new instrumental version (1984), Wolfgang Rihm's *Oedipus* (1987) and Henze's *Das verratene Meer* (1990); in the revivals and first performances by the company of Korngold's *Die tote Stadt*, Rihm's *Jakob Lenz* and Bernd Alois Zimmermann's *Die Soldaten*; in the consistent

attention paid to the operas of Janáček; and in the work of such directors as Günter Krämer, Hans Neuenfels, Achim Freyer and John Dew. Friedrich set a high standard in his theatre with his own productions, which included a *Ring* cycle. Udo Zimmermann is appointed successor of Friedrich from 2001.

Musical standards at the Deutsche Oper have always been determined by great conductors as well as by great singers. The names of Ferenc Fricsay, Karl Böhm, Eugen Jochum, Heinrich Hollreiser, Horst Stein, Lorin Maazel (Generalmusikdirektor, 1965–71), Daniel Barenboim, Gerd Albrecht, Jesus López-Cobos (Generalmusikdirektor, 1981–90), Rafael Frühbeck de Burgos (Generalmusikdirektor, 1992–7) and Christian Thielemann (Generalmusikdirektor, 1997–2001) are closely linked with the company. Guest conductors have included Claudio Abbado, Herbert von Karajan, Hermann Scherchen, Marek Janowski, Giuseppe Sinopoli and Charles Mackerras. Walther Hagen-Groll, chorus master for many years, left his artistic mark on the company. Fabio Luisi will succeed Thielemann in 2001.

The Deutsche Oper has given guest performances in countries throughout the world, including Japan, Sweden, the USA, Greece, the Netherlands and Yugoslavia. Friedrich, as director, initiated close contacts with the Los Angeles Music Center. Following the demolition of the Berlin Wall, the Deutsche Oper has been affected by the political changes; its position in a city no longer divided is essentially unchanged, but is likely to alter as closer cooperation between the Berlin opera houses develops.

4. Music publishing and criticism. Music publishing in Berlin began with the publication of sacred music in the mid-16th century, when the first printing houses were established. The true founder of Berlin music printing, however, was the Runge firm, which established its own printing shop in 1599 and later published works by Johannes Crüger and books of sacred songs. The first important writings printed in Berlin included Crüger's *Synopsis musica* (1630), one of the first theoretical treatises based on harmonic principles. More significant musical writings appeared in Berlin as music became an integral part of court life during the reign of Frederick the Great. The first Berlin musical journal was F.W. Marpurg's *Der critische Musicus an der Spree* (1749–50). Among the most important sources of German 18th-century rationalistic musical thought, all published in Berlin, were the writings of C.G. Krause, Marpurg's *Die Kunst das Clavier zu spielen* (1750), *Kritische Briefe über die Tonkunst* (1760–64) and *Abhandlung von der Fuge* (1753–4), Quantz's *Versuch* (1752) and C.P.E. Bach's *Versuch* (1753). After Kirnberger's writings appeared, an antithesis between conservative and progressive musical ideals gradually developed in Berlin scholarship, stimulating a juxtaposition that characterized the city's musical life for many years.

J.F. Reichardt promoted early music and was Berlin's first notable music journalist, producing the short-lived *Berlinische Musikalische Zeitung* (1805–6). Concurrently E.T.A. Hoffmann was influential as a critic, writing vivid and forceful reviews of contemporary music. Before A.B. Marx wrote his extensive biography of Beethoven (1859), he founded, with Heinrich Dorn and the poet Ludwig Rellstab, the *Berliner allgemeine musikalische Zeitung* (1824–30), which assumed a leading role in the city's music journalism. Rellstab continued to promote modern music, including Liszt's, through his journal *Iris im Gebiete der Tonkunst* (1830–41) and other writings; he was Berlin's most respected critic until he grew cold to the works of Wagner after 1850. In the following years new music was supported in such journals as the *Neue Berliner Musikzeitung* (1847–96) and the *Allgemeine deutsche Musikzeitung* (1876–1942; later *Allgemeine Musikzeitung*). In 1834 Winterfeld's important three-volume study *Johannes Gabrieli und sein Zeitalter* was published in Berlin. From the beginning of music journalism in Berlin, over 160 journals on all aspects of music have appeared, including *Die Musik* (1901–42) and *Musikblätter* (from 1948). Periodicals currently published in Berlin include *Opernwelt*, *Orpheus ballettanz international* and the *Neue Berlinische Musikzeitung*. Berlin has supported more than 100 music publishers of international repute, such as A.M. Schlesinger (from 1810 until 1899) and Bote & Bock (1838; since 1996 an affiliate of Boosey & Hawkes). Along with the Deutscher Verlag für Musik, Leipzig (now part of Breitkopf & Härtel), the leading East German publisher was Henschel, Berlin, which now collaborates with Bärenreiter and Alkor Edition, Kassel.

5. Music education. Until the end of the 18th century music education in Berlin was limited to private tuition by local professional musicians. As increased secularization of city life caused a decline in the number of church choirs, several school choirs were established towards the end of the century to continue choral training. In the early 19th century schools began to give vocal instruction, which in 1826 became a compulsory part of public education. In 1804, at the Akademie der Künste, Zelter established the Ordentliche Singschule, the first state-supported programme of music education in Prussia. At the suggestion of Wilhelm von Humboldt, the first chair of music was created at the Akademie der Künste in 1809 and Zelter was appointed to supervise the city's sacred and secular music education. A.W. Bach, Zelter's successor as director of the academy's music department (1832–69), added a series of masterclasses in composition to the syllabus; composers who participated included Meyerbeer, Bruch, Busoni, Pfitzner, Schoenberg and Richard Strauss. Before World War I this important department had one of the most distinguished composition faculties in Germany.

Zelter was also responsible for the foundation in 1820 of the Musikalische Bildungsanstalt, which became the Institut für die Ausbildung von Organisten und Musiklehrern in 1822, and the Königliches Akademisches Institut für Kirchenmusik in 1875. The institute initially taught only composition, singing and keyboard instruments but expanded its scope after 1907 through the reforms of Hermann Kretzschmar. After World War I music was no longer compulsory in public education in Berlin, partly because of the reforms of the Prussian minister of culture Leo Kestenberg; the institute was renamed the Akademie für Kirchen- und Schulmusik in 1922. The comprehensive training, especially under the directors Carl Thiel and H.J. Moser, made the academy into the leading school of church and school musicians. It was amalgamated with the Hochschule für Musik in 1944.

Although private keyboard, singing and string lessons were readily available in Berlin at the end of the 18th century, instruction in wind instruments was inadequate. After 1799 the clarinettist Franz Tausch assembled wind

players for informal rehearsals and performances to encourage wind playing. As these gatherings became more regular, the Conservatorium der Blasinstrumente was organized; after Tausch's death in 1817, this was continued by his son until he died in 1845. To supply string players for his concerts in the Sing-Akademie, Zelter founded the Orchester-Schule, or Ripienschule, in 1807: this gave rise to Spontini's Königliche Theater-Instrumental-Schule (1822) which trained musicians for the royal theatres and also provided instruction for wind players after 1855. In the late 1830s Friedrich Wilhelm IV proposed the organization of a Hochschule für Musik, but administrative complications thwarted this scheme until 1869, when the school was founded as part of the Akademie der Künste. Under the direction of Joachim (1869–1907) the school became known as one of the finest in Germany, with a staff of outstanding musicians and scholars. After 1872 the teachers and students gave public recitals and orchestral concerts. Between the wars directors included Schreker, Schünemann and Fritz Stein; Schoenberg, Hindemith and Humperdinck taught composition. Other outstanding teachers at the school have included Max Bruch, Curt Sachs, Philipp Spitta, Edwin Fischer and Artur Schnabel. Dissatisfaction with the school's administration towards the end of World War II led Höffer, Josef Rufer and Blacher to found the Internationales Musikinstitut, whose masterclasses competed with those of the Hochschule. This project ceased when Höffer was appointed director of the Hochschule in 1949 and drew many of the best musicians back to the school. Through his efforts and those of his successors Egk (1950–53) and Blacher (1954–70), the school has regained its international status.

One of the more important institutions that developed in the 19th century was the Berliner Musikschule, founded in 1850 by Julius Stern and A.B. Marx. In 1857 it was renamed the Sternsches Konservatorium, in 1935 the Konservatorium der Reichshauptstadt and in 1945 the Städtisches Konservatorium. In 1966 the conservatory merged with the Hochschule für Musik. After his withdrawal from the Sternsches Konservatorium in 1855, Theodor Kullak organized the Neue Akademie der Tonkunst, which concentrated chiefly on keyboard instruction until it closed in 1890. Berlin's rapid growth in the 19th century prompted the establishment of many smaller music schools (over 20 by 1930) in various districts of the city, the most notable being the Klavier-Schule Tausig (1866–70), and the Konservatorium Klindworth-Scharwenka (1893–1939), formed by the amalgamation of the Scharwenka-Konservatorium (1881) and the Klavier-Schule Klindworth. In the former East Berlin, the Deutsche Hochschule für Musik was opened in 1950 and, under its founder and first director, the musicologist Georg Knepler, it quickly achieved a high international reputation; it was renamed after Hanns Eisler following the composer's death in 1962. The current director is Christhard Gössling.

6. Musicology. The first academic music position in Berlin was established in 1815 when Zelter was appointed director of music at the Friedrich-Wilhelm University, founded five years before. In 1830 the position was changed to that of a university lectureship, only the second of its kind in Germany; two years later Marx became Zelter's successor. The succeeding lecturers, among them Spitta, developed music history into a scholarly discipline. In 1904 a chair of musicology was created, which has been held by such scholars as Hermann Kretzschmar, Curt Sachs, Hermann Abert, Johannes Wolf and Arnold Schering. In the second half of the 19th century municipal support of music scholarship in Berlin helped to attract such musicologists as Spitta and F.C. Stumpf; their pupils Sachs and Hornbostel also taught in Berlin. As other distinguished scholars moved to Berlin before World War I, the city became second only to Leipzig as a centre of German musicology. Hugo Leichtentritt (1905) and Alfred Einstein (1917) each published a *Geschichte der Musik*, concurrently contributing to such journals as *Die Musik* and *Berliner Tageblatt*.

To continue the research begun by Helmholtz and Stumpf, a chair of ethnomusicology was established (1934) at the University of Berlin (formerly Friedrich-Wilhelm University, after World War II the Humboldt University). Important teachers have included Walther Vetter, Ernst Hermann Meyer, Georg Knepler and Alfred Brockhaus. The last musicology department chairman, before the reunification, was Gerd Reinäcker; the first to be appointed in its aftermath was the Swiss musicologist Hermann Danuser. As a result of the city's political division after the war, the Freie Universität was founded in 1948 in the western sector with chairs in both ethnomusicology and historical musicology, where incumbents have included Walter Gerstenberg, Kurt Reinhard and Rudolf Stephan. After his retirement in 1995, Albrecht Riethmüller and Jürgen Maehnder took over. Josef Kuckertz (1930–96) was chairman of the ethnomusicology department until his death. At the Technische Universität (successor of Frederick the Great's Bergakademie), H.H. Stuckenschmidt, also a noted journalist, taught music history from 1948 to 1967 (professor from 1953). Under his successor, Carl Dahlhaus, the university's musicology department assumed a position of prominence comparable to that or the Freie Universtität. After the death of Dahlhaus in 1989, Christian Martin Schmidt became chairman. The department also has a position in music psychology.

7. Libraries. The first public music library in Germany was organized in Berlin in 1842 as a division of the Königliche Bibliothek after the purchase of the important Pölchau and Naue collections. Through the acquisition of other collections, such as the libraries of the Sing-Akademie and the Institute for Church Music, and of valuable manuscripts of Bach, Mendelssohn, Meyerbeer, Schumann and others, it became one of the most extensive music libraries in the world. On its amalgamation with the Deutsche Musiksammlung (1914) it became a valuable museum of German music printing and source for scholarly research. After World War II most parts of the collection which had been sent to the east were returned to their original location, now the music division of the Deutsche Staatsbibliothek in East Berlin, directed by Karl-Heinz Köhler. Materials sent westward to Marburg and Tübingen, including many theoretical works, parts of the Deutsche Musiksammlung and newer manuscripts, have since come back to West Berlin where they form the basis of the music division, under Rudolf Elvers, of the Staatsbibliothek Preussischer Kulturbesitz directed by Hans-Peter Reinecke. Much of the most valuable material, however, including many autographs of works by Bach, Mozart and Beethoven, disappeared in 1945. After the reunification, the eastern and western parts of the

Staatsbibliothek merged under the organization of the Stiftung Preussischer Kulturbesitz.

Carl Stumpf's important collection of recordings of ethnic music developed into the Phonogrammarchiv, which Hornbostel directed after 1905. In 1932 the collection was annexed to the Hochschule, and in 1935 absorbed into the Völkerkundemuseum. The collection of musical instruments, begun in 1888 at the Hochschule, was extensively reorganized and restored by Sachs (appointed director in 1919) and taken over by the Staatliches Institut für Deutsche Musikforschung in 1935. This institute, part of the Stiftung Preussischer Kulturbesitz, consists of departments of music history, folk and electronic music, and has been responsible for such publications as *Das Erbe Deutscher Musik* and the *Archiv für Musikforschung*.

HEINZ BECKER, RICHARD D. GREEN (with HUGH CANNING, IMRE FÁBIÁN (3))/CURT A. ROESLER

**Berlin, Irving** [Baline, Israel] (*b* Mogilyov, 11 May 1888; *d* New York, 22 Sept 1989). American composer of Russian birth. The son of an impoverished Jewish cantor, he was taken to America at the age of five. His father died when he was 13, and a year later he ran away from home, rather than be a burden to his mother. He sang for pennies outside cabarets, became a chorus boy, a stooge in vaudeville, a song plugger and a singing waiter. Berlin had no formal musical training, but taught himself to play the piano, if only in one key, F♯. He began churning out songs, usually serving as his own lyricist, and finally caught America's ear with *Alexander's Ragtime Band* in 1911.

Berlin had three phenomenally successful careers: he was one of Broadway's most melodic composers, he scored some of Hollywood's most beloved film musicals, and he was a Tin Pan Alley songwriter with more singles hits than any other composer. It was as a Tin Pan Alley composer that he found early success, but throughout his life he wrote many songs outside the context of a show or film. Among his popular hits were *Remember*, *Always*, *What'll I do?* and *God bless America*, the last earning Berlin a Congressional Gold Medal.

Berlin's first complete stage work, *Watch your Step* (1914), purported to be the first musical written entirely in ragtime. Purists would argue that that was not strictly so, but cannot dispute that Berlin played a major role in making ragtime popular, just as the real genre was fading away. The show's hit was 'A Simple Melody'. Between *Watch your Step* and *Mr. President* (1962) Berlin wrote all or most of the songs for 19 other Broadway shows. *Stop! Look! Listen!* (1915) included 'I love a piano' and 'The Girl on the Magazine Cover' while *Yip, Yip, Yaphank*, performed by soldiers in 1918, gave us 'Mandy' and 'Oh! How I hate to get up in the morning'. His numerous contributions to several *Ziegfeld Follies* and *Music Box Revues* included 'All Alone', 'Lady of the Evening', 'A pretty girl is like a melody', 'Say it with

*Irving Berlin, 1947*

music', 'Shaking the Blues Away', 'You'd be surprised' and 'What'll I do?'. *Face the Music* (1932) is remembered for 'Soft Lights and Sweet Music', and *As Thousands Cheer* (1933) for 'Easter Parade' and 'Heat Wave'. 'It's a lovely day tomorrow' came from *Louisiana Purchase* (1940). In World War II, the all-soldier show *This is the Army* (1942) presented 'I left my heart at the stage door canteen' and 'This is the army, Mr. Jones'.

Berlin's most successful musical was *Annie Get your Gun* (1946). Based very freely on the life of Annie Oakley, the show was originally to have had music by Jerome Kern; he died while working on it, and Berlin replaced him. At the first performance Ethel Merman sang the title role and Ray Middleton played Frank. *Annie Get your Gun* has entered the repertory of opera companies in the USA, and the Vienna Volksoper. The hit song of his last success, *Call me Madam* (1950), was 'You're just in love'.

Berlin's Hollywood career began when the talkies began, his 'Blue Skies' being interpolated into *The Jazz Singer* (1927). When the Depression cut down the number of musicals presented on Broadway, Berlin moved to California in the mid-1930s and scored film musicals for various studios. Most beloved were the series of Fred Astaire-Ginger Rogers films at RKO between 1935 and 1939, including *Top Hat* (1935), *Follow the Fleet* (1936) and *Carefree* (1938). Astaire would also be featured in such later Berlin-scored films as *Holiday Inn* (1942), *Blue Skies* (1946) and *Easter Parade* (1948). While few of Berlin's early stage works were made into films, his songs were often interpolated into musicals built around the extensive Berlin repertory. Old favourites filled such film musicals as *Alexander's Ragtime Band* (1938), *This is the Army* (1943), *White Christmas* (1954) and *There's No Business Like Show Business* (1954).

One of the most remarkable aspects of Berlin's 54-year career was his chameleon-like ability to adapt to the latest trends and styles in popular music. Berlin created rags for the first decades of the century, songs about the various dance crazes in the 1920s, optimistic songs for the Depression, swing numbers at the end of the 1930s, and theatre scores in the Rodgers and Hammerstein mode in the 1940s. He always managed to write successfully in whatever style was in vogue. Ironically, many of Berlin's songs have successfully outlived the eras that they were created for. 'White Christmas', for example, is still the best-selling single song in American culture.

Some detractors have suggested that his work was too often lacking in subtlety, but careful analysis of his seemingly simple tunes and lyrics usually shows a knowing, complex artistry hidden behind the deceptive façade. As an example, one could cite the marvellous harmonic modulations in 'A pretty girl is like a melody'. Berlin's remarkable ear and his often underrated inventiveness in the face of rapidly changing styles led his contemporary Jerome Kern to conclude: 'Irving Berlin has no *place* in American music; he *is* American music'.

WORKS

STAGE

*Works for which Berlin wrote all or much of the score; lyrics are by Berlin. Names of librettists are given in parentheses; dates are those of first New York performance*

Ziegfeld Follies of 1911 (revue, G.V. Hobart), 26 June 1911

Watch your Step (musical, H.B. Smith), New Amsterdam, 8 Dec 1914 [incl. A Simple Melody, The Syncopated Walk]

Stop! Look! Listen! (musical, Smith), Globe, 25 Dec 1915 [incl. The Girl on the Magazine Cover, I love a piano]

The Century Girl (revue, collab. H. Blossom), 6 Nov 1916 [musical collab. V. Herbert]

The Cohan Revue of 1918, collab. G.M. Cohan, 31 Dec 1917

Yip, Yip, Yaphank (revue), 19 Aug 1918 [incl. Mandy; Oh! How I hate to get up in the morning]

Ziegfeld Follies of 1919 (revue), 16 June 1919 [incl. A pretty girl is like a melody, You'd be surprised]

Ziegfeld Follies of 1920 (revue), 22 June 1920 [incl. Tell me, little gypsy]

Music Box Revue 1921–2, orchd F. Tours, M. DePackh, S. Jones, H. Akst, 22 Sept 1921 [incl. Say it with music, Everybody step]

Music Box Revue 1922–3, orchd Tours, DePackh, Jones, Akst, 23 Oct 1922 [incl. Lady of the Evening, Pack up your sins and go to the devil]

Music Box Revue 1923–4, orchd Tours, DePackh, Jones, Akst, 22 Sept 1923

Music Box Revue 1924–25, orchd Tours, De Packh, Jones, Akst, 1 Dec 1924

The Cocoanuts (musical, G.S. Kaufman, M. Ryskind), Lyric, 8 Dec 1925; film, 1929

Ziegfeld Follies of 1927 (revue), 16 Aug 1927 [incl. Shaking the Blues Away]

Face the Music (musical, M. Hart), New Amsterdam, 17 Feb 1932 [incl. Let's have another cup o' coffee, Soft Lights and Sweet Music]

As Thousands Cheer (revue, Hart), orchd Tours, A. Deutsch, H. Kresa, 30 Sept 1933 [incl. Easter Parade, Heat Wave, Supper Time]

Louisiana Purchase (musical, M. Ryskind), orchd D. Walker, Imperial, 28 May 1940 [incl. It's a lovely day tomorrow, What chance have I, Fools fall in love, You're lonely and I'm lonely]; film, 1942

This is the Army (revue), 4 July 1942 [incl. I left my heart at the stage door canteen, This is the army, Mr. Jones]; film, 1943

Annie Get your Gun (musical, H. and D. Fields), orchd P.J. Lang, R.R. Bennett, T. Royal, Imperial, 16 May 1946 [incl. Anything you can do, Doin' What Comes Natur'lly, The Girl that I Marry, I got the sun in the morning, Moonshine Lullaby, There's no business like show business, They say it's wonderful, You can't get a man with a gun]; film, 1950

Miss Liberty (musical, R. Sherwood), orchd Walker, Imperial, 15 July 1949

Call Me Madam (musical, H. Lindsay, R. Crouse), orchd Walker, Imperial, 12 Oct 1950 [incl. The Hostess with the Mostes' on the

Ball, It's a lovely day today, Marrying for Love, They like Ike, You're just in love]; film, 1953
Mr. President (musical, Lindsay, Crouse), orchd Lang, St James, 20 Oct 1962

FILM
*not all scores wholly by Berlin*

The Jazz Singer, 1927 [incl. Blue Skies]
The Awakening, 1928
The Cocoanuts, 1929 [incl. When my Dreams Come True]
Hallelujah, 1929
Puttin' on the Ritz, 1930 [incl. Puttin' On the Ritz]
Mammy, 1930
Reaching for the Moon, 1931
Kid Millions, 1934
Top Hat, 1935 [incl. Cheek to cheek, Isn't this a lovely day?, Piccolino, Top hat, white tie, and tails]
Follow the Fleet, 1936 [incl. I'd rather lead a band, I'm putting all my eggs in one basket, Let's face the music and dance, Let yourself go]
On the Avenue, 1937 [incl. I've got my love to keep me warm, This Year's Crop of Kisses]
Alexander's Ragtime Band, 1938 [incl. Alexander's Ragtime Band, All Alone, What'll I do?]
Carefree, 1938 [incl. Change partners, The Yam]
Second Fiddle, 1939
Holiday Inn, 1942 [incl. Be careful, it's my heart, White Christmas]
Blue Skies, 1946 [incl. You keep coming back like a song]
Easter Parade, 1948 [incl. A Couple of Swells, Better luck next time, It only happens when I dance with you]
White Christmas, 1954 [incl. Count your blessings, The best things happen while you're dancing, Sisters]
There's No Business Like Show Business, 1954

OTHER SONGS
(*selective list*)

*lyrics by Berlin; dates are of first publication*

Marie from Sunny Italy (music M. Nicholson), 1907; Alexander's Ragtime Band, 1911; Everybody's doin' it, 1912; When the Midnight Choo Choo Leaves for Alabam', 1912; International Rag, 1913; Snooky Ookums, 1913; When I Lost You, 1913; When I Leave the World Behind, 1914; Someone else may be there while I'm gone, 1917; I've got my captain working for me now, 1919; All By Myself, 1921; What'll I do?, 1924; Always, 1925; Remember, 1925; Blue Skies, 1927; Russian Lullaby, 1927; The song is ended, 1927; Say it isn't so, 1932; How deep is the ocean?, 1932; God bless America, 1938 [chorus written 1918]

GERALD BORDMAN/THOMAS S. HISCHAK

**Berlin, Johan Daniel** (*b* Memel, Prussia, 12 May 1714; *d* Trondheim, 4 Nov 1787). Norwegian organist, composer, inventor and writer of German birth. He studied the organ with his father Heinrich Berlin, and in 1730 went to Copenhagen, where he became the pupil of the city musician Andreas Berg. In 1737 Berlin was appointed city musician in Trondheim, a post he held until 1767. From 1740 to his death he was organist at Trondheim Cathedral and from 1752 to 1761 at the Vår Frue Kirke. Berlin was probably the most exceptional and versatile figure in 18th-century Trondheim: he not only conscientiously carried out his duties as city musician, but published books and papers on a variety of subjects (including music theory, meteorology and astronomy); he arranged concerts, composed, and built instruments; he was for many years the head of the city fire-service and inspector of the city waterworks; he was a map designer and architect; and he owned one of the largest collections of music literature and instruments in Norway. His *Musikalske elementer* is the first Danish-Norwegian music textbook and is still considered an instructive and comprehensive work. His papers on other subjects were published by the Royal Norwegian Scientific Association, of which he was a founder-member (1760). In 1746 Berlin built a keyboard viola da gamba which he called 'cembalo da gamba verticale', in 1751 a piano with a pedal and in 1752 a monochord; in addition he constructed a mechanism to enable him to play loud and soft on his Haas harpsichord. Only the monochord has survived (in the Ringve Museum, Trondheim). In January 1787 he was elected to the board of the Trondheim Music Society (founded 1786).

Berlin wrote almost 30 compositions, of which only a few are extant. Their style lies between late Baroque and the *style galant*, with perhaps a bias towards the latter. Of Berlin's nine children three became musicians: Johan Andreas Berlin (1734–72), Johan Daniel Berlin (1749–91) and Johan Henrik Berlin (1741–1807).

WORKS
*all MSS are in N-T*

Edition: John Daniel Berlin: *The Collected Works*, ed. B. Korsten (Bergen, 1977)

KARI MICHELSEN

**Berlioz, (Louis-)Hector** (*b* La Côte-Saint-André, Isère, 11 Dec 1803; *d* Paris, 8 March 1869). French composer. He stands as the leading musician of his age in a country, France, whose principal artistic endeavour was then literary, in an art, music, whose principal pioneers were then German. In many senses the Romantic movement found its fullest embodiment in him, yet he had deep Classical roots and stood apart from many manifestations of that movement. His life presents the archetypal tragic struggle of new ideas for acceptance, to which he gave his

full exertions as composer, critic and conductor. And though there were many who perceived greatness in his music from the beginning, his genius only came to full recognition in the 20th century.

1. 1803–21. Louis-Hector Berlioz was the eldest child of Louis-Joseph Berlioz (1776–1848), a doctor of some distinction and a prominent, well-to-do citizen of La Côte-Saint-André, 48 km north-west of Grenoble in the département of Isère. The family had belonged to the region for many generations, and the countryside, especially the grandeur of the Isère plain against its distant background of the Alps, cast a lasting spell on the young composer. His father was a man of liberal outlook and broad intellectual range, an inspiring mentor for his son, and though the dispute over Hector's career and marriage damaged their relationship for some years, there was a profound bond between them. His mother, Marie-Antoinette (née Marmion), was a Catholic of sharper temper and narrower outlook. Five more children were born, of whom two, Nanci and Adèle, lived to maturity, and enjoyed Berlioz's permanent affection.

At about the age of ten Berlioz briefly attended an infant seminary at La Côte, but thereafter his education was entirely in his father's hands. He took most keenly to French and Latin literature and to geography, especially travel books, which implanted in him a longing for distant, sometimes exotic shores that his later travels around Europe scarcely satisfied. Of Latin authors his favourite was Virgil, and in his *Mémoires* (the major source for knowledge and understanding of his life) he recounted how his father's reading of the episode of Dido and Aeneas reduced him to tears. His father also gave him rudimentary instruction on the flageolet, and he later learnt the flute with a local teacher, Imbert, and the guitar with another, Dorant. There is no doubt that his ability on the flute and guitar quickly became more than adequate, and it satisfied not only social demand but the deep-rooted sensitivity to music of which Berlioz had first become aware as a small boy when attending Mass. A tune from Dalayrac's *Nina*, pressed to the service of religion, first evoked a sense of wonderment mingling with an ardent but short-lived religious sense. He never studied the piano and never learnt to play more than a few chords.

Berlioz also linked his first steps in music, learning the flageolet, with his boyhood passion for Estelle Duboeuf, when he was 12 and she 18. He called her his *stella montis*, associating her with the mountains behind Meylan where she lived and with Florian's *Estelle et Némorin* which he had already 'read and reread a hundred times'. He was teased for his admiration from afar, but it proved to be deeper than anyone suspected. He found a copy of Rameau's *Traité de l'harmonie* at home and also procured Catel's *Traité d'harmonie*. These provided the basis for a knowledge of harmony, learnt entirely without reference to a keyboard, with which he began to compose more ambitiously, probably at the age of 13 or 14. He wrote a potpourri on Italian melodies, and then two quintets for flute and strings, all now lost but for a melody from one of the quintets that became the second subject of the overture to *Les francs-juges*. Similarly, a setting of one of Florian's poems *Je vais donc quitter pour jamais* made at this time survives as the first theme in the opening section of the *Symphonie fantastique*. 'It seemed to me exactly right for expressing the overpowering sadness of a young heart caught in the toils of a hopeless love.' He made copies of popular *romances* by Dalayrac, Boieldieu, Berton and others, sometimes with his own guitar accompaniments, and his own *romances* were in the same mould. In 1819, when he was 15, he wrote to two (and probably more) Paris music publishers offering a sextet and some songs with piano accompaniment, but none seem to have been published at that time.

When he reached 17 a decision had to be made about his career, and though an irresistible instinct drew Berlioz to music, his father's wish that he should follow him into the medical profession prevailed, and he was sent to Paris to the Ecole de Médecine, having obtained his bachelor's degree in Grenoble in March 1821. At this stage his horizons were still narrow; his knowledge of the world was more literary than real, and his profoundest impressions were probably the child's absorption of his natural surroundings and of the echoes of the Napoleonic convulsion. Much of his experience was vicarious, for he found in Bernardin de St Pierre and Chateaubriand an outlet for his still dormant capacity for intense feeling. In music only the slightest works by minor composers were known to him and he had never seen a full score; Pleyel's quartets were the most sophisticated music he had heard. In physique he was of middle height, with a mass of fiery, tawny hair; his eyes were blue and deep set, and a distinctive aquiline nose surmounted wide, thin lips.

2. 1821–30. Even before Berlioz's departure from La Côte his aversion to medicine was plain.

> Become a doctor! Study anatomy! Dissect! Take part in horrible operations – instead of giving myself body and soul to music, sublime art whose grandeur I was beginning to perceive! Forsake the highest heaven for the wretchedest regions of earth, the immortal spirits of poetry and love and their divinely inspired strains for dirty hospital orderlies, dreadful dissecting-room attendants, hideous corpses, the screams of patients, the groans and rattling breath of the dying! No, no! It seemed to me the reversal of the whole natural order of my existence. It was monstrous. It could not happen. Yet it did.

With his cousin Alphonse Robert, with whom he shared lodgings, he attended medical school and pursued his studies for two years, with interruptions, at least until his baccalauréat de sciences physiques which he took in January 1824.

But medicine was fighting a losing battle against the overpowering strength of Berlioz's musical impulse now inflamed a hundred times more strongly by the musical experience and opportunity offered by the capital, which was to remain his home for the rest of his life. Within a month of his arrival he began to attend performances at the Opéra. Gluck, whose *Iphigénie en Tauride* was one of the first operas he heard, made a deep and lasting impression and remained the composer he admired most wholeheartedly of all. He also heard operas by Salieri, Sacchini, Méhul, Spontini and Boieldieu, a repertory that supplied a stylistic basis for his own initial attempts at large-scale composition. There survive copies in his own hand of extracts from Gluck's operas made in 1822 in the Conservatoire library, which he frequented as often as his studies allowed, but he soon felt the need to supplement his musical technique; at the end of 1822 he gained an

introduction to Le Sueur through a pupil, Gérono, and was admitted to his class. By this time he had attempted for the first time a work for full orchestra, the cantata *Le cheval arabe* on a text by Millevoye (now lost). Six *romances*for one or two voices with piano had appeared separately in print since his arrival in Paris, but one effect of Le Sueur's tutelage was that Berlioz published no further music for about six years, concentrating instead on larger works, with orchestral accompaniments. In 1823 he composed an opera on Florian's *Estelle et Némorin* referring to childhood memories and doubtless childhood melodies too. This, like the two works that followed – a scene for bass from Saurin's *Beverley* and the Latin oratorio *Le passage de la mer rouge* – was later burnt, on Berlioz's confession. The first important work to have survived is the *Messe solennelle* composed for the church of St Roch in 1824. A first rehearsal under Valentino on 27 December 1824 was a fiasco, but a successful performance the following July, under the same conductor, restored Berlioz's confidence in himself and strengthened his resolve to be, in Le Sueur's words, 'no doctor or apothecary but a great composer'.

Since his abandonment of medicine he had had to face the entrenched opposition of his parents and their curtailment of his funds. His father had always assumed that his son would inherit the responsibilities of the family estate in which he had invested so much of his own energies, and resisted any suggestion that Berlioz's career might take him elsewhere. Family disputes persisted for years and the visits he paid to La Côte only deepened the estrangement. With his father's allowance reduced and intermittently refused, Berlioz was forced to borrow from his friends, and he was to suffer severe hardship for at least five years. He depended on whatever sources were at hand – a few pupils, a short period as a chorus singer at the Théâtre des Nouveautés, and occasional articles for the press, the beginnings of what was later to be his principal source of income. His closest friend at this period was a law student with literary inclinations, Humbert Ferrand, who supplied the text for *La révolution grecque*, set to music in 1825, and also for an opera *Les francs-juges* (1826) of which six fragments and the overture remain. It owed much to his teacher Le Sueur but also reflected the dark colours and sinister tones of Weber's *Der Freischütz*(introduced to Paris as *Robin des bois* in 1824). Although *Les francs-juges* was completed, none of Berlioz's efforts to secure a performance succeeded, and after at least two attempts to rewrite it, he discarded or re-used some of it in later works, notably the *Marche des gardes*, incorporated in the *Symphonie fantastique* as the 'Marche au supplice' in 1830.

In 1826 Berlioz entered the Conservatoire: here he was in Le Sueur's class for composition, which he had been attending for some time, and Reicha's class for counterpoint and fugue. *Les francs-juges* and the overture to *Waverley*, which followed it, revealed a growing individuality and a marked confidence in his own powers, especially in the handling of instruments. In 1826 he also entered for the Prix de Rome for the first time, getting no further than the preliminary round. The following year, though, he passed the first test and entered *en loge* for the first of four times to compose the cantata prescribed by the regulations of the competition. *La mort d'Orphée*, the cantata set in 1827, was declared unplayable by the judges (though Berlioz had it played in rehearsal in 1828 with some satisfaction). For the 1828 competition he composed *Herminie*, which contains the melody later used as the *idée fixe* in the *Symphonie fantastique*, and won second prize. In 1829 he wrote the most individual and dramatic of these cantatas, *La mort de Cléopâtre*, and no prize was awarded, probably to avoid bestowing official approval on a composer who 'betrayed such dangerous tendencies'. At the fourth attempt, in 1830, Berlioz was finally successful, although only a fragment of the cantata, *La mort de Sardanapale*, survives. His tactic had been to restrain his more individual mode of expression in order to provide a conventionally acceptable style.

Meanwhile the emotional and artistic elements of his being had been set alight by a series of thunderstrokes. The capacity for absorbing powerful external impressions and transmuting them into high artistic form placed him in the avant garde of the generation of 1830, and implanted in the soil of his imagination the seed of great works, many of them to remain beneath the surface of realization for many years. The first was the simultaneous impact of Shakespeare and the actress Harriet Smithson on 11 September 1827. On that day Berlioz attended *Hamlet* presented by an English company at the Odéon theatre, with Charles Kemble playing Hamlet and Miss Smithson playing Ophelia. 'The impression made on my heart and mind by her extraordinary talent, nay her dramatic genius, was equalled only by the havoc wrought in me by the poet she so nobly interpreted.' Though the performance (of the Garrick version) was in English, of which Berlioz knew virtually nothing at that time, he grasped the grandeur and sublimity of Shakespeare's language and the richness of its dramatic design, and he joined the ranks of those under Hugo's leadership who extolled Shakespeare as a challenge to French Classicism and a model for the new Romantic theatre. For Berlioz Shakespeare represented the pinnacle of poetic utterance; his veracity of dramatic expression and freedom from formal constraints picked up direct resonances in Berlioz's spirit. Shakespeare's plays were to supply the basis of three major works, *Roméo et Juliette*, *Béatrice et Bénédict* and the *Roi Lear* overture. In addition, there were at least three pieces inspired by *Hamlet*, a fantasy on *The Tempest*, and some direct borrowings in *Les Troyens*. More profoundly Shakespeare provided a framework for the structure of both *Roméo et Juliette* and *Les Troyens* and was a source, in the form of dramatic truth, of Berlioz's fundamental notion of expressive truth. Berlioz was to read and quote Shakespeare avidly for the rest of his life, putting him alongside Virgil in his literary pantheon.

This seminal discovery worked itself out more profoundly and more slowly than that of Miss Smithson, whom he referred to as his Ophelia, or Juliet, or Desdemona. His emotional derangement was immediate and violent. For the next two years he was obsessed by her, waiting for her return to Paris, vainly seeking a means to approach her. When in 1830 his love for her eventually turned sour, the accumulation of emotional tension broke out in the *Symphonie fantastique*, which describes and transmutes into artistic form the artist's passions, dreams and frustrations. For Berlioz there was no clear distinction between the real Harriet Smithson and the idealized embodiment of Shakespeare's heroines, so that when, later, he was to secure an introduction to her and ultimately marry her, a relationship that had begun on an ideal level could only spoil in the glare of everyday reality,

and the wholly Romantic conjunction of the artist with the ideal woman came to a bitter end.

Two further discoveries at this time rank as of supreme importance: in March 1828 Berlioz heard Beethoven's Third and Fifth Symphonies, played by Habeneck and the Société des Concerts at the Conservatoire. 'Beethoven opened before me a new world of music, as Shakespeare had revealed a new universe of poetry.' For the first time his horizons widened from the exclusively vocal genres of opera, cantata and *romance* to the expressive potential of pure instrumental music. That Berlioz wrote symphonies at all is entirely due to his obeisance to Beethoven, and the *Symphonie fantastique* can be seen as a deliberate and conscious attempt to work out dramatic and poetic ideas in the framework of a Beethoven symphony. More important, Berlioz discovered that instrumental music has an expressive and articulative force far more penetrating than vocal setting, a discovery shown palpably in the 'Scène d'amour' of *Roméo et Juliette*, in the *Hamlet* funeral march, and at certain points in *Les Troyens*. Just as Berlioz hardly set any of Shakespeare's poetry to music, similarly Berlioz rarely adopted the precise tone and timbre of Beethoven. He absorbed this impact at a deep level, seeing Beethoven as a supreme dramatist in music, more poet than craftsman.

Goethe's *Faust* reached Berlioz through Gérard de Nerval's translation, published in December 1827, and again its impact was profound and immediate. The Faustian conception of man struck numerous echoes in Berlioz's breast. In a letter of 1828 he described Shakespeare and Goethe as 'the silent confidants of my suffering; they hold the key to my life'. He went on to say that he had just set the ballad of the King of Thule to music, the first of what were to be eight scenes, settings of the verse portions of Nerval's translation. The *Huit scènes de Faust* were published at Berlioz's expense in the following year, an op.1 of exceptional originality and invention. Each scene bears a quotation from Shakespeare, and each has its appropriate musical setting, varying from the *Concert de sylphes* for six solo voices and orchestra to the *Sérénade* in which Mephistopheles is accompanied by a guitar. But despite its remarkable character Berlioz found the work 'crude and badly written'. He collected all the copies he could and destroyed them. Dimly he may have realized that the music would eventually find its due place in the larger scheme of *La damnation de Faust*, completed in 1846.

1. *Hector Berlioz: portrait by Emile Signol, 1830 (Académie Nationale de France, Rome)*

Literary influences of a less overwhelming kind were numerous, chief among them being the works of Moore, Scott and Byron. All three inspired compositions. He submerged himself, too, in Chateaubriand, Hoffmann, Fenimore Cooper, and the work of his own compatriots and contemporaries, Hugo, de Vigny, de Musset and Nerval. Later he was to absorb and admire Balzac, Flaubert, and Gautier, whose poems supplied the text of *Les nuits d'été*.

The ferment of Berlioz's mind in the late 1820s was astonishing. Instead of wilting under a constant onslaught on his sensitivities, he broke out in gusts of creative energy. The *Waverley* overture, the *Huit scènes de Faust*, the nine settings of Thomas Moore (the *Irlande* collection), composed in 1829, and above all the *Symphonie fantastique*, composed in early 1830, are testimony to this. He was active too as a proponent of his own music. The *Messe solennelle* had been played at St Roch in 1825 and 1827, and on 26 May 1828 Berlioz gave his first orchestral concert in Paris. His intention was to bring himself to the attention of the public, especially Harriet Smithson, and he succeeded in his aim in that the press, particularly the influential Fétis, was favourable. Much of his time in the next 15 years was devoted to planning, organizing and, after 1835, conducting his own concerts in Paris, a task that made heavy demands on his energy and usually his purse, but which provided the sole outlet for his orchestral works.

His eventual success in winning the Prix de Rome in 1830 was important to him as a means of convincing his parents that his musical bent was serious, as well as a source of income for the next few years. The prize required residence in Italy, but before he left he had important concerts to give in Paris. At the prize-giving ceremony at the institute on 30 October his cantata *La mort de Sardanapale* (with an additional conflagration scene written after the prize had been awarded) misfired completely. His fantasy (or 'overture') on *The Tempest* for chorus and orchestra was heard for the first time on 7 November at the Opéra and on 5 December the *Symphonie fantastique* received its first performance in a concert of Berlioz's works conducted by Habeneck. Liszt, who was present, made Berlioz's acquaintance on that occasion (fig.2).

Berlioz's reputation as a composer of startling originality was by now confirmed and his progress in the musical world of Paris was not to be furthered by enforced removal to Italy. He made several requests to be exempted from going, giving as his reasons his need to pursue his career in Paris and the state of his health, which had certainly not been good. A more pressing reason, in Berlioz's mind, was his attachment to Camille Moke, a

*2. Autograph MS from chap.31 of Berlioz's 'Mémoires' (private collection); in this passage the composer describes his first meeting with Liszt and reactions to the première of the 'Symphonie fantastique' on 5 December 1830*

19-year-old pianist of exceptional gifts whom he had met earlier in the year at a school where she taught the piano and he the guitar. She replaced the unresponsive Miss Smithson in his affections and their ardent affair led even to betrothal on the eve of his departure for Italy.

3. 1831–42. Berlioz spent a month at La Côte-Saint-André, where his parents were at last delighted with their son's success. At the back of his mind he had a large-scale composition that was to haunt him for a number of years, while his immediate thoughts were entirely with Camille, already, according to Ferdinand Hiller (her previous attachment), cooling in her affections. His journey to Italy and the 15 months he spent there were crucially formative. His mind was constantly alive to the impressions, both inspiring and disappointing, of the country and the people, their customs and way of life. He was supposed to draw inspiration from the relics of classical antiquity. These certainly intrigued him, especially where they touched upon Virgil, but his musical output was relatively small and haphazard, and his official submissions from Rome were not especially remarkable. Italy was nonetheless to work upon his music in more gradual fashion, with far-reaching influence on his style. Henceforth there was a new colour and glow in his music, both sensuous and vivacious. These derive not from Italian art, which touched him little, or Italian music, which he despised, but from the scenery and the sun, and from his acute sense of locale. *Harold en Italie*, *Benvenuto Cellini* and *Roméo et Juliette* are the most obvious expressions of his response to Italy: both *Les Troyens* and *Béatrice et Bénédict* reflect the warmth and stillness of the Mediterranean, as well as its vivacity and force.

Berlioz's descriptions of Italy in the *Mémoires* and the abundant accounts of his travels in letters to his friends and family are wonderfully evocative; he seems here to have discovered his gifts as a writer. In Italy he came face to face with experiences he had previously only read about or idealized. Byronism, so fashionable at that time, became reality as he encountered brigands, corsairs, revolutionaries, *lazzaroni* and *pifferari*, and as he sampled the harshness of a storm at sea or the Carnival in Rome or sleeping in the open air in the mountains. He met sailors, peasants, sculptors and travellers, but, with the notable exception of Mendelssohn, few musicians. The

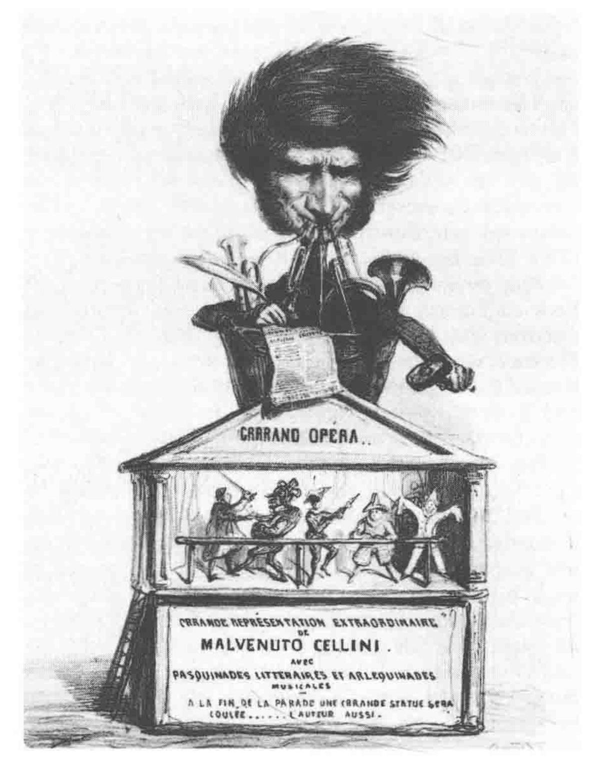
Villa Medici at Rome housed the institute prizewinners under the tutelage of Horace Vernet, but Berlioz greatly disliked the city: 'Rome is the most stupid and prosaic city I know: it is no place for anyone with head or heart'. Florence, on the other hand, he adored: 'Everything about it delights me, its name, its climate, its river, its palaces, its air, the style and elegance of its inhabitants, its surroundings, everything, I love it, love it'. At Rome he composed little, mostly because of the stifling atmosphere of the Villa, but on his travels he achieved much more.

Three weeks after his arrival in Rome Berlioz set off back to France, jeopardizing his pension, in order to discover why he had heard nothing from Camille. At Florence, where he suffered a serious attack of quinsy, he learned the truth: that she had abandoned him for a new and more prosperous suitor, Camille Pleyel, the piano manufacturer. In a torrent of rage and wounded pride, Berlioz determined to return to Paris to kill the two Camilles, her mother and finally himself. Although he reached Nice, his resolve wavered and his better sense persuaded him to give his passions time to cool. Vernet was prepared to pardon him; Berlioz was prepared to spare his victims. The experience was traumatic, with emotional recovery very closely related to the recovery of his health. He felt that he had 'survived', and that he could live again to compose the music still dormant in his mind. Here was born *Le retour à la vie*, a half-literary, half-musical work that folded a variety of experiences together under the title 'mélologue' taken from Thomas Moore. Much of the text reflected thoughts and ideas found in his letters of the time, while the music was almost entirely drawn from works written earlier in Paris. Although the work was always designed as a sequel to the *Symphonie fantastique* and referred directly to Harriet Smithson, it was a different unrequited love that originated it. It was not renamed *Lélio*until its revival in 1855.

Resting for three weeks in Nice – the three happiest weeks of his life, Berlioz said – he gave priority to another pressing inspiration, an overture on Shakespeare's *King Lear*, which he had read in Florence, and started another on Scott's *Rob Roy*. On the return to Rome he worked further on *Le retour à la vie* and revised the *Symphonie fantastique*. He moved out of Rome as often as possible, especially to the Abruzzi mountains, Tivoli and Subiaco, where he finished *Rob-Roy*. Antoine Etex, the sculptor, recalled how he and Berlioz went for long walks together, singing *Guillaume Tell*, bathing, searching for brigands and playing practical jokes. In September Berlioz went to Naples, visited Pompeii and the island of Nisida, and then returned to Rome on foot.

The only musical product of the rest of his stay in Italy was the song *La captive* (in its strophic form), written in Subiaco in February 1832. Impatient to get back to Paris and to have his new works performed there, he secured six months' dispensation and left in May 1832. He was later exempted from the required residence in Germany. After some months at La Côte-Saint-André, he reached Paris in November and immediately organized a concert of his own music, including the revised *Symphonie fantastique* with its sequel *Le retour à la vie*. Thinly veiled references to Fétis's 'corrections' of Beethoven symphonies earned Berlioz a bitter notice in the *Revue musicale* and the animosity of an influential critic, but he was more concerned by the fact that Harriet Smithson was in Paris at the time. Her performances were far from the fashionable success they had been five years earlier, but an intermediary secured her attendance at the concert and subsequently an introduction. Despite their respective accumulated debts and difficulties and objections from both families, especially his own, Berlioz soon proposed marriage. After a bizarre and stormy courtship, they were married on 3 October 1833. It was perhaps characteristic of Berlioz to take his idealized love for his Ophelia to the point of marriage and perhaps, too, no surprise that the marriage was happy for scarcely more than six years. A son, Louis, was born to them in August 1834, and the picture of the young ménage living at the top of Montmartre, where their friends went to visit them, is a touching one. But with a language barrier between them and the strains of temperament and material deprivations always acute, it is hardly surprising that by 1842 or earlier they had drifted apart. Harriet's last years are a distressing tale of misery and decline, and she died in 1854. Berlioz supported her to the end and retained a warmth of affection for what she had meant to him and for her inspiring qualities as an artist.

Berlioz's career in the 1830s is, despite its astonishing achievements, essentially a tragic one. Conscious of his own genius and of the springs of invention within him, he failed to win the recognition that alone assured him even the barest means of existence. As a composer he earned virtually nothing. The general view of his music was that it was eccentric and 'incorrect'. His admirers were passionate but few, and no worthy official post, such as a teaching appointment at the Conservatoire, came his way; he became merely its assistant librarian. He secured two government commissions (for the *Grande messe des morts* in 1837 and the *Grande symphonie funèbre et triomphale* in 1840), but neither of these was particularly profitable or helpful to his artistic standing. He was compelled to earn a living in a profession at which he excelled but which he abhorred – as a critic. He wrote for *L'Europe littéraire* in 1833, *Le rénovateur* from 1833 to 1835, and principally from 1834 for the *Gazette musicale* (later to become the *Revue et gazette musicale*) and the *Journal des débats*, an influential newspaper whose proprietors, the Bertins, were his staunch supporters. He was soon to be better known to Parisians as a critic than as a composer.



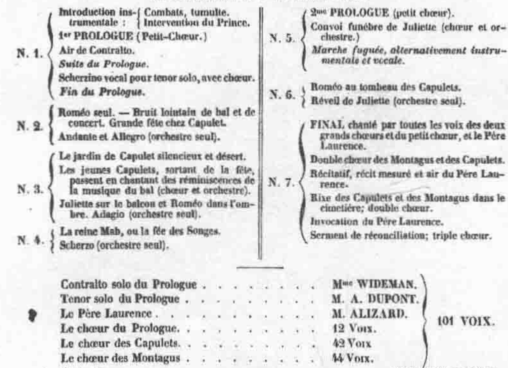
Journalism took him away from composing and from its essential adjunct, performance. Gladly would Berlioz have devoted more of his time to giving concerts, even though the financial burdens were always severe. The record of his concerts in Paris is as follows: in 1832 he gave two, in 1833 five, in 1834 four, in 1835 six, in 1836 two, in 1837 the official performance of the *Grande messe des morts*, in 1838 two, in 1839 three, in 1840 five (*see* Paris, fig.28), in 1841 one and in 1842 four. The programme was normally made up of his own music interspersed with vocal and instrumental solos and occasionally works by Beethoven, Weber, Spontini and others. Liszt, Chopin, Hallé and other members of the richly cosmopolitan circle of musicians who then inhabited Paris took part. After 1835, when Girard bungled a performance of *Harold en Italie*, Berlioz resolved to conduct his own works himself. This led in turn to an illustrious career as one of the first specialist orchestral conductors, in wide demand outside France for his skill and interpretative insight.

Discouragement could not stem the flow of major compositions. *Harold en Italie* was composed in the

summer of 1834 in response to a request from Paganini for a work in which he might display a fine Stradivari viola. Berlioz used the opportunity to devise an unusual symphony with concerto elements in which echoes of his Italian journey are presented in the cloak of Byron's *Childe Harold*. As in the *Symphonie fantastique*, a recurrent theme again serves to unify the four movements, but the modest role of the viola solo deterred Paganini from ever playing it.

If the image of Beethoven was still vivid in Berlioz's mind at this time, his primary concern, for professional as well as artistic reasons, was to win success at the Opéra. Only thus was real recognition to be sought; only thus, too, could Berlioz prove himself in the noble line of Gluck and Spontini. *Les francs-juges* had already been revised once before he left for Italy. After his return he made a further attempt, with Thomas Gounet's help, to refashion it into a single act, but it still aroused no interest. After abandoning it, he considered a comic opera on Shakespeare's *Much Ado about Nothing* (this eventually materialized as *Béatrice et Bénédict*in 1862) and briefly contemplated *Hamlet* before persuading Léon de Wailly and Auguste Barbier, with Alfred de Vigny's assistance, to make a libretto out of Benvenuto Cellini's *Vita* (*Memoirs*), a book whose abundant incident appealed strongly to him. It provided, too, the irresistible local colour of Renaissance Italy. First written as an *opéra comique* with dialogue, the libretto was refused in 1834, but by elevating the tone and expanding the action Berlioz was able to offer it to the Opéra. It was accepted in 1836 and performed in September 1838. At that time the music of Meyerbeer and Halévy held such sway at the Opéra that few members of the company were able or prepared to consider Berlioz's bewilderingly original and inventive music with real seriousness. At all events, the three performances of 1838 were a clear failure (fig.3), and the management had little interest in the few fragmentary revivals the following year. Berlioz described the experience with bitterness as being 'stretched on the rack', for it not only humiliated him as an artist, it also closed the door of the Opéra to him, except as the arranger of other men's works, for the rest of his life.

Berlioz was preoccupied at the same time with a half-Revolutionary, half-Napoleonic conception on the grandest scale, which took various forms. Remnants of the 1824 mass, a military symphony sketched out on the journey back from Italy, and a preoccupation with the Last Judgment all contributed to plans for a huge work in seven movements commemorating France's national heroes, of which two movements were completed in 1835. These do not survive, although they were probably included in the Requiem commissioned by the minister of the interior and performed in the Invalides on 5 December 1837, and also perhaps in the *Grande symphonie funèbre et triomphale*, another government commission, performed during the tenth anniversary of the 1830 Revolution on 28 July 1840. Both works exploit Berlioz's interest in grandiose spatial effects and in the appropriate matching of instrumental forces to the occasion and the place for which a piece was intended. The *Symphonie funèbre*was originally written for large military band and performed out of doors. Berlioz later added parts for strings and for chorus. Traces of his Napoleonic leanings may be seen in his setting for solo bass, chorus and



*3. 'One-man orchestra', caricature of Berlioz that appeared after the failure of 'Benvenuto Cellini': lithograph by 'Benjamin' (Benjamin Roubaud) from 'Caricature provisoire' (1 November 1838); the harlequinade is based on the pantomime of King Midas in Act 1 tableau ii*

orchestra of Béranger's *Le cinq mai*, first performed in 1835.

In contrast to these, many compositions of the 1830s were delicate and intimate. He continued to write songs, of which some were orchestrated, such as *La captive* and *Le jeune pâtre breton*. *Sara la baigneuse*, an exceptionally refined setting of a Hugo poem, was first heard in 1834. *Les nuits d'été*, six settings of Gautier poems with piano accompaniment, appeared in 1841: all six were later orchestrated.

Paganini's unexpected gift of 20,000 francs in December 1838, a token of his admiration for *Harold en Italie*, made possible the composition of *Roméo et Juliette*, and consoled Berlioz for the failure of *Benvenuto Cellini*. 'My one idea was to put it to a musical purpose. I would give up everything else and write a really important work, something splendid on a grand and original plan, full of passion and imagination, worthy to be dedicated to the glorious artist to whom I owed so much.' Berlioz wrote movingly of the ardent months of composition and he came to regard the 'Scène d'amour' as one of his finest things. The critics accused him of failing to understand Shakespeare, although for Wagner at least, who was present at one of the first performances, it was a 'revelation'.

4. 1842–8. About 1841 Berlioz reached a turning-point in his career. In that year the only music of his publicly performed in Paris was the set of recitatives composed for Weber's *Der Freischütz* in order to make it acceptable to the Opéra's ban on spoken dialogue. At the same time

GRANDE SALLE DU GARDE-MEUBLE DE LA COURONNE,
Rue Bergère, n° 2.

*Dimanche* 24 NOVEMBRE 1839, *à* 2 *heures précises*,

GRAND CONCERT,
VOCAL ET INSTRUMENTAL,
DONNÉ PAR M.
H. BERLIOZ,
on y entendra, pour la 1re fois,
ROMÉO ET JULIETTE,
SYMPHONIE DRAMATIQUE,

Avec Chœurs, Solos de Chant et Prologue en Récitatif harmonique, composée d'après la Tragédie de *Shakspeare*, par M. H. BERLIOZ. Les paroles sont de M. ÉMILE DESCHAMPS.

PROGRAMME DE LA SYMPHONIE.

N. 1. Introduction instrumentale : Combats, tumulte. Intervention du Prince.
1er PROLOGUE (Petit-Chœur.)
Air de Contralto.
*Suite du Prologue.*
Scherzino vocal pour tenor solo, avec chœur.
*Fin du Prologue.*

N. 2. Roméo seul. — Bruit lointain de bal et de concert. Grande fête chez Capulet.
Andante et Allegro (orchestre seul).

N. 3. Le jardin de Capulet silencieux et désert.
Les jeunes Capulets, sortant de la fête, passent en chantant des réminiscences de la musique du bal (chœur et orchestre).
Juliette sur le balcon et Roméo dans l'ombre. Adagio (orchestre seul).

N. 4. La reine Mab, ou la fée des Songes.
Scherzo (orchestre seul).

N. 5. 2me PROLOGUE (petit chœur).
Convoi funèbre de Juliette (chœur et orchestre.)
*Marche fuguée, alternativement instrumentale et vocale.*

N. 6. Roméo au tombeau des Capulets.
Réveil de Juliette (orchestre seul).

N. 7. FINAL chanté par toutes les voix des deux grands chœurs et du petit chœur, et le Père Laurence.
Double chœur des Montagus et des Capulets.
Récitatif, récit mesuré et air du Père Laurence.
Rixe des Capulets et des Montagus dans le cimetière; double chœur.
Invocation du Père Laurence.
Serment de réconciliation; triple chœur.

Contralto solo du Prologue . . . . . . . . . Mme WIDEMAN.
Tenor solo du Prologue . . . . . . . . . M. A. DUPONT.
Le Père Laurence . . . . . . . . . M. ALIZARD.
Le chœur du Prologue. . . . . . . . . 12 Voix.
Le chœur des Capulets. . . . . . . . . 42 Voix
Le chœur des Montagus . . . . . . . . . 44 Voix.
(101 VOIX.)
Orchestre. . . . . . . . . . . . . . . . 100 INSTRUMENTS.

*L'exécution sera dirigée par M. H. BERLIOZ.*
Maitre de chant : Mr DIETSCH.

*Dimanche 1er Décembre 2me Concert (Roméo et Juliette).*

PRIX DES PLACES : 1res Loges, 10 f.; Stalles de Balcon, 10 f.; Secondes Loges, 6 f.; Stalles d'Orchestre, 6 f.; Loges du Rez-de-Chaussée, 6 f.; Parterre 3 f.; Amphithéâtre, 2 f.

*4. Programme of the first performance of Berlioz's 'Roméo et Juliette', 24 November 1839*

reports of performances abroad were increasingly common. The Requiem, for example, was heard in St Petersburg, while smaller works, such as the overtures, especially *Les francs-juges*, were becoming more frequently heard in England and Germany. He still withheld publication of the symphonies to prevent performances outside his control, so that it was growing urgent to go abroad in person, and to reinforce a developing international reputation. At the same time the frustrations of Paris made themselves more keenly felt, with the brighter enthusiasms of 1830 already receding and bourgeois tastes daily more evident, especially in the theatre. His marriage was perhaps already strained. For the first time his musical creativity waned, with no major works appearing for five years. He worked intermittently and unenthusiastically on a Scribe libretto for the Opéra, *La nonne sanglante*, which was never completed. On the other hand his literary activity was extending beyond the regular demands of his newspaper criticisms to a comprehensive study of orchestration, which began to appear in 1841 in the *Revue et gazette musicale* and which was published as the *Grand traité d'instrumentation et d'orchestration modernes* in 1843.

For the next 20 years much of Berlioz's time was spent on peregrinations of Germany, Austria, Russia and England. Curiosity about advanced music was more evident in such places than in Paris, and the administrative and financial problems of promoting concerts were fewer. The more he travelled the more bitter he became about conditions at home; yet though he contemplated settling abroad – in Dresden, for instance, and in London – he always went back to Paris.

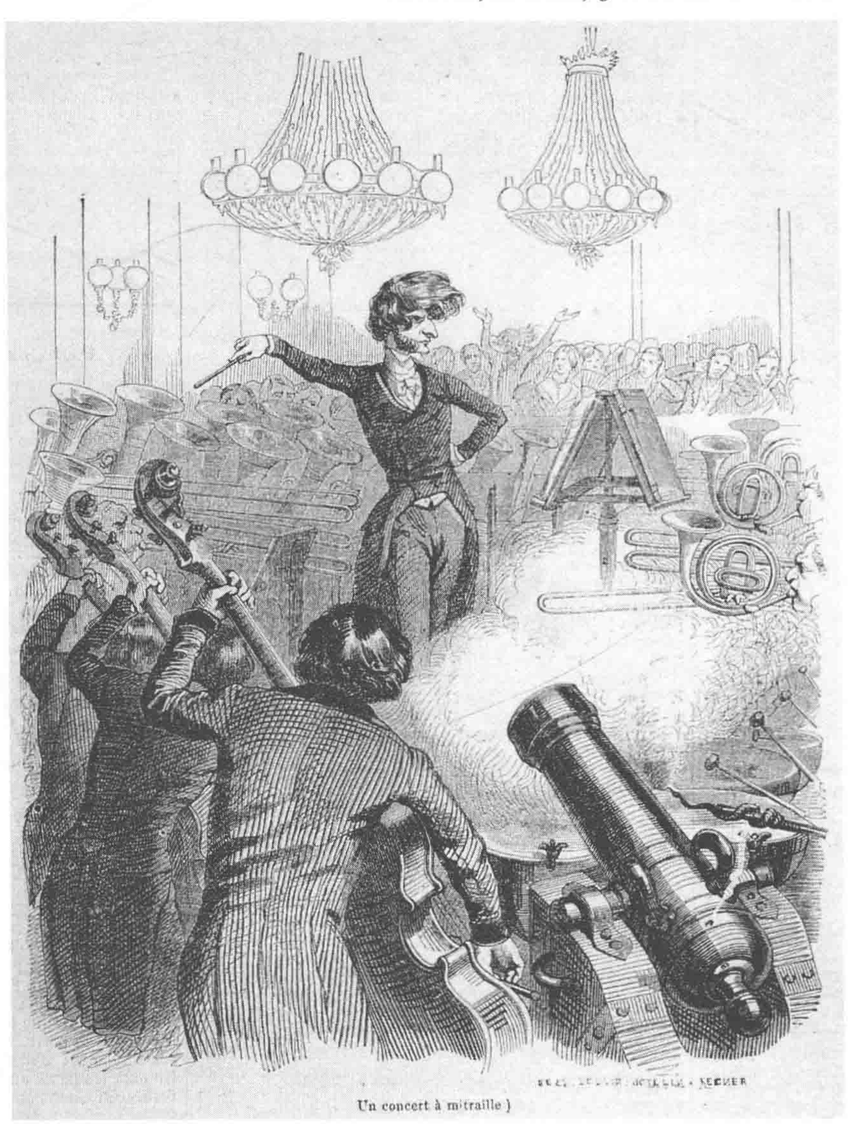
His first concert abroad was on 26 September 1842 in Brussels. His two concerts there were, in Berlioz's words, 'merely an experiment', but sufficiently successful to justify the more ambitious tour that followed shortly afterwards. He was abroad from December 1842 to the end of May 1843, and his tour took in visits to Brussels, Frankfurt, Stuttgart, Hechingen, Mannheim, Weimar, Leipzig, Dresden, back to Leipzig, Brunswick, Hamburg, Berlin, Hanover and Darmstadt. The tour was vividly recounted in open letters to his friends published initially in the *Journal des débats*, then collected in the *Voyage musical en Allemagne et en Italie* in 1844 and finally forming part of his *Mémoires*. He met new friends, including Schumann, revived his acquaintance with old ones – Mendelssohn and Wagner, for example – and made a study of orchestral playing in the different cities he visited. Generally his reception was wholeheartedly warm, a foretaste of many enthusiastic welcomes he was to receive in Germany. To his reputation as a new and original voice as composer was added that of being a leading modern conductor, even though he conducted few works by other composers on his first tour. His return prompted the following reflections:

> Paris is where music one moment lies moribund and the next moment seethes with life; where it is sublime and second-rate, lordly and cringing, beggar and king; where it is at once glorified and despised, worshipped and insulted. In Paris music too often speaks to morons, barbarians and the deaf. You see it walking freely and without restraint, or barely able to move for the clammy fetters with which Routine shackles its powerful limbs. In Paris music is a god – so long as only the skinniest sacrifices are required to feed its altars.

Berlioz was accompanied on the German tour by a singer of mixed French and Spanish birth, Marie Recio, who sang in most of his concerts. For her he orchestrated the song *Absence*, from *Les nuits d'été*, which she sang in Leipzig for the first time. His feelings for her had none of the passionate élan he had felt towards Harriet Smithson, indeed he tried to escape her pursuit on a number of occasions. On this relationship his letters and writings are more or less silent, yet prosaic or not, it was to last 20 years, until her death. After his separation from Harriet in 1844, Berlioz was confronted with supporting two households and with the even more distressing spectacle of Harriet's acute decline. Yet for his son, Louis, Berlioz felt an affection that was to grow stronger until it became the very focus of his emotional life.

The two years that elapsed before undertaking another concert tour were unremarkable, especially since he was now 40 and *nel mezzo del cammin* of his life. They were not unproductive, but were devoted far more to journalism and publication of his music and of his two first literary works than to composition. The *Mémoires* dwell on his endless obligations as *feuilletoniste* and on his concerts, the largest of which was on 1 August 1844 as part of the Grand Festival de l'Industrie, with over 1000 performers (fig.5). Four concerts early in 1845 formed a festival promoted by the Théâtre Franconi and were also given with large orchestra and chorus. From this period originates Berlioz's unfortunate reputation as a noisy composer, and the cartoonists were not slow to exploit the image (fig.6). The finest composition of this period is the *Corsaire* overture, sketched in Nice immediately after the exertions of the Grand Festival de l'Industrie in 1844

*5. Berlioz conducting a concert at the Grand Festival de l'Industrie, with over 1000 performers, 1 August 1844: engraving from 'L'illustration' (10 August 1844)*



and given at first with the title *La tour de Nice*. The broad and majestic *Hymne à la France* also dates from this year. Earlier he had arranged parts of his opera *Benvenuto Cellini* into a brilliant overture, *Le carnaval romain*, played for the first time on 3 February 1844, and an arrangement of Leopold de Meyer's *Marche marocaine* had a notable success a year later. He saw both the *Symphonie fantastique* and the *Symphonie funèbre et triomphale* through the press at this time.

In 1845 began a more intensive and varied succession of concert tours. The first was to Marseilles and Lyons, followed by a visit to Bonn for the Beethoven festival organized by Liszt and attended by leading musicians from all over Europe and a number of crowned heads. There followed a lengthy tour of Austria, Bohemia and Hungary that brought his name and music even more decisively into the forefront of European attention. Once again he recounted the details of his travels in the *Journal des débats* two years later and subsequently in his *Mémoires*. His itinerary was as follows: by carriage to Linz and thence by steamer to Vienna, where he stayed over two months and gave five concerts. He added two new songs to his repertory, *Zaïde*for soprano and *Le chasseur danois* for bass, and his concerts, which included at least parts of all his major works to date, were a 'grandissime succès'. One concert was devoted to a complete performance of *Roméo et Juliette*, and he had no need to exaggerate his reports of applause and enthusiasm; it was a reception entirely different from anything he had ever experienced in Paris. He then gave three concerts in Prague in as many weeks and then another back in Vienna. In February 1846 he gave three concerts in Pest, including a new arrangement of the Rákóczy March, rapturously received by an audience conscious of its national aspirations. He gave a concert in Breslau, then three more in Prague, where he found the musicians 'generally speaking the finest in Europe' and where he enjoyed success and admiration greater even than in Vienna. On his way back to Paris he gave one concert in Brunswick, on 24 April 1846.

Not only had Berlioz won unprecedented laurels and acclaim on this tour: he had also composed the bulk of a large new work, *La damnation de Faust*. For some years his mind had been turning back to Goethe's *Faust* and the settings he had rejected in 1829. A librettist, Almire Gandonnière, supplied some material before his departure from Paris, and Berlioz wrote the rest himself: henceforth he would write all his own major texts. *La damnation de Faust* was put together in the various cities he stayed in, including Passau, Vienna, Pest, Breslau and Prague. It was completed and orchestrated on his return, although composition was briefly interrupted by the commission of *Le chant des chemins de fer* for the opening of the Chemin de Fer du Nord at Lille on 14 June 1846, an occasion wittily recounted in *Les grotesques de la musique*.

The first performance of *La damnation de Faust*, given on 6 December 1846 at the Opéra-Comique, was a serious reverse, both artistically and financially.

*Faust* was given twice before a half-empty house. The fashionable Paris audience, the audience which goes to concerts and is supposed

*6. Berlioz conducting 'un concert à mitraille': engraving from 'L'illustration' (15 November 1845)*

to take an interest in music, stayed comfortably at home, as little concerned with my new work as if I had been the obscurest Conservatoire student . . .. Nothing in my career as an artist wounded me more deeply than this unexpected indifference.

Signs of growing philistinism in Paris had been in evidence for some years, but the irony was all the sharper in contrast to the warmth and understanding shown to him abroad. Berlioz had no choice but to continue to till foreign soil and to extend the chronicle of his wanderings to new lands. Two principal nations offered hope, Russia and England, and it was to Russia that he went first, within two months of the *Faust* fiasco. Altogether he gave five concerts in St Petersburg and one in Moscow, the former including two complete performances of *Roméo et Juliette*. He now had *La damnation de Faust* to enrich his repertory, and the first two parts were heard three times in Russia. On his way home he gave a complete performance of *Faust* in Berlin at the invitation of the King of Prussia. Once again he was able to report, on his return:

great success, great profit, great performances, etc. etc. . . . France is becoming more and more philistine towards music, and the more I see of foreign lands the less I love my own. Art, in France, is dead; so I must go where it is still to be found. In England apparently there has been a real revolution in the musical consciousness of the nation in the last ten years. We shall see.

So he left Paris once again, reaching London in early November 1847. He had been engaged by Louis Jullien as conductor of the opening season at Drury Lane, and the works in his charge were Donizetti's *Lucia di Lammermoor*and *Linda di Chamounix*, Balfe's *The Maid of Honour* and Mozart's *Le nozze di Figaro*. The season opened in December, yet within a month Berlioz was sensing alarm at Jullien's approaching bankruptcy. Jullien had all the bravado and showmanship of the charlatan, and though the opera season ran its full two months Berlioz was never paid. He pinned his hopes, instead, on a concert of his own music, which won many admirers. At the same juncture revolution broke out in Paris, and Berlioz was perhaps thankful to be away from the barricades. He began to piece together his *Mémoires* and added a preface that despairs of artistic life in France. His one salaried post, as librarian of the Conservatoire, was threatened, and many of his friends were fleeing the

*7. Hector Berlioz: lithograph by Josef Kriehuber, 1845*

Continent to settle in England, chief of them Charles Hallé. Despite Jullien's failure Berlioz found the English friendly and hospitable and their appetite for music encouraging. A second major concert on 29 June 1848 in Hanover Square Rooms established his reputation, especially in the eyes of the London press, and he contemplated staying if a suitable position were offered to him. Yet he returned to Paris, perhaps because his *feuilletons* offered him his sole regular income and because it was after all, as he himself ironically noted, his home.

5. 1848–63. Henceforth Berlioz's tours to foreign cities were almost all to places he had visited before; his years of first conquest were over. In the space of six years his European fame had flowered and he had, too, published most of his major works (*Benvenuto Cellini* and *Faust* were exceptions), making possible the further dissemination of his music. Success abroad went a long way to compensating for failure at home, and he continued to make regular visits to England and Germany for 15 years. The new regime in France made the Romantic heyday seem even more remote, and soon Second Empire tastes were to infiltrate all walks of life. But Berlioz achieved a new lofty detachment based on his powerfully ironic sense of humour and on his deep-rooted faith in classical ideals. One may detect a new repose in his music after 1850, linking him with his adored Gluck and isolating him both from Parisian taste and from the new schools of Liszt and Wagner.

It is not necessary to chronicle every foreign tour of this period. The majority gave him deep satisfaction and showed a genuine understanding in his audiences. The most notable events were in Weimar where Liszt's position

at the Duke of Saxe-Weimar's court allowed him to promote certain works of Berlioz. In March 1852 Liszt revived *Benvenuto Cellini*, after which Berlioz, with Liszt's aid, devised a new version, partly to improve the dramaturgy and partly to meet the demands of German taste. Its success in Weimar and other German cities was lasting. In November 1852 Liszt gave a Berlioz Week, with *Benvenuto Cellini* and *Roméo et Juliette* and two parts of *La damnation de Faust*, which was later dedicated to Liszt when published in 1854. In reply Liszt dedicated his own *Faust Symphony* to Berlioz. Further visits by Berlioz to Weimar in 1855 and 1856 were the occasion of discussions in which the Princess Sayn-Wittgenstein, Liszt's mistress, urged Berlioz to pursue his dream of a large epic opera based on the *Aeneid*; it came to fruition in *Les Troyens* in 1858.

But in London *Benvenuto Cellini* fared badly when it was performed there, at Covent Garden in June 1853, and was rapidly withdrawn, as it had been in Paris in 1838. This was a single blot on Berlioz's otherwise happy reception in England in all his five visits. His stay in 1851, as a member of the international jury to examine musical instruments at the Great Exhibition, produced some remarkable impressions in his reports to the Paris press, above all the experience of hearing 6500 children intoning *All people that on earth do dwell* during the Charity Children's annual service in St Paul's Cathedral. Six concerts in Exeter Hall in 1852, in which his own music had relatively little prominence, were 'an altogether extraordinary success exceeding anything I had had in Russia and Germany'. Two performances of Beethoven's Choral Symphony, in particular, set the seal on his celebrity as a conductor, and contributed to an invitation from the New Philharmonic Society to conduct their 1855 season. Since Wagner was then conducting the old Philharmonic Society it provided an occasion for the two men to meet and to exchange sympathy and encouragement in fuller measure than at any other time in their careers. Subsequently their radically divergent conceptions of music were to bring an estrangement between them. Other foreign visits that Berlioz recalled with satisfaction were to Hanover, Brunswick and Dresden in 1854, to Brussels in 1855, and his regular engagements for the summer season at Baden-Baden. He first conducted there in 1853 and was engaged every year from 1856 to 1863. Bénazet, manager of the casino, 'let me have everything I could possibly want for the performance of my works. His munificence in this respect has far surpassed anything ever done for me even by those European sovereigns whom I have most reason to be grateful to'. It was Bénazet who commissioned for the Baden-Baden theatre Berlioz's last work, *Béatrice et Bénédict*, first performed in 1862.

At home in Paris Berlioz made another determined attempt to win an audience for his music by the formation of a Société Philharmonique, in clear rivalry to the Société des Concerts du Conservatoire. This new body gave its first concert on 19 February 1850 with Berlioz as conductor. Despite initial success the society was troubled by internal dissent and by an early shortage of funds, and lasted only until May 1851. But in that period Berlioz had conducted a wide range of music and had introduced some of his own works, notably *L'adieu des bergers*, later to be the central part of *L'enfance du Christ*. At its first performance Berlioz attributed it to an imaginary 17th-century composer Pierre Ducré, allowing him to delight in the delusion of his audience. The Société Philharmonique also gave his Requiem in the church of St Eustache. The complete *L'enfance du Christ* was first heard in Paris on 10 December 1854 having grown from *L'adieu des bergers* and *La fuite en Egypte*. Many critics observed a more restrained style in the work, but Berlioz insisted that on the contrary only his subject matter had changed and that his primary stylistic aim, accuracy of expressive content, was still unchanged.

Berlioz's monumental manner was represented by the *Te Deum*, composed in 1849, although the conception probably goes back three or four years earlier. He found no opportunity to perform this work until April 1855, when it was included in the large-scale events promoted in connection with the Exposition Universelle. By that time he had added to its two choruses a part for large children's choir, inspired by his experience in St Paul's Cathedral in 1851. In November 1855 Berlioz conducted three big concerts in the Palais de l'Industrie for the closing events of the Exposition. Throughout the 1840s and most of the 1850s the Société des Concerts, Paris's longest-established and most regular concert-giving body, continued to ignore Berlioz's music completely.

His father died in 1848. Berlioz had felt deeply attached to him, the more since the strain in their relationship during Berlioz's first days in Paris had passed, and he felt the loss keenly. He remained close to both his surviving sisters, Nanci and Adèle, who died in 1850 and 1860 respectively – and their families. He inherited a modest income from his father's estate, which relieved some of his financial burdens. Harriet Smithson died in 1854 after four years of severe paralysis. Berlioz wrote movingly of her and of the failure of their happiness in the *Mémoires*; he never forgot the impression she first made on him or the style of dramatic interpretation that coloured his own conception of Shakespeare.

He married Marie Recio seven months later, a natural step after their 12-year association, and though she had not sung in public for some years he still had to suffer the damage done by her spiteful attitude to other musicians, Wagner especially. With her came her Spanish mother who outlived them both and cared generously for Berlioz in his last years. His son Louis, now in the French navy, caused Berlioz many an anxiety after a difficult adolescence, but gradually there developed a strong bond between them. In Louis' words: 'The thread of my life is but the extensions of my father's. When it is cut, both lives will end'. Louis saw action in the Crimean War and in the Baltic. In 1867, when captain of a merchant ship plying between France and Mexico, he died of yellow fever in Havana, one of the severest blows Berlioz ever had to suffer and a direct contribution to his own final decline. In Louis' love of travel and the sea Berlioz saw a reflection of his own lifelong, idealized passion for distant lands, inextricably interwoven with his dream of a land where art and music enjoyed unfettered cultivation, where the frustrations and miseries of Paris were not to be found. In 1862, in response, Louis came to love and admire his father's music.

Berlioz's compositions in the 1840s were haphazard in origin and frequency, partly because of his diversion of energy to travel, conducting, proof correction and journalism. In the following decade these diversions were no

*8. Dido's throne-room at Carthage, Act 1 of 'Les Troyens à Carthage' (Act 3 of 'Les Troyens'), Théâtre Lyrique, Paris, 1863: design by Philippe Chaperon, pen and ink with watercolour (Bibliothèque et Musée de l'Opéra, Paris)*

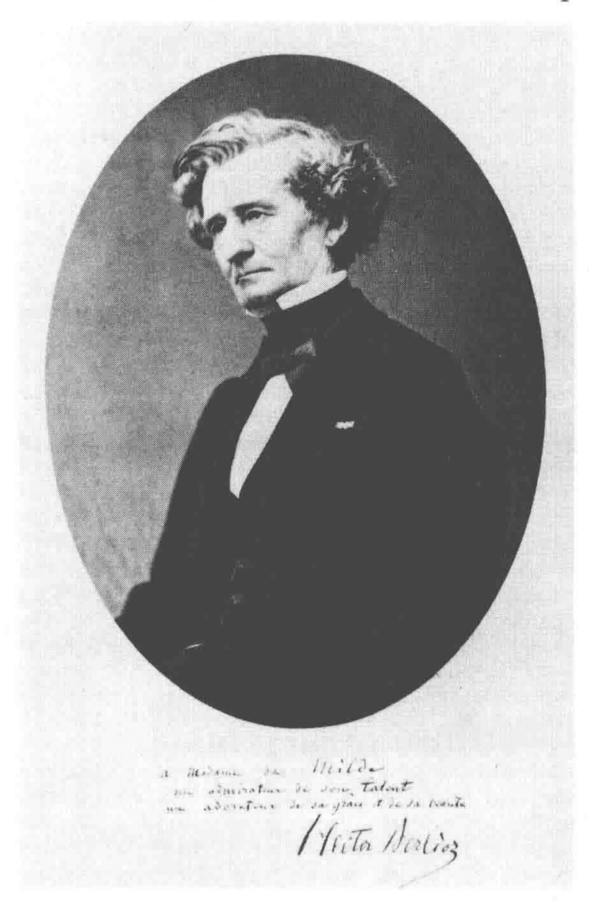
less pressing but he now found the mental and spiritual calm to produce a series of masterpieces that shine nobly through the day-to-day battles he was obliged to fight. After the *Te Deum* of 1849, his main productions were *L'enfance du Christ*, composed to his own text mostly in 1854. Another work of 1854 is the cantata in honour of the Emperor *L'impériale*, played at the Exposition Universelle of 1855. Early in 1856 he orchestrated most of *Les nuits d'été* (*Absence* had been orchestrated in 1843) for publication in Winterthur, though he never heard more than *Absence* and *Le spectre de la rose* in orchestral form. At that point (April 1856) he yielded to his desire to compose a vast epic opera based on the second and fourth books of Virgil's *Aeneid*. The idea had been in his mind for five years or so, and had doubtless haunted him since childhood when he wept at his father's readings of Virgil. His love of Virgil had stayed with him even through the blinding discoveries of Shakespeare and Goethe and came back to him with irresistible force in his maturity. His muse was now in full flight, for long disillusionment with the world seems to have fanned the creative flame even though he knew what difficulties he would face if it were ever written. By abandoning most of his concert tours and much of his journalism he did in fact complete *Les Troyens*, words and music, in less than two years, with small additions and revisions to be made at intervals over the next five. It is a five-act grand opera in the French classical tradition, on the same approximate scale as Meyerbeer's operas and many others that enjoyed regular performance in Paris, and composed with the Opéra in mind. Yet Berlioz's chances of securing a production in which his work would receive attention at all close to its merits were negligible from the first – a fact he was fully aware of.

The following five years were devoted to a series of frustrating attempts to see *Les Troyens* on the stage. Berlioz's enemies in the press were quick to exaggerate its length and its demands, and the failure of *Benvenuto Cellini* was still remembered at the Opéra. He gave numerous readings of the poem to carefully chosen audiences; he vainly sought the patronage of Napoleon III and his ministers. Eventually, in 1860, he accepted an offer to mount it at the Théâtre Lyrique, an independent theatre run by the enterprising impresario Carvalho, while Wagner's *Tannhäuser*was staged with unprecedented extravagance at the Opéra. Its failure in March 1861 was bitterly ironic for Berlioz, and it created an opportunity for *Les Troyens* to be accepted at the Opéra. This

agreement fell through early in 1863 so turning Berlioz back to the Théâtre-Lyrique, where, in order to see any production at all, he was forced to divide his opera into two parts, Acts 1 and 2 becoming *La prise de Troie* and Acts 3 to 5 *Les Troyens à Carthage*. The second part was first performed on 4 November 1863, with Mme Charton-Demeur as Dido. It was an unequivocal success, warmly admired by the majority of the press and running to 21 performances. Berlioz was proud and touched, but gradually embittered, then enraged, to see cuts made by Carvalho at subsequent performances (the 'Chasse royale et orage', for example, was played on the first night only) and to see the printed vocal scores being mutilated to match the performances 'like the carcass of a calf on a butcher's stall'. Of *La prise de Troie* Berlioz only ever heard one extract sung at Baden-Baden in 1859.

6. 1863–9. After 1863 Berlioz discouraged revivals of *Les Troyens* and none took place for nearly 30 years. The financial fruits were compensation for his artistic despair, for he was enabled at long last to resign his duties as critic of the *Journal des débats*. He retired from composition and criticism, and allowed his spirit to be overcome by a despair and disillusionment of appalling intensity. He became morbidly conscious of death, especially since the loss of two sisters and two wives, and as more and more of his contemporaries and friends disappeared he haunted the cemeteries. In 1864 he wrote:

> I am in my 61st year; past hopes, past illusions, past high thoughts and lofty conceptions. My son is almost always far away from me. I am alone. My contempt for the folly and baseness of mankind, my hatred of its atrocious cruelty, have never been so intense. And I say hourly to Death: 'When you will'. Why does he delay?



And yet he lived another five years, suffering acutely from a form of intestinal neuralgia that had first appeared some ten years before and had reached severe proportions by 1859. Physical pain was never far away in the last 15 years, accentuated by his spiritual isolation. He depended more and more on a diminishing circle of friends for comfort, especially Stephen Heller, the Damckes, the Massarts and Edouard Alexandre. From time to time he would give readings of Shakespeare; but music he usually avoided. He went to few public concerts or operas, making an exception for *Don Giovanni*, for Pasdeloup's concerts where *Les francs-juges* overture and parts of *Les Troyens*were played, and for the Opéra's revival of Gluck's *Alceste*in October 1866. He completed and revised his *Mémoires*. 1200 copies were printed in 1865 and stored in his office in the Conservatoire. A few close friends received copies; the rest were to be published after his death.

The final pages of the *Mémoires* reveal the single ray of light that penetrated an otherwise all-pervading gloom. In 1864 he felt an overwhelming impulse to revisit the scenes of his childhood, especially Meylan, near Grenoble, where his adored Estelle had lived as a child. He had made an earlier pilgrimage and even written to her in 1848, but this time, having discovered that she was living in Lyons, he wrote again and paid her a visit. She was now a widow of 67, he 60, yet the memory of their childhood encounter was fully alive in his mind. 'My soul leapt out towards its idol the moment I saw her, as if she had still been in the splendour of her beauty.' Berlioz was enraptured to be in her presence, to kiss her hand, and, next day, to receive even a brief and formal letter from her. He sought permission to write to her, and for the rest of his life he did, nearly every month. He visited her the following three summers in Geneva, where she went to live with her son. She accepted his attentions with calmness and incomprehension, which turned gradually to feelings of understanding and sympathy. The full extent of his dependence on this glimpse of his own childhood cannot be measured: not for the first time he had fallen in love with an idealized vision, reality transfigured by imagination.

Berlioz had not wholly given up conducting his own music abroad. In December 1866 he accepted an invitation to conduct *La damnation de Faust* in Vienna. Hanslick, who had admired *Roméo et Juliette* in 1846, castigated the music but in general its success was immense. Age, illness and his poor knowledge of German now impaired his conducting skill, but he was lionized by Cornelius and Herbeck and fêted as he had been in 1845. The following February he conducted *Harold en Italie* and parts of *Béatrice et Bénédict* in Cologne as the guest of his old friend from 1830, Ferdinand Hiller. The final burst of energy was his acceptance of an invitation to St Petersburg in November 1867, shortly after the death of Louis. Perhaps he thought he would find renewal and escape. Instead the journey and the concerts – six in St Petersburg and two in Moscow – shattered his remaining strength. Not even the instinctively sympathetic response from the emerging school of Russian composers or the overwhelming public applause staved off a sense of impending collapse. He went directly to Nice, scene of happy memories of 1831 and 1844, and Monte Carlo. Twice, walking by the sea, he fell and was picked up dazed and bleeding. He returned to Paris where he had 12 months to live, now little more than a shadow, dragging out what had come to seem a meaningless existence. He died on 8 March 1869, having been cared for by his mother-in-law and visited by his remaining friends, the Damckes, Saint-Saëns and Reyer. He was buried in the Cimetière du Nord, Montmartre, on 11 March 1869.

7. Character and personality. Berlioz was widely misunderstood in his own lifetime – and has been since – in spite of the clarity of his ideas and the abundance of his writings. Few composers have explained at such length or with such cogency the nature of their own inspiration, its sources, its aims or its meaning. In Berlioz certain qualities stand out, and chief among them must be cited his consistency and his sincerity. There was no dividing line between his life and his music; the same principles governed both and each was a reflection of the other. Few composers have woven their own personality so tightly into their music, so that all his works reflect something in himself expressed through poetry, literature, religion or drama. Expression is the key. Music was not for him an autonomous art obeying internal rules and exploiting internal relations. It was an integral part of emotional and spiritual life, reflecting the teeming motion of the mind, the explosive diversity of life. Just as Shakespeare had laid bare every facet of human nature in poetry and drama, so Berlioz aspired to chart his own experience in music. Of course, not all his music is autobiographical, but he remained steadfast to an ideal of truthfulness of artistic expression from the first note he wrote to the last.

Sincerity as burning as this meant an unwillingness to compromise. He was not a diplomat, and he often failed to win influential friends by being outspoken at unguarded moments. Cherubini and Fétis, for example, might have been won over to his cause had he been less severe on their work to their faces. Many acquaintances found him

9. *Hector Berlioz: photograph, c1863*

embarrassingly forthright in his views. 'Few were at ease in his company', wrote Legouvé; and his sister Nanci said as early as 1824 that with him everything was open and spontaneous and that he never made the slightest effort to conceal the vagaries of his mood. He was subject to violent emotional change, from enthusiasm to misery, and these are reflected in his music. The *Symphonie fantastique*specifically depicts the *vague des passions* of the young artist. Enthusiasm was to be seen in his adoration of Harriet Smithson, Shakespeare, Gluck, Goethe and Virgil; misery in his descriptions of the 'spleen' and the 'mal d'isolement' that afflicted him throughout his life, increasingly so as his isolation became more real and more intense. His dislikes, for example of inexpressive music, ornamented singing and of commercially minded theatre managers, were as intense as his enthusiasms and as consistently articulated. Sometimes he had to conceal his feelings, when writing public notices of works by respected contemporaries, a cause of bitterness about the critic's métier that gradually intensified.

Another cause was the failure of the world to live up to his ideals, and not just its failure, its clear determination to dissociate itself from them. He was a passionate idealist, whose conception of what might be achieved in music drew him on even when external discouragement was most intense: in the treatise on orchestration he described an ideal orchestra; in *Les soirées de l'orchestre* he described an ideal city, Euphonia, where everything is arranged to the service of art and where commerce has no place. He expected his audience to have an imagination as vivid as his own, he made no rigid frontier between the kingdoms of imagination and reality. His lofty conception of the role of art and music presupposed an essentially aristocratic view that music was not for the many; it was a highly sophisticated form of expression (sometimes disarmingly simple in its outward form) that required the highest degree of imagination and intellect for its proper appreciation. He spoke as an artist to men of kindred capacity. The morons, fools, parasites and tune-mongers who made fortunes out of music he bitterly despised.

One quality saved him from morbid self-pity and from the tediousness of rapture: he had the sharpest sense of the ridiculous in human behaviour. His writings win us by their humour as much as by their style and their ideas. His conversation was laced with puns. His humour was largely based on the ironic, on the startling contrast between what is and what might be, but also on the foibles of singers, pianists and audiences. Contrast and diversity were to be cultivated as well as to be laughed at, so that the juxtaposition of passion and mockery in his writing is equally as characteristic as the simultaneous combination of opposites to be found so often in his music.

His intellect embraced the broad movement of ideas that Romanticism swept into currency and can be seen as a powerful expression of them. Yet some tastes passed him by, notably the nostalgia for things medieval so widespread in his time. He had little taste for painting and had, as he confessed, 'little feeling for conventional beauty'. He knew classical Latin and French literature well and was given to quoting it at all times, especially to adapting quotations slightly to suit his purpose. His favourite authors remained with him through life and provided imaginative worlds for his fantasy.

Berlioz was no philosopher, since life, for all his idealism, was a practical matter whose problems had to be confronted by action not theories. The business of composing and performing music, educating listeners and guiding taste was a daily obligation from which he drew such evidence as he needed to reinforce his views on the proper place of music in culture. His historical sense did not extend to an appreciation of music much earlier than that of Gluck, and most of Bach and Handel left him cold.

Although he falls clearly into the French tradition, from Rameau and Gluck through Gossec, Méhul and Le Sueur, he had no nationalist preconceptions whatever. His distaste for Italian music stemmed purely from its composers' higher regard for melody and vocalization than for expression. Because Germany, England, Bohemia and Russia applauded his music he was prepared to regard these as musical nations without going so far as to presume that their compositions were inherently superior to those of any other country. He was as happy to work with foreign musicians as with French, though he never fully mastered English and spoke little German. Many of the friends he valued most highly were foreigners, such as Hiller, Heller, Ernst, Davison, Damcke, Hallé and of course Liszt.

Slowly the youthful idealist changed into the aloof, dignified but weary figure of later years. His working life was characterized by tireless energy and the capacity to turn emotional stress into creative form. He was driven by the intensity of his emotional being, with nerves that responded more sharply than those of his fellow men. His life was a continuous search for an unattainable tranquillity, not the tranquillity of idleness or repose but the peace of mind that would allow him to work rather than labour,

write music rather than prose, and grapple with his leaping imagination rather than with the petty squabbles of everyday life.

8. INTRODUCTION TO THE WORKS. It is fundamental to the understanding of Berlioz's music to recognize that for him there existed rigid categories of neither form nor medium. Opera, cantata, song and symphony all merge imperceptibly one into another and overlap constantly. The important criterion is the matching of means to expressive ends. Heterogeneous elements are to be found in all his larger works and some, like *Lélio* or the *Huit scènes de Faust*, have unity of subject matter and artistic purpose, not unity of musical means. He did not refuse to adopt conventional means in order to be iconoclastic; he felt impelled to give every idea its proper musical setting according to its literary, pictorial or suggestive content, and this led him to construct new forms and to throw musical genres into new relationships.

Apart from two youthful quintets and a sextet, all now lost, Berlioz composed no chamber music. He wrote nothing for the most widely cultivated instrument of his time, the solo piano. He was not a pianist and his only solo keyboard music is a group of three short harmonium pieces commissioned in 1844. His chosen medium was the orchestra, expanding in his time with new speed and momentum. The best of his songs, though all composed with piano accompaniment, were eventually orchestrated. He was not, like Chopin or Schumann, a miniaturist by habit, yet the smallest of his works are little more than albumleaves, while the largest are conceived on a huge scale.

9. OPERAS. Berlioz completed five operas, all different in style and dramatic stance. He contemplated or sketched many more and had at least one operatic project in mind at nearly all points of his working life. Opera was the medium of the predecessors he admired most – Gluck, Spontini, Méhul, Le Sueur, Weber – and was the most assiduously cultivated form of music in Paris during his first years there. Success in opera was also, in Berlioz's time, the principal yardstick by which a composer was measured and the surest way to financial reward. Dramatic expression is the very pulse of his music, so that operatic elements are to be observed in many of his non-operatic works, especially the symphonies and larger choral works.

*Estelle et Némorin*, composed in 1823, has not survived. There followed *Les francs-juges*, composed to a libretto by Humbert Ferrand in 1826. The secret tribunals of the Black Forest in the later Middle Ages provided a background for a sombre story of heroism and virtue in the face of oppression and tyranny. Its colour came from Méhul and more especially Weber, whose *Freischütz* had been heard in Paris two years before. Six complete numbers and the overture survive, of which the latter is a bold and imaginative piece of orchestral writing, especially since Beethoven was still unknown to him. The first version of the work, probably consisting of 14 numbers, was superseded in 1829 by a longer version, which probably included the *Marche des gardes*, later to become the 'Marche au supplice' in the *Symphonie fantastique*. But though Berlioz was soon pillaging the score, he made a further attempt to recast it in 1833 into a one-act intermezzo *Le cri de guerre de Brisgau*. His failure with this reflects the enormous strides his music was taking during these years and his desire to tackle new material. Consider his remark in 1828 that he had two operas in hand for the Opéra-Comique, a third for the Opéra and a fourth planned on the English play *Virginius*. Projects on *Robin Hood* and *Atala* perhaps never even reached libretto stage. In 1833 he considered *Much Ado about Nothing* for the Opéra-Comique, the theatre for which *Benvenuto Cellini* was destined when first drafted.

This opera, when finally presented in 1838, was utterly different from *Les francs-juges* in pace, colour, subject matter and dramaturgy, and was very different too from any other opera to be seen in Paris in that decade, comic or serious. It combined elements of both, perhaps accidentally, because the work, originally intended for the Opéra-Comique, had been upgraded for the Opéra. Yet the mixture of genres was utterly characteristic of Berlioz, with the tone veering from knockabout comedy to serious reflection on the duties and priorities of the artist. One reason for its poor reception was the dazzling brilliance of the music, its orchestral virtuosity and rhythmic élan, shifting in metre and colour with kaleidoscopic suddenness. Neither players, singers nor audience could grasp an opera so teeming with life when the more stolid manner of Meyerbeer was fashionable. The libretto has weaknesses, especially in the character of the Pope (changed to Cardinal on the order of the censor), and is diffuse in the last act; it was these problems that Berlioz attempted to solve in 1852 when he recast the work for Weimar. But at the same time other dramatic inconsistencies were created and some of the vitality of the 1838 version was sacrificed. In his own words, *Benvenuto Cellini* 'contains a variety of ideas, an energy and exuberance and a brilliance of colour such as I may perhaps never find again'.

Berlioz made some sketches on Ballanche's *Erigone*, an 'intermède antique' in the period 1838–40; he also considered a collaboration with Frédéric Soulié, and finally began work on *La nonne sanglante* by Scribe, a concession to the Opéra's established tastes. The libretto, based on Lewis's *The Monk*, recalls the sombre tones of *Les francs-juges* and the music survives, likewise, only in fragmentary form, for Berlioz abandoned composition and negotiation with the Opéra in 1847. What music survives is undistinguished, hampered by Scribe's lumbering metres, though sometimes prophetic of the restrained accents of *Les Troyens*.

By 1850 Berlioz seems for the first time to have abandoned thoughts of opera. Nonetheless, involuntarily, the dream of a grand opera on Virgil's *Aeneid* began then to impose itself. He resisted it, but in 1856, urged by the Princess Sayn-Wittgenstein, decided to yield. He wrote his own libretto, building Acts 1 and 2 around the tragedy of Cassandra in Troy and Acts 3, 4 and 5 around the tragedy of Dido in Carthage, linked in the character of Aeneas and the fateful destiny of the Trojan people. It is a truly epic opera, grand in conception and execution, with equal claim to be Berlioz's masterpiece as to be one of the towering achievements of 19th-century music. In it all aspects of Berlioz's art converge: the monumental and the intimate, the symphonic and the operatic, the decorative and the solemn. Its great scenes include the enormous finale of Act 1 where Cassandra's wails of doom contrast starkly with the Trojans' fatal faith in the Wooden Horse; the Royal Hunt and Storm, where the coming together of Dido and Aeneas is enacted in an elaborate and symbolic mime; the sublime sequence of quintet, septet and duet in the garden scene that follows; the final departure of Aeneas and Dido's immolation, and much else. The opera belongs to a long tradition that

*10. Autograph MS (with the composer's revisions) of part of the 'Royal Hunt and Storm' from Berlioz's 'Les Troyens', composed 1856–8 (F-Pn 1.162, f.289r)*

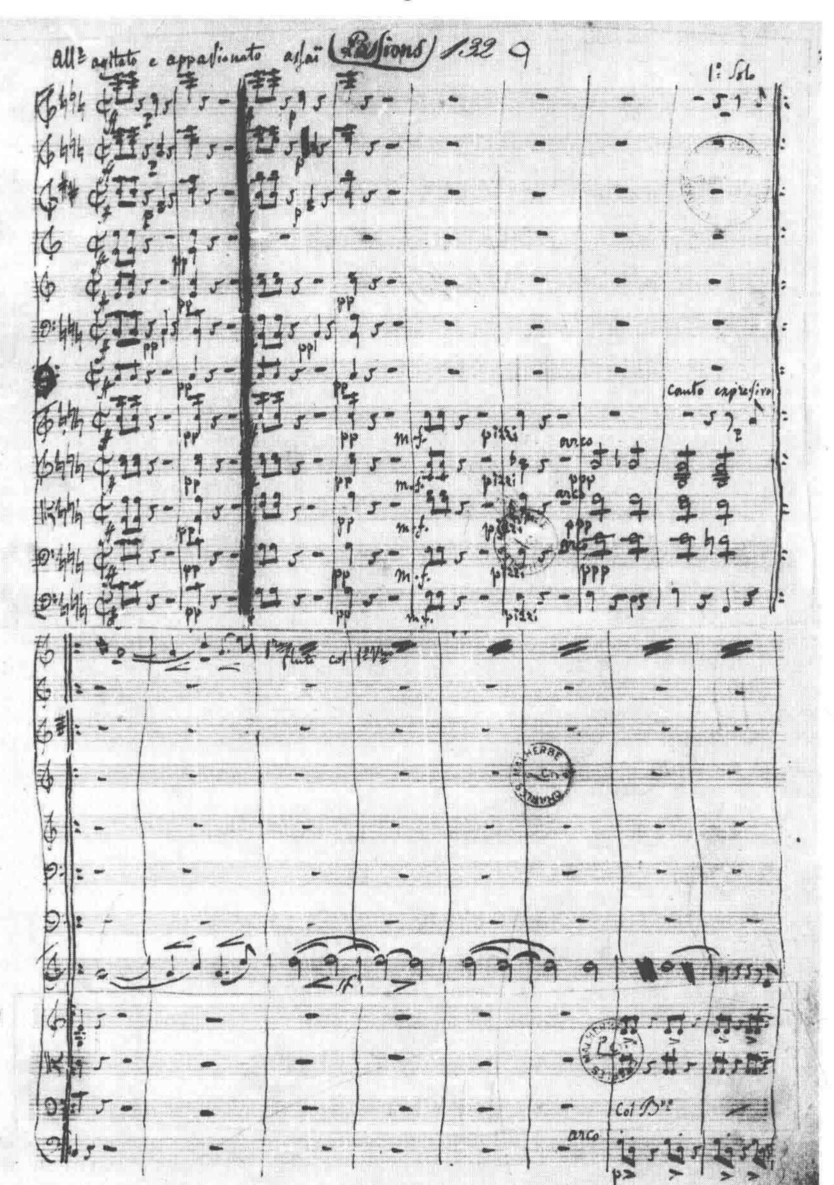
embraces Rameau, Gluck, Spontini and Meyerbeer, and was anything but revolutionary. Yet the classical poise and sense of tragedy is imbued with a warmth of feeling and passion that only a Romantic composer could attain, 'Virgil Shakespeareanized', he called it.

His last opera was an *opéra comique*, composed almost as relaxation after the travail of *Les Troyens*. *Béatrice et Bénédict*was begun in 1860 and first performed in 1862. Berlioz made his own libretto from Shakespeare's *Much Ado about Nothing*, adapting much of the original text for his dialogue. 'It is a caprice written with a point of a needle', in his own words, a fair description of the light textures and disarming immediacy of the work. There are moments of sterner feeling, as in Beatrice's air in Act 2, ensembles of almost Mozartian grace, and a heaven-sent tranquillity in the Duo-Nocturne that concludes the first act. As an interpolation on Shakespeare, Berlioz invented a comic character Somarone, in which the archetypal pedantic Kapellmeister is gently satirized.

10. SYMPHONIES. It was Berlioz's discovery of Beethoven that led him to compose symphonies, yet his treatment of music as an expressive and dramatic art made his symphonies into something other than the pure instrumental music that many Germans saw in Beethoven. They stretch the meaning of the word to new limits. The first, the *Symphonie fantastique* of 1830, is a five-movement symphony with a slow introduction to the first-movement Allegro, a waltz, a slow movement, a march and a finale, the whole unified by a theme that recurs, transformed, in each movement. But it is, more importantly, an 'Episode in an Artist's Life', set out in detail in the programme, and the recurrent theme is an *idée fixe* representing the artist's obsession with the woman he adores. There is no mistaking the artist or the woman as Berlioz and Harriet Smithson, and the programme spells out his dreams and fantasies in dramatic form. The slow introduction, for example, portrays the 'flux of passion, the unaccountable joys and sorrows he experienced before he saw his

beloved'; the Allegro describes 'the volcanic love that his beloved suddenly inspired in him'. The last two movements represent an opium dream in which he dreams he has murdered his beloved and is led to execution, and in the finale he finds himself at a macabre and turbulent witches' sabbath. Later (in 1855) the programme was altered to interpret the whole drama as a dream, not just the end. Berlioz devoted much time and attention to the programme, revised it frequently and generally issued it as a pamphlet when the symphony was performed. Its vivid action is matched by music of unprecedented boldness and originality. The orchestration adopts many practices previously associated with opera, such as the use of harps, bells and english horn. Berlioz used the E♭ clarinet for the shrieking presentation of the beloved's image in the finale, and brought together combinations and distributions (for example the multi-*divisi* strings) of extreme boldness; four timpani are used simultaneously to represent distant thunder, and the brass is given a distinctive new role. The novelty and defiant youthfulness of the score have never faded, and the musical and thematic invention is inextricably linked with Berlioz's conception of a new world of colour and dramatic content. At one stroke the symphony as a form became a fully-fledged medium of explicit drama.

*Harold en Italie*, the symphony that followed in 1834, has a prominent concerto element, with a solo viola impersonating the character of Harold, a responsive and passionate observer of scenes of Italian life. The drama is more episodic and less cogent than in the *Symphonie fantastique* and the theme that here represents Harold recurs unchanged in each movement. There is a direct link with Beethoven in the last movement ('Orgie de brigands'), which is introduced by brief reminiscences of the first three movements. There are picturesque echoes of Italy in the 'Marche des pèlerins', with its tolling bells and chanting pilgrims, and the serenade of the Abruzzi mountaineer. The symphonic idea is retained with limited acceptance of the principles of sonata form in the first movement and by the balance of the four movements. The music is also enriched by an obsession with rhythmic vitality and rhythmic experiment, looking forward to the impulsive vivacity of *Benvenuto Cellini*.



Berlioz's third symphony was *Roméo et Juliette* (1839), sub-titled 'symphonie dramatique'. It moves well away from the purely symphonic realm towards that of opera. Yet Berlioz was specifically not writing an opera, and he kept the idea of symphonic construction closely in mind. He was able, consequently, to express the main portions of the drama in instrumental music, while setting the more expository and narrative sections for voices. The three principal instrumental sections – 'Fête chez Capulet', 'Scene d'amour' and 'La reine Mab' – can be seen as first movement, slow movement and scherzo, with elaborate vocal introduction and finale. The introduction sets the scene with warring Montagues and Capulets, and outlines the coming drama in choral recitative, with foretastes of later movements and solo sections for tenor and contralto. The text is by Emile Deschamps, based on Garrick's version of Shakespeare (which is what Berlioz saw at the Odéon in 1827). The instrumental sections intensify the drama, since instruments have a more powerful capacity for deep expression than voices, as Berlioz explained in his preface. The finale is a complex sequence of movements, scarcely symphonic in the traditional sense, but drawing the listener out from the inner drama to the world of action and resolution. Juliet's funeral procession, the scene where Romeo comes to the vault, the death of the lovers, Friar Laurence's explanation and the reconciliation of the two families are enacted in music mostly of operatic cast, especially the final Oath, which can match anything in *Guillaume Tell* or *Les Huguenots* for grandeur, and was later echoed in *Tannhäuser*.

The *Grande symphonie funèbre et triomphale* (1840) is an occasional piece for a solemn public ceremony, scored for large military band, and was probably put together from earlier drafts. This is definitely so for the second movement 'Oraison funèbre', reworked as a trombone solo from a scene in *Les francs-juges*. The first movement, 'Marche funèbre', is one of Berlioz's most powerful movements, immense in span and dynamic contrast, with an overwhelming sense of melancholy projected on to a public, even popular level. The finale, 'Apothéose', is a triumphal march. Of particular interest is the fact that the three movements are in different keys, F minor, G major and B♭ respectively. In 1842 Berlioz added parts for optional string orchestra and later also for chorus, with a patriotic text by Antony Deschamps.

In his *Mémoires* Berlioz spoke of a symphony he dreamed of writing in the 1850s, though because of difficulties of time, expense and performance he decided not to commit it to paper, a tragic loss perhaps, but an indication too that he had still not lost sight of the symphonic mode. Yet it is easier to see the symphonic impulse expanding vastly into *Roméo et Juliette* and thence further towards dramatic expression in *La damnation de Faust* and *L'enfance du Christ*.

11. LARGER DRAMATIC CHORAL WORKS. *La damnation de Faust* was described by Berlioz at the time of composition as an 'opéra de concert' but was finally issued as a 'légende dramatique' (fig.12). In 1847, when there was a proposal to turn it into an opera, it became clear that Berlioz would have wanted to revise it considerably for the stage. Its effect rests too strongly on the imagination to be directly transferable to the theatre, and the same can be said of *Roméo et Juliette* and *L'enfance du Christ*. Transformations of time and place are sometimes dramatically sequential and sometimes kaleidoscopic, since Berlioz used only those parts of Goethe's *Faust* that met his needs. Taking the rejected *Huit scènes de Faust* of 1828–9 and inserting his rousing arrangement of the Rákóczy March at the end of the first part, he expanded the work into a broad conception of Faust as an aspiring, yearning soul, overwhelmed by the immensity of nature, with a heart sensitive to emotion at many levels, yet ultimately damned by his inner weaknesses, which Mephistopheles both represents and exploits. The nature music is particularly striking, in Faust's welcome of spring at the beginning and the invocation early in the fourth part, where harmony and orchestration display Berlioz's genius for the unexpected within the span of a huge melodic line. The chorus plays a large part, as penitents, carousers, sylphs, soldiers, students and as the occupants of both Heaven and Hell. The finale of the second part, combining the songs of both soldiers and students, is a tour de force; and the Pandaemonium, at the climax of the precipitous 'Course à l'abîme', is an apocalyptic scene worthy of John Martin (a comparison first made of Berlioz's music by Heine) or even Blake.

*L'enfance du Christ* (1850–54) shows the same mixture of dramatic action and philosophic reflection as *La damnation de Faust*, though Berlioz still refrained from calling it an oratorio. It is constructed in three parts, 'Le

*11. Autograph MS of the passage containing the beginning of the idée fixe from Berlioz's 'Symphonie fantastique', composed 1830 (F-Pn 1.118, f.11r)*

songe d'Hérode', 'La fuite en Egypte' and 'L'arrivée à Saïs', the second of which was composed first. Like *La damnation de Faust*, the score contains stage directions to explain (to the imagination) the movement of events. The third part, with the Ishmaelites' welcome of the holy family, is the most immediately theatrical. In the first part Berlioz's concern was for the tormented soul of Herod, disturbed in his dreams yet at the mercy of his soothsayers; then, with a clear change of mood, the listener is taken to Mary and Joseph in Bethlehem and the angels' warning. The second part is seen largely through the eyes of the narrator, with instrumental music in the overture setting the tone and distancing the action. At the end, when the Saviour has found repose, the music draws away from the portrayal of action to a serenely contemplative farewell, 'O mon âme', the nearest Berlioz ever came to a devoutly Christian mode of expression.

Perhaps these dramatic choral works would never have existed if Berlioz had won early success and acceptance in opera. Yet they constitute a heterogeneous genre entirely characteristic of his faith in expressive truth as superior to consistency of method. They left their mark, too, on the dramatic style of *Les Troyens* into which his symphonic, choral and dramatic impulses were then all compulsively channelled.

12. Other choral works. Berlioz was not an orthodox Christian, yet he set sacred texts with a strong personal vision that has deep religious roots. The *Messe solennelle* of 1824 was partially modelled on the masses of Cherubini and Le Sueur, but Berlioz's distinctive tone is already marked, especially in the forceful close of the Kyrie, the closing 'Domine salvum', and the powerful 'Resurrexit'. Although Berlioz turned against the work after its second performance in 1827 and claimed to have destroyed it, it was discovered in an Antwerp church in 1992, revealing that many later works, including the *Symphonie fantastique*, the Requiem and the Te Deum,

*12. Frontispiece to the first edition of the full score of Berlioz's 'La Damnation de Faust' (Paris: S. Richault, 1854); lithograph by Frédéric Sorrieu*

borrowed or adapted passages from it. The Requiem (1837) and the *Te Deum* (1849) form a pair of monumental sacred works that exploit Berlioz's sense of numinous space on a grand scale. Space and direction are essential elements in both. In the Requiem the large orchestra is supplemented by eight pairs of timpani and four groups of additional brass placed at the four corners of chorus and orchestra. These large forces are used for the 'Tuba mirum', where Berlioz's vision of the Last Judgment is realized with overwhelming vividness and force, and there is no doubt that the music requires a building (such as the church of Les Invalides, for which it was composed) that can do justice to its sonority. This broad ceremonial style was a legacy from the outdoor music of the French Revolution, when immense forces of wind and percussion were assembled for public occasions; yet Berlioz was careful to contrast the great with the small. The 'Quid sum miser' and the 'Quaerens me' form a strikingly restrained contrast with the outbursts on either side of them. The Offertorium, adapted from the Kyrie of the 1824 Mass, is written in a subdued contrapuntal style, with the chorus intoning two alternating notes over a winding orchestral accompaniment. The Sanctus is a trifle worldly in its sweetness, and the 'Hostias' exploits the extraordinary sonority of high flutes and low trombones in combination. The Requiem is expressive without being theatrical, solemn without being sanctimonious. It marks an extreme point in his music, where Shakespearean and literary ideas have no place; all is subsumed in a vision of humanity in collective obeisance to the presence of God.

The feeling for space in the *Te Deum* is expressed by the contrast of the organ with the orchestra and chorus. The organ should be at a distance from the rest and is not often heard simultaneously with them; the opening chords particularly exploit the directional idea. There are parts for two choruses and an extra body of 600 children's voices, in a manner similar to the ripieno line in the opening chorus of Bach's *St Matthew Passion*. Counterpoint again plays an important part in the formulation of the style. The 'Dignare' is constructed on a highly original device of moving the bass line through a succession of pedals, a 3rd apart, and Berlioz's technique of harmonic variation is much in evidence. The full forces produce moments of great dynamic impact, especially in the 'Tibi omnes' at the conclusion of each of three verses, and in the 'Judex crederis', described by Berlioz as 'Babylonian, Ninevitish', perhaps the most immense movement of his entire output: climax breaks over climax like an unending sea. The last movement is an orchestral march for the presentation of the colours, enacted at St Eustache in

1855, and an additional movement, never used by Berlioz, is a 'Prélude' designed for military occasions only. A tenor soloist sings in the 'Te ergo quaesumus', a movement retrieved from the Agnus Dei of the 1824 Mass.

There are other choral works in which the same monumental style is applied on a narrower scale, for example the *Hymne à la France* (1844) and *L'impériale* (1854) whose titles betray their patriotic origins. The *Chant sacré* (1829) and the *Méditation religieuse* (1831), both settings of Thomas Moore, can be coupled as contemplative works, short but broad in style. The *Scène héroïque*(1825–6) and *Le cinq mai* (1835) are more narrative, like dramatic cantatas. *Sara la baigneuse*, to a text by Victor Hugo, especially in its version for three separate choruses and small orchestra, is exquisitely poetic, one of Berlioz's most delicate and refined compositions. A number of choral works were composed with piano accompaniment, and the best of these are *Le ballet des ombres* (1828), a remarkably daring evocation of nocturnal spirits, and the *Chant guerrier* and the *Chanson à boire*, both in the *Irlande* collection of 1829, both exploiting expressive contrast as an element of form.

13. SONGS. Some of Berlioz's pieces, for example *Hélène* or *Sara la baigneuse*, exist in versions for four voices with accompaniment. There are songs for two or for three voices, so that the same phenomenon of a continuum between genres can be observed between choral music and songs. *La belle voyageuse* is a solo song with piano or orchestra, or a chorus for women's voices and orchestra; *La mort d'Ophélie* is a solo song with piano or for women's chorus with either piano or orchestral accompaniment. Berlioz made adaptations according to need wherever the expressive content of the piece allowed. A number of songs were orchestrated, and some, like *Zaïde* and *Le chasseur danois*, came into being in both piano and orchestral versions at the same time.

As a songwriter Berlioz owed much to the tradition of the French *romance*, with which he was familiar from childhood, and many of his earliest compositions were in this mould. It is interesting to see how *La captive*, composed in Italy in 1832, was originally a strophic song relying on an exquisitely shaped melody, but was later revised by Berlioz into a through-composed song with orchestral accompaniment, a fully elaborated work in his most expressive style. Even as late as 1850 he was publishing songs like *Le matin* and *Petit oiseau* (two settings of the same text) in an unambitious form with simple piano accompaniment. One of his highest achievements in song is the *Elégie en prose*, the last of the *Irlande* set of 1829, a fervent outpouring of Romantic feeling. Berlioz wrote of it: 'I think I have rarely found a melody of such truth and poignancy, steeped in such a surge of sombre harmony'. But this is overshadowed by the *Nuits d'été* of 1840–41, six settings of poems by Gautier, originally composed for single voice with piano, but orchestrated with some transpositions for different voices in 1856. One should be wary of treating the set as a strict cycle and Berlioz never performed it as such, but it has a wholeness of mood and feeling and a satisfying emotional balance. The outgoing mood of *Villanelle* and *L'île inconnue* frame more sombre reflections on disappointed love, the longing of *Absence* and the icy serenity of *Au cimetière*. The orchestral versions are executed with supreme skill, with light yet richly coloured textures throughout.

14. ORCHESTRAL MUSIC. Besides the symphonies, Berlioz's orchestral output included five concert overtures that reflected Beethoven's and Mendelssohn's treatment of the overture as an independent form. *Waverley* (1828) and *Rob-Roy* (1831) are based on Scott novels without any supposition that they preface an opera. In *Waverley* the contrast of slow introduction with vigorous Allegro is an illustration of the couplet:

> Dreams of love and Lady's charms
> Give place to honour and to arms.

It is one of the few works where Berlioz shows any affinity with the Italian style, but it is also experimental in feeling, especially at the beginning of the coda. *Rob-Roy* was rejected by the composer as 'long and diffuse', which is a fair summary, and two themes were re-used in *Harold en Italie*. *Le roi Lear*, composed just before it, displays, in contrast, great concentration of energy; it is not a retelling of the play but a general representation of its mood, with events and characters worked into a logical musical sequence. Its composition was a spontaneous response to first reading the play and has some of the energetic turbulence of the first movement of the *Symphonie fantastique*. The overture to *Benvenuto Cellini* established a formal pattern of brief allegro before a slow section returning to the main allegro, and Berlioz used this in all his subsequent overtures, *Le carnaval romain*, *Le corsaire* and *Béatrice et Bénédict*. *Le carnaval romain* is perhaps Berlioz's most extrovert and brilliant orchestral work, whose pace and glitter have long established it as a favourite concert showpiece. *Le corsaire* has a similar swiftness and brilliance, and a beautifully expressive slow section recalled, at fast tempo, in the Allegro. The music spells out the atmosphere and associations of the sea, in particular the Mediterranean, which provided Berlioz's first experience of wind and rigging in combat.

The *Marche funèbre pour la dernière scène d'Hamlet* is a neglected work, but one of his finest. There is a part for wordless chorus intoning a lugubrious 'Ah!' from time to time, but the burden of a long relentless climax is carried by an orchestral ostinato and a melody of hollow solemnity, the feeling so clearly and so often inspired in Berlioz by his experience of the play. The closing pages, where he used chromatic harmony to fine effect, are as affecting as Dido's final scene in *Les Troyens* and seem to have been conceived on an equivalently broad scale.

Another solitary orchestral work is *Rêverie et caprice* for solo violin with piano or orchestral accompaniment; its restless movement, alternating rapidly between slow and fast tempos, is explained by its origin as a solo air from *Benvenuto Cellini*, but it is hardly satisfactory as a violin showpiece and has too fragmentary a construction to be convincing as instrumental music.

15. OTHER WORKS. Only with Berlioz's attitude to the mixing of opposites could a work like *Lélio* have come into being, for its six musical numbers are, if seen as separate entities, wholly diverse in subject and treatment. Yet the whole is given a sense of order by its literary format and by the vivid links with Berlioz's personal life in each movement. Originally entitled *Le retour à la vie* in 1831, it was a pendant to the *Symphonie fantastique*, a further episode in an artist's life, showing how he comes to terms with life after an overwhelming traumatic experience, largely through the healing power of music and of creative fantasy. The *idée fixe* is also used to recall the symphony at crucial points. Most of the music of

*Lélio* had existed before; for example, the 'Chant de bonheur' and 'La harpe éolienne' are revised from *La mort d'Orphée*, the Prix de Rome cantata of 1827. The *Tempest*fantasy was incorporated unchanged. The relevance of each movement is made plain in the monologues between them, summarizing Berlioz's obsessions with Shakespeare, especially *Hamlet*, with brigands as a symbol of the free life, with passionate identification of self with others; these give it, quite apart from its unusually heterogeneous musical form, a unique place in the territory occupied by both literature and music.

Berlioz assembled other miscellanies with looser internal associations. There are the nine Moore settings of *Irlande* and the six Gautier settings of *Les nuits d'été*. Two *Hamlet*pieces and one Thomas Moore setting were grouped as *Tristia* for publication in 1850. Other groupings, largely for publisher's convenience, were *Feuillets d'album*, *Vox populi* and *Fleurs des landes*.

Three of the *Lélio* pieces were derived from Prix de Rome cantatas, of which Berlioz wrote four. The best of these are the first and third. *La mort d'Orphée*, of 1827, contains a bold Bacchanale and an affecting 'Tableau musical' at the end. The more conventional *Herminie*, of 1828, won second prize. *Cléopâtre*, of 1829, is startlingly dramatic with clear adumbrations of Berlioz's later tragic heroines, Juliet, Cassandra and Dido. The invocation, where she addresses the spirits of the Pharaohs, is magnificent. When re-used in *Lélio*, Berlioz's description of it was: 'Sombre orchestration, broad, sinister harmony, lugubrious melody... a great voice breathing a menacing lament in the mysterious stillness of the night'. The fourth cantata, *La mort de Sardanapale*, is mostly lost.

16. Musical style. Berlioz's style is one of the most idiosyncratic of the 19th century. It is quickly recognizable and has been as much reviled by his critics as vaunted by his partisans. It is true that its characteristics do not always take immediate effect and that a familiarity with his music is often regarded as essential to its understanding. For a long time the inaccessibility of many of his scores produced a correspondingly hesitant public response, but the higher standing now enjoyed by Berlioz's music is reinforced and consolidated by its wider circulation. Opinions vary widely over the relative parts played in Berlioz's style by technique and inspiration. That he was subject to inspiration in truly Romantic fashion has never been denied, but this created the extraordinary belief that he had no technique and composed in a kind of blind fury. The truth is that Berlioz's music would be worthless with neither inspiration nor technique and that its mastery is due to an abundant provision of both. Both were of an unconventional kind; neither can be overlooked or denigrated for the advantage of the other. Certain elements of Berlioz's style call for separate discussion.

Berlioz's claim to be an inspired and natural melodist is irrefutable. Few of his melodies fall into regular phrase lengths, and when they do, as in the second subject of *Les francs-juges* overture or in the *idée fixe* of *Harold en Italie*, they sound uncharacteristic. He found the regular balance of four- and eight-bar phrases uncongenial and spoke naturally in a kind of flexible musical prose, with surprise and contour important elements. His melodies sometimes expand to great length as at the opening of the *Symphonie funèbre et triomphale*, or fill out a whole musical movement in one long arch, as in Aeneas's 'Ah! quand viendra l'instant des suprêmes adieux', where internal repetition is minimal. The *idée fixe* of the *Symphonie fantastique* is well known for its expansive length. Much of Berlioz's melodic strength is built on small chromatic inflections, especially when an otherwise diatonic melody is slightly coloured by a chromatic note (with an attendant harmonic surprise). He was fond, for example, of falling chromatically from the 5th of the scale (G in the key of C), or falling chromatically downwards towards the 5th, so that using A♭, often in alternation with A♮, in C major or C minor is a recurrent fingerprint. The flattened 6th, especially in a major context, introduces a feeling of melancholy or loneliness, and a number of movements end with this almost unresolved hovering over the dominant note. The opening melody of *La damnation de Faust* offers a fine example of Berlioz's flattened 6th. There is an occasional modal touch in his melodies, especially in *L'enfance du Christ*, but he eschewed the folk idiom altogether. The sharpened 4th in the melody of *Le roi de Thulé* is a deliberately sophisticated attempt to portray Marguerite's naive nature, not the adoption of a naive style of his own.

Berlioz's harmony has been greatly abused by those who have sought either a Brahmsian orderliness or a Lisztian spirit of adventure. By the standards of Chopin and Liszt the actual vocabulary of his harmony is restrained and there are few instances of enriched chromatic harmony. Berlioz was for the most part content with the harmonic vocabulary of Gluck and Beethoven, but he differed from most of his contemporaries in seeing harmony as an expressive rather than functional element. Chords do not lead one into another with inexorable cadential progress. They play their part one by one and become altered, when alteration is necessary, by the replacement of any or all of their notes. The element of surprise is intrinsic, for it is frequently the unexpected note of a chord that alters, and despite Berlioz's avowed dislike of enharmonic change he used it constantly. He similarly disliked accented appoggiaturas for creating new harmony, though many are to be found in his music. Diminished 7ths and kindred secondary 7th chords are much used, but generally without tonal pull. The suggestion that his harmonic thinking was derived from his study of the guitar has too weak a technical basis to be convincing.

A characteristic sonority is the grouping of upper parts as high as possible with the bass line isolated at a distance from them; at such times the strong melodic role of the bass line becomes evident. Much has been said about Berlioz's 'false' basses and his love of root positions, both of which are clear misrepresentations. A root position is sometimes disturbing when it anticipates a cadence on to the same root, but Berlioz preferred a smooth, often stepwise, movement to the striding pattern of a functional bass. The bass line is in free counterpoint with the upper line, with harmonic filling.

The free contrapuntal relationship of parts, especially the upper and lower parts of a texture, is an essential element of Berlioz's style. His mature style exhibits plainly his distaste for 'tune with accompaniment', a mannerism associated by him with Italian opera and only used for special purposes, for example 'Un bal' in the *Symphonie fantastique*or Teresa's cavatina in *Benvenuto Cellini*. Contrapuntal textures are often an extension of orchestral textures, with layers seen in both contrapuntal and colouristic relationship to one another.

Berlioz regarded strict contrapuntal forms as mechanistic and inexpressive. He parodied the Handel–Cherubini style of fugue in *La damnation de Faust* and *Béatrice et*

*Bénédict.* On the other hand fugato occurs repeatedly, generally to fine expressive and formal effect. There are choral fugues in the *Messe solennelle*, the Requiem and the *Te Deum*, whose 'Judex crederis' exhibits a type of fugue learnt from his teacher Reicha: the entries are successively one semitone higher. 'Châtiment effroyable' in Act 1 of *Les Troyens* has the entries successively one tone lower. Berlioz's orchestral fugatos range widely, from the turbulent effect of the 'Ronde du sabbat' in the *Symphonie fantastique* and the middle section of *Le carnaval romain* to the wonderfully atmospheric fugal openings of the first and second parts of *La damnation de Faust* or the 'Chasse royale et orage' in *Les Troyens*, whose fugal beginning is concealed in delicate harmony. Fugato is used to express strife in *Roméo et Juliette* and the streets of Jerusalem at night in *L'enfance du Christ*, and for a host of other purposes elsewhere. Canon and inversion are rare.

One type of contrapuntal treatment appealed greatly to Berlioz and this he called the 'réunion de deux thèmes' where two separate themes are heard first separately and then in combination. There are fine examples in the finale of the *Symphonie fantastique*, where the 'Ronde du sabbat' is combined with the *Dies irae*; in *Harold en Italie*; in the 'Fête chez Capulet' of *Roméo et Juliette*; in the overture to *Benvenuto Cellini*; in Act 4 of *Les Troyens*, and elsewhere. The chorus of soldiers and students in *La damnation de Faust* is brilliantly effective, for the soldiers sing in B♭ major, in 6/8, and in French, while the students' song is in D minor, 2/4, and in Latin. At the opening of the carnival in *Benvenuto Cellini* Berlioz superimposed three separate elements, all distinct in character; this technique is a clear example of his belief in the combination of opposites and the mingling of diverse genres in a single work.

The vitality of Berlioz's music owes much to the clarity and boldness of his rhythmic articulation. In the mid-1830s, especially in *Harold en Italie* and *Benvenuto Cellini*, he exploited experimental rhythms, not just unusual time signatures but also superimpositions of different rhythms. Fieramosca's air in *Benvenuto Cellini* is an exercise in shifting time signatures. The 'Danse cabalistique' in *L'enfance du Christ* is in 7/4, the 'Combat de ceste' in *Les Troyens* in 5/8. Berlioz did not succumb to the universal passion for triple metres, which his generation suffered, despite his recurrent fondness for 3/4 for music of tenderness or longing. He felt strongly that rhythm was inadequately studied by both composers and performers. As a conductor, too, he was noted for his rhythmic precision.

17. ORCHESTRATION. Berlioz's reputation has long rested on his supreme skill as an orchestrator, sometimes at the expense of his other gifts. Instrumental colour is a fundamental element of his music, for he was no pianist and never thought of sound, as Chopin and Brahms did, through the filter of the piano. But he played no orchestral instrument either (having abandoned the flute) and had to learn this art by studying textbooks, tutors, the instruments themselves, the scores of other composers, and by befriending players. Kastner's orchestration treatise of 1837 is the main significant predecessor to Berlioz's own, published in 1844 with a second edition in 1855. For Berlioz it was a sin to neglect the possibilities of orchestral instruments or to use them in unsuitable combinations. He was particularly anxious to use new instruments and took a close interest in Adolphe Sax's work. Instruments that had previously been used for special purposes he introduced into his normal requirements: the harp, for example, and the english horn are found in most of his scores; he was one of the first to write for the bass clarinet, the valve trumpet and the saxhorn; he made a special arrangement for the newly invented saxophone in 1844 and called for tuned cymbals in *Roméo et Juliette*; he required a piano, with two players, in the 'Tempest' fantasy in *Lélio*; there is a Turkish crescent in the *Grande symphonie funèbre et triomphale* and an antique sistrum in *Les Troyens*.

But it is not the novelty of the instruments themselves that mark out Berlioz's orchestration so much as his skill in using them. Sometimes one instrument is used for a solo of striking fitness, for example the viola in *Harold en Italie* or the english horn in Marguerite's *romance* in *La damnation de Faust*. More often it is in combining and contrasting instruments that his judgment is most acute and inventive, especially in his use of wind. He wrote for woodwind in layers more often than in solos, and he liked the sound of wind chattering on repeated notes. Consider the 'Menuet des follets' in *La damnation de Faust* where the banks of woodwind give a splendidly rich effect followed by the darting brilliance of the two piccolos; in contrast there is the sombre colour of Romeo's arrival at the Capulets' vault, or of the 'Choeur d'ombres' in *Lélio*. Brass can be solemn or brazen; the 'Marche au supplice' in the *Symphonie fantastique* is a defiantly modern use of brass. Trombones introduce Mephistopheles with three flashing chords or support the gloomy doubts of Narbal in *Les Troyens*. With a hiss of cymbals, *pianissimo*, they mark the entry of the Cardinal in *Benvenuto Cellini* and the blessing of little Astyanax by Priam in *Les Troyens*.

There are innumerable instances of felicitous orchestral colour in Berlioz's music, and the delicacy of his use of *pianissimo* (as in the Queen Mab scherzo) is as memorable as the force of his immense sounds (as in the Requiem or the *Te Deum*). Yet he could also miscalculate, and there are occasions when the correct balance is extremely difficult to achieve, or when acoustics hinder the proper realization of a novel idea. In the latter category must be placed the trombone and flute chords in the Requiem and the timpani chords in the *Symphonie fantastique* and the Requiem, effective though they are from the expressive point of view. The influence of his orchestration has been immense, directly upon Liszt, Wagner, the Russians, Strauss and Mahler, but more profoundly by his emancipation of the procedure of orchestration. For Berlioz it was intrinsic to composition, not something applied to finished music. Berlioz also disregarded the 18th-century conception of orchestration as similar to part-writing for voices; in his hands timbre became something that could be used in free combinations as an artist might use his palette, without bowing to the demands of line, and this leads to the rich orchestral resource of Debussy and Ravel.

18. OTHER STYLISTIC ASPECTS. A related element of Berlioz's style is his care for the spatial distribution of sound. He felt strongly that music should be fitted to the building in which it is heard and he severely castigated the sound of noisy orchestras in small theatres. His scores, especially *Roméo et Juliette*, are filled with directions for the placing of players and singers. He was fond of offstage music, not only in the operas, but in the symphonies too: the shepherd's pipe is heard offstage in the *Symphonie fantastique*, the pilgrim's march is heard *au lointain* at the end of *Harold en Italie*; in *L'enfance du Christ* the

angels are in a neighbouring room whose door is gradually closed.

The Requiem is the grandest example of wide orchestral distribution and both the *Te Deum* and the *Symphonie funèbre et triomphale* exploit the distinct separation of parts of the orchestra. At the beginning of Act 1 of *Benvenuto Cellini* and Act 2 of *Béatrice et Bénédict* a great deal happens offstage, and the first-act finale of *Les Troyens* is constructed on an elaborate panoply of three offstage groups carefully scored to suggest the approach and passing of the Wooden Horse into the city. The offstage trumpets and drums in Marguerite's *romance* in *La damnation de Faust* simultaneously exploit their separateness in space and their total distinctness in musical language, diversity doubly expressed in both spatial and musical terms.

In matters of form Berlioz never subscribed to rigid procedures and paid only lip service to such inherited patterns as sonata form. Intuition and expression were allowed to dominate expectation and rule. Thematic development is abundant but irregular, tonal balance is felt rather than preordained. Large-scale tonal designs are not easy to discern; indeed there is no reason to expect them. Two movements in *Les Troyens*, Andromache's scene in Act 1 and the Sentinels' scene in Act 5, do not end in the key in which they began, although they are musically self-contained; a similar case is the *Symphonie funèbre et triomphale.*

The dominant does not necessarily play its classical role as antithesis to the tonic, and the notion of a 'second subject' in the symphonies is not always applicable. Development for its own sake, as a purely musical procedure, he avoided; he preferred to throw the weight of a movement on to the coda, or sometimes on to a series of codas of cumulative impact, and the sense of climax and closure is always strong. There are few musical forms as satisfying musically or emotionally as the 'Chasse royale et orage' (from *Les Troyens*), yet apart from its return to C major, where it began, its tonal scheme is free and unfettered by pre-set schemes. Modulation in Berlioz's music is always fluid. Mediant relationships of every kind abound, so do Neapolitan and closer tonal shifts, made possible by his open attitude to the directional sense of harmony.

Two structural techniques should be mentioned. Berlioz contributed much to the then current desire to relate movements to each other by thematic, dramatic and other means. Thematic transformation is clearly seen in the *idée fixe* of the *Symphonie fantastique*, and in the treatment of many themes in *La damnation de Faust* and *Les Troyens*. To change the significance and colour of a theme by adjusting its pace, pitch, metre or orchestration, was a technique Berlioz applied with great subtlety, as for example in the opening of Act 4 of *Les Troyens* and the air of Narbal that follows. More personal to Berlioz is the device of harmonic variation, where a theme is presented against a series of different harmonies. The clearest example is the 'Tibi omnes' in the *Te Deum*, where the three strophes have the melody presented in three guises.

Berlioz's use of programmes must be clearly understood as a natural outcome of his belief in the implicit kinship, identity even, of music and ideas. Since music was not autonomous, it must have equivalences and meanings in the world of action and imagination. In his mind music and literature were inextricably entwined, both expressions of the human soul. Poetry and literature often suggested music, music always suggested life and feeling.

It is thus absurd to speak, as many have, of Berlioz's 'reliance' on programmes, or of his use of them as propaganda. They are not there to serve the music as a means of making it more palatable or more intelligible. They are part of it; they too reflect the movement of the composer's mind. He did not write the programme of the *Symphonie fantastique* in order to make it more sensational – that was scarcely needed; he wrote it because he felt it as part of the impulse that brought the music to birth. His programmes have the same status as his vocal texts. Many, of course, are not so explicit; indeed a title often serves as the sole direction, but the title or the image is always there. In some cases, as in the death scene in *Roméo et Juliette* or the 'Chasse royale et orage' in *Les Troyens*, the action described by the music is continuous and precisely detailed.

A problem is presented by Berlioz's recurrent habit of self-borrowing, which generally arose from the desire to find better use for music first placed in an unsuitable, unfinished or unsuccessful setting. Generally there is no real conflict between the expressive purpose of one context and another, for it is clear that music of a given type can express many kinds of poetic or pictorial image and that therefore successive images may evoke or require the same music. The same image may likewise relate to more than one musical setting, although this is rarer. Self-borrowing is common because many of his ideas were unrealized, for a variety of reasons, and because he recognized the vitality of pieces that could otherwise be wasted. There is no evidence that when he was borrowing most heavily he was suffering any lack of fecundity, although the *Symphonie funèbre* came suspiciously close to a fallow period.

19. THE CRITIC. Berlioz's views were presented regularly to readers of the Paris press, and his literary output was immense. In addition to the *Traité d'instrumentation* and the *Voyage musical*, he published three collections of criticism: *Les soirées de l'orchestre* (1852), *Les grotesques de la musique* (1859) and *A travers chants* (1862). In his *feuilletons* he wrote of new operas and singers, many of them of staggering unimportance; his opinion on momentous occasions was of crucial interest, for example at the première of *Le prophète* in 1849. He reviewed most of the concerts of the Société des Concerts; he wrote of new instruments and musical gadgets, of his own impressions of music abroad, and of important musicians visiting France; he wrote biographical notices of Gluck, Beethoven, Spontini, Méhul and himself; he wrote fiction and fantasy, often with a critical purpose; he wrote serialized treatises on orchestration and conducting. There are, in short, few facets of musical practice of the time untouched in his *feuilletons*.

Inconsistencies and changes of opinion are to be found, as one would expect over 30 years; but in general Berlioz's opinions are trenchant and clearly expressed. He loathed the easy success of second-rate musicians with no personality and a borrowed style, and he fought endlessly against backstage politics that placed graft above art. His admiration for the greatest masters, especially Gluck and Beethoven, is a leitmotif of almost wearying persistence, and with secondary masters, such as Rossini, Meyerbeer and Halévy, he was carefully discriminating, separating the good from the bad. He greeted Glinka and Bizet with prophetic enthusiasm, yet Wagner ultimately taxed his deep-rooted beliefs beyond the boundaries of acceptance. The *Tristan* prelude had, for him, 'no other theme than a

sort of chromatic sigh'. It was 'full of dissonant chords, the harshness of which is intensified by modifications of the real notes of the harmony'; he acknowledged Wagner as a powerful new voice, but one that was speaking a language he no longer understood, and leading the next generation away from the highest reaches of the art.

Berlioz was one of the first to enunciate a critical standpoint that is now a commonplace but was then startlingly new: that music should be enshrined in the form in which it was written and not brought up to date. He attacked Fétis and Habeneck for their 'corrections' of Beethoven, and repudiated singers who added ornamentation and 'improvements' to the vocal lines of Gluck and Mozart. For Berlioz the composer's utterance had a sanctity that raised it above the tampering of mere performers. That is not to say that he only accepted whole performances, for his concert programmes were full of extracts, as was the custom of the day, but the principle of respecting a composer's own directions had his constant support. Castil-Blaze's travesties of Mozart and Weber appalled him, and it was an ironic twist that exposed him to the criticism of having mutilated Weber's *Der Freischütz* when he had set the recitatives to music in order to prevent the Opéra from mutilating it any more. A series of sarcastic directions in the autograph of *Les Troyens* permits cuts to be made when circumstances render them necessary; a footnote in *Roméo et Juliette* advises suppression of the more demanding sections when the audience is not sufficiently attuned to the composer's purpose.

Berlioz's battles as a critic were not fought just to expound his points of view. They were intimately related to the more serious struggle for recognition as a composer. If his readers could be persuaded to recognize the good and the beautiful in Gluck, Spontini and any modern composer, so they might turn more sympathetically to his own music. But the strategy failed and his journalism was seen more and more as an independent professional activity, executed with extreme flair and wit, but in fact making his stature as a composer all the harder to establish.

20. Standing and research. Berlioz belongs to a tradition, yet he is an isolated figure. Since the music on which he based his style is still little known, he has been regarded too simply as a wholly unprecedented phenomenon in French music. From his predecessors he inherited a basic language and certain mannerisms, for example dramatic recitative gestures from Spontini and a taste for plain melody from Gluck. Méhul's raw vigour is to be seen echoed in Berlioz's early music, and Le Sueur's passionate search for new modes of expression, by using lengthy descriptions or unusual instrumental effects, left a clear mark. The grandiose music of the French Revolution, especially such pieces as the *Marche lugubre* of Gossec, is carried on in Berlioz's monumental style. He learnt much from Weber and Beethoven and a little, despite himself, from Rossini; his contemporaries on the whole did not influence him greatly. The shape and pulse of his themes and their treatment, his sense of colour and contrast, the urgent flux of passion and the immense expressive variety of his music: these were all new. No other French composer of his time had the imagination or the genius to grasp the Berliozian manner, which was in any case too personal to permit easy imitation. German composers, like Schumann, admired his music but spoke a different language. Mendelssohn admired him as a man, but disliked his music.

Berlioz's influence was most obviously shown (to the point of imitation) by such minor figures as David and Reyer in France and Cornelius in Germany. The latter's *Barbier von Bagdad* is full of homage to *Benvenuto Cellini*. More important was the fertilization of Liszt's music, shown especially in the symphonic poems, a debt Liszt was glad to acknowledge. Wagner stands clearly in line, yet though he adapted a number of felicitous inventions from Berlioz and can be shown to have learnt much from him, his fundamental outlook was too different and too all-embracing to be regarded as an offshoot of Berlioz's Romanticism in particular.

The Russians adopted Berliozian ideas with enthusiasm, especially Balakirev, whose plan for a *Manfred* symphony, intentionally modelled on *Harold en Italie*, was taken up by Tchaikovsky. Rimsky-Korsakov's *Antar* and many other poematic symphonies show a debt to Berlioz. Strauss showed it, too, in *Aus Italien* and especially *Don Quixote*.

In France Berlioz's style is heard occasionally in Saint-Saëns and Massenet. Debussy and Ravel repudiated him on technical grounds, although more sympathetic attitudes have been voiced by Milhaud and Messiaen. In sum, it is a sorry tale of rejection and isolation. Berlioz has inspired many by the sincerity and energy of his music, but in his lifetime the opportunity of absorbing even part of an idiosyncratic style was missed. As an idealist he had much to offer to artists of any milieu, and history has forced one to recognize him for what he was and what he did rather than for where he stood in relation to others. This may ultimately prove a blessing.

Much was written on Berlioz in his lifetime, but the first full-length biographies were written by Jullien and Hippeau in the 1880s. The centenary of 1903 coincided with a wave of Berliozian study that produced the Breitkopf & Härtel collected edition, Adolphe Boschot's three-volume biography and a wide range of special studies by Prod'homme and Tiersot, who also published three volumes of correspondence.

The greatest resurgence of interest was later in the century, assisted particularly by recordings, by Barzun's two-volume study of 1950, and by the London revival of *Les Troyens* in 1957. The 1969 centenary created a wider familiarity with the music, especially *Les Troyens*, which was finally performed, published and recorded in full for the first time. New complete editions of the music, the literary works and the correspondence are all now in progress, so that by the 2003 bicentenary of his birth a full and fair presentation of Berlioz's life and work may eventually atone for many years of neglect and misunderstanding.

HUGH MACDONALD

**Berman, Bernhardt.** *See* BAR-AM, BENJAMIN.

**Berman, Boris** (*b* Moscow, 3 April 1948). American pianist of Russian birth. He studied at the Moscow Conservatory with Lev Oborin from 1965 to 1971, and took part in the Russian premières of works by Ligeti, Berio, Stockhausen and Cage, as well as the first performances of Denisov's *Ode* and Schnittke's *Serenade*. In 1973 he emigrated to Israel, and for six years taught at Tel-Aviv University. After moving to the USA in 1979 he held various teaching posts, and from 1984 to 1997 was head of piano at Yale University, where he also directed the Yale Music Spectrum concert series. Among Berman's many recordings are the complete piano works of Prokofiev, which display his powerful but always clear, stylish and intelligent playing.

DAVID FANNING

**Berman, Eugene** [Yevgeny Gustavovich] (*b* St Petersburg, 4/16 Nov 1899; *d* Rome, 14 Dec 1972). American stage designer of Russian birth. He studied painting and architecture in St Petersburg until forced to flee in 1918. He settled in Paris in 1919 and remained there for 20 years, studying painting at the Académie Ranson until 1922. Along with Christian Bérard and Pavel Chelishchev (Tchelitchew), he was identified with neo-Romanticism and its preoccupation with architectural views of landscapes and the evocative use of perspective, twin features of his stage designs. In 1937 he designed a production of Weill's *Die Dreigroschenoper* at the Théâtre de l'Etoile, Paris, and then began a series of commissions for the Ballet Russe de Monte Carlo. He emigrated to the USA in 1940, became a naturalized citizen in 1944 and finally settled in Rome in 1957.

Berman attracted attention in 1951 with his designs for a television production (NBC) of Menotti's *Amahl and the Night Visitors* and for Pergolesi's *La serva padrona*, the inaugural production at the Ringling Museum of Art's Baroque theatre in Sarasota, Florida. From 1951 to 1957 he worked on productions at the Metropolitan Opera of *Rigoletto* (1951), *La forza del destino* (1952), *Il barbiere di Siviglia* (1954) and *Don Giovanni* (1957); he also designed *Così fan tutte* for La Scala in 1956. *Otello* (1963) was his last production for the Metropolitan.

Berman rejected the abstract impressions of Adolphe Appia and Edward Gordon Craig, describing them as 'gloomy, rigid and depressing in their puritanistic primness and intellectual intolerance'. His colourful and elegant designs were brilliant mannerist illustrations that evoked crumbling architectural fantasies of earlier times.

DAVID J. HOUGH

**Berman, Lazar' (Naumovich)** (*b* Leningrad [now St Petersburg], 26 Feb 1930). Russian pianist. From the age of two he was taught by his mother, Anna Makhover, and from three and a half by Samary Savshinsky of the Leningrad Conservatory. In 1939 his family moved to Moscow and he joined the class of Aleksandr Gol'denveyzer, first at the Central Children's Music School, then from 1948 to 1953 at the Moscow Conservatory, where he continued as a postgraduate until 1957. He gained a reputation for astonishing virtuosity, and prizes at the 1956 Queen Elisabeth Competition in Brussels and the Franz Liszt in Budapest were followed by a foreign tour, during which he played and recorded Liszt's B minor Sonata and Beethoven's 'Appassionata' in London. From 1959 to 1971 he was not allowed to tour abroad because of his marriage to a Frenchwoman (from whom he was soon to be divorced, however).

Berman made recordings of the complete Liszt Transcendental Studies in 1959 and 1963, the latter at the invitation of the state recording firm Melodiya to take advantage of stereo technology; these contain Liszt playing of extraordinary rhetorical grandeur and agility. In the 1970s he was allowed to tour again and his international career blossomed. Although his concert performances were inconsistent, he made several fine recordings, including a Rachmaninoff Third Concerto of colossal power and structural command, and the original version of Tchaikovsky's First Concerto. In 1980, at the height of his success, he was again forbidden to tour and all his foreign contracts were cancelled, after the discovery

of banned American literature in his luggage. In 1988 he was made Honoured Artist of the RSFSR. He left Moscow in August 1990 to teach in Norway and Italy, settling in Imola at the end of the year. In 1995 he was appointed to teach at the Musikhochschule in Weimar. He plays in a duo with his son, the violinist Pavel Berman.

**Bermann, Jeremias.** Austrian music publisher in the firm of JOSEPH EDER.

**Bermúdez, Pedro** (*b* Granada; *c*1558; *d* Puebla, ?1605). Spanish composer. He was probably educated at Granada Cathedral under Santos de Aliseda, *maestro de capilla* there from 1557 to 1580, and perhaps also studied composition with Rodrigo de Ceballos, *maestro de capilla* at the adjacent Capilla Real from 1561–1581. On 8 July 1584, while holding a benefice at Santa Fe, he was elected *maestro de capilla* of the collegiate church at Antequera. Unhappy there, he unsuccessfully competed for the post of *maestro de capilla* at Málaga in February 1586. Dismissed from his Antequera appointment on 31 January 1587 for gross negligence and a fight with one of his tenors that had led to a brief imprisonment, he returned to Granada, where he secured a half chaplaincy at the Capilla Real. He unsuccessfully competed for the post of *maestro de capilla* at Granada Cathedral in April 1592 and remained at the Capilla Real until he left for the New World, probably in the spring of 1595. On 9 October 1597 he succeeded Gutierre Fernández Hidalgo as *maestro de capilla* at Cuzco, mountain capital of the Incas. He seems to have left Cuzco during 1598, probably because of dissatisfaction with his salary and the enmity of his singers, since in that year he became *maestro de capilla* at Guatemala City Cathedral; he remained in this post until his departure for Puebla in 1603. He probably died at Puebla late in 1605 since the *sochantre* Luis Mendes was placed in charge of the choir there on 1 January 1606.

All but one of Bermúdez's extant works are preserved in the choirbooks at Guatemala City Cathedral. The exception, *Domine ad adiuvandum me*, appears in the Puebla *Libros de coro*, which books also contain concordances to seven of the Guatemala works. All the works are liturgical and, except for the parody *Misa de Bomba*, based on the *ensalada La Bomba* by Mateo Flecha the Elder, they incorporate the monophonic music to which their texts were traditionally sung. Although not a composer of the stature of Guerrero or Victoria, Bermúdez was a well-trained craftsman capable of providing competently written polyphonic settings for liturgical use in New World churches.

WORKS

Editions: *A New World Collection of Renaissance Polyphony for Holy Week and the Salve Service: Guatemala Cathedral Music MS 4*, MRM, ix (1995) [N]

Masses: Misa de Bomba; Misa de feria, 4vv, N; Misa de feria, 5vv, N

Passions: Passio secundum Matthaeum, N; Passio secundum Lucam, N; Passio secundum Joannem, N

Hymns: Aurea luce; Christe redemptor omnium; Defensor alme; Hostis Herodes [2 settings]; Iste confessor [2 settings]; Jesu nostra redemptio [2 settings]; Lauda mater; Pange lingua; Veni creator

Antiphons: Christus natus est, 4vv; Christus natus est, 8vv; Lumen ad revelationem, 4vv; Lumen ad revelationem, 5vv; Salve regina, 4vv, N; Salve regina, 4vv, N; Salve regina, 5vv, N; Salve regina, 6vv, N; Salve regina, ed. Stevenson (1982–3), 45–50, formerly attrib. Bermúdez, actually by Hernandeo Franco

Other works: Cum invocarem, N; Qui habitavit, N; In manus tua, N; Nunc dimittis, N; Domine ad adiuvandum me; Lamentations of Jeremiah (Maundy Thursday, Good Friday), N; Miserere mei, N; O gloriosa Domina; Vidi aquam

ROBERT J. SNOW

**Bermúdez Silva, Jesús** (*b* Bogotá, 24 Dec 1884; *d* Bogotá, 25 Oct 1969). Colombian composer. He studied the violin and theory with Uribe Holguín at the National Conservatory in Bogotá (1905–10) and taught the violin and the viola there (1910–19). From 1929 to 1933 he studied composition with Campo at the Madrid Conservatory. He then held posts as a teacher of counterpoint and composition at the National Conservatory in Bogotá (1935–7), a teacher of string instruments and theory at the Escuela Normal in Tunja (1928–40), director of the Regional Conservatory of Tolima at Ibagué (1942–4) and professor of harmony and counterpoint at the conservatory attached to the National University of Colombia in Bogotá (1952–62). From 1935 he played a decisive role in the heated discussion on nationalism, presenting various symphonic pieces inspired by traditional Colombian music. His orchestral and chamber works, though never daring, were always well crafted. He disavowed everything he wrote before 1930.

WORKS
(*selective list*)

Orch: Cuento de hadas, vas, fls, orch 1930; Torbellino, sym. poem, 1931; Sym., C, 1933; 3 danzas típicas, 1938; Pf Conc., a, 1947, unpubd; Orgía campesina, sym. poem, 1959; Estampa criolla, sym. impression, 1959, unpubd

Choral: several pieces for 3–4vv, 1938, incl. Leyenda de oro (E. Ortega), 4vv, and Canción arrullo de María Isabel (L. Stella), 3vv, in *Obras polifónicas*, ed. L.A. Escobar (Bogotá, 1973), 39ff

Chbr and solo inst: Prelude and Fugue, g, org, 1930; Trio no.2, C, fl, vc, pf, 1943; Str Qt, D, 1947; Pf Trio, g, 1949; Sonatina, a, pf, 1950; Pf Sonata, D, 1951; 6 viejas estampas de Santa Fé de Bogotá, pf, 1958

ROBERT STEVENSON/ELLIE ANNE DUQUE

**Bermudo, Juan** (*b* Écija, *c*1510; *d* ?Écija, after 1559). Spanish music theorist. All our knowledge of his life comes from his treatises. He was the son of a well-to-do Écija family and joined the Observant Franciscans at the age of 15. He studied at the University of Alcalá de Henares, probably in the Franciscan college. Eventually he became *guardián* of his convent (perhaps that in Écija), a duty he had to relinquish owing to illness. On 24 June 1560 he was elected *definidor*, a member of the governing body of the Franciscan province of Andalusia. Since no later documents have come to light, it is believed that he died in the early 1560s.

Bermudo refers only obliquely to early studies in music; at the university he studied mathematics. He clearly never held a musical position, and as a theorist he seems to have been self-taught through wide reading; his main modern sources are Faber Stapulensis, Gaffurius, Ornithoparchus and Glarean. The titles by which he is addressed in his books refer to him only as a dignitary of his order; his superior praised him as a fine preacher and confessor. Although his career may seem surprising for a theorist, it corresponds well to the attitude of Spanish Observant Franciscans, who did not cultivate polyphonic music. Bermudo devoted himself to music only after illness forced him to resign as *guardián*, possibly already then with the intention of writing a book.

The publication of his *Declaración* did not come about easily. The first edition is an extract (the *Libro primero*) from what was intended to be four separate books and was dedicated to João III, King of Portugal. Despite the word 'instruments' (though not 'music') in the title, the book does not deal with instruments at all; only in the edition of 1555 does it become clear that the expression 'instrumentos musicales' refers to *musica instrumentalis*, practical rather than speculative music. The second publication, *El arte tripharia* ('The Threefold Art') of 1550, was written for the nuns of the Santa Clara convent in Montilla at the request of the abbess, Doña Isabel Pacheco, to whom it is dedicated. It is an abbreviated version in three books, comprising a manual for beginners of plainchant, polyphony and organ-playing. Not until 1555 was Bermudo able to bring out what he considered the definitive version of his treatise, dedicated to Francisco de Zúñiga y Avellaneda, Count of Miranda. It begins with an extended praise of music in the first book, combines much of the elementary treatises of the 1550 edition in the second book, followed by more advanced treatment in the third book, and includes a fourth book – actually on musical instruments, especially the organ, harp and vihuela – and a new fifth book on composition, prefaced with a commendatory letter by Cristóbal de Morales, praising the theorist for embedding theory in practice (the book includes complete compositions). A sixth book, though announced on the title-page, was not included, nor was a contemplated seventh book; Bermudo mentioned the high cost of paper.

Bermudo's stated goal (Prologue of *El arte tripharia*) was to distil Greek and Latin theory in a form intelligible to the average singer; his four-book treatise was intended as a textbook for university students, but could also be used by the self-taught. In this he succeeded admirably, guiding the student personally, with many interesting observations, from elementary instruction to advanced theory, not hesitating to criticize previous writers (the sixth book was to have refuted the errors of 14 of them). He made much of his '12 new things' (in the sense that they had not been covered by previous treatises); nine of these, however, were in the unprinted sixth and seventh books. They mostly concern methods of achieving accidentals in harps, vihuelas and keyboard instruments, with advice on building organs and keyboard instruments. The novelties discussed in the 1555 treatise concern the tuning of the seven-course vihuela, including a proposed new tuning system applicable to all fretted instruments, close to equal temperament. He wrote at length on composing in the 'semi-chromatic' (mixed diatonic and chromatic) genus.

As Bermudo had hoped, his book achieved wide success; it was quoted well into the 18th century and remains today the most comprehensive and accessible source of 16th-century Spanish music theory. He successfully bridged the gulf that separated practice and theory and in the process raised the level of scientific discourse in the genre of *musica practica* treatises by introducing mathematical and geometrical demonstrations that formerly appeared only in *musica speculativa* and mathematical treatises. His careful didactic method but also his personal presentation of the material, interspersed with much 'advice', bring the sometimes dry theoretical tradition to life, and his treatise deserves to be much better known.

WOLFGANG FREIS (with BONNIE J. BLACKBURN)

**Bernabei** [Barnabei]. Italian family of composers, active in Germany.

**(1) Ercole Bernabei** (*b* Caprarola, 1622; *d* Munich, 5 Dec 1687). Presumably he grew up in Rome, where he became a pupil of Orazio Benevoli. On 25 August 1642 he took part as an additional continuo player in the church festival at S Luigi dei Francesi, where Benevoli was *maestro di cappella*, and in August 1653 he succeeded Luigi Rossi as organist there. He was temporarily replaced in 1658–9 by Ercole Pastorelli, but he continued in the post even after being appointed *maestro di cappella* at S Giovanni in Laterano in July 1665; presumably his son (2) Giuseppe Antonio Bernabei then officiated for him at S Luigi. In April 1667 he succeeded A.M. Abbatini as *maestro di cappella* at S Luigi dei Francesi, and remained there until June 1672, when, largely through the intercession of Queen Christina of Sweden, he assumed the important position, vacated by his late master Benevoli, of director of the Cappella Giulia at the Vatican. But within two years he left Rome for Munich to become Kapellmeister to Prince Ferdinand Maria of Bavaria in succession to Johann Kaspar Kerll (he was specially sought after for his maturity because the court had found the temperamental Kerll very difficult); he took with him as assistant and translator his young pupil Agostino Steffani. Although not altogether happy in Munich and longing to return to Italy, he remained there until his death.

During his years as a composer for various churches in Rome Bernabei proved himself a master of the *stile antico*, but he also showed that he was versatile by composing sacred music in more modern styles: he wrote numerous concertato works, both in the grand polychoral manner and in the intimate style for a few solo voices. His important church posts restricted his involvement with secular music, but despite criticism from conservative quarters he composed a few cantatas and canzonettas. Some of his most skilful work is found in the 15 three-voice pieces of his *Concerto madrigalesco*, a collection that served Steffani as a model. Only when Bernabei went to Munich was he required to compose operas; the music is lost.

WORKS

OPERAS

*all first performed in Munich; music lost*

La conquista del vello d'oro in Colco (D. Gisberti), 1674
I portenti dell'indole generosa, ovvero Enrico terzo imperatore, duca di Baveria (Gisberti), 1675
Il litigio del cielo e della terra (V. Terzago), 1680
Erote ed Anderote (Terzago), 1686

Doubtful: La fabbrica delle corone (Gisberti), 1674

OTHER WORKS

Concerto madrigalesco, 3vv, bc (Rome, 1669)
Sacrae modulationes, op.2, 5vv, 2 vn, bc (Munich, 1691)
2 masses, 16vv, *I-Rvat* C.G.
23 motets, hymns, introits, antiphons, 4–8vv, *D-Bsb*, *Mbs*
Cantatas, canzonettas, arias, 1v, bc, *A-Wn*, *D-Dl*, *F-Pn*, *GB-Cfm*, *Lbl*, *I-MOe*

**(2) Giuseppe Antonio Bernabei** (*b* Rome, ?1649; *d* Munich, 9 March 1732). Elder son of (1) Ercole Bernabei. He presumably studied with his father, and probably replaced him at the organ of S Luigi dei Francesi from July 1665 to April 1667. He then went to work with him as vice-Kapellmeister in Munich, a post he assumed on 24 June 1677. After his father's death he became Hofkapellmeister there. During the first 15 years of his career at Munich he regularly wrote operas, but the political situation then cut short this activity. When the production of opera was resumed Pietro Torri became the principal composer, Bernabei – who was a priest – restricting his output to sacred music. A large number of his sacred works are listed in the 1753 catalogue of the Munich Hofkapelle together with 30 sinfonias and three 'Sinfonie, e Pastorel'.

WORKS

SACRED

6 missarum brevium cum una pro defunctis liber primus, 4vv, insts (Augsburg, 1710)
Motet, 3vv, 1675[3]
Many masses, motets, hymns in MSS, principal sources: *D-Bsb*, *Mbs*, *Rp*, *I-Bc*

OPERAS

*all first performed in Munich*

Alvilda in Abo (melodrama, 3, V. Terzago), 10 Feb 1678
Enea in Italia (Terzago), Jan 1679
Giulio Cesare, ricovrato all'ombra (Terzago), 11 July 1680, lib *D-As*, *Mbs*, *Sl*
L'Ermione (drama per musica, Terzago), Salvator, 14 July 1680, lib *Mbs*
L'Ascanio in Alba (melodramma, 3, F.R. Sbarra), Salvator, 19 Feb 1686, *A-Wn* (facs. in IOB, lxvi, 1982), *D-Mbs*
La gloria festeggiante [Gli dei festeggianti] (introducimento dramatico musicale del torneo, L. Orlandi), 18 Jan 1688, *A-Wn*
Diana amante (componimento dramatico, 3, Orlandi), St Georgs-Saal, Residenz, 26 Feb 1688, *Wn*
Il trionfo d'Imeneo (festa, 5, ?Orlandi), 22 Nov 1688, *Wn*
L'Eraclio, 5 Feb 1690 [also attrib. Clementin, and V. Bernabei]
Il segreto d'Amore in petto del Savio (melodrama, Orlandi), 7 Feb 1690, *Wn*, *D-Mbs*
La fiera (trattenimento musicale), ? 18 Jan 1691, *A-Wn*; ed. R. Münster (Lottstetten, 1979)
Vaticinio di Apollo e Diana, Nov/Dec 1692, *Wn*

ORATORIOS

Il cielo nato, Rome, 1675
La santissima croce ritrovata da S Elena imperatrice, Rome, 1675
Regina Ester, liberatrice del popolo ebreo, Rome, 1675

OTHER VOCAL

2 serenades: Venere pronumba (Orlandi), 1688, *Wn*; Egloga pastorale, *D-Mbs*; cantatas, arias, duets, *A-Wn*, *I-Bc*

INSTRUMENTAL

Orpheus ecclesiasticus: symphonias varias commentus [12 sonatas], 4 insts (Augsburg, 1698)

**(3) Vincenzo Bernabei** (*b* Rome, 1660; *d* Munich, 1732–6). Younger son of (1) Ercole Bernabei. He was apparently a highly skilled keyboard player. During his early years in Rome he was active in the production of operas. Largely because of his financial irresponsibility his father and brother arranged to have him employed at the court in Munich, where he was installed as organist in 1684. He composed a small number of sacred works (in *D-Dl* and *Mbs*) and a number of pieces for operatic productions (one in *A-Wn*).

OWEN JANDER (with JEAN LIONNET)

**Bernac** [Bertin], **Pierre** (*b* Paris, 12 Jan 1899; *d* Avignon, 17 Oct 1979). French baritone. He began taking singing lessons at the age of 18, and was first taught by the composer André Caplet. He was later coached by Yvonne Gouverné, who accompanied him at his first recital, in Paris, in 1925. He quickly became a renowned interpreter of *mélodies*, and in 1926 he gave the first performance of Poulenc's *Chansons gailliardes*, a harbinger of things to come. He made only two excursions into opera, both as Pelléas, at Paris in 1933 (Théâtre des Champs-Elysées) and at Geneva with Ansermet in 1936. From 1930 to 1932 he studied lieder with Reinhard von Wahrlich. Then, in 1934, looking for a pianist to partner him at a Debussy recital at the Salzburg Festival, he approached Poulenc. Their musical rapport was so great that they decided there and then on a musical partnership. Their first official recital together was at the Ecole Normale in Paris on 3 April 1935, when they gave the première of Poulenc's *Cinq poèmes de Paul Eluard*. They remained together for 25 years, touring all over the world, until Bernac retired in 1960. In all Poulenc wrote 90 songs for Bernac, his style influenced by the baritone's peculiarly refined artistry. They appeared for the first time in Britain in 1938 and in the USA in 1948. Other French composers, including Jolivet, Sauguet and Françaix, wrote for Bernac, as did Hindemith, Berkeley and Barber. Among his many pupils the most distinguished was Gérard Souzay, whose style owed much to Bernac's example.

Bernac's art was consciously allied, in the French tradition, to a scrupulous enunciation of the text which, together with his light, pleasing high baritone, innate musicianship and refined taste in literature, epitomized the French style of his era. His repertory extended to lieder (he recorded an interesting but slightly mannered *Dichterliebe* with Robert Casadesus) but his reputation rests on his interpretations of *mélodies*, Poulenc's in particular, of which he left a substantial legacy on disc. His most important recordings, made for EMI, were reissued complete in 1999. All demonstrate his fastidious artistry.

ALAN BLYTH

**Bernacchi, Antonio Maria** (*b* Bologna, 23 June 1685; *d* Bologna, 1 March 1756). Italian alto castrato. He was a pupil of Pistocchi and G.A. Ricieri, and studied counterpoint with G.A. Bernabei at Munich. He made his Italian operatic début at Genoa in 1703 and appeared in Vienna in 1709 and Venice in 1709–10, 1717–19, 1721–4, 1731–2 and 1735, singing in at least 22 operas there (see illustration). During the same period he sang in many other Italian cities including Novara (1711), Bologna (1710, 1712–13, 1722, 1727, 1731), Florence (1712–15), Parma (1714, 1728–9, 1736–7), Pesaro (1719), Reggio nell'Emilia (1718, and 1719, in Gasparini's *Bajazet*), Milan (1719), Rome (1712, 1721, in the first performance of Alessandro Scarlatti's *Griselda*, and 1731), Turin (1726–7), Naples (1728–9) and Modena (1728–9, 1735–6). Following his success in Orlandini's *Carlo re d'Alemagna* at Parma in 1714, he was appointed virtuoso to Prince Antonio Farnese. His fame spread throughout Europe and he sang in operas by all the leading composers of the age, from Pallavicino and Alessandro Scarlatti to Hasse, Vinci and Leo. In 1720 he was engaged by the Elector of Bavaria for Munich and sang there frequently until 1727, remaining nominally in his service until 1735. In 1729 Swiney described him as 'the very best singer in the world'.

Bernacchi made his London début at the King's Theatre in Alessandro Scarlatti's *Pirro e Demetrio* in 1716 (when Handel composed three extra arias for him) and also sang in the pasticcio *Clearte*. In 1717 he appeared in Handel's *Rinaldo* and *Amadigi*. In 1729 Handel engaged him as leading man for the second Royal Academy and he sang in the first performances of *Lotario* (1729) and *Partenope* (1730), revivals of *Giulio Cesare* and *Tolomeo* (1730), and the pasticcio *Ormisda*. Though English audiences preferred Senesino, Bernacchi was accepted on the score of his European reputation; Burney described him as 'past

*Antonio Maria Bernacchi in the title role of the pasticcio 'Mitridate, re di Ponto', S Giovanni Grisostomo, Venice, 1723: caricature by Anton Maria Zanetti (i), pen and brown ink (Fondazione Giorgio Cini, Venice)*

his meridian', but paid tribute to his taste and intelligence. He retired from the stage in 1738, apart from an unsuccessful reappearance in Florence, 1741–2, and founded a famous singing school at Bologna; among his many distinguished pupils were Guarducci, Raaff and Amadori. Bernacchi had been a member of the Accademia Filarmonica, Bologna, since 1722 and its president in 1748–9, and he sang in churches and private concerts in the city. He was also a composer; some arias, duets and church music survive (in *F-Pn*, *I-Bc*).

The range of Bernacchi's voice was slightly higher than that of Senesino. The two parts Handel composed for Bernacchi – Lotario and Arsace (*Partenope*) – have a compass of *a* to *f″*. Though his natural musical gifts were not exceptional, he was renowned for technical virtuosity, especially in ornaments and cadenzas. He was accused, by Martinelli and Algarotti among others, of sacrificing expression to execution and adopting an instrumental style; his old master Pistocchi is said to have exclaimed: 'I taught you to sing, and you want to play'. Farinelli studied under him briefly in 1727.

WINTON DEAN

**Bernal, Afonso Perea** (*b* ?Seville; *d* Coimbra, 1593, before 6 Oct). Portuguese theorist of Spanish birth. His second name has sometimes been incorrectly cited as Pereira. He was appointed professor of music at Coimbra University on 29 May 1553. He published at Coimbra in 1550 an *Arte de canto chão*, translated from Juan Martínez's *Arte de canto llano* (Alcalá de Henares, 1532), an extremely popular manual of plainchant. An enlarged and revised edition was published probably before 1560 (no copies have been found), and another appeared posthumously with the title *Arte de Canto-chão, posta & reduzida em sua inteira perfeição, acrecentada de nouo em as entoações de cousas muito necessarias* (Coimbra, 1597). The *Ave sanctissimum* once attributed to 'A. Bernal' is by BERNAL GONÇÁLEZ.

ROBERT STEVENSON

**Bernal Gonçález, ?José** (*fl c*1550). Spanish composer. His first name is uncertain; in the past it has sometimes (as in *Grove5*) been too readily assumed to be Antonio. According to Collet he was *maestro de capilla* of the collegiate church of S Salvador, Seville, about 1550. A well-known cancionero of the period contains four works for four voices attributed to 'Bernal' or 'Bernal Gonçalez': a mass (without Gloria or Credo) *Domine, memento mei*; the turbae (crowd scenes) of a *St Matthew Passion*; and the highly sophisticated and expressive madrigal *Navego en hondo mar* (the last ed. in MME, viii, 1949, 74–7). His four-part pentecostal hymn *Veni, Creator Spiritus* seems to have been popular, for three copies exist (two in *E-Tc* and one in the archive of Guadalupe monastery, Cáceres; ed. in *Tesoro sacro musical*, lvii/3, 1974, suppl., 19f). There is also a poignant motet, *Ave sanctissimum*, by him (in *E-E* 4; ed. S. Rubio, *Antologia polifónica sacra*, i, Madrid, 1954, pp.268–73). A *romance* by him, *A las armas, moriscote*, is extant in an intabulation (in M. Fuenllana, *Orphénica lyra*, RISM 1554[32]; ed. C. Jacobs, Oxford, 1978).

ROBERT STEVENSON

**Bernal Jiménez, Miguel** (*b* Morelia, Michoacán, 16 Feb 1910; *d* León, Guanajuato, 26 July 1956). Mexican composer. A choirboy at Morelia Cathedral, he studied at the Colegio de Infantes there with Aguilera Ruiz and Mier y Arriaga. In 1928, after completing a course at the Escuela Superior de Música Sagrada, he was sent by Villaseñor to Rome for further study at the Pontificio Istituto di Musica Sacra with Casimiri (musicology and composition), Refice and others. Graduating in 1933 in the organ, composition and Gregorian chant, he returned to teach in his home town. There he was appointed director of the Escuela Superior de Música Sagrada (1936), and in 1939 he founded under its auspices the monthly *Schola cantorum*, which he edited until 1953 while touring widely in Mexico and the USA as a concert organist, choral conductor and lecturer. In 1943 the Mexican Academia de Ciencas y Artes Cinematográficas awarded him its annual prize in recognition of *La Virgen que for jo una patria*, one of his four films for which he wrote the music. He taught at Loyola University, New Orleans, from 1954 until his death. His stage works include *Tata Vasco*, an opera to commemorate the fourth centenary of the arrival of Vasco de Quiroga, first bishop of Michoacán, the ballet *Timgambato* on a Tarascan legend, and *Los tres galanes de Juana*, a ballet paying tribute to the Mexican poet Juana Inés de la Cruz. Whatever the genre – opera, ballet, sharply etched film scores, pieces of local colour such as the orchestral *Suite michoacana*, liturgical organ sonatas or Christmas confetti villancicos – Bernal Jiménez's music was the most tasteful composed by a conservative Mexican of his generation.

WORKS
(*selective list*)

Stage: Tata Vasco (opera, 5 scenes, M. Muñoz), Patzcuaro, 15 Feb 1941; Timgambato, ballet, Mexico City, 26 Aug 1943; Los tres galanes de Juana, ballet, Mexico City, Sept 1952
Orch: Noche en Morelia, sym. poem, Mexico City, 1 Aug 1941
Other inst: Sonata de iglesia, org (1942); Sonata de Navidad, org (1942); Prelude and Fugue, org, 1946; Cuarteto virreinal, str qt (1951); Catedral, 24 pieces, org (1964)
Sacred vocal music: numerous Latin and vernacular works
Principal publishers: Fischer, Ediciones Mexicanas de Música, Schola Cantorum (Morelia)

ROBERT STEVENSON

**Bernaola, Carmelo Alonso.** *See* ALONSO BERNAOLA, CARMELO.

**Bernard, Emery.** French writer on music, not identifiable with ETIENNE BERNARD.

**Bernard, (Jean) Emile (Auguste)** (*b* Marseilles, 28 Nov 1843; *d* Paris, 11 Sept 1902). French organist and composer. He studied at the Paris Conservatoire, initially as a pianist, and was organist of the Paris church of Notre Dame des Champs from 1887 to 1895. In 1877 his Fantasy and Fugue for organ won a prize offered by the Société des Compositeurs de Paris. The Divertissement for wind instruments was played at the Parisian Société des Instruments à Vent, and his violin concerto played by its dedicatee, Sarasate, at the Conservatoire concert of 24 February 1895. Other works include two suites for orchestra, a *Concertstück* for piano and orchestra, the cantatas *La captivité de Babylone* and *Guillaume le conquérant*, chamber works and solo music for organ and piano; his serious and reflective disposition is shown in almost all his compositions.

WORKS
(*selective list*)

*published in Paris unless otherwise stated*

VOCAL

Scène de mai (L. Gallet), chorus, 2vv (1892)
Guillaume le conquérant (épisode lyrique, H. Brière), T, Bar, male vv, orch, vs (1896)
La captivité de Babylone (cantate biblique, L. Reed), Bar/Mez, chorus, orch, op.8 (1897)
Rondel (Charles, Duc d'Orléans), 5vv a cappella (Lyons, 1898)
3 offs: Exulta Deo, Voce mea, Dominus illuminatio mea, vv, org (Lyons, 1900)

INSTRUMENTAL

Orch: Suite no.1, op.23 (n.d.), arr. pf 4 hands (1877); Romance, fl, orch/pf, op.33 (1885); Vn Conc., op.29, arr. vn, pf (Berlin, 1885); Romance, vn, orch, op.27 (1888); Concertstück, pf, orch, op.40 (1892), arr. pf solo (1892); Suite no.2, op.38 (1892); Nocturne, pf, orch, op.51 (Lyons, 1902), arr. 2 pf (Lyons, 1902)
Chbr: Pf Trio, op.30 (Berlin, *c*1880–85); Suite, vn, pf, op.34 (1887); Andante and Rondo, vc, pf, op.43 (1892); Divertissement, 2 fl, 2 ob, 2 cl, 2 bn, 2 hn, op.36 (1894); Sonata, vc, pf, op.46 (1896); Sonata, vn, pf, op.48 (1897); Pf Qt, op.50 (1900); Str Qt, op.52 (Lyons, 1903)

DAVID CHARLTON/GÉRARD STRELETSKI

**Bernard, Etienne** [Stevan] [Bernardi, Stefanus; Bernardo, Estevan; Vernart, Esteban] (*b* Soignies, 1569/70: *d* Douai, Sept 1600). French singer and composer. He received his early music education at the monastery of St Vincent at Soignies. He was engaged as a *cantorcillo* at Madrid in the Flemish choir of Felipe II of Spain; he may have been recruited by George de La Hèle who took up his appointment as Felipe's *maestro de capilla* in 1582. In Madrid Bernard was taught by Philippe Rogier from 1586, and, according to Pedro Vaz Rego's poem *Armonico Lazo*, was one of Rogier's best pupils. As a clerk of the Toledo diocese he was considered on 13 April 1587 for the living of the chapel of Lens Castle, which had fallen vacant on the death of La Hèle. In 1590 he returned with Rogier to the Netherlands to attend Douai University where he continued to study until his death. He obtained a living at Soignies in 1595 but it was annulled on 24 September 1600, and his membership of the chapel at Lens 'vacante par le trespas de feu Estienne Bernard' was awarded to Charles Manpetit. Bernard's only surviving works are two chansons published at Antwerp (RISM 1597[10]); another chanson and one Spanish sacred work are lost, and three Latin motets for five and six voices were formerly in the library of King João IV of Portugal (listed in *JoãoIL*).

Etienne Bernard was not related to Emery Bernard (*b* Orléans), the author of *Brieve et facile méthode pour apprendre à chanter en musique* (Paris, 1541).

DOUGLAS KIRK

**Bernard, Matvey Ivanovich** (*b* Mitau [now Jelgava, Latvia], 1794; *d* St Petersburg, 28 April/9 May 1871). Russian music publisher, pianist and composer. In 1808 his family moved to Vilnius, where Bernard learnt to play the piano and decided on a musical career in preference to his father's military profession. Two years later he moved to Moscow, where he became involved in the leading musical circles, taking piano lessons from John Field and studying composition with Johann Hässler. Subsequently he decided to abandon his considerably successful performing career, and in 1816 was appointed to take charge of the serf orchestra on Count Potocki's estate. In 1822 he settled in St Petersburg and earned a reputation as a fine piano teacher.

As a composer, Bernard is known primarily for his songs and for an opera, *Ol'ga, doch' izgnannika* ('Olga, the Exile's Daughter'), which enjoyed some success when it was first produced in St Petersburg during the 1845–6 season. However, his chief contribution to Russian music was in publishing. Having already produced several music

journals, Bernard became established as an important and active publisher after he had purchased the Dalmas publishing house, put up for auction in 1829 after Dalmas's death. An early plan to publish a journal containing popular songs from recent vaudevilles was thwarted by the decline of public entertainment during the 1830 cholera epidemic, but in the same year he produced another journal, *Hommage à la jeunesse de St. Pétersbourg*, consisting of piano pieces. Like many of Bernard's publications this was intended for the amateur musician. He performed a valuable service by introducing to the St Petersburg public the music of contemporary Russian and foreign composers and produced many useful educational publications, including *Le pianiste du jour*, *Répertoire des jeunes pianistes* and *Répertoire des enfants* (St Petersburg, 1840). He is best known for his association with one of 19th-century Russia's most popular musical magazines, *Nouvelliste*, which continued to appear until 1916. Bernard published this from 1840, and included in it a vast quantity of music for piano and voice. He published the songs of Alyab'yev, Varlamov and Aleksandr Gurilyov, and was a champion of the early works of Glinka and Dargomïzhsky. Furthermore, he was instrumental in introducing the piano works of Laskovsky, Henselt and Liszt to Russian audiences. After Bernard's death the publishing house continued to flourish under his son, Nikolay, until it was finally absorbed into Jurgensen's publishing empire in 1885.

GEOFFREY NORRIS

**Bernard, Pierre-Joseph** [Gentil-Bernard] (*b* Grenoble, 26 Aug 1708; *d* Paris, 1 Nov 1775). French poet and librettist. After working as an attorney's clerk he joined the army, distinguishing himself in the Italian campaigns of 1733–4. He soon gained the protection of Mme de Pompadour, who secured for him administrative posts in the army and at court that provided a substantial income and the leisure to indulge his epicurean tastes. In 1736 he was briefly involved with La Pouplinière's circle, where he probably met Rameau. He also participated in the SOCIÉTÉ DU CAVEAU, a convivial literary society of which Rameau was a member.

Bernard's *Castor et Pollux* (1737), in its revised version of 1754, has with some justification been described as the finest French libretto of the 18th century (Masson); in emphasizing brotherly rather than romantic love it was exceptional. The plot, which develops with pleasing logic, is rich in conflicts of sentiment and provides convincing pretexts for the all-important spectacle. His subsequent librettos, *Les surprises de l'Amour* and *Anacréon*, are more routine, though never less than competent. Both were set by Rameau: the first, written for Mme de Pompadour's amateur theatricals, as an *opéra-ballet* in 1748 (rev. 1757), and the second as an *acte de ballet* in 1757.

GRAHAM SADLER

**Bernard, Robert** (*b* Geneva, 10 Oct 1900; *d* Paris, 2 May 1971). French music critic and composer. He studied at Geneva Conservatoire and University with G.T. Strong, Otto Barblan and Joseph Lauber, and with L.F.A. Aubert in Paris (1926). During his wide-ranging career he worked as a concert pianist, choirmaster and conductor, and as a teacher at the Conservatoire International de Paris (1929) and Schola Cantorum (1937), but he was known chiefly as a music critic and composer. He wrote for several Parisian daily newspapers and edited various French music periodicals including the *Revue musicale* (1939–40, 1946–51) and *L'information musicale* (1940–44); his books are mainly about French music. His compositions include the operas *Flen* (1918), *Le chevalier au Barizel* (1919) and *Polyphème* (1922), orchestral music (including *Les bergers d'Arcadie* and *Prélude au cimetière marin*, symphonic poems after P.A. Valéry), chamber music and songs.

CHRISTIANE SPIETH-WEISSENBACHER

**Bernardel.** French family of violin makers. Sébastien-Philippe Bernardel (*b* Mirecourt, 10 Jan 1802; *d* Bougival, 6 Aug 1870), known as Bernardel *père*, was apprenticed as a violin maker in Mirecourt before moving to Paris to complete his training with NICOLAS LUPOT and, after Lupot's death in 1824, with Charles-François Gand (*see* GAND (i)). He opened his own workshop at 21 rue Croix-des-Petits-Champs, Paris, in 1826, where he remained for 40 years, creating a large number of violins and cellos on the pattern of Stradivari. Occasionally he followed Guarneri or Maggini. He received several awards in national and international exhibitions (Paris 1839, 1844, 1849; London 1851). Although overshadowed by those of his colleague J.-B. Vuillaume, Bernardel's instruments are characterized by fine workmanship and the choicest materials. He was less successful with his varnish, and his violins sometimes appear rather bulky. The cellos are greatly sought after. In 1859 he went into partnership with his two sons, Ernest-Auguste Bernardel (*b* Paris, 1826; *d* Paris, 10 Dec 1899) and Gustave-Adolphe Bernardel (*b* Paris, 23 April 1832; *d* Cherbourg, 29 Jan 1904); he retired in their favour in 1866. That year the house was united with that of Gand, becoming Gand & Bernardel Frères. The Bernardel brothers built instruments and were responsible for maintenance and restoration, while Charles-Nicolas-Eugène Gand, renowned for his expertise, dealt with the purchase and sale of fine instruments. The firm made many fine instruments, though their striking red appearance shocked in some

quarters. Ernest Bernardel retired in 1886, and Gand's death in 1892 left Gustave Bernardel as sole proprietor. In 1901 the business passed to Albert Caressa amd Henri Français, who moved to 12 rue de Madrid in 1913. Less significant members of the Bernardel family were Louis (*b* Mirecourt, 3 July 1806; *d* Amsterdam, 26 Sept 1847), brother of Bernardel *père*, and Léon (*b* Paris, 1853; bur. 1 April 1931), son of Ernest-Auguste, who had a shop in rue du Faubourg Poissonnière from 1898.

CHARLES BEARE/SYLVETTE MILLIOT

**Bernardi, Bartolomeo** (*b* ?Bologna, *c*1660; *d* Copenhagen, 23 May 1732). Italian composer. The title-page of his first published collection of trio sonatas (1692) names him as a member of the Accademia Filarmonica of Bologna. On 1 January 1703 he was engaged by the Danish court as a violinist and composer. Dissatisfied with his conditions, he left Copenhagen in 1705, only to return in 1710 and be reinstated, as director of music. He remained in this post, taking occasional leave of absence, until his death in straitened circumstances. Since nearly all his vocal works – mostly pieces written for state occasions – were lost in the great fire of Copenhagen in 1794 it is difficult to evaluate Scheibe's negative assessment of Bernardi, coloured by anti-Italian prejudice. Bernardi's instrumental works, especially op.3, which is said to exhibit northern European as distinct from Bolognese characteristics, have won some guarded praise from modern writers. He wrote a treatise, *Anweisung alle Noten in Generalbass, sie mögen gehen oder springen auff besonderer Art accomp. könne* (*D-Bsb*).

MICHAEL TALBOT

**Bernardi, Francesco.** *See* SENESINO.

**Bernardi, Mario** (*b* Kirkland Lake, ON, 30 Aug 1930). Canadian conductor and pianist. His early musical promise prompted his family to send him to Italy to study, largely at the Benedetto Marcello Conservatory in Venice, and he returned to Canada to finish his training at the Royal Conservatory in Toronto. He began his career as a pianist, gaining added experience as an opera coach and conductor; he made his conducting début with the Canadian Opera Company's 1956 production of *Hänsel und Gretel.* He moved to England where he became a conductor (1964) with the Sadler's Wells company and subsequently its musical director (1966–9), and made his San Francisco Opera début in 1967. As founding conductor, he directed the first performance of the National Arts Centre Orchestra in Ottawa in 1969, remaining there until 1981. In Bernardi's hands the orchestra became a virtuoso ensemble, recording, touring Canada and abroad, and playing at the National Arts Centre's Summer Opera Festival from 1971 to 1982. He became principal conductor of the CBC Vancouver Orchestra in 1982, made his Metropolitan Opera début in 1984 and became music director of the Calgary PO the same year, remaining in the post until 1994. He was made a Companion of the Order of Canada in 1972 and received an honorary degree from the University of British Columbia in 1997.

KEITH MACMILLAN/CHARLES BARBER

**Bernardi, Stefano** [Steffano] (*b* Verona, *c*1585; *d* ?Salzburg, 1636). Italian composer and theorist. In his early years he sang under Baccusi at Verona Cathedral and was a chaplain there in 1603. He spent a period in Rome, where at least in 1610 he was *maestro di cappella* of the church of the Madonna dei Monti. He returned to Verona in April 1611 to take up a similar post at the cathedral and was also associated with the music at the Accademia Filarmonica there, at least in 1616. He left in 1622 to become a musician in the service of Archduke Carl Joseph, Bishop of Breslau and Bressanone, after whose death in 1624 he settled at Salzburg for at least ten years. He was involved in the music for the consecration of Salzburg Cathedral in 1628: he wrote a *Te Deum* for 12 choirs and a dramatic work, which does not survive. He became a Doctor of Law in 1627.

Although he was primarily a church composer, Bernardi wrote a good deal of secular music, and a few of his volumes of vocal music include at the back a number of instrumental works. He published his counterpoint treatise when he was hovering on the brink of the new concertato style while still adhering to a traditional polyphonic idiom. The dichotomy between old and new is typified in the exactly contemporary 1615 collection of masses, some of which are *a cappella* and some concertato. The former are in a kind of watered-down post-Palestrinian idiom, fluent and occasionally expressive; one is based on Arcadelt's famous *Il bianco e dolce cigno*, then almost 80 years old – a testimony to that madrigal's incredible popularity. Bernardi had, however, already espoused the concertato principle in the motets and psalms of 1613. In some of the former there are contrasting solo and tutti sections (though otherwise they are pale and inexpressive works), and the psalms are among the earliest to include such contrasts of texture, which an organ continuo made possible. Other psalm and mass collections by him are in a conventional *stile antico*, whether double choirs are used or not. But in a late volume, the *Salmi concertati* of 1637, he returned to the concertato manner: most interestingly he singled out only one soloist, a soprano, in all the psalms, while punctuating the solos with a four-part ripieno singing excitingly

rhythmic, contrapuntal music. It is as if the solo concerto had already arrived, even if thematic integration had yet to be worked out. A number of the motets in the 1621 collection have parts for instruments, including cornett, lute and theorbo as well as the more common violins and trombones. The 1634 volume contains three dialogues.

Bernardi's instrumental works are for three to six players and continuo. Their style renders them adaptable to various combinations, as is suggested on the title-page of the *Madrigaletti* of 1621. In the six-part works in the *Concerti academici* of 1616 Bernardi made the top two parts more agile, perhaps with violins in mind. His three volumes of five-part madrigals show the transition from unaccompanied to concertato texture: the first book recalls early Monteverdi with its attention to word-painting and its rich scoring, though the writing is often syllabic; the second book introduces a continuo, but only as a gesture to taste, for the textures are not very varied. Bernardi made an interesting contribution to the delicate art of the madrigaletto in the three-part volume of 1611 as well as that of 1621. The former was published in Rome while he was living there and lacks a continuo; its contents were perhaps directed towards the amateur market that Marenzio had supplied with just this sort of music in the 1580s. The collection ends with a 'peasants' masquerade' in six parts.

JEROME ROCHE/ELIZABETH ROCHE

**Bernardi, Stefanus.** *See* BERNARD, ETIENNE.

**Bernardini, Marcello** [Marcello da Capua] (*b* ?Capua, 1730–40; *d* after 1799). Italian composer and librettist. There is evidence in the archives of the Collegio Nazareno in Rome that he may have been the son of Rinaldo di Capua. He reached Rome in about 1764, when his *La schiava astuta* and other intermezzos – *pantomime ed ariette in musica da recitare nel Teatro dei Signori Capranica* – were performed. In 1767 he held a civic office (*caporione*) in the Campitelli district and in 1769 he received an appointment at the Collegio Nazareno to write the music for the Nativity of the Virgin, an office he held until 1784. The fact that he had been preceded in this post by Rinaldo di Capua, who according to Burney had a 'graceless son', supports the theory of a close link between Rinaldo and Bernardini, especially since it was customary for composers to suggest their successors, usually a son or pupil.

In 1771 Bernardini wrote *Il vello di Gedeone* for the Oratorio di S Girolamo, Rome, and later the same year he was in Naples, where his operas were performed at the Teatro del Fondo. From 1770 he also wrote librettos for himself and for other composers such as G.B. Borghi, Pietro Terziani and Martín y Soler. It is possible that he went to Turin and Munich when his operas were performed there. Some librettos from 1789 to 1799 designate him as being in the service of 'the Princess Lubomirski Czartoryska of Poland' (probably Elisabeth Helene Anna Czartoryska, Princess Lubomirski), whom he may have followed to Poland about 1795, after visiting Vienna for a performance of his cantata *Angelica placata*.

Of Bernardini's large output of nearly 40 operas only 13 survive, together with two cantatas and a few librettos. All but three of his operas are comic. Some, such as *La donna di spirito* (1770), *Li tre Orfei* (1784) and *Le donne bisbetiche* (1785), were highly successful and widely performed into the first decade of the 19th century. As a composer he was particularly appreciated for his comic writing and his skill in characterization. He wrote mainly comedies of intrigue; but instead of following rigid conventional formulae, they have lively innovations and a sharp line in caricature.

WORKS

OPERAS

La schiava astuta (int, 2), Rome, Dame, carn. 1765
La pescatrice (farsetta), Rome, 1768
Il Don Chisciotte della Mancia (dg, ? G.B. Lorenzi), Turin, Carignano, aut. 1769
Il cavaliere errante (farsetta, 2, M. Bernardini), Rome, Capranica, carn. 1770

La donna di spirito (farsetta, 2, Bernardini, after C. Goldoni: *La vedolva scaltra*), Rome, Capranica, carn. 1770, *A-Wgm*, rev. as La donna bizzarra, Naples, Nuovo, 1789, *P-La*; as Le quattro nazioni, Florence, S Maria, sum. 1793; as Li cinque pretendenti, Trieste, Carn. 1794

**Bernard of Clairvaux** (*b* Fontaines-lès-Dijon, 1090; *d* Clairvaux, 1153). French theologian, reformer and mystic. He was educated at Châtillon by the canons of St Vorles. In 1112 or 1113 he entered Cîteaux, and in 1115, in obedience to his abbot, St Stephen Harding, he left it to found Clairvaux, which was to become one of the most famous houses of the Cistercian order. Bernard was its first abbot, ruling over it until his death. Many of his written works were designed for delivery in the chapter house before his own monks. His influence, however, extended far beyond the confines of Clairvaux. He travelled throughout Europe, from Speyer to Palermo and from Madrid to Bordeaux, crossing and recrossing the Alps and the Pyrenees. He made active contributions to synods and councils, notably at Troyes (1128), Pisa (1135), Sens (1140) and Reims (1148). At Troyes he was responsible for establishing the Order of the Knights Templar and he may have been the author of their Rule. He supported Pope Innocent II against the antipope Anacletus II at the disputed election after the death of Honorius II in 1130.

An ardent defender of the faith, Bernard engaged in doctrinal disputes with Pierre de Bruys, Henri de Lausanne, Arnold of Brescia, Gilbert de la Porée and finally with Abelard, whom he condemned at the Council of Sens (1140). By his presence and moral support Bernard preached the Second Crusade (1147–9) and was deeply disappointed when it failed.

The secret of Bernard's far-reaching influence lay in his saintliness and in the strength of his compelling personality. His contribution was essentially that of a monk. Under his leadership the Cistercian order came to be recognized throughout Europe, its austerely reformed type of monasticism contrasting sharply with the style of its great rival, Cluny. The differences are highlighted in the correspondence between Bernard and his friend Peter the Venerable, which called forth Bernard's famous *Apologia ad Guillelmum Abbatem*.

Bernard's writings include sermons, treatises, a few miscellaneous minor works and a vast output of letters (ed. in Mabillon; James, 1953; and Leclercq, 1957–77). The minor works include an Office for the feast of St Victor, with its important covering letter to the abbot and monks of Montiéramey, a hymn in honour of St Malachy and the tiny prologue to the Cistercian antiphoner (*c*1147) – all three pointing to Bernard's concern for an authentic style of worship. 'The chant', he wrote in his letter to Abbot Guy, 'should be quite solemn, nothing sensuous or rustic. Its sweetness should not be frivolous. It should please the ear only that it might move the heart, taking away sorrow and mitigating wrath. It should not detract

from the sense of the words but rather make it more fruitful'. The so-called *Tonale Sancti Bernardi* and the two chant treatises connected with the reformed antiphoner and gradual (all ed. Mabillon, clxxxii) are of doubtful authorship but are associated with Bernard's reforms (*see* TONARY, §6(iv)).

Bernard played a major role in the Cistercian liturgical reform. The founding fathers had sought a 'pure' tradition in what they considered to be the best source available – the Metz tradition for the music of the Office). A second stage in this reform came between 1140 and 1147 with the setting up of a commission of experts under Bernard's presidency. Bernard was probably responsible for the textual revisions, based on clear editorial principles: the avoidance of unnecessary duplication; the removal of apocryphal or theologically debatable texts; and the provision of greater literary unity within a piece, for example, a responsory and its verse would preferably be chosen from the same biblical source, not from two different sources.

From the musical point of view the 'Bernardine reform' achieved three objectives. The corrupt repertory used by the early Cistercians was brought into line with what was being sung at the time in Europe. The age-old melodies were made to conform to recent theory; for example, melodies that exceeded the requisite range or were unduly florid were modified or transposed; modally ambiguous melodies were re-composed and confined within the straitjacket of a textbook mode; *musica ficta* was avoided. Finally, the reformers introduced many recently composed pieces in a more popular vein.

Bernard was canonized in 1174 and declared a Doctor of the Church in 1830.

**Bernardon** [Kurz-Bernardon], **Joseph Felix von.** *See* KURZ, JOSEPH FELIX VON.

**Bernardus.** *See* BERNO OF REICHENAU.

**Bernart de Ventadorn** [de Ventador, del Ventadorn, de Ventedorn] (*b* Ventadorn, ?*c*1130–40; *d* ?Dordogne, *c*1190–1200). Troubadour. He is widely regarded today as perhaps the finest of the troubadour poets and probably the most important musically. His *vida*, which contains many purely conventional elements, states that he was born in the castle of Ventadorn in the province of Limousin, and was in the service of the Viscount of Ventadorn. In *Lo temps vai e ven e vire* (PC 70.30, which survives without music), he mentioned 'the school of Eble' ('l'escola n'Eblo') – apparently a reference to Eble II, Viscount of Ventadorn from 1106 to some time after 1147. It is uncertain, however, whether this reference is to Eble II or his son and successor Eble III; both were known as patrons of many troubadours, and Eble II was himself a poet, although apparently none of his works has survived. The reference is thought to indicate the existence of two competing schools of poetic composition among the early troubadours, with Eble II as the head and patron of the school that upheld the more idealistic view of courtly love against the propagators of the *trobar clos* or difficult and dark style. Bernart, according to this hypothesis, became the principal representative of this idealist school among the second generation of troubadours.

The popular story of Bernart's humble origins stems also from his *vida* and from a satirical poem by his slightly younger contemporary Peire d'Alvernhe. The *vida* states that his father was either a servant, a baker or a foot soldier (in Peire's version, a 'worthy wielder of the laburnum bow'), and his mother either a servant or a baker (Peire: 'she fired the oven and gathered twigs').

After leaving Ventadorn, Bernart (according to the *vida*) entered the service of the Duchess of Normandy, Eleanor of Aquitaine, who received the title after her marriage to Henry Plantagenet in 1152, who in turn became Henry II of England two years later. There are a number of references in Bernart's poems to Eleanor, Henry and, probably, a trip to England with the royal pair. Bernart's association with Eleanor and his presence in England some time after 1150 thus seem plausible but the fact that he met Chrétien de Troyes there, as some scholars have maintained, cannot be documented. The *vida* states that after Eleanor and Henry II went to England Bernart entered the service of Raimon V, Count of Toulouse (1148–94). After the count's death, the troubadour is reported to have entered a monastery in Dordogne, where he remained for the rest of his life.

Bernart is remarkable among the early troubadours in that more of his melodies have survived than of any other 12th-century poet. Of 45 poems attributed to him, 18 are extant with complete melodies, and one other survives with a fragment of melody (*Tuit cil que·m pregon qu'eu chan*). His influence on the subsequent history of medieval song is demonstrated by the fact that four melodies served as the basis for later contrafacta by French, Latin, Provençal and German poets (*Ara no vei luzir soleill*; *Be m'au perdut*; *Pos mi pregatz seignor* and *Quan vei la lauzeta mover*). *Quan vei la lauzeta mover* was probably the most widely known of all medieval melodies: it inspired at least six contrafacta in four languages. The great popularity of this song, together with his presence in northern France and possibly England in the 1150s, lends credence to the view that Bernart more than any other single figure was responsible for transplanting the

poetic-musical art of the troubadour to northern Europe, thus stimulating the development of the trouvère tradition.

Although the majority of the extant troubadour melodies are through-composed (*oda continua*), those attributed to Bernart show a predilection for repeated sections, a characteristic shared with Jaufre Rudel, Raimon de Miraval, Peirol and Giuraut Riquier. Of Bernart's 18 melodies, only three are through-composed; 12 are either in chanson form (*ABABX*) or derived from it. Scherner-van Ortmerssen has divided his output into the following categories: *oda continua* (PC 70.7, 19, 43); reduced *oda continua*, containing at least one repeated phrase (PC 70.8, 24, 42); chanson (PC 70.1, 17, 41); and the remaining nine, some variant of chanson. Later studies have shown instances of syntactical interplay between poetry and music in Bernart's melodies.

**Bernasconi, Alessio Boileau.** *See* BOILEAU BERNASCONI, ALESSIO.

**Bernasconi, Andrea** (*b* ? Marseilles, 1706; *d* Munich, 24 Jan 1784). Italian composer. Early sources state that he was born in 1712. His father, a French officer, settled in Parma after his withdrawal from military service. Little is known of Bernasconi's education. In the librettos of his early operas he is referred to as a Milanese dilettante (1737 and 1743) and as a Veronese (1742 and 1745), but mainly as a Milanese (1737, 1743–53). In 1744–53 he was *maestro di cappella* at the Ospedale della Pietà in Venice, and in 1747 he married Maria Josepha Wagele (*c*1722–1762) in Parma. He instructed his stepdaughter, Antonia, in music and helped launch her successful singing career. A decree of 24 November 1753 refers to his engagement as assistant Kapellmeister of vocal music in Munich from 1 August 1753; his appointment coincided with the opening of the Residenztheater. He was soon appointed electoral councillor. On 5 June 1754 he was named music teacher to the princesses Maria Anna Josepha (until July 1755) and Josepha Maria (until January 1765); the Elector Maximilian III Joseph also received music lessons from him. Following the death of Giovanni Porta, Bernasconi was appointed Kapellmeister on 7 September 1755. In 1778 Elector Carl Theodor confirmed his official post, but he probably rendered no further service. His successor in 1784 was Paul Grua.

As a composer, Bernasconi was a conservative representative of the Neapolitan *opera seria*, his music devoid of any attempts at reform. Most of his arias are in a modified da capo form with florid melodic writing; the recitatives are noteworthy for their fluent and vocally graceful declamation. He employs accompanied recitatives effectively, especially in the later operas. Gerber reports that Hasse's wife, the soprano Fuastina Bordoni, liked Bernasconi's operas, and that his arias pleased her as much as those of her husband. His stage works performed in Munich, some being revisions of earlier works, were very popular. After 1772 Bernasconi devoted himself exclusively to church music. He wrote relatively little instrumental music and almost all of his sacred music (including 34 masses) is lost.

WORKS

STAGE

*opere serie in three acts unless otherwise stated*

Flavio Anicio Olibrio (A. Zeno ?and P. Pariati), Vienna, carn. 1737, *A-Wn*
Alessandro Severo (Zeno), Venice, S Giovanni Grisostomo, 27 Dec 1738; rev. Palermo, S Cecilia, carn. 1746; rev. as Salustia, Venice, Vendramin, 31 May 1753
Temistocle (P. Metastasio), Padua, Obizzi, 6 June 1740, *I-PLcon*; rev. Lucca, 1741; rev., as pasticcio, Venice, S Giovanni Grisostomo, aut. 1744; rev. Munich, Residenz, carn. 1754; rev. Munich, carn. 1762; *D-Bsb*, *Hs*, *Mbs*, *Wa*, *F-Pn*
Demofoonte (Metastasio), Rome, Dame, carn. 1741; rev. Munich, Residenz, carn. 1766, *D-Mbs*
Didone abbandonata (Metastasio), Venice, S Giovanni Grisostomo, carn. 1741; rev. Munich, Residenz, 26 Jan 1756, *Mbs*; rev. Munich, 1760
Endimione (serenata, 2, Metastasio), Venice, 6 Feb 1742; rev. Munich, Residenz, 1766

Il Bajazet (A. Piovene), Venice, S Giovanni Grisostomo, aut. 1742; rev. Munich, Residenz, 12 Oct 1754; rev. as Baiazet, Prague, 1762; arias *Mbs*
La ninfa Apollo (scherzo comico pastorale, 2, F. de Lemene), Venice, S Giovanni Grisostomo, 26 Feb 1743
Germanico (N. Coluzzi), Turin, Regio, carn. 1744, *A-Wgm, Wn*
Antigono (Metastasio), Venice, S Giovanni Grisostomo, carn. 1745; rev. Treviso, Delfino, carn. 1752
Artaserse (Megastasio), Vienna, 8 Oct 1746; rev. Munich, Residenz, 10 Jan 1763, *D-Mbs*
Ezio (Metastasio), Vienna Schönbrunn, 4 Oct 1749, *Mbs*
L'huomo (festa teatrale, 1, Wilhelmine of Bayreuth), Bayreuth, sum. 1754, *W*
Adriano in Siria (Metastasio), Munich, Residenz, 5 Jan 1755, *Mbs, F-Pn*
Il trionfo della costanza (festa teatrale, P. Honory, after Metastasio: *Il sogno di Scipione*), Nymphenburg, 20 July 1755
Agelmondo (dramma per musica, 2), Munich, carn. 1760, *D-Mbs*
Olimpiade (Metastasio), Munich, Residenz, 20 Jan 1764, *Mbs, F-Pn**
Semiramide riconosciuta (Metastasio), Munich, Residenz, 7 Jan 1765, *D-Mbs, F-Pn*
La clemenza di Tito (Metastasio), Munich, Residenz, Jan 1768, *D-Mbs, F-Pn** (*R*/1982: IOB, lxxxviii)
Demetrio (Metastasio), Munich, Residenz, Jan 1772, *D-Mbs, F-Pn*
Music in: Didone abbandonata, 1743; Ixion, 1746; Andromeda, 1749; Euridice, 1750; Nerone, 1753; Issipile 1763

ORATORIOS AND SACRED CANTATAS

Davidis lapsus et poenitentia, Venice, 10 Sept 1744; Adonias (drama sacrum), Venice, 1746; Pastorum dialogus in Domini nativitate, Venice, 1746; Jonathas (drama sacrum), Venice, 1747; David (drama sacrum), Venice, 1751; Carmina (drama sacrum), Venice, 1752; La Betulia liberata (componimento sacro, Metastasio), Munich, 30 March 1754, Vienna, 1754, *A-Wn*; Ricorrendo il giorno solenne (solo cant., Honory), Munich, 28 March 1755

OTHER WORKS

Sacred: mass, *D-Mf*; Stabat mater, *Mf*; 6 lits, *WEY*; Miserere, *Po*, 2 Mag, *Bsb*; Beatus vir, *A-RB*, 11 offs, *D-Mbs, Mf, HR*; 33 masses, lost; *c*125 other works, lost
Inst: 8 syms., *Bsb, DO, KA, RH, Tl*; fl conc.; trio sonata; *c*12 syms., lost

ROBERT MÜNSTER (with PAUL CORNEILSON)

**Bernasconi** [Wagele], **Antonia** (*b* Stuttgart, *c*1741; *d* ?Vienna, ?1803). German soprano. She was the daughter of a valet of the Duke of Württemberg. By her widowed mother's second marriage in 1743, she became the stepdaughter of Andrea Bernasconi, who instructed her in singing. Her successful début followed on 21 January 1762 as Aspasia in Bernasconi's *Temistocle* in Munich. In Vienna from about 1765–6 she first performed in *opere buffe* by Piccinni and Sacchini and in 1767 was highly successful as Alcestis in the première of Gluck's opera. J.A. Hiller gave a detailed account of her in the *Wöchentlichen Nachrichten* of 24 October 1768. In December 1770 she sang Aspasia in the première of Mozart's *Mitridate*; it is also possible that the part of Ninetta in his *La finta semplice* was composed for her. In 1771–2 she sang in Cesena, Milan and at the Teatro S Benedetto in Venice, in 1772–3 and 1774–5 at the Teatro di S Carlo in Naples. From November 1778 to May 1780 she was a member of the Italian opera company at the King's Theatre, London, and in the summer of 1781, supposedly at Gluck's request, she returned to the Vienna Burgtheater to sing in three Gluck operas that were specially mounted for the Grand Duke Paul of Russia. Mozart's letters are severely critical of her intonation and German declamation, although he said he would have trusted her with a part in the German performance of *Idomeneo* that he was planning. She was retained for the *opera buffa* company that was created in April 1783, but was released four months later, probably because, as Mozart had said (29 August 1781), she really sang well only in serious operas. In 1786 she appeared in Piacenza and Lucca. She is supposed to have married, under the name of Rieler.

ROBERT MÜNSTER

**Bernat-Verí, Jorge Bosch.** *See* BOSCH BERNAT-VERÍ, JORGE.

**Berne** (Ger. Bern). Capital city of Switzerland. A strong musical tradition can be traced from the 15th century, particularly after the victorious conclusion of the Burgundian wars. Town musicians were employed early in the century, and Berne Minster, dedicated to St Vincent, had an organ by about 1450. The choir school at St Vincent was founded in 1485; its choir was singing polyphonic music by 1489. Among the pre-Reformation Kantors were Bartholomäus Frank (1481–1502), Heinrich Wölflin (1504–5), Johannes Wannenmacher (1510–13) and Cosmas Alder (1524), whose hymns received new texts after the Reformation, a sure indication of earlier polyphonic practice. Places for six boys were maintained in the choir school.

During the Reformation music was banned from church and the cathedral organ was sold, but music continued to play a role in secular life. The town council provided for a lute teacher in 1531, and from 1533 to 1541 the organist Hans Kotter taught at the Minster School. Music printing was fostered by Apiarius, who founded his business in 1537.

Choral dramas with solo vocal and instrumental elements, an outgrowth of humanistic school plays, were prominent in the decades following the Reformation. Music found its way back into the church service by way of psalm singing, and in 1574 the town council appointed the first Protestant Kantor. About the same time congregational singing was introduced and from 1581 four town pipers, hired in 1572, accompanied it. Berne led the way in introducing the Lobwasser Psalter into Switzerland: some of the psalms were included in early 17th-century songbooks, and the new edition of 1655 contained all 150.

The central figure in Berne's musical revival during the second half of the 17th century was J.U. Sultzberger, musical director from 1675, author of a simplified *Transponiertes Psalmenbuch* and founder of several

collegia musica, of which the Collegium Musicum Studiosorum lasted until the end of the 18th century.

With the rise of public concert life, music in Berne became less centred on church and school; the Hôtel de Musique (completed 1770) was the scene of regular operas and concerts from 1799.

The city's orchestral life has been fostered by two large societies, the Bernische Musikgesellschaft (1815) and the Orchesterverein (1877). The Orchesterverein, subsidized by the city, governs the activities of the Berne SO (1876), which plays for the Stadttheater. It organizes regular series of symphony concerts, promoting 20th-century music as well as the standard repertory. The Musikgesellschaft organizes a number of subscription concerts (usually ten) each year, at which the major symphonies and concertos are performed by the Berne SO with international soloists. Resident conductors have included Karl Munzinger (1884–1909), Fritz Brun (1909–41), Luc Balmer (1941–64), Paul Kletzki (1964–8), Charles Dutoit (1968–78), Gustav Kuhn (1979–82), Peter Maag (1984–91) and Dmitri Kitayenko (1991–). Each season three or four guest conductors are engaged. The Musikgesellschaft also organizes chamber concerts in which the Berne String Quartet regularly participates. The Berne Chamber Orchestra (conducted by Hermann Müller, 1938–73, Jean-Pierre Moeckli, 1973–92, and, since 1992, Olivier Cuendet) plays pre-Classical and modern music. The Camerata Bern, founded in 1962, is a small string orchestra that gives about 50 concerts a year and has achieved an international reputation. The Stadttheater (1903), also subsidized by the city, stages Baroque, Classical, Romantic and 20th-century operas.

The main choral societies are the Caecilienverein (1862) and the Berner Liedertafel (1845): for decades they have given performances of oratorios in the 15th-century minster in collaboration with the Berne SO. Other important choirs include the Berner Männerchor (1870), the Lehrergesangverein (1909), the Berne Chamber Choir (1940) and the Berne Concert Choir (1981). The regular evening concerts in the minster were initiated by Ernst Graf, organist there from 1912 to 1937.

Berne has a section of the ISCM which organizes regular concerts of avant-garde music with the section's own ensemble Neue Horizonte, directed by Urs Peter Schneider. The Berne radio studio shares broadcasting with those of Basle and Zürich.

The Berne Conservatory was founded in 1858, ten years after the city became the capital of Switzerland; Roman Brotbeck became its director in 1999. The chair of musicology at Berne University has been held by Ernst Kurth (1912–46), Arnold Geering (1950–72), Stefan Kunze (1973–92) and Anselm Gerhard (1994–).

KURT VON FISCHER/JÜRG STENZL/CHRIS WALTON

**Bernelinus** (*fl* Paris, late 10th and early 11th centuries). French mathematician. According to two late manuscripts used by Gerbert, he compiled a mathematical treatise, *Prefacio libri abaci quem junior Bernelinus edidit Parisius* (*I-Rvat* lat.4539, f.1; see *GerbertS*, i, *Praefatio*, no.X; RISM, B/III/2, 1968, p.95). The treatise claims to be based on the doctrine of Gerbert d'Aurillac (*d* 1003) and can thus be dated to the late 10th or early 11th century. A musical treatise (*GerbertS*, i, 312–30; *PL*, cli, 651–74) is ascribed to Bernelinus in only one manuscript, *I-Rvat* Regin.lat.1661 (see RISM, B/III/2, p.119). It comprises two sections; the first, *Dimidium proslambenomenos* (*GerbertS*, i, 312), sometimes appears, anonymously, separately from the second, *Rogatus a pluribus* (*GerbertS*, i, 314), as for example in *GB-Lbl* Harl.3199, f.69*v* (RISM, B/III/4, 1992, p.82) and *I-CEc* S.XXVI.1, f.177*v*; and, according to Smits van Waesberghe, Berno (*Musica*) quoted the first section but did not give the author's name (only 'quidam sapiens'; *GerbertS*, ii, 78*B* = i, 313*B*–314*A*; see J. Smits van Waesberghe: *Divitiae musicae artis*, vi, Buren, 1978–9, pt B, p.45). The second section of the treatise concerns the monochord; it seems unlikely to be the work of Bernelinus, if the attribution of it in *E-Mn* 9088 to GERBERT D'AURILLAC is to be believed.

MICHEL HUGLO

**Berner, Alfred** (*b* Heinrichswalde [now Slavsk, nr Sovetsk], 10 April 1910). German musicologist. From 1928 he studied musicology with Schering, Sachs, Hornbostel and Wolf at Berlin University, with philosophy, art history and Arabic as subsidiary subjects. From 1931 to 1933 he worked at the Institute for Arabic Music in Cairo and in 1935 he took the doctorate at Berlin with a dissertation on Arabic music. He worked in Berlin at the Phonogramm-Archiv, in the music department of the Preussische Staatsbibliothek and at the Staatliches Institut für Deutsche Musikforschung; in 1937 he lost his position at the institute, under Seiffert, as he was not a member of the Nazi party. After military service (1939–45) he was principal adviser on music and art institutions for the municipal council of Berlin: simultaneously (1946–8) he held a lecturing post at the Humboldt University, Berlin. From 1948 he devoted himself to rebuilding the Institut für Musikforschung and its instrument collection: he effectively ran the institute from 1949 and was responsible for the first concerts on its collection of historical instruments in 1951. He was appointed chief academic adviser in 1961, institute director in 1962, director of the Museum der Musikinstrumenten in 1966 and professor in 1967. He retired in 1978. He won particular acclaim

for expanding the museum of musical instruments attached to the institute. He lectured in the study of musical instruments at the Berlin Conservatory which merged with the Staatliche Hochschule für Musik in Berlin in 1966; Berner continued to lecture at the Hochschule until 1975.

HANS HEINRICH EGGEBRECHT/R

**Berner, Friedrich Wilhelm** (*b* Breslau, 16 May 1780; *d* Breslau, 9 May 1827). German organist, teacher, composer and musical organizer. He studied music with his father, Johann Georg Berner (1738–1810), organist at St Elisabeth, Breslau, becoming his assistant at 13 and succeeding him in 1810. He also learnt many other instruments, and at the age of 16 became clarinettist in the city theatre orchestra; he also studied composition with Franz Gehirne. Around 1798 he heard the organist David Traugott Nicolai, whose father had been a pupil of Bach, and was so impressed that he abandoned 'the galant style of organ playing' for that of Bach. When Weber was appointed Kapellmeister in 1804 Berner befriended him, and when Weber accidentally drank some engraving acid, it was Berner's prompt action which prevented disastrous consequences. In 1812 Berner went to Berlin with Joseph Schnabel, leader of the theatre orchestra, to study Zelter's teaching methods at the Sing-Akademie, the Prussian government's intention being to form similar institutions. While in Berlin he played Mozart's Concerto for two pianos with Weber, and also performed as an organist. Three years later the Akademische Institut für Kirchenmusik was founded in Breslau, with Berner and Schnabel as directors. After the dissolution of the Silesian monasteries in 1810 Berner catalogued their music collections.

An important figure in Breslau's musical life, Berner was admired by Mendelssohn as a teacher and improvisor, and was in his day also highly regarded as a composer. His compositions include several cantatas, songs, organ and piano pieces and concertos for wind instruments; many of his works, including all his theoretical writings, are lost. His most important pupils were Ernst Köhler and Adolf Hesse.

FRANZ GEHRING/JOHN WARRACK/RUDOLF WALTER

**Berners**, Lord [Tyrwhitt-Wilson, Sir Gerald Hugh, Baronet] (*b* Apley Park, nr Bridgnorth, 18 Sept 1883; *d* Faringdon, 19 April 1950). English composer, writer and painter. The son of a naval officer, he was sent to Cheam School and Eton, described mercilessly in his memoirs. Then, for the first decade of the century, he studied and travelled in various parts of France, Germany and Italy. As a schoolboy he had admired Wagner, but now turned to Richard Strauss, Debussy and Schoenberg, although his teachers included academics such as Edmund Kretschmer, in Dresden, and, at home, Tovey. His experiences abroad gave him a European perspective and equipped him to work as an honorary attaché in the diplomatic service from 1909 until 1920. As an only child, his principal family connection was with his mother – his father was usually abroad and died in 1907 – and her fluent if superficial ability in music and painting was part of his background. He was first in Constantinople, where he was a colleague of Harold Nicholson, and moved to Rome in 1911. During this formative period he benefited greatly from his friendship with Stravinsky, whom he met in 1911. Fifty years later Stravinsky rated *A Wedding Bouquet* and *The Triumph of Neptune* 'as good as the French works of that kind produced by Diaghilev' and in 1937, noting the success of *A Wedding Bouquet*, told his publisher 'I have always been devotedly sympathetic to his music'. Berners also showed his work to Casella and knew Diaghilev and Ronald Firbank in Rome. It was here that he composed some of the most advanced music by any British composer at that date.

Berners' earliest mature works were for the piano – *Le poisson d'or*, dedicated to Stravinsky and published with designs by Natal'ya Goncharova of the Ballets Russes, and *Dispute entre le papillon et le crapaud*, which was not published until 1982. Both these pieces have illustrative texts in the manner of Satie's *Sports et divertissements*, of which Berners possessed an early copy, and the *Dispute* has Berners' own watercolour on the cover of the manuscript. Even at this stage Berners was working in more than one medium at once: this and his sense of humour caused him to be known as the English Satie. But his first published work, appearing in Florence and London under the name of Gerald Tyrwhitt, was the *Trois petites marches funèbres*, given its first performance by Alfredo Casella at the Accademia di S Cecilia in Rome on 30 March 1917. The last of these pieces, *Pour une tante à héritage*, gained notoriety firstly for the dissonant style of its gleeful celebration and secondly from the fact that Berners inherited his titles and wealth just 18 months later.

No less remarkable is another triptych, the *Fragments psychologiques*, well aware of the Vienna of Schoenberg and Freud. Some of these exploratory piano pieces impressed Bartók so much that he copied them out. *L'uomo dai baffi*, a futurist marionette show by Fortunato Depero directed by Casella at the Teatro dei Piccoli in Rome on 15 April 1918, used chamber orchestra versions of the second of the *Fragments psychologiques* and all three funeral marches. Another piece, *Portsmouth Point*

(based on the Rowlandson sketch and predating the Walton piece by several years), was added. But the British première of *L'uomo* was not until 1 November 1983.

With remarkable confidence Berners took the discoveries of these instrumental pieces into the orchestral medium with *Trois morceaux*, based on exotic idioms made fashionable by the Ballets Russes, and *Fantaisie espagnole*, carrying Spanish mannerisms to the limit with a genial genuflection towards *The Rite of Spring*. Both of these works became landmarks in modern British music of the period immediately after World War I. Most of his 15 songs with piano were written around 1920. His stance as a parodist is evident in the first song of the *Lieder Album*, where he claims that Heine's poem 'Du bist wie eine blume' was addressed to a pig and not a girl. The piano part obliges with periodic grunting noises. The *Trois chansons* follow serious French models up to Debussy and Satie, but the distorted military fanfare introducing the drummer-boy in the last song is a comic touch. The *Three English Songs* open with a lullaby in pastoral vein, but then the elderly rich lady do-gooder is lampooned, as is the sulkily jealous girl in the third song 'James gave Elizabeth a Dodo'. In the second of the *Three Songs* (sea chanties) Masefield's Pirate King (who, 'though dripping gore, was always courteous to the ladies') is delineated with the precision of Satie. Of the two last songs, *Red Roses and Red Noses* is a unique comic encore – Berners wrote the poem, which appeared in an anthology edited by Edith Sitwell, and decorated the cover – and *Come on, Algernon* is a hysterically realistic music-hall number. Most of these songs have been particularly associated with Meriel Dickinson, especially since the Portrait of Lord Berners given at the Purcell Room and on BBC Radio 3 with John Betjeman on 8 December 1972. More recently they have been associated with Felicity Lott.

Berners had gained recognition with his piano music, songs and orchestral pieces – by 1950 over 3000 copies of the *Trois petites marches funèbres* had been printed – and his *Valses bourgeoises* were given at the ISCM at Salzburg in 1923. But his contribution to modernism was at an end. In the early 1920s he started to move towards the wider arena of the theatre. His first step was the opera. *Le carosse du Saint Sacrement*, based on a short story by Mérimée, vocally treated in arioso and recitative with a vivid orchestral response including Spanish mannerisms. The première was at the Theatre des Champs-Elysées in Paris on 24 April 1924 but it was not heard in England, apart from the concert piece (*Caprice péruvien*) arranged by Constant Lambert, until BBC Radio 3 broadcast it on 18 September 1983 for the Berners centenary. After the opera Berners found himself more decisively in ballet, giving free rein to his obsession with the waltz, and his music became more English in the process. *The Triumph of Neptune* was one of only two British commissions from Diaghilev, the other being Lambert's *Romeo and Juliet*. The story was by Sacheverell Sitwell and the choreography by George Balanchine, as in Berners' next ballet, *Luna Park*, given in a C.B. Cochran revue. Stylistic fingerprints in these scores include the use of short fragments shifting rapidly from one tonal centre to another. Frederick Ashton was the choreographer for Berners' remaining three ballets, all directed by Lambert, but by far the most significant of these was *A Wedding Bouquet*, for which Berners himself designed the sets and painted the backcloth. This satire on marriage – a recurring theme in Berners' novels and memoirs – employs a chorus, by way of Stravinsky's *The Wedding*, with a text from Gertrude Stein. Berners found her an ideal literary partner because she disconcerted people and was fashionable. Like *The Triumph of Neptune*, *A Wedding Bouquet* has held the stage, although it has not had the advantage of Beecham's recordings of the suite from the earlier ballet. In the original version for chorus, rather than the weak substitution of a speaker, *A Wedding Bouquet* is characteristic of Berners in so many ways that it can be claimed as his masterpiece, the climax of his more public concerns developed through the 1920s and now showing a zest for balletic idioms from Tchaikovsky to Ravel.

The 1930s was an extraordinarily creative decade for Berners since in 1931 and 1936 there were exhibitions of his oil paintings at the Reid and Lefevre Gallery in London. Unlike his earlier music, there was nothing avant-garde about his paintings, which showed him as a collector of Corot. Two volumes of his autobiography, *First Childhhood* (London, 1934) and *A Distant Prospect* (London, 1945), testify to the difficulties experienced by the arts in being taken seriously during Berners' youth. Five novels and two short stories, with translations or editions in France, Sweden, Germany and the USA, were published between 1914 and 1941. Unfortunately, but not surprisingly for such a committed European, Berners felt demoralized by the onset of war and told Gertrude Stein that he felt 'confronted with the breakdown of all the things that meant anything to me'. In the 1940s his work declined, although his drawing-room comedy, *The Furies*, ran for a week at the Oxford Playhouse from 1 June 1942 and he wrote two full-length film scores.

Historically Berners was part of a slender British avant garde which emerged after World War I. His example encouraged younger composers such as Bliss, Walton and Lambert; the Sitwells were a literary counterpart and all these figures were friends, even though Berners upset Walton with his caricature of a composer in his novel, *Count Omega*. Diana Mosley, who knew Berners well, confirmed: 'He enjoyed painting, but looked upon himself as a composer. One sees the whole man in his music – jokes, but underlying sadness'. By the 1990s much of his music was available on CD and his fiction was reprinted as *Collected Tales and Fantasies* (London, 1999). In spite of Berners' deserved reputation as a versatile eccentric, it is the irreverent stance and consistently sharp focus of his small musical output that ensure his survival as a unique figure in British music of the period.

WORKS

STAGE

An Egyptian Princess (operetta), *c*1900

L'uomo dai baffi (5 balli plastici, F. Depero), Piccoli, 15 April 1918 [arr. of Fragments psychologiques, 3 petites marches funèbres and Portsmouth Point]

Le carosse du Saint Sacrement (op, P. Mérimée), 1923, Paris, Champs-Elysées, 24 April 1924, rev. (1925)

The Triumph of Neptune (ballet, 10 tableaux, O. Sitwell), 1926, London Lyceum, 3 Dec 1926

Luna Park (ballet, 1), 1930, Manchester, Palace, 4 March 1930

A Wedding Bouquet (ballet, G. Stein), 1936, London, Sadler's Wells, 27 April 1936

Cupid and Psyche (ballet), 1938, London, Sadler's Wells, 27 April 1939

Les sirènes (ballet, 1), 1946, London, CG, 12 Nov 1946

PETER DICKINSON

**Bernet Kempers, Karel Philippus** (*b* Nijkerk, Gelderland, 20 Sept 1897; *d* Amsterdam, 30 Sept 1974). Dutch musicologist. After studying law for some years, he took lessons from Bernard Zweers (theory and composition), Simon van Milligen (music history) and Gonda van Dam (piano). In 1922, at a time when musicology was not being taught in the Netherlands, he went to the University of Munich to study with Sandberger and graduated in 1926 with a doctoral dissertation on the motets of Clemens non Papa. He taught music history at the Royal Conservatory at The Hague (1929–49) and at the Amsterdam Conservatory (1934–53). In 1929 he became *Privatdozent* in musicology at the University of Amsterdam; in 1938 he was appointed lecturer, in 1946 associate professor and in 1953 professor at the same university. He retired in 1968.

Bernet Kempers's chief interest was the Dutch polyphonic school of the 16th century, in particular Clemens non Papa, whose complete works he edited; he also wrote extensively on Mozart, Schubert and the history of music in general. For many years he was on the boards of the Koninklijke Nederlandse Toonkunstenaars Vereniging (first secretary, 1934–41; chairman, 1945–65) and the Vereniging voor Nederlandse Muziekgeschiedenis (1959–72).

WRITINGS

ELLINOR BIJVOET

**Bernger von Horheim** [Berengerius de Orehem, Berlengerius de Oreim] (*fl* 1196). German Minnesinger. It has been assumed that he came from the Frankfurt region, on the grounds of his use of language, but it is also possible that he was from a north Bavarian family, or otherwise came from Horheim, near Vaihingen. He was one of a group of noblemen from south-west Germany who, as the followers of Friedrich von Hûsen, writing in a more international style than hitherto, brought about the blossoming of Minnesang. These men drew on the work of the northern French trouvères and southern troubadours for content and formal schemes of their poetry. Six songs (17 strophes) by Bernger have survived, all of them stylish and none with music. Of these, two (possibly four) may have used the melodies of his Romance precursors, since they can be recognized as contrafacta of works by, among others, Chrétien de Troyes and Gace Brule.

WORKS

Text edition: *Des Minnesangs Frühling*, ed. K. Lachmann and M. Haupt (Leipzig, 1857, rev. 38/1988 by H. Moser and H. Tervooren), 224–9 [MF]

BURKHARD KIPPENBERG/LORENZ WELKER

**Bernhard, Christoph** (*b* Kolberg, Pomerania [now Kołobrzeg, Poland], 1 Jan 1628; *d* Dresden, 14 Nov 1692). German music theorist, composer and singer. He is best known for his discussion of musical-rhetorical figures in *Tractatus compositionis augmentatus*.

1. Life. 2. Music. 3. Writings.

1. LIFE. The birthplace given above is documented in a funeral poem by Bernhard's brother-in-law C.C. Dedekind and is confirmed by Walther; the birth date appears in Müller-Blattau (2/1963) without documentation. Mattheson states, no doubt erroneously, that Bernhard was born in Danzig in 1612. According to Dedekind, Bernhard studied in Danzig (probably with the elder Kaspar Förster and possibly Paul Siefert) and in Warsaw (very likely with Scacchi); Mattheson's assertion that Bernhard studied in Danzig with Balthasar Erben must also be in error for Erben did not become Kapellmeister at the Marienkirche until 1658, well after Bernhard was established in Dresden. At some point Bernhard also studied law. He began singing as an alto at the electoral court in Dresden under Schütz probably in 1648 and received a contract with the elector's ensemble (which also required him to instruct the choirboys in singing every day) on 1 August 1649. Shortly thereafter he travelled with the royal retinue to Gottorf for a wedding. The music was directed by Agostino Fontana, a virtuoso Italian singer serving as Kapellmeister to Christian IV of Denmark; Bernhard remained in Denmark (Copenhagen, according to Dedekind) to study with Fontana for about a year.

On 1 August 1655 Bernhard was promoted to vice-Kapellmeister at Dresden and his salary was increased from 200 to 350 gulden; his new duties included conducting the unison singing of chorales and chant (see Spagnoli). With the accession of the italophile Johann Georg II as Elector of Saxony in 1656, Italian musicians gained greater influence at court. These included G.A. Bontempi, Vincenzo and Bartolomeo Albrici, Gioseppe Peranda and Dominicus Melani. Bernhard made two trips to Italy, supported by Johann Georg II, to gain more first-hand experience of Italian music, musicians and singing technique. One of the trips took place in 1657 (his dedicatory poem for Dedekind's *Aelbianische Musenlust* is signed 'Rome, 1657') but the date of the other is unknown; according to Dedekind, Bernhard also visited Venice. He married Christina Barbara Weber on 28 October 1659.

Growing tension between the German and Italian musicians was probably the main factor in Bernhard's decision in 1663 to follow his former colleague Matthias Weckmann to Hamburg. There he succeeded Thomas Selle as Kantor of the Johanneum and civic director of church music in Hamburg. There were six other contestants for the post, and he obtained it by one vote. Weckmann had helped make him known in Hamburg by performing a piece of his own under Bernhard's name. Bernhard accepted the Hamburg offer on 18 October 1663 and was installed on 9 February 1664. The city fathers greeted his arrival in elegant style and completely remodelled his house, which Bernhard gratefully acknowledged when dedicating his *Geistliche Harmonien* (1665) to them. As civic music director he conducted figural music for Saturday vespers and Sunday morning services for the four principal churches, rotating among them, with eight to ten paid singers, eight municipal musicians and a chorus from the Johanneum.

The fact that Bernhard was taken into membership of the brotherhood *Englandfahrer* shortly after his arrival in Hamburg indicates the esteem in which he was held. Visits from Johann Rist (in 1666) and the younger Kaspar Förster (in 1667) provided occasions for chamber music at Bernhard's house. In 1670 Schütz requested him to compose a motet for his funeral to the text *Cantabiles mihi erant justificationes tuae*, which, to Schütz's great approval, he set for five voices in the *stylus gravis* (see §3 below). It was performed at Schütz's funeral in 1672 but was subsequently lost. Bernhard must also have participated in the weekly concerts of the collegium musicum founded by Weckmann in 1660. In addition to performing the most up-to-date works from Venice, Rome, Vienna, Munich and Dresden, they joined with Reincken, Buxtehude and Theile in cultivating learned counterpoint as an esoteric art; Bernhard's *Prudentia prudentiana*, in four-part invertible counterpoint, was imitated by Buxtehude two years later (BUXWV76/1). The years of Bernhard and Weckmann's joint activity formed one of the highpoints of 17th-century musical life in Hamburg.

Just before Weckmann's death (on 24 February 1674) Johann Georg II called Bernhard back to Dresden to supervise the education of his two grandsons, and he was installed on 31 March 1674 with instructions to teach them religion, reading and writing. He also resumed his post as vice-Kapellmeister. In 1676 he supervised a new edition of the Dresden hymnal, combining the Lutheran chorales with Schütz's settings of the Becker Psalter. Johann Georg III, who became elector in 1680, soon decided to reduce his musical establishment in order to cut costs. All the Italians either left or were dismissed, and from 24 August 1681 Bernhard was the sole Kapellmeister, as well as inspector of the music library; he held both positions until his death. With the accession of Johann Georg IV in 1691 he was serving his fourth Elector of Saxony.

2. MUSIC. Bernhard's compositions consist almost entirely of sacred vocal music. His only published collection, *Geistliche Harmonien*, appeared in 1665 in Dresden; it was probably composed there. At this time most of the better Protestant church music was disseminated in manuscript, and this volume is exceptional among contemporary printed works for its quality, scope

and virtuoso demands. It contains 20 sacred concertos for one to four solo voices and continuo, often with two violins. All the texts are German, and most of them are biblical. Two dialogues include extensive additions to the basic biblical text. In one of them, *Euch ist's gegeben*, the interpolations are poetic and are set in a simple aria style; the work is a very early example of a German concerto-aria cantata. Vincenzo Albrici had introduced Latin works of this type to the Dresden court repertory in 1660 (see Frandsen, 1996). Otherwise, the style of the collection is clearly derived from Schütz's *Kleine geistliche Concerte* and *Symphoniae sacrae*, especially in the careful text-setting. Bernhard's concertos provide numerous examples of the musical-rhetorical figures that he described in his treatises.

Bernhard's other sacred vocal works are of equally high quality. Composed in a variety of styles, they include masses and motets in the *stylus gravis*, many small and large sacred concertos and a few concerto-aria cantatas (e.g. *Ich sahe an alles thun*, composed in 1669 for a funeral). Most of the manuscript works survive in the collection of Gustaf Düben (i) and were copied in Stockholm during Bernhard's Hamburg period (1664–74). None of Bernhard's extant works can definitely be ascribed to his second Dresden period; the lost works listed in inventories from Leipzig, Weissenfels and Ansbach may date from this time, however (see Fiebig). The madrigal *Lasst uns, o Schönste, lieben* is the only secular work ascribed to Bernhard that can be regarded as authentic. The 14 songs by 'C.B.' in Caspar von Stieler's *Die geharnschte Venus* (Hamburg, 1660) have been attributed to Bernhard even though the collection was published three years before his arrival in Hamburg. Although perhaps the best in the collection, they do not approach the quality of his sacred music; they could also be by Crato Bütner of Danzig or Christoph Bronner, a Hamburg organist. Bernhard is named as the author of two songs in Dedekind's *Aelbianische Musenlust*, but in a manner that suggests that he wrote only the texts; he was also known as a poet.

3. WRITINGS. Although Bernhard was one of the better German composers of his generation, he is now remembered chiefly for his musical treatises, all of them disseminated in manuscript copies that circulated widely. The most important is *Tractatus compositionis augmentatus*, which must be dated some time after Bernhard's trip to Rome in 1657, since he refers in it to many Roman composers. Its significance lies in his classification of music into three distinct styles according to the relationship of words and music, the typical place of performance and, above all, the types of dissonance used. His basic division between *stylus gravis* (*stylus antiquus*) and *stylus luxurians* (*stylus modernus*) goes back to Monteverdi's *prima* and *seconda pratica*, and his further division of *stylus luxurians* into *communis* and *theatralis* bears some resemblance to Marco Scacchi's three categories of church, chamber and theatrical music. But whereas Scacchi's basic distinctions are sociological, Bernhard's are strictly stylistic; his three categories are distinguished chiefly by their use of figures, according to his limited definition of a figure as 'a certain way of employing dissonances, which renders these not only inoffensive but rather quite agreeable'.

In *stylus gravis*, which is used in church, music is the master of language; Palestrina is its main exponent. It uses only four figures – in modern terminology the passing note, auxiliary note, suspension and prepared appoggiatura. *Stylus luxurians communis* is found 'in vocal works – both church and table music – as well as in instrumental pieces', and here words and music are both masters. Bernhard added 15 figures, including most of the dissonances associated with 17th-century style.

Bernhard named Monteverdi as the founder of this style and added several of his Italian successors, including Carissimi, Scacchi and his own colleagues in Dresden, Albrici, Bontempi and Peranda. He named only three Germans, Schütz, Kerll and the younger Förster. *Stylus luxurians theatralis* is used mostly in theatrical productions; the leading exponents of it are contemporary Roman musicians, and no Germans are listed. Here language is the absolute master of music, and Bernhard's discussion includes suggestions for word-painting and other non-dissonant rhetorical devices as well as the addition of seven more figures.

Bernhard's *Tractatus* also contains a discussion of the 12 modes (listed in the order of Zarlino's 1573 edition of *Le istitutioni harmoniche*, beginning with the C modes), of fuga (as a generic term for all imitative counterpoint, including canon) and of invertible counterpoint (in an appendix, *Von denen doppelten Contrapuncten*, which also circulated independently). With his concepts of *consociatio modorum* and *aequatio modi*, Bernhard offered the composer a method of working with both tonal and real answers in points of imitation. Bernhard was perhaps the first theorist to consider four-part invertible counterpoint.

Bernhard wrote at least two other treatises. The *Ausführlicher Bericht vom Gebrauche der Con- und Dissonantien* appears to be a later abridgment of the main part of the *Tractatus*, combining the figures of the second and third styles into one group, *figures superficiales*, and omitting the discussion of modes, *fuga* and invertible counterpoint. A short treatise on vocal ornamentation, *Von der Singe-Kunst, oder Maniera*, probably originated earlier, reflecting Bernhard's teaching of the choirboys during his first years in Dresden and derived in turn from his study with Agostino Fontana in Denmark. These shorter works confirm that Bernhard's figures originated in Italian improvisatory practice and that they were justified for the composer as extensions and variations of the dissonance treatment permitted in the *stylus gravis*. This explicit combination of Italian vocal art with the German predilection for counterpoint was indeed a legacy from Schütz, and it was to recur often in German music.

KERALA J. SNYDER

**Bernier, Nicolas** (*b* Mantes-la-Jolie, 5/6 June 1665; *d* Paris, 6 July 1734). French composer, harpsichordist, theorist and teacher. He probably learnt music in the *maîtrise* of the collegiate church of Notre Dame, Mantes, and in that of Evreux Cathedral. According to the *Etat actuel de la Musique du Roi* (1773) he then studied with Caldara in Rome. In 1692 Bernier was living in the rue Tiquetonne in Paris and was teaching the harpsichord. On 20 November 1693 he failed to win the post of *maître de musique* at Rouen Cathedral in competition with Jean-François Lalouette. He was appointed head of the *maîtrise* of Chartres Cathedral on 17 September 1694 and remained there until 18 March 1698, when he obtained a similar position at St Germain-l'Auxerrois, Paris. A *Te Deum* performed before the king at Fontainebleau on 24 October 1700 was very successful, and was sung again in several Parisian churches in 1701 and 1704. On 5 April 1704 he succeeded Marc-Antoine Charpentier as *maître de musique* of the Sainte-Chapelle, resigning from this post on 18 September 1726 in favour of his friend François de La Croix. It had taken the patronage of Philippe, Duke of Orléans, for him to keep the position after his marriage to Marie-Catherine Marais on 20 June 1712, since the rule of the Sainte-Chapelle required its *maître de musique* to be 'a celibate in clerical garb'. In spite of Le Cerf de La Viéville's claim, Bernier was not an abbé, but only an acolyte entitled to wear the clerical collar. In 1715 he took part in the divertissements organized by the Duchess of Maine at her château of Sceaux. In January 1723, at the request of the regent, Michel-Richard de Lalande gave up three of his four trimestrial periods of duty as *sous-maître de musique* at the Chapelle Royale. The posts thus created were allotted, without being thrown open to competition, to André Campra, Charles-Hubert Gervais and Bernier, who officiated during the summer term of duty until his death. In 1726 Lalande's term became vacant when he died, and was shared between the remaining *sous-maîtres*, with Bernier taking charge of the education of the Chapelle pages until 1733. He was in fact famous as a teacher. He wrote a treatise entitled *Principes de composition* and numbered Louis-Claude Daquin among his pupils.

Bernier offered a personal solution to the union of French and Italian tastes. He achieved equilibrium between the two styles in his first book of French cantatas, a genre of which he was one of the first creators together with Jean-Baptiste Morin. Vigorous recitatives and da capo *airs*, with or without an initial motto, follow each other freely, while the expressive melody, with few wide intervals or long melismas, is rooted more in the French

tradition. *Les nuits de Sceaux* contains Bernier's only instrumental pieces: dances and two overtures which adopt the Lullian structure but are italianate in style. The 45 *petits motets*, the 36 *grands motets* and the 39 cantatas exhibit a stylistic feature peculiar to Bernier: the often systematic repetition of a motif, whether or not it is transposed. Bernier had a reputation as a contrapuntist, and the polished writing of fugal choruses in *Beatus vir* and *Confitebor tibi Domine* bear witness to his skill. Two of his *grands motets* were sung several times at the Concert Spirituel from 1725 onwards. Most of his *Principes de composition* is devoted to two-part counterpoint; the work resembles the treatises of Nivers and Masson.

WORKS
*all printed works published in Paris*

SACRED VOCAL

[26] Motets, 1–3vv, bc, some with insts, op.1 (1703); 16 for 1v, 7 for 2vv, 3 for 3vv
[15] Motets, 1–3vv, bc, some with insts, op.2 (1713); 11 for 1v, 3 for 2vv, 1 for 3vv
3 motets, 1v, and 1 motet, 3vv, in Motets ... par Mr. de la Croix, 1–3vv, bc, some with insts, op.1 (1741)
Grands motets, all SATBB, str: Beatus vir, *F-Pc*; Benedic anima mea, *Pc*; Cantate Domino, *LYm*; Confitebor tibi Domine, *Pc*; Cum invocarem, *LYm*; Deus noster refugium, *Pc*; Lauda anima mea Dominum, *Pc*; Lauda Jerusalem, *Pc*; Laudate Dominum quoniam, *Pc*; Miserere mei, *Pc*; Venite exultemus, *Pc*
[9] Leçons de Ténèbres, S, bc, *LYm*, *V*
Mass; Te Deum: both lost
Chants des offices de différents Saints nouveaux, cited in Privilège Général, 3 March 1724, lost
Motets attrib. Bernier, all doubtful authenticity: Quis habitat, Resonate, Salve regina, Sicut cervus, all *Pn*; Haec dies quam fecit Dominus, *LYm*

SECULAR VOCAL

[24] Cantates françoises ou musique de chambre, 1–2vv, bc, some with insts, bk 1–4 (1703); repr. in The Eighteenth-Century French Cantata, vi–vii (New York, 1990); 21 for 1v, 3 for 2vv
Les nymphes de Diane, cantate françoise, 2vv, bc (1703); repr. in The Eighteenth-Century French Cantata, vi (New York, 1990)
Les nuits de Sceaux, concerts de chambre, ou cantates françoises, solo vv, bc, insts, bk 5 (1715); repr. in The Eighteenth-Century French Cantata, viii (New York, 1990); 2 divertissements
[6] Cantates françoises, ou musique de chambre, 1v, bc, some with insts, bk 6 (1718); repr. in The Eighteenth-Century French Cantata, viii (New York, 1990)
[6] Cantates françoises, ou musique de chambre, 1v, bc, some with insts, bk 7 (1723); repr. in The Eighteenth-Century French Cantata, viii (New York, 1990)
1 air in Recueil d'airs sérieux et à boire (1706); several airs in Nouvelles poésies, bk 1–8 (1703–7); 1 air in Nouveau recueil de chansons choisies, bk 7 (1736)
Works in *Pc* attrib. Bernier, all doubtful authenticity: Polyphème, cantata, B, insts [2 copies, 1 without insts]; 3 duos and 1 air in Recueil d'airs choisies

JEAN-PAUL MONTAGNIER

**Bernier, René** (*b* Saint-Gilles, Brussels, 10 March 1905; *d* Ixelles, Brussels, 8 Sept 1984). Belgian composer. His musical development was dominated by Gilson and he was a member of the group of Synthétistes formed by Gilson's disciples. His interests extended to composition and musicology. A professor of music history at the Mons Conservatory and inspector of music in secondary education (1945–70), he was elected to the Belgian Royal Academy in 1963.

Bernier belonged to the tradition of Fauré, Ravel and Roussel. His Sinfonietta for strings (1957) is excellently written and stylistically refined; many of his other orchestral works are elegiac evocations of literary inspiration, such as *Le tombeau devant l'Escaut*. It is in vocal music, however, that Bernier excelled: his limpid melodies with their very regular contours have a charming naturalness. In his works for *a cappella* chorus he was influenced by the 16th-century French chanson. His harmony is essentially tonal, with modal suggestions, and his deeply lyrical and discreetly refined music creates an atmosphere of gentle melancholy.

WORKS
(*selective list*)

Orch works incl. Ode à une madone, 1938; Epitaphe symphonique, 1945; Le tombeau devant l'Escaut, 1952; Sinfonietta, str, 1957; Tanagras (ballet), 1968–9; Danses parodiques, 1970; Ménestrandie, vn, orch, 1970; Hommage à Sax, wind, 1974
Inst pieces incl. Sonate à 2, fl, hp, 1939; Trio, fl, hp, vc, 1942; 3 Interludes, hp, 1944; Serinette en guise de bis, sax qt, 1971; Suite pour le plaisir de l'oreille, sax qt, 1973; 2 qnts, fl, str trio, hp; pf pieces
Songs incl. 3 quatrains pour ma mie, 1927; Evasions, 1942; Eclosions, 1942–4; Dévotions, 1944–51; Lettre d'un ami, 1959
Choral pieces incl. Sortilèges ingénus, female/children's chorus, pf/orch, 1939–42; Liturgies, chorus, 1941–2; Incantations, chorus, 1954–6; Ode française, chorus, org, orch, 1968

HENRI VANHULST

**Bernoneau** [Bernnoneau], **Hilaire** [Hilarius] (*fl* 1510–20). French singer and *maître de chapelle*, probably to be identified with the composer HYLAIRE.

**Berno of Reichenau** [Berno Augiensis; Bernardus] (*d* Reichenau, 7 June 1048). Writer on church music and liturgy, and possibly a composer. He is generally believed to have been of 'German' birth from a family of some standing, and was named abbot of Reichenau by Emperor Henry II in 1008. Before this he had been at the monastery of Prüm for an undetermined length of time. The belief that he was a novice at either St Gallen or Fleury is now

rejected (see Oesch). Before his appointment, the abbey had fallen on evil days. Berno restored peace and discipline to it, although he himself became embroiled in squabbles over property and prerogatives, especially after Emperor Conrad came to power (1024–39).

He travelled to Rome in 1014 for Henry's coronation and used the occasion to collect materials for his monograph on the Mass, *De quibusdam rebus ad misse officium pertinentibus*. Eight years later he went to Italy again in the company of the emperor, visiting Monte Cassino briefly. Finally, he was present in Rome in 1027 at the coronation of Conrad. He appears to have felt special concern for the cultivation of scholarship at his abbey, and one of his pupils was the versatile and erudite Hermannus Contractus. Berno continued as abbot of Reichenau until his death.

His chief work on music is a tonary with extensive prologue (*GerbertS*, ii, 62–91) which, to judge from extant copies, was quite widely distributed in Germanic lands during the 11th and 12th centuries. The text of the prologue presents substantial difficulties since some manuscripts have extensive later interpolations by Berno himself in addition to the many borrowings from earlier writers such as Hucbald, Regino of Prüm, Gerbert, Anonymus 1 and pseudo-Bernelinus. Two topics of considerable interest touched on by Berno are transposition and the so-called middle modes ('toni medii'). The tonary proper is perhaps a compilation from earlier sources, and exemplifies conservatism in musical and liturgical matters, showing in particular no influence of the modern theory of Guido of Arezzo. It appears to be the prototype for the tonary of FRUTOLFUS OF MICHELSBERG. Another work with the title *De varia psalmorum atque cantuum modulatione* (*GerbertS*, ii, 91–114) is thought to be inauthentic, at least in the version published by Gerbert; Oesch even raised doubts as to Berno's authorship. It does not, in any event, concern melody or music, but rather discrepancies between the texts of the 'Gallican' and 'Roman' psalters.

The brief *De consona tonorum diversitate* (*GerbertS*, ii, 114–17), an abridged tonary with a short preface of the most elementary sort, seems to have been written for teaching at Reichenau. The unique manuscript source *CH-SGs* 898 is devoted exclusively to the works of Berno, and is also the only old source containing his musical works, namely three hymns, an Epiphany trope, three sequences and an Office for St Ulrich. Another office is known for St Meinrad. None of the melodies has been published. Smits van Waesberghe has argued that the treatise published by Gerbert as Anonymus 1 is also by Berno on the basis of its attribution in the sole surviving manuscript source *A-Wn* cpv 51; he has re-edited the work under its title *De mensurando monochordo*. Certain other works on music have been attributed to Berno, but with little or no authority (see Oesch, 48–9).

LAWRENCE GUSHEE/DOLORES PESCE

**Bernoulli, Daniel** (*b* Groningen, 8 Feb 1700; *d* Basle, 17 March 1782). Swiss physicist. He was the second son of Johann Bernoulli, the leading mathematician of his age, and nephew of Jakob Bernoulli, one of the greatest of all mathematicians. He was at first inclined towards mathematics, but turned more and more to experiment suggested or supported by mathematical theory. After taking the doctorate in medicine at the age of 21, he went to Venice to continue his studies but instead published noteworthy mathematical papers and was invited to the Academy of St Petersburg in 1725. In that year he won the Grand Prix of the Paris Académie for the first of ten times. He returned to Basle in 1733, where he held chairs in anatomy, botany and physics. His most famous work is *Hydrodynamica* (1733), but he made lasting contributions to several branches of mathematics, physics and medicine; most of his writings appeared in the proceedings of the academies of science at Berlin, Paris and St Petersburg.

Bernoulli was responsible for the idea that a body may execute free sinusoidal vibrations at only one of a series of definite ('normal mode') frequencies, to each of which corresponds exactly one proportional family ('normal mode') of shapes, and that, the higher the frequency, the greater the number of quiet points or regions ('nodes'). Moreover, he was the first to calculate from theory the normal modes appropriate to the monochord, the flute, the chime and the conical horn. He claimed that any small vibrations may be regarded as a superposition of normal modes, each with its own suitably selected amplitude. Although his mathematical tools enabled him to illustrate his ideas only in rather simple cases, those provided telling examples. Mathematicians of the 19th century developed Bernoulli's ideas extensively by Fourier analysis or 'harmonic analysis'. Bernoulli's concepts, as so substantiated, refined and extended, provide the general picture of sonic vibration that now underlies theoretical and experimental acoustics.

Bernoulli is probably best known for his work on fluid flow, particularly the relationship between velocity and pressure in the flow of air or other fluid. The so-called 'Bernoulli effect' states that an increase in flow velocity must be accompanied by a corresponding loss of pressure and vice versa. This phenomenon is crucial to an understanding of lip and mechanical reed vibrations and also the vibrations of the vocal folds in voice production.

CLIVE GREATED

**Bernstein, Elmer** (*b* New York, 4 April 1922). American composer and conductor. He was trained as a pianist but also studied composition with Citkowitz, Sessions, Ivan Langstroth and Wolpe. He attended New York University, then enlisted in the Army Air Corps (1942); he arranged and composed music for some 80 programmes for the Armed Forces Radio Service and was a concert pianist for three years after his discharge. Norman Corwin then engaged him to score radio drama, which led to composition for films; Bernstein's third film, *Sudden Fear* (1952), attracted favourable attention. In 1955, despite suffering career difficulties due to McCarthyism (see Marmorstein),

he rose to sudden prominence with his score for *The Man with the Golden Arm*. In this, as in several scores that followed (e.g. *Walk on the Wild Side*, 1962), he effectively blended jazz into a modern symphonic idiom to suit gritty stories and contemporary settings. He subsequently became known for his rousing scores for westerns and action films (notably *The Magnificent Seven*, 1960, and *The Great Escape*, 1963), and in the 1970s and 80s he showed a flair both for youth-market comedies such as *National Lampoon's Animal House* (1978) and for intimate adult dramas, including several Irish films.

Throughout a career of some 130 scores, Bernstein has crafted memorable themes, such as that for *To Kill a Mockingbird* (1963), and shown a fondness for thematic metamorphosis, lively rhythmic ostinatos and clean-cut, economical instrumental textures. In recent years, he has again blended jazz into his scores for period pieces such as *Devil in a Blue Dress* (1995), and since the 1980s has made a point of using the ondes martenot. He also led efforts to secure screen composers' incomes and copyrights and has promoted the appreciation of film music through his writing. He founded the Film Music Collection (1974–8), which published *FilmMusic Notebook* and released recordings, mostly by other eminent film composers and conducted by Bernstein.

WORKS
(*selective list*)

FILM SCORES
*director in parentheses*

Saturday's Hero (D. Miller), 1951; Sudden Fear (Miller), 1952; The View from Pompey's Head (P. Dunne), 1955; The Man with the Golden Arm (O. Preminger), 1955; The Ten Commandments (C.B. de Mille), 1956; Fear Strikes Out (R. Mulligan), 1957; Sweet Smell of Success (A. Mackendrick), 1957; Kings Go Forth (D. Daves), 1958; Desire under the Elms (D. Mann), 1958; God's Little Acre (Mann), 1958; Some Came Running (V. Minnelli), 1958; The Story on Page One (C. Odets), 1959; From the Terrace (M. Robson), 1960; The Magnificent Seven (J. Sturges), 1960; Summer and Smoke (P. Glenville), 1961; Birdman of Alcatraz (J. Frankenheimer), 1962; Walk on the Wild Side (E. Dmytryk), 1962

To Kill a Mockingbird (Mulligan), 1963; The Great Escape (Sturges), 1963; Love with the Proper Stranger (Mulligan), 1963; Baby the Rain Must Fall (Mulligan), 1964; The World of Henry Orient (G.R. Hill), 1964; The Hallelujah Trail (Sturges), 1965; The Sons of Katie Elder (H. Hathaway), 1965; Return of the Seven (B. Kennedy), 1966; Hawaii (Hill), 1966; Thoroughly Modern Millie (Hill), 1967; True Grit (Hathaway), 1969; The Bridge at Remagen (J. Guillermin), 1969; The Liberation of L. B. Jones (W. Wyler), 1970; Big Jake (G. Sherman), 1971; See No Evil (R. Fleischer), 1971; The Trial of Billy Jack (F. Laughlin), 1974

CHRISTOPHER PALMER/CLIFFORD McCARTY/MARTIN MARKS

**Bernstein, Lawrence F.** (*b* New York, 25 March 1939). American musicologist. He graduated from Hofstra University with the BS in 1960. At New York University he studied with LaRue, Martin Bernstein and with Reese, who also supervised his dissertation; he received the PhD there in 1969. He taught at the University of Chicago from 1965 to 1970. He then joined the faculty of the University of Pennsylvania, where he was chairman of the music department (1974–7) and professor from 1981. He was named Karen and Gary Rose Term Professor of Music in 1996, and he has been visiting professor at Rutgers University (1982–3) and New York University (1992). He was also editor-in-chief of the *Journal of the American Musicological Society* (1975–7), a member of the editorial board of the new Josquin Des Prez collected edition (1982–95) and has been general editor of the series Masters and Monuments of the Renaissance (from 1970) and American Musicological Society Monographs (from 1990).

Bernstein's research has focussed on the music of the Renaissance, particularly 16th-century French chansons and the music of Ockeghem. His chanson research has centred on the uses of pre-existing material, including cantus-firmus and parody techniques; his dissertation traces the applications of these techniques in two- and three-voice works of the first half of the century and shows how treatment of borrowed material changed as the century progressed.

PAULA MORGAN

**Bernstein, Leonard** [Louis] (*b* Lawrence, MA, 25 Aug 1918; *d* New York, 14 Oct 1990). American composer-conductor and pianist. He was the most famous and successful native-born figure in the history of classical music in the USA. As a composer, conductor, pianist and pedagogue he bridged the worlds of the concert hall and musical theatre, creating a rich legacy of recordings, compositions, writings and educational institutions.

1. Life. 2. Early works and influences. 3. *Facsimile* to *West Side Story*. 4. Composition after 1958. 5. Conducting. 6. Television programmes and writings.

1. Life. His parents, Samuel Bernstein and Jennie Resnick, emigrated from Russia. His father was descended from a line of rabbis and remained a student of the Talmud, but the family managed to rise into the American middle class as a result of success in the supply of beauty products. The first of three children, Bernstein grew up in suburban comfort, but close to his immigrant roots. His family acquired a piano when he was ten, and, despite his father's objections, he immediately began lessons; his early teachers included Helen Coates, who later became his assistant, and Gebhard. He attended the Boston Latin School, and then went on to Harvard where he studied with Ballantine, Edward Burlingame Hill, A. Tillman Merritt and Piston. During his time at Harvard he composed incidental music for a production of *The Birds* and directed and performed in a production of Blitzstein's agitprop opera *The Cradle will Rock*. His thesis entitled *The Absorption of Race Elements into American Music* (reprinted in *Findings*, New York, 1982/R) already demonstrates a broad knowledge of contemporary music and a dedication to creating music with a distinctively American flavour. At Harvard, too, he met Copland, proving his devotion to the older composer by performing the *Piano Variations* at a birthday party for him. It was the beginning of a lifelong friendship – Bernstein performed and recorded almost all of Copland's works and commissioned *Connotations* for the opening of Philharmonic Hall in New York in 1962 – while Copland's style, particularly that of *El salón México*, for which Bernstein made a piano reduction, forms much of the basis of his music.

After receiving the BA in 1939 Bernstein attended the Curtis Institute where his teachers were Vengerova (piano), Renee Longy (score reading), Thomson (orchestration) and Reiner (conducting). During the summers of 1940 and 1941 he studied conducting with Koussevitzky at Tanglewood, becoming Koussevitzky's assistant in 1942. In these years he also worked with a group of cabaret entertainers called The Revuers, which included his future collaborators Betty Comden and Adolph Green as well as the comedienne Judy Holliday. In 1943 Rodzinski appointed Bernstein assistant conductor of the New York PO, and on 14 November 1943 he replaced Walter, who was indisposed, at short notice. The dramatic début of a young American conductor on a nationally broadcast concert brought him instant fame. He immediately followed that success with three others. His Symphony no.1 'Jeremiah' was given its première by the Pittsburgh SO in January 1944, and it won the New York Music Critics' Circle award as the best American work of the year. In April 1944 the ballet *Fancy Free*, choreographed by Jerome Robbins, was first performed at the Metropolitan Opera House. In December of the same year *On the Town*, with book and lyrics by Comden and Green, opened on Broadway.

Over the next decade Bernstein pursued a highly diversified career. His conducting included many appearances with the Israel PO and, in 1953, a *Medea* at La Scala with Callas – the first time an American had conducted there. He composed a series of theatrical works – *Facsimile*, *Peter Pan*, *Trouble in Tahiti*, *Wonderful Town*, *The Lark*, *Candide*, *West Side Story*; concert hall music (including the Symphony no.2 'The Age of Anxiety', *Prelude, Fugue and Riffs* and the *Serenade*); and a film score, for example, *On the Waterfront*. He also taught as professor of music at Brandeis University (where his chamber opera *Trouble in Tahiti* had its first performance in 1952) and, on Koussevitzky's death in 1951, as head of the orchestra and conducting departments at Tanglewood. In the same year he married the Chilean actress Felicia Montealegre, with whom he had three children, while three years later he made his first appearance on television with 'Beethoven's Fifth Symphony', as part of the programme *Omnibus*.

In 1958 Bernstein became music director of the New York PO, the first American-born conductor to hold the position. He introduced thematic programming, and the televised Young People's Concerts, and at one concert every week he addressed the audience before playing each work; he launched a survey of Mahler's symphonies, and inaugurated the new Philharmonic Hall (now Avery Fisher Hall) at the Lincoln Center. The years at the orchestra made Bernstein internationally famous but were not free of rancour; Harold Schonberg, the chief music critic of the *New York Times*, regularly vented his contempt for Bernstein's extravagant gestures, for example. As a celebrity, too, Bernstein's private life came under greater scrutiny: his leftist political sympathies became the object of derision when the writer Tom Wolfe ridiculed a fund-raising party given by the Bernsteins for the Black Panthers as an example of 'radical chic'.

Bernstein remained musical director of the New York PO until 1969 (he was given the lifetime position of laureate conductor); his international reputation as a

conductor soared but his composing became more sporadic and controversial although ever more ambitious, as in the multimedia theatre piece *Mass* (1971), the failed musical *1600 Pennsylvania Avenue* (1976) and the opera *A Quiet Place* (1983). In 1973 Bernstein gave the Norton Professor of Poetry lectures at Harvard (filmed for TV and published as *The Unanswered Question*). In them he used a controversial reading of Chomsky's theory of linguistics to argue, much against the wisdom of the time, for the universal nature of tonality in music. He continued to conduct up until his death, in his latter years forming a close association with the Vienna PO. On the occasion of the fall of the Berlin Wall in 1989 he conducted an orchestra drawn from German musicians and those of the former occupying powers in a performance of Beethoven's Ninth Symphony.

Bernstein won almost every award the American music world had to offer – only the Pulitzer Prize eluded him. Among his honours were the Kennedy Center Honor for Lifetime of Contributions to American Culture Through the Performing Arts, election to the Academy of the American Academy and Institute of Arts and Letters and the Academy's Gold Medal for Music, the Sonning Prize and the Siemens Prize. He won 11 Emmy Awards and the Lifetime Achievement Grammy Award from the National Academy of Recording Arts and Sciences. Besides his influential teaching of young conductors at Tanglewood, Bernstein helped to found the Los Angeles Philharmonic Institute, helped to create a training orchestra at the Schleswig-Holstein Music Festival and founded the Pacific Music Festival in Sapporo, Japan.

2. Early works and influences. Although he had little formal study of composition, with the Symphony no.1 ('Jeremiah'), *Fancy Free* and *On the Town* Bernstein revealed a full mastery of symphonic, ballet and musical theatre idioms, and a distinctive style that would change little for the rest of his life. His abiding influences were Copland and Blitzstein, with secondary echoes of Schuman and Hindemith and occasionally Gershwin – but he created a personal synthesis. Most importantly Bernstein took up the Judaic and jazz elements from 1920s Copland, which Copland had mostly abandoned, bringing the jazz up to date in a manner derived from Woody Herman, and giving the prophetic, cantorial elements of early Copland a less austere, more lyrical treatment; throughout his career Bernstein returned to Jewish subject matter for inspiration.

*Leonard Bernstein conducting the LSO in Mahler's Symphony no.2, Ely Cathedral, 1973*

The 'Jeremiah' Symphony, despite its obvious debts to Copland and Schuman, was an astonishing début. Its form, which already points to Bernstein's interest in Mahler, is an original three-movement structure: a brooding first movement, 'Prophecy', based on cantorial chant motifs; a manic scherzo, 'Profanation', derived from a chant used for synagogal reading from the prophets, and a concluding 'Lamentation', a setting in Hebrew for mezzo-soprano of verses from Jeremiah. The outer movements evoke the anxiety of the Jewish people during the war years, while the second movement, which represents a questioning of belief, gives a traditional liturgical melody the jagged rhythmic development of a Copland hoedown, with a contrasting section that already forecasts the melody of 'Maria' from *West Side Story*.

*Fancy Free* was written for a Jerome Robbins ballet about three sailors on shore leave in wartime Manhattan. From its very opening, the symphonic treatment of jazz is clearly taken beyond Gershwin and Copland. The changing metres and cross accents look Stravinskian on paper, but, without using jazz structures or improvisation, the aural impression is one of the sounds of the big band era and the nervous energy of jazz. In the *Three Dance Episodes* Bernstein anticipates later works: a parody polka hints at the style of *Candide* (and also shows the influence of Shostakovich) while the Coplandesque 'Danzon' forecasts the dance at the gym in *West Side Story*. Oliver Smith, who designed the set for *Fancy Free*, suggested turning it into a musical. However, the only feature that the ballet has in common with *On the Town* is the presence of three sailors on leave in New York; the story and the music were new, as were the lyrics by Comden and Green and Robbins's choreography. Bernstein's symphonic score and the extended ballet sequences were innovatory and contributed to the originality of the show. For a conductor who spent most of his time interpreting the classics, his lifelong devotion to musical comedy is the defining oddity of his career, even if it made him a fortune; yet he rightly insisted that he was always a theatre composer, born to bring the theatre and the concert hall together. In *On the Town*, Bernstein seems more comfortable with the extended dance numbers than with simple songs; he moves back and forth between cleverly topical review skits, like the comic 'I Can Cook, Too', and more operatic and symphonic passages. Though a success, the show failed to produce a hit song; nevertheless 'New York, New York' became the unofficial anthem of Bernstein's adopted city. Of the often performed *Three Dance Episodes*, the second is one of the few examples of an overt Gershwin influence; it sounds like an echo of the slow movement of Gershwin's Piano Concerto.

3. 'FACSIMILE' TO 'WEST SIDE STORY'. The works of the immediate postwar years show Bernstein still to be exploring. The ballet *Facsimile*, one of his few early failures, depicts a complicated psychological triangle; by turns touching and humorous, it demonstrates how his personality could emerge even without constant recourse to jazz colours. By contrast *Prelude, Fugue and Riffs*, written for Herman, is an American response to Stravinsky's *Ebony Concerto*, while in his Symphony no.2 ('The Age of Anxiety'), based on Auden's poem, Bernstein reveals a surprising debt to Hindemith, especially his Theme and Variations 'The Four Temperaments' (1940). Like the Hindemith work, which Balanchine choreographed in 1947, 'The Age of Anxiety' combines the genre of the piano concerto with theme and variations form, beginning with 14 variations derived from the poem's account of 'seven ages and seven stages'. However, the double influence of Hindemith's classicism and Auden's neo-Baroque portrait of four people who meet in a New York bar during the war makes for a strained impression. Compared to the 'Jeremiah' Symphony, the mood of 'The Age of Anxiety' remains unevocative of the text, its rhythms surprisingly Germanic; only the jazzy 'Masque' movement, scored for piano, harp, celesta and percussion, exhibits Bernstein's usual manner.

He continued his Broadway work with songs for a production of *Peter Pan* (not to be confused with the later Jule Styne, Comden and Green musical) and *Wonderful Town*, based on the popular book *My Sister Eileen* by Ruth McKenney, subsequently dramatized by Joseph Fields and Jerome Chodorov. This lively show, built around the talents of Rosalind Russell and his last collaboration with Comden and Green, was the closest Bernstein ever came to a traditional musical entertainment; it won a Tony as best musical of 1952–3. But he had already begun to think in more operatic terms – even if the model was Blitzstein, not Verdi - writing two years earlier *Trouble in Tahiti*, an exposé of suburban malaise framed by a Greek chorus singing in the style of radio commercials, and reminiscent of the parodies of popular music in Blitzstein's *The Cradle will Rock*. Though the music for this updated *Zeitoper* begins with a satirical edge, its portrayal of the struggles of Sam and Dinah, based on his own parents' unhappy marriage, quickly turns serious; Dinah's anthem 'There is a garden' is a non-ironic prayer for inner peace, a genre that was to return in many of his later works.

Bernstein's next two compositions, *Candide* and *West Side Story*, are his greatest achievements, though *Candide*, a cross between Blitzstein and Offenbach, has survived on the wit and brilliance of the music alone, its numerous versions not having solved the flaws in the dramatic structure. *West Side Story*, equally indebted to Blitzstein in such numbers as 'Maria' and 'Gee, Officer Krupke', reveals, too, how much Bernstein had come under the sway of the Rodgers and Hammerstein 'book' musical, which at the time he described as the true American form of opera. With its stylistic swings between the operatic and jazz, dramatic integration of dance (the show was originally held together by the power of Robbins's choreography), use of song to reveal character and social consciousness, it is modelled – despite being set dramatically and musically in a gritty Manhattan – on *South Pacific*. In its mixture of 1930s Bowery Boys clichés, 1940s bebop and Latin jazz, and typical 1950s pop sociology about juvenile delinqency and alienation, it may be as much of a Broadway confection as the contemporary Rodgers and Hammerstein *Flower Drum Song*. Yet it is that very eclecticism – together with the freshness of Bernstein and Sondheim's lyrics, and its range of melodic invention, from the intimately romantic 'One Hand, One Heart' to the brash, irreverent 'America' – that gives *West Side Story* its enduring strength.

Outside the theatre, Bernstein also achieved a distinctive manner, evident from works such as the *Serenade*, a violin concerto with an original formal structure based on Plato's *Symposium*, and his bleak yet Romantic music for the film *On the Waterfront*. Of all his works the *Serenade* departs furthest from popular music, only erupting at the end as a representation of drunken high spirits; it shows what a fine neo-classicist Bernstein might have been. The raucous, urban score for *On the Waterfront*, on the other hand, had served as a preparation for *West Side Story*, and it was also to serve as a model for future film scores, especially those in the 'noir' mode, set in New York.

4. COMPOSITION AFTER 1958. When Bernstein accepted the leadership of the New York PO in 1958, Brooks Atkinson, the *New York Times* theatre critic, accused him of 'capitulating to respectability', fearing that the orchestra's gain would be Broadway's loss, a prediction that turned out to be true, for Bernstein never had a Broadway success after *West Side Story*. Composing now became a secondary activity, while it was his shorter, less grandiose works, like the *Chichester Psalms* and *Songfest*, rather than such extravagantly dramatic compositions as the Symphony no.3 ('Kaddish') and *Mass*, which were best received. The 'Kaddish' Symphony, dedicated to the memory of President Kennedy, was conceived as a vehicle for Bernstein's wife, who had previously narrated Debussy's *Martyr de Saint Sébastien*; like the Debussy, it stands somewhere between concert music and musical theatre. Its other sources include Honegger's *Jeanne d'Arc au bûcher* and Blitzstein's *Airborne Symphony*, but the text – the traditional Hebrew prayer for the dead placed within a melodramatic expression of doubt – restates the spiritual journeys of his previous symphonies. Anticipating the argument of his Norton lectures, Bernstein represented here the struggle between faith and doubt as between atonality and tonality in which the latter finally prevails.

*Mass*, a multimedia piece of music theatre, not a liturgical work, is an American equivalent to Britten's *War Requiem*. Commissioned by the Kennedy Center in Washington and written during the Vietnam War and just after Woodstock, it gave rise to a pastoral warning from the Catholic Archbishop of Cincinnati for its irreverent treatment of religious ritual and for its vulgar language. It is very much a product of its times making use of electronic tapes, amplified guitars and keyboards, rock singers and a chorus of 'street people'. The text, by Bernstein himself and Stephen Schwartz (who had previously written the rock musical *Godspell*), combines elements from *Marat/Sade*, *Hair*, the Swingle Singers, the Living Theater and *Jesus Christ Superstar*; the theme of faith, profanation and rebirth is one Bernstein had presented earlier in all three of his symphonies, though never before in such a vernacular idiom. Most typical of its era is the hallucinogenic explosion in which the celebrant desecrates the altar, though the most popular number from the work, 'A Simple Song', is a piece of true

Bernstein sentiment that might have appeared in *Candide* or even *On the Town*. If the text of *Mass* is potentially offensive, the music reveals the composer to be in full command of his musical and theatrical powers, moving between styles and moods effortlessly and to great effect.

Of his later works, two song cycles, *Songfest* and *Arias and Barcarolles*, have achieved the broadest acceptance; but the two largest projects of these years remain controversial. For the American bicentennial celebrations, Bernstein collaborated with Lerner in the musical *1600 Pennsylvania Avenue*. The premise of the show was a history of the first hundred years of the White House, including a conflict between white presidential families and their black servants. Despite large claims for the political significance of the work, it emerged as the biggest fiasco in the careers of both of its creators. (In 1997 Charles Harmon and Sid Ramin refashioned the score as a 90-minute *White House Cantata*.) The opera *A Quiet Place* was commissioned jointly by the Kennedy Center, the Houston Grand Opera and La Scala. Written to a libretto by Stephen Wadsworth, it surrounds the entire unchanged text of *Trouble in Tahiti* with a more contemporary soap opera that takes place 30 years later, thereby placing the audience in a strange time warp. Exhibiting something of the immediacy of a Sondheim musical or Robert Altman film in the context of the opera house, the new plot nevertheless remains somewhat opaque; and in contrast to the fragmented psychological drama of the added sections, the world of *Trouble in Tahiti* now appears as a 1950s idyll. Its treatment of autobiographical elements, including homosexuality and incest, and its mixture of musical styles are at the same time provocative and path-breaking. The piece is experimental in its flashback form (which Bernstein and Wadsworth revised significantly after its Houston première), while the new sections are strikingly different in idiom from *Trouble in Tahiti*, indeed from most of the earlier works. They are written as dissonant recitative without sustained lyricism, a kind of operatic modernism that until then he had always avoided. What little of the old Bernstein emerges in occasional arias and orchestral interludes often sounds like deliberate self-parody. Despite these novelties, the opera once more restated the theme of spiritual disintegration and hope which Bernstein had clung to over the previous 40 years. He considered it a summation of all his work.

5. Conducting. Bernstein's mentors, Mitropoulos, Reiner and Koussevitzky, were all modernists, and much of his early conducting and recording was devoted to contemporary music such as Stravinsky's *L'histoire du soldat*, Milhaud's *La création du monde*, Copland's *Billy the Kid* and Britten's *Peter Grimes*, the American première of which the 27-year-old Bernstein conducted. Once at the New York PO, he began to record almost all the standard repertory; his huge recorded output shows that he was a modern Romantic, less interested in sound than Stokowski, less interested in structure than Boulez, but concentrating instead on revealing the narrative of the music in fervidly energized readings. Bernstein may not have made the New York PO the world's leading orchestra – he was never a disciplinarian – but he did succeed, as no one had done before, in putting it at the centre of the city's cultural life.

Bernstein's stylistic range was vast; only Schoenberg and his latter-day followers remained alien to his sympathies. His particular strengths were in American music (especially Copland, Harris and Ives) and in Haydn, Schumann, Sibelius, Stravinsky, Shostakovich and, above all, Mahler. Although Bernstein has been given too much credit for the Mahler revival (Klemperer, Walter, Mitropoulos and Barbirolli had all kept Mahler's music alive), his recordings placed all of Mahler's symphonies, which had been regarded as provincially Viennese, at the core of the orchestral repertory. The fact that, unlike Klemperer or Walter, Bernstein did not come from Mahler's world served to enliven his interpretations, which are often far more observant of Mahler's indications than those of other conductors. He recorded the complete cycle three times.

6. Television programmes and writings. True to his rabbinic roots, Bernstein was always a teacher, but he was also an innovator in using television to educate the audience. He produced programmes for both adults and children, though those for children were so sophisticated and uncondescending in their approach that they delighted adults as well. Despite the technical crudeness of early television Bernstein exploited all the possibilities of the medium, its intimacy and immediacy, and its ability to create cultural icons for a wide audience – which is what he himself, by turns academic and familiar, became. Whether the subject was Beethoven's compositional process, or the evolution of jazz, or Stravinsky's *Oedipus rex*, Bernstein stressed musical values which he illuminated by a careful exposition of ideas and striking juxtapositions of musical examples, and without the facile anecdotes and programmatic interpretations that had passed for music appreciation. Moreover, the medium of television directly served Bernstein's belief in a cultural continuum, ranging from homespun blues to late Beethoven with the American musical theatre at the vital centre. As this vision splintered in the 1960s Bernstein's programmes, like his compositions, lost their way; but he attempted to re-establish his views with the Norton lectures, the first time the series had been specifically designed for television. They were widely criticized at the time, partly because Bernstein used Chomsky's ideas in a rather simplistic and apparently self-serving manner, and partly because the production was surprisingly clumsy and unvisual. Nevertheless, the lectures are a fascinating potpourri of Bernstein's obsessions and insights, which reach their climax in a grand sermon on Mahler as the central figure in 20th-century music; here Bernstein's theatrical and educational instincts come together in a passionate statement of the beliefs that sustained his remarkable career.

WORKS

*all published unless otherwise stated*

DRAMATIC

The Birds (incid music, Aristophanes), 1938, unpubd; Cambridge, MA, 21 April 1939

The Peace (incid music, Aristophanes), 1940, unpubd; Cambridge, MA, 23 May 1941

Fancy Free (ballet, choreog. J. Robbins), 1944; New York, 18 April 1944

On the Town (musical, B. Comden, A. Green, Bernstein), orchd H. Kay, Bernstein, 1944; Boston, 13 Dec 1944

Facsimile (ballet, choreog. Robbins), 1946; New York, 24 Oct 1946, cond. Bernstein

Peter Pan (incid music, Bernstein, after J.M. Barrie), orchd Kay, 1950; New York, 24 April 1950, cond. B. Steinberg

Trouble in Tahiti (op, 1, Bernstein), 1951; Waltham, MA, 12 June 1952, cond. Bernstein

Wonderful Town (musical, Comden and Green, after J.A. Fields and J. Chodorov: *My Sister Eileen*), orchd D. Walker, 1953; New Haven, CT, 19 Jan 1953
On the Waterfront (film score, dir. E. Kazan), 1954
The Lark (incid music, L. Hellman, after J. Anouilh), 1955; Boston, 28 Oct 1955
Salome (incid music, O. Wilde), 1955, unpubd
Candide (comic operetta, Hellman, R. Wilbur, J. La Touche, D. Parker, Bernstein, after Voltaire), orchd Kay, Bernstein, 1956; Boston, 29 Oct 1956; rev. 1973 (Wilbur, La Touche, S. Sondheim, Bernstein, after H. Wheeler after Voltaire), Brooklyn, NY, 20 Dec 1973, cond. J. Mauceri
West Side Story (musical, Bernstein and Sondheim, after A. Laurents), orchd S. Ramin, I. Kostal, Bernstein, choreog. Robbins, 1957; Washington DC, 19 Aug 1957
The Firstborn (incid music, C. Fry), 1958, unpubd; New York, 20 April 1958
Mass (music theatre piece, S. Schwartz and Bernstein), orchd J. Tunick, Kay, Bernstein, 1971, Washington DC, 8 Sept 1971, cond. M. Peress; arr. Ramin for chbr orch, Los Angeles, 26 Dec 1972, cond. Peress
Dybbuk (ballet), 1974; New York, 16 May 1974, cond. Bernstein
By Bernstein (revue), 1975, withdrawn [based on unpubd and withdrawn theatre songs]; New York, 23 Nov 1975
1600 Pennsylvania Avenue (musical, A.J. Lerner), orchd Ramin, Kay, 1976; Philadelphia, 24 Feb 1976; reworked as vocal-orch work White House Cant., 1997
A Quiet Place (op, 1, S. Wadsworth), 1983; Houston, 17 June 1983, cond. J. De Main; rev. 1984 in 3 acts, incl. Trouble in Tahiti

ORCHESTRAL

Fancy Free, suite, 1944 [based on ballet]; On the Town, 3 dance episodes, 1945 [based on musical], transcr. concert band; Facsimile, choreographic essay, 1946 [based on ballet]; Sym. no.2 'The Age of Anxiety', after W.H. Auden, pf, orch, 1949, rev. 1965; Prelude, Fugue and Riffs, cl, jazz ens, 1949; Serenade, vn, str, hp, perc, 1954 [after Plato: *Symposium*]; On the Waterfront, sym. suite, 1955 [based on film score]; West Side Story, sym. dances, 1960 [based on musical]; Fanfare I, 1961 [for inauguration of J.F. Kennedy]; Fanfare II, 1961 [for 25th anniversary of the High School of Music and Art]; 2 Meditations from Mass, 1971; Meditation III from Mass, 1972, withdrawn; Dybbuk Suite nos. 1–2 (Dybbuk Variations), 1974 [based on ballet]; 3 Meditations from Mass, vc, orch, 1977, arr. vc, pf, 1978; Slava!, ov., 1977; CBS Music, 1977; Divertimento, 1980; A Musical Toast, 1980; Halil, nocturne, fl, str, perc, 1981; Conc. for Orch, 1989; Suite, arr. Ramin, M.T. Thomas, 1991 [based on op A Quiet Place, 1983]

VOCAL-ORCHESTRAL

Sym. no.1 'Jeremiah' (Bible), Mez, orch, 1942; Hashkivenu (Heb. liturgy), T, chorus, org, 1945; Arr. of Reena (Heb. folksong), chorus, orch, 1947, unpubd; Sym. no.3 'Kaddish' (Heb. liturgy, Bernstein), S, spkr, chorus, boys' chorus, orch, 1963; Chichester Psalms (Bible), Tr, chorus, orch, 1965; Songfest, 6 solo vv, orch, 1977: To the Poem (F. O'Hara), The Pennycandy Store beyond the El (L. Ferlinghetti), A Julia de Burgos (J. de Burgos), To What you Said (W. Whitman), I, too, Sing America (L. Hughes), Okay 'Negroes' (J. Jordan), To my Dear and Loving Husband (A. Bradstreet), Storyette H.M. (G. Stein), If you can't eat you got to (Cummings), Music I Heard with You (C. Aiken), Zizi's Lament (G. Corso), What Lips my Lips have Kissed (Millay), Israfel (E.A. Poe); Olympic Hymn (G. Kunert), chorus, orch, 1981; White House Cant., arr. C. Harmon, Ramin, 1997 [based on musical 1600 Pennsylvania Avenue, 1976]

OTHER VOCAL

Choral: Arr. of Simch Na (Heb. folksong), SATB, pf, 1947; Yidgal (Heb. liturgy), chorus, pf, 1950; Harvard Choruses (Lerner), 1957; Dedication, Lonely Men of Harvard; Warm-Up, mixed chorus, 1970, incorporated into music theatre piece Mass, 1971; A Little Norton Lecture (e.e. cummings), male vv, 1973, unpubd, arr. as Storyette H.M. in Songfest, 1977 [See VOCAL-ORCHESTRAL]; Missa brevis (Ct, mixed chorus)/(7 sol vv), perc, 1988 [based on incid music The Lark, 1988]
Solo vocal (1 v, pf, unless otherwise stated): Psalm cxlviii, 1932; I Hate Music (Bernstein), song cycle, 1943; My Name is Barbara, Jupiter has Seven Moons, I Hate Music, A Big Indian and a Little Indian, I'm a Person Too; Lamentation, Mez, orch, 1943 [arr. of 3rd movt of Sym. no.1 'Jeremiah']; Afterthought (Bernstein), 1945, withdrawn; La bonne cuisine (4 recipes, Bernstein), 1947; 2 Love Songs (R.M. Rilke), 1949 : Extinguish my eyes, When my soul touches yours; Silhouette (Galilee) (Bernstein), 1951; On the Waterfront (La Touche), 1954, withdrawn; Get Hep! (Bernstein), 1955, withdrawn; So Pretty (Comden, Green), 1968; The Madwoman of Central Park West (Bernstein): My New Friends, Up!Up!Up!, 1979; Piccola serenata, 1979; Arias and Barcarolles (L. DAVID SCHIFF

**Bernstein, Martin** (*b* New York, 14 Dec 1904; *d* 19 Dec 1999). American writer on music and music educator. He graduated from New York University (BS 1925, BMus 1927 with Stoessel), where he began teaching in 1926. After working during World War II as an intelligence officer, he was appointed professor in 1947 and chairman of the music department in 1955. After his retirement in 1972 he was visiting professor at Harvard University in 1986; during the course of his career he was also a guest lecturer at many American universities, including Yale, Rutgers and Indiana.

Bernstein was known primarily for his dedication to teaching: he led graduate seminars (concentrating on Baroque performing practice, Bach and Wagner), taught the survey course of Western music for over 30 years, wrote music textbooks (*Score Reading*, 1932, 2/1947, and *Introduction to Music*, 1937, 4/1972 with M. Picker), and created an archive on music iconography of over 5000 slides. He was also a lecturer on music in a weekly radio programme for WCBS, New York (1955–7), and associate editor of the Reese Festschrift (1966). A collection of essays in his honour (ed. E.H. Clinkscale and C. Brook) was published in 1977. As a performer, Bernstein played the double bass in the New York SO (1925) and the New York PO (1926–8) and was founder and conductor of the Washington Square Chorus and Orchestra, which introduced many lesser-known works of Purcell, J.S. Bach and Handel to New York audiences.

PAULA MORGAN/R

**Béroff, Michel** (*b* Epinal, 9 May 1950). French pianist. As a boy he came to the notice of Messiaen, who eventually made it possible for him to enter the Paris Conservatoire at an early age and study with Yvonne Loriod. By his late teens he was making an international reputation, at first mainly in the works of Messiaen but later with a wider 20th-century repertory. He showed himself a player of élan, exact rhythmic control and astonishing ability in commanding the nuances of resonance. Not surprisingly, he has had most success in the music of Bartók, Stravinsky, Prokofiev, Boulez (including *Eclat/Multiples* under the composer's direction) and Messiaen. Excepting the Mozart sonatas, of which he is a controversial performer, and the Liszt concertos (which he has recorded) he has given comparatively little attention to the literature from before 1900. He was appointed professor at the Paris Conservatoire in 1989.

PAUL GRIFFITHS

**Berr** [Beer], **Friedrich** (*b* Mannheim, 17 April 1794; *d* Paris, 24 Sept 1838). German clarinettist. He learnt to play the violin at the age of six, and later the flute and bassoon, with his father Jacob Beer, who drove him so hard that he would faint at his practice. At the age of 16 he fled from home and, joining a French infantry regiment as bassoonist, fought in the Peninsular War. After the war he studied composition, first with Fétis at Douai and then with Reicha in Paris, where he settled. It was only then that he took up the clarinet, teaching himself and developing a delicate, sensitive style of playing. In order to avoid confusion with the clarinettist Joseph Beer, he changed his surname to Berr. He played principal clarinet at the Théâtre du Vaudeville (1823) and at the Théâtre Royal Italien (1825–38). Influenced by Gambaro, he used Müller clarinets. Every worthwhile appointment came his way, including that of solo clarinettist to King Louis Philippe.

Berr was a professor at the Conservatoire from 1831 and in 1836 he took charge of the Gymnase de Musique Militaire. He was a fine teacher and had a profound influence on French clarinet playing, introducing German ideals of tone and advocating playing with the reed on the lower lip. In 1836 he wrote a tutor for the 14-keyed clarinet, which owed much to Müller, dedicating it to his pupil Klosé. He also wrote a bassoon tutor, many solo works for various instruments, and a large number of compositions for military band. In 1833 he was made a Chevalier of the Légion d'Honneur.

PAMELA WESTON

**Berra, Marco** (*b* Campagna, 24 Oct 1784; *d* Prague, 18 May 1853). Italian music publisher. He worked first for Artaria in Vienna. From 1811 to 1853 he owned his own publishing works and adjacent shop in Prague, where, in addition to music, maps and engravings, he sold instruments, strings, lithographs and oil paintings. From 1835 he also ran a large music-hire business, and maintained profitable commercial contacts with Italy, France, England, Germany and Russia. He issued about 1380 numbered items, of which some of the first 100 contain two separate compositions; nos.1330 to 1380 were published jointly with his son-in-law, Jan Hoffmann. Berra's main publications were songs and pieces for guitar or piano; besides some church music and works for flute and organ, he also published works by Bach, Beethoven, Weber and other widely known composers as well as many local ones (e.g. Tomášek, Vitásek, Kníže, Mašek, Jan Martinovský and Führer). He produced much contemporary dance music in the collections *Prager Lieblings-Galloppen* and *Prager Lieblings-Polkas*; his edition of

organ compositions in the collection *Museum für Orgelspieler* is also well known. Animosity towards the competition from Jan Hoffmann, who opened his music publishing firm in Prague in 1841, prompted Berra to decide that after his death his publishing house should be sold. It was bought by the firm Christoph & Kuhé, who continued Berra's numbering. During the 1880s it foundered and the publishing was taken over by Jaromír Hoffmann.

ZDENĚK CULKA

**Berretta, Francesco.** *See* BERETTA, FRANCESCO.

**Berry, Chuck** [Charles Edward Anderson] (*b* St Louis, 18 Oct 1926). American rock and roll singer, songwriter and guitarist. Born into a solid working-class black family, he worked at a variety of jobs before pursuing a career in music. He achieved success rather late; his first number one hit, *Maybellene*, was recorded in 1955 when he was 29. During the 1950s and 60s he wrote a number of hit songs which have become rock and roll standards, including *Roll over Beethoven*, *Too Much Monkey Business*, *Brown-Eyed Handsome Man*, *School Days*, *Back in the USA*, *Little Queenie*, *Memphis*, *Tennessee* and *Johnny B. Goode*. Berry's songs were based on 12-bar blues progressions, with variations ranging from 8 to 24 bars, played at fast tempos with an emphasis on the backbeat. He had a high clear baritone, extremely clean diction and wrote literate, witty lyrics, many of them the best in early rock and roll. He was a consummate guitarist and his style has been as influential as his songwriting. He employed blues and rhythm and blues licks with bluegrass inflections, and adapted them to a pop-song format. Many of these were probably learned from his pianist and collaborator, Johnnie Johnson.

Like all black American musicians he faced severe racism, especially early in his career. He was often turned away from live performances (some promoters thoug0ht he was white because of his clear diction) and faced a number of legal troubles, some of which seemed to be the result of prejudice and vindictive authorities. However, as an entrepreneur as well as musician, Berry knew ways of surmounting musically this racial divide. In his autobiography he wrote:

> the songs of Muddy Waters impelled me to deliver the down-home blues in the language they came from, Negro dialect. When I played hillbilly songs, I stressed my diction so that it was harder and whiter. All in all it was my intention to hold both the black and the white clientele by voicing the different kinds of songs in their customary tongues.

In attempting to reach a mixed audience he wrote songs about school, cars and love. In 1972 he had his second number one hit with *My Ding-a-Ling*, an unfortunate live recording of a risqué ditty. After that he stopped writing but continued to perform, occasionally appearing on television. He also performed at President Clinton's inaugurations in 1993 and 1997.

He was one of a few early rock and roll musicians whose work defined the genre in the 1950s and for two decades thereafter. Berry profoundly influenced many of the most popular rock and pop artists including the Rolling Stones, the Beach Boys, Bruce Springsteen, Bob Dylan and the Beatles. He received a Grammy Lifetime Achievement award in 1984.

TIMOTHY D. TAYLOR

**Berry, Théodore.** *See* LABARRE, THÉODORE.

**Berry, Wallace (Taft)** (*b* La Crosse, WI, 10 Jan 1928; *d* Vancouver, 16 Nov 1991). American theorist and composer. He studied at the Paris Conservatoire (1953–4) and at the University of Southern California (PhD 1956). In 1977, after teaching music theory at the University of Michigan (1956–76), he was appointed head of music at the University of British Columbia. Despite broad recognition as a composer, including a 1978 award from the American Academy and Institute of Arts and Letters, Berry largely reorientated himself in mid-career towards theory. His books and contributions to teaching and administration made him a leader in the discipline. From 1982 to 1985 he served as President of the Society for Music Theory.

Berry's music is in a freely dissonant, but at times tonally centric idiom, of wide expressive range. His works are energetic and rhythmically complex, yet precise in detail, and clear in phrase structure and formal outline. His theoretical work provides a balanced treatment of rhythm, texture and tonality. He views musical coherence as deriving from patterns of intensification ('progression') and détente ('recession'). While this perspective has precedents in the work of Ernst Kurth among others, its originality lies in Berry's analysis of the concept of intensity in terms of concrete, measurable factors. He calls these 'structural functions' and treats them hierarchically. Of special value are his essays linking analysis with performance, that draw on his extensive professional experience as a pianist.

WILLIAM BENJAMIN

**Berry, Walter** (*b* Vienna, 8 April 1929). Austrian bass-baritone. After study with Hermann Gallos at the Vienna Music Academy he joined the Staatsoper in 1950. His first big success was as the Count in *Le nozze di Figaro*, and in very few years he built up a sizable repertory and an enviable international reputation, appearing in the leading German houses and in North and South America (Metropolitan début, 1966). From 1952 he was a regular soloist at the Salzburg Festival, creating roles in such modern operas as Liebermann's *Penelope*, Egk's *Irische Legende* and von Einem's *Der Prozess*, and singing the standard bass-baritone repertory. From 1957 to 1971 he was married to, and frequently appeared on stage with, the mezzo-soprano Christa Ludwig. Apart from his Mozart roles (Masetto and Leporello, Guglielmo and Don Alfonso, Papageno, the Count and, later, Figaro) he won acclaim in a wide variety of parts: Wozzeck, Ochs, Escamillo, Pizarro, Telramund and subsequently Barak (*Die Frau ohne Schatten*), in which role he made his Covent Garden début in 1976, Wotan and Bartók's Bluebeard. He also appeared frequently in the concert hall, and recorded the Bach Passions and Haydn oratorios, lieder and numerous choral works. His operatic recordings, for which he is especially noted, include leading roles in operas by Bartók, Strauss (Barak and Ochs), Berg (Wozzeck) and Mozart (Masetto, Leporello, Figaro and Papageno).

PETER BRANSCOMBE

**Bersa, Blagoje** (*b* Dubrovnik, 21 Dec 1873; *d* Zagreb, 1 Jan 1934). Croatian composer. He studied at the Zagreb music school (from 1893) and then with Robert Fuchs and Julius Epstein at the Vienna Conservatory; his graduation work, the *Andante sostenuto* for orchestra, received its first public performance in Vienna in 1899. After working briefly as a choral conductor in Sarajevo and Split, he conducted at the Graz municipal theatre (1902–3). From 1903 to 1919 he worked in Vienna as a music teacher and orchestrator of operettas; from 1911 he was arranger and consultant for the publishing firm Doblinger. He returned to Croatia in 1919, and in 1922 he became professor of composition at the Zagreb Academy of Music (formerly the conservatory); he held this appointment until his death.

Bersa was a typical *fin de siècle* composer who enriched the Romantic tradition with fresh nuances. His orchestral output is mostly made up of programmatic symphonic poems, which developed a new sensibility in orchestral writing. Notable for its effective use of sound and space, the best of these works is *Sunčana polja* ('Sunny Fields', 1919). He also composed a number of fine chamber and piano works as well as songs to Croatian and German texts. Of his three operas the most important is *Der Eisenhammer* (1905–6), in which he drew on Wagnerian techniques as well as on the Italian *verismo* style to portray modern subject matter and the atmosphere of a factory; the 'music of the machines' in Act 3 is an example of musical futurism. He also composed 'melo-monodramas' and a film score. As both composer and teacher he laid the foundations of modern music in Croatia.

KORALJKA KOS

**Bersag horn** (It. *tromba per fanfara per Bersaglieri*). A type of valved bugle adopted by the Bersaglieri corps of the Italian army in 1861. The soprano, in B♭, has three valves and is similar to the flugelhorn. The E♭ contralto, B♭ tenor, B♭ baritone and F bass are equivalent in pitch and bore to the tenor (alto) horn, baritone, euphonium and F tuba, respectively; each has a single valve that lowers the pitch of a note by a 4th, thus enabling a complete diatonic scale to be played from the fourth partial upwards. Bersag horns are still manufactured in Italy and are used by some Bersaglieri regimental bands.

CLIFFORD BEVAN

**Berselli, Matteo** (*fl* 1708–21). Italian soprano castrato. He was apparently Venetian; he sang in six operas in Venice (1708–9), including works by Gasparini and Albinoni, in Bologna (1712), Reggio nell'Emilia (1713 and 1719), Rome (1714 in Gasparini's *Lucio Papirio* and 1716),

Florence (1715), Milan (1715) and in three operas at Naples, including Alessandro Scarlatti's *La virtù trionfante* (1716). He was engaged at Dresden (1717–20) at a salary of 4500 thaler (and the use of a carriage), and appeared in Lotti's *Giove in Argo*, *Ascanio* and *Teofane* and Ristori's *Cleonice*. Handel negotiated with him in Dresden in 1719, but he did not reach London until September 1720, when he sang for one season with the Royal Academy at the King's Theatre. He made his début in Giovanni Bononcini's *Astarto* (1720) in a female role, and appeared in Handel's *Radamisto*, the pasticcios *Arsace* (*Amor e Maestà*) and *Ciro* (*Odio ed Amore*) and the composite *Muzio Scevola* (1721). Handel composed three new arias for him in *Radamisto* and a duet and aria in *Muzio Scevola*, of which Burney remarked that 'this singer must have been high in the composer's favour for taste, as he is left to himself in no less than six *ad libitums* and adagios, which he had to embellish'. Berselli's voice was a high soprano with a compass from *e′* to *b″* in Handel, though according to Quantz, who thought his tone pleasing but rather thin, he could sing from *c′* to *f‴*.

WINTON DEAN

**Bershadskaya, Tat′yana Sergeyevna** (*b* Petrograd [now St Petersburg], 4 July 1921). Russian musicologist. She graduated from the Leningrad Conservatory in 1947 and undertook a postgraduate course there in 1951. Her teachers at the conservatory included Yu.N. Tyulin and K.S. Kushnaryov. She was appointed a lecturer at the Leningrad Conservatory in 1945, later becoming assistant professor (1961) and professor (1979). She gained the doctorate from the Moscow State Conservatory in 1986. She became a member of the Composers' Union in 1975, and has been a member of its traditional music section from 1976 and its criticism and musicology section from 1978. She has been awarded medals for her services to Leningrad during World War II, and in 1993 was made an Honoured Art Worker of Russia.

Bershadskaya's main research interest is pitch organization in music, particularly the issues of harmony and modes. Her work is based on the concepts that harmony is a system of accord with tones being linked to sound simultaneously and that the modal system is found in both traditional and classical music but is not identifiable with scale and tonality. She defines this theoretical basis for study in her published lectures on harmony (1978) and her book on harmony as an element of the musical system (1997). She has also made a significant contribution to the study of Russian traditional music. In her book on the basic laws of polyphony in Russian folksong (1961) she discusses fundamental questions concerning monody, forms of polyphony, heterophony and the principles forming modes. She has in addition published work linked to her teaching activities in the harmony section of the music theory department at the Leningrad Conservatory, including a book on the non-traditional forms of written work on harmony in conservatories (1982), and has written many articles on musical education and the methodology of teaching theoretical disciplines.

ELENA TITOVA

**Bertali** [Bertalli, Berthali, Bartali, Barthali, Bertaldi], **Antonio** (*b* Verona, March 1605; *d* Vienna, 17 April 1669). Austrian composer and violinist of Italian birth. Musical literature from the late 17th century to the mid-20th contains much inconsistency and misinformation about his life, and the resulting confusion was eliminated only in the 1970s by Bartels and Olsen. A portrait of him painted in October 1664 is inscribed 'aetatis suae 59 ann, et 7 Mens' (in *A-Wn*, see Schaal, 1970). He received his early training in music from Stefano Bernardi, *maestro di cappella* of Verona Cathedral from 1611 to 1622. It seems reasonable to assume that it was Bernardi's appointment in 1622 to the service of Archduke Carl Joseph, Bishop of Breslau and Bressanone and brother of the Emperor Ferdinand II, that led to Bertali's employment at the imperial court in Vienna. He seems to have arrived there in 1624, since an imperial resolution of 1666 referred to his 42 years' service at the court. The earliest recorded evidence in Viennese archives, however, is his marriage certificate (at the Stephansdom), which is dated 26 January 1631 and lists him as an instrumentalist in the imperial chapel.

During his early years in Vienna, Bertali must have gained a solid reputation as a composer, for he was soon

entrusted with the composition of music for special occasions at court, such as a cantata, *Donna real*, for the marriage of the future Emperor Ferdinand III to the Spanish Infanta Anna Maria in 1631, the *Missa Ratisbonensis* for the Imperial Diet at Regensburg in 1636, and the *Requiem pro Ferdinando II* in 1637. In Vienna and beyond he also enjoyed a reputation as an excellent violinist; the dedication of G.A. Bertoli's *Compositioni musicali* (1645) calls him 'valoroso nel violino'. It was not until 1 October 1649, however, that he was appointed Kapellmeister of the imperial court, in succession to Giovanni Valentini. One of his major achievements during his tenure of this position was the promotion and composition of operas, an activity that contributed in no small measure to the establishment of regular performances of Italian opera at court from the 1660s. His fame increased as he continued to contribute sacred works as well as festive instrumental music for important occasions at court and ably administered the affairs of the rapidly expanding imperial chapel. In his *Tractatus compositionis augmentatus* (1657) Christoph Bernhard mentioned his works, along with those of such composers as Monteverdi, Cavalli and Rovetta, as models of the luxuriant style. Bertali's manuscript works, mostly lost, are listed in *Distinta specificatione dell'archivio musicale per il servizio della cappella e camera cesarea*, the catalogue of Leopold I's private collection (in *A-Wn*). His immediate posthumous reputation rested largely on the two collections of instrumental music published in 1671 and 1672.

The style of Bertali's music is firmly rooted in the north Italian tradition of the first half of the 17th century. Thus, his dramatic works rely on the models of Cavalli and Cesti, though there is more individuality in the oratorios than in the operas. His overtures resemble the French type, and the brief ritornellos are usually dramatically or thematically linked to preceding arias or scenes. Arias are short and in strophic form, with contrast provided by a binary or, less frequently, a ternary structure. Generally, Bertali eschews elaborate vocal writing and concentrates on expressive settings of the text, notably in the frequent arioso endings of recitatives. Ensembles, frequently found in his oratorios and short dramatic works, are similar in style to polyphonic madrigals of the early 17th century. His liturgical music encompasses a wide spectrum of styles and scorings, from short unaccompanied four-part pieces of a madrigalian type to strict contrapuntal masses in *stile antico* and festive polychoral pieces with instrumental ensembles. Most of these works fall within the basic liturgical styles of the Viennese court and many were apparently written for particular occasions, such as the *Missa post partum* (*CZ-KRa*). Bertali's instrumental music includes a broad range of popular mid-17th-century styles, from the contrapuntal sonatas prevalent at court to large-scale, multi-sectional works including trumpets, cornetts, strings, and continuo for important church feasts and court festivities.

WORKS

OPERAS

L'inganno d'amore (prol, 3, B. Ferrari), Regensburg, 24 Feb 1653, lost, pubd lib *A-Wn*

Theti (favola dramatica, prol, 5, Diamante Gabrielli), Vienna, Hof, 13 July 1656, pubd lib *Wn*

Il rè Gelidoro (prol, 3, A. Amalteo), Vienna, Hof, 19 Feb 1659, lost, pubd lib *Wn*

La magia delusa (prol, 1, Amalteo), Vienna, Favorita, 4 June 1660, *Wn*

Gli amori d'Apollo con Clizia (prol, 1, Amalteo), Vienna, Hof, 1 March 1661, lost, pubd lib *Wn*

Il Ciro crescente (prol, 3 intermezzos, Amalteo), Vienna, Laxenburg, 14 June 1661, *Wn*

La Zenobia di Radamisto (prol, 3, C. de' Dottori), Vienna, Hof, 18 Nov 1662, Act 3 and pubd lib *Wn*

Untitled opera [incipit: Pazzo amor] (prol, 1), Vienna, Hof, ?18 Nov 1664, *Wn*

L'Alcindo (prol, 3, A. Draghi), Vienna, Hof, 20 April 1665, prol and pubd lib *Wn*

La contesa dell'aria e dell'acqua (festa a cavallo, F. Sbarra), Vienna, Hof, 24 Jan 1667, lost, pubd lib *Wn* [vocal music by Bertali, ballets by J.H. Schmelzer]

Doubtful: Niobe (introduttione alla barriera, 3, Gabrielli), Mantua, Ducale, 15 Feb 1652, pubd lib *US-Wc*: Theti (favola dramatica, prol, 5, Gabrielli), Mantua, Ducale, 24 Feb 1652, pubd lib *Wc* [relationship to Theti for Vienna, 1656, is unknown]; Cibele ed Ati (intermezzo), Vienna, ?Dec 1666

ORATORIOS

Il pentimento, l'amore verso Dio, Vienna, 1661, lost, pubd lib *Wn*

Maria Maddalena (Draghi), Vienna, 1663, *Wn*

Oratorio sacro [title unknown], Vienna, 1663, lost

L'inferno deluso (Sbarra), Vienna, 1665, lost, pubd lib *I-Vnm*

La strage degl'innocenti, Vienna, 1665, *A-Wn* (facs. (New York, 1986)); ed. in Olsen

SACRED VOCAL

2 motets, 1649[1], 1653[1]

Missa Resurrectionis, SSAATTB, 2 tpt, 2 cornett, 5 tbn, str, bc; ed. B. Clark (Huntingdon, 1987)

Missa semiminima, SSAATTBB, 4 tbn, str, bc; ed. W. Fürlinger (Altötting, 1985)

Ecce illuxit nobis, vv, 6vv, 3 rec, 2 vn, va, bc; ed. K. Ruhland (Altötting, 1992)

32 masses, 8 requiem masses, 32 ints, seq, 8 Vespers, 10 Complines, 16 Mag, 5 TeD, 73 ants, 16 lits, 5 lessons and resps, 78 pss, 75 motets: most lost, extant works in *A-KR*, *Wgm*, *Wn*, *CZ-KRa*

SECULAR VOCAL

40 'compositioni morali e spirituali', 1–6vv, some with insts; 14 occasional cantatas, 1–9vv, insts; 134 'compositioni amorose', 1–8vv, some with insts: most lost, extant works in *A-Wn*, *S-Uu*

INSTRUMENTAL

Thesaurus musicus, a 3 (Dillingen, 1671), lost

Prothinia suavissima, 24 sonatas a 3–4 (n.p. [?Dillingen], 1672), some doubtful, see Kačic

Sonatas: 11 'con trombe solenni' a 13–18; 29 a 3–8; 10 for 2 vn, tbn/b viol, bc; 1 for vn, bc: some lost, extant works in *CZ-KRa*, *D-Mbs*, *S-Uu*; 6 ed. J.D. Hill and R.P. Block (London, 1972), 2 ed. J.D. Hill and R.P. Block (London, 1971), 1 ed. R. Wigness and R.P. Block (London, 1975), 23 ed. in Zink, 1 ed. in RRMBE, lxxxii (1997), 2 ed. B. Clark (Huntingdon, 1998)

Chiacona, vn, bc, ed. in RRMBE, lxxxii (1997)

RUDOLF SCHNITZLER/CHARLES E. BREWER

**Bertalotti, Angelo Michele** (*b* Bologna, 8 April 1666; *d* Bologna, 30 March 1747). Italian composer and pedagogue. Having received his initial musical training in Bologna, he was employed as a singer in Rome between 1687 and 1690, attached to the choirs of S Luigi dei Francesi and S Agostino. Returning to Bologna, he was appointed singing master at the Scuole Pie in 1693; later he also instructed the seminarists. In 1698 his *Regole facilissime per apprendere con facilità e prestezza li canti fermo e figurato* were published anonymously. On 22 March 1703 he was admitted to the Accademia Filarmonica of Bologna. He joined the choir of S Petronio as a bass in January 1705, holding this post until his death.

Bertalotti's authorship of the *Regole facilissime* was confirmed in 1706 by a revised edition under the title *Regole utilissime per apprendere con fondamento e facilità il canto fermo* (Bologna, 1706, 3/1716), which omitted the section on 'canto figurato' and augmented the section on 'canto fermo'. It was revised and enlarged in 1720, and further revised and enlarged (with an added 'dialogo') in 1744, an edition which received a fourth printing as late as 1820. The pedagogical usefulness of the *Regole facilissime*, which require a knowledge of solmization, did not outlive Bertalotti's age, but the *Solfeggi a canto e alto dati alle stampe per comodo delli putti delle Scuole pie* in two and three parts, first issued in 1744 (revised 1764; ed. R. Goitre, Milan, 1977), have retained their value for choir training and as models of contrapuntal writing in the strict style. Their most enthusiastic modern advocate was Haberl, through whose efforts they came to be included in the curriculum of Bavarian teacher-training colleges. They can be regarded as vocal equivalents without words of J.S. Bach's 'inventions' for keyboard.

MICHAEL TALBOT

**Bertani, Lelio** (*b* Brescia, 1553–4; *d* Brescia, 1612). Italian composer. He had certainly composed madrigals by 1571, for a response by the fellow Brescian Costanzo Antegnati to a piece by Bertani was printed in that year. He succeeded his teacher Giovanni Contino as *maestro di cappella* of Brescia Cathedral in 1574, a post he still held in 1591 (Fontana). According to Rossi he served the last Duke Alfonso of Ferrara, which has been taken to mean that he was employed in the Ferrarese court music establishment, but although the Ferrarese court salary records are preserved almost complete for the end of the 16th century, Bertani is not mentioned there. He did visit the court, however, and presented some of his music, including the first book of madrigals for six voices, to the duke; this is probably the service for which he received the reward of 50 scudi mentioned by Rossi. He was appointed *maestro di cappella* of Padua Cathedral in November 1598 and he asked to be allowed to resign from this post in July 1604 (the dates 1588 and 1607 sometimes cited in this connection are incorrect).

Bertani enjoyed great esteem among his contemporaries, which is attested both by his recommendation for an important post in 1601 by Luzzaschi and by his inclusion in numerous anthologies of many countries during the years 1580–1610. A sampling of several of his madrigals indicates that this esteem was warranted. Particularly prominent in Bertani's style of the 1580s is an almost instrumental attitude towards vocal composition: a preference, for example, for motivic textures and for development and unification by purely motivic and tonal means, independent of the words, of the sort that brought forth complaints by Bardi and Galilei during the same decade. Bertani must be recognized as a superior craftsman in the style in which he worked, however the style itself is judged. His skill in resolving the opposing demands of a harmonic and an imitative lowest part, in expanding and developing his repetitions by motivic, harmonic and textural means, in exposing two or three motifs simultaneously, or in using written-out ornamentation for structural purposes, withstands comparison with that of Marenzio or Monteverdi during the 1580s and 90s. His varying of texture and his control of pace are masterly. Only the lack of any great dramatic imagination and, as Rossi suggested, a lack of ambition prevented Bertani from being included among the finest madrigalists of his age.

ANTHONY NEWCOMB

**Bertati, Giovanni** (*b* Martellago, 10 July 1735; *d* Venice, *c*1815). Italian librettist. The son of a farm agent, he was sent by a local nobleman to study at the Treviso seminary, but showed more interest in the theatre. His libretto *La morte di Dimone, o sia L'innocenza vendicata*, a translation of a German play by the impresario J.F. von Kurz, was set by Antonio Tozzi and inaugurated the renovated Teatro S Cassiano in Venice in 1763. Thereafter he wrote almost exclusively comic librettos. He benefited from his association with Baldassare Galuppi, who took him to Vienna in 1770 and for whom he wrote two librettos. Bertati wrote over 70 librettos, at least 45 of them for the Teatro S Moisè in Venice, where he served as principal comic librettist from 1771 to 1791. Many of his works set by Gazzaniga, Anfossi and other composers achieved considerable success beyond Italy. In 1791 after several earlier visits to Vienna, he succeeded the ousted Da Ponte as chief poet to the imperial theatre, where his *Il matrimonio segreto* (music by Cimarosa) was an instant and long-lasting success. He returned to Venice in 1794, apparently by his own choice, having written five librettos for Vienna. After 1798 he largely gave up writing librettos and worked as a civil servant, later an archivist, at the arsenal in Venice.

Bertati's librettos reflect both the traditions of Italian comedy and the innovations of Carlo Goldoni, his leading predecessor in Venice. Most are dramas of domestic intrigue, populated by shrewd servants, vain or fatuous aristocrats and young lovers who have to outwit jealous, greedy or social-climbing guardians (as for example in *Il matrimonio segreto*). There are also librettos set in imaginary or distant lands, combining typical romantic intrigue with satirical observations about contemporary life and manners (for instance in *L'inimico delle donne* and *L'isola di Alcina*). Bertati relied heavily on the traditional mechanisms of Italian comedy: disguises and mistaken identities, magic incantations, and the other comic devices of the *commedia dell'arte*. He used to good advantage nonsense poetry, real or invented foreign languages, parodies of the elevated language of *opera seria*, and catalogue arias, which were a particular speciality. As with Goldoni, his intrigues involve rivalries both of class and of generation. Smith (1970) saw in Bertati's librettos 'a growing undertone of cynical protest at the license of the aristocrats' – a protest broader than in Goldoni's mocking of particular social customs (in particular in Bertati's *La villanella rapita* and *Don Giovanni*). But Bertati was no revolutionary; his works are light and entertaining, and for the most part conventional and unchallenging in their subject matter. He was, however, among the first librettists to write texts exhibiting two important structural innovations: the change from three acts to two (his librettos to 1775 contain three acts; by 1777 they are in two); and the development of the *introduzione* (his examples encompass action that sets the plot immediately in motion).

The widespread success of Bertati's librettos was due more to their theatrical than to their poetic merits. Perhaps partly because of the haste in which he frequently had to work, his language is often coarse, lacking the grace of such librettists as Da Ponte or G.B. Casti. Moreover, as Goldin has shown, Bertati's poetry lacks the finesse and variety needed to distinguish characters from one another; the psychological subtlety of Da Ponte's librettos for Mozart is not to be found in Bertati's. His strength was his ability to 'order a story line with clarity and concision and stuff it with the requisite amount of plot intrigue and *commedia* business' (Smith, 1970). Even Da Ponte, who had little that was positive to say about his rival, acknowledged that Bertati's librettos came across better on the stage than in reading.

Bertati's one-act libretto *Don Giovanni, o sia Il convitato di pietra* (set by Gazzaniga in 1787) served as the model for Da Ponte's *Don Giovanni* for Mozart. Da Ponte took over nearly complete the outlines of Bertati's work, adding to it the Act 1 finale and most of the second act. But Bertati's version, despite its strong characterization of Giovanni and its dramatic scenes of the duel and the final confrontation with the statue, has a less serious tone. It comprises the second act of a comedy, *Il capriccio drammatico*, depicting the woes of a touring opera company which out of desperation revives the old Don Juan story, even though the singers protest that the tale is fit for nothing but village fairs. This 'frame' thus presents Bertati's one-act *Don Giovanni* in an ironic light. Even more striking is its final scene (after Giovanni's descent to hell), a frivolous comic ensemble in which the other characters imitate the sounds of musical instruments with a variety of nonsense syllables.

JOHN PLATOFF

**Berté, Heinrich** [Harry] (*b* Galgócz, Hungary [now Hlohovec, Slovakia], 8 May 1857; *d* Perchtoldsdorf, nr Vienna, 23 Aug 1924). Austro-Hungarian composer. After the death of his father in 1867 he moved with his

brother Emil to Vienna, studying with Hellmesberger, Fuchs and Bruckner at the Gesellschaft der Musikfreunde Conservatory and becoming a fine pianist. After the success of his second ballet *Die goldene Märchenwelt* (Hofoper, 1893) he continued to compose for the stage, producing at least six ballets and a dozen operettas. His greatest success came with *Das Dreimäderlhaus* (Raimundtheater, 15 January 1916), an operetta using melodies by Schubert and based on a distorted version of his life. This became one of the greatest operetta successes of its time, achieving popularity in the USA as *Blossom Time* (arr. Romberg, New York, 21 September 1921) and in Britain as *Lilac Time* (arr. Clutsam, London, 22 December 1922; as *Blossom Time*, London, 1942). Berté's brother Emil (1855–1922) became a music publisher in Vienna, and his son Emil jr (1898–1968), who studied composition with Franz Schmidt, wrote an opera and some operettas.

ANDREW LAMB

**Berteau** [Berthault, Bertaud], **Martin** (*b* 1708; *d* Angers, 23 Jan 1771). French cellist. He was the founder of the French school of cello playing. Among his pupils were Tillière, Janson, Cupis and the elder Duport. He began by playing the bass viol, studying in Germany with Kozecz, the Bohemian performer on that instrument. After hearing the Italian cellist Francischello he gave up the viol for the cello. In 1739 he played a concerto of his own composition with great success at the Concert Spirituel in Paris. La Borde praised him highly: 'M. Berteau fut le Professeur qui contribua le plus à la perfection de cet instrument, par la manière dont il en jouait'. Some doubts have been cast upon the authenticity of the few works which survive, largely due to confusion over his date of death, thought by F.-J. Fétis, Eitner and others to be 1756. The later date given above is, however, confirmed by the register of St Pierre d'Angers and in an annotation by Abbé Roze to a manuscript of 'Sonate del S[i]gnore Berteau 1759' (*F-Pn*) of which two pages, according to Roze, are autograph. Jean Louis Duport included an étude (no.6) by Berteau requiring the use of thumb position in his *Essai sur le doigté du violoncelle et la conduite de l'archet*. A 19th-century etching, showing him seated with his cello, is reproduced by Vidal (ii, pl.lxxix).

MARY CYR

**Bertezen, Salvatore** (*b* Malta, *fl* 1780–?1792). Italian singing teacher of Belgian parentage. He was living in Rome about 1780, the year in which he published there his *Principj di musica teorico-prattica*. After a short stay in Paris he moved to London, where in 1781 a completely rewritten and much condensed second edition appeared as *Principj della musica* (in which he called Malta his homeland). In 1782 he produced an *Extract of the Work entitled 'Principles of Music'*, including some new material. Fétis praised the author for his 'knowledge and erudition' and his work as 'a rather estimable collection of good critical and historical observations', but held that it did not fulfil its function as an elementary method for music students. Bertezen also published in London *Four Songs and Two Duetts* (?1783) and *Six Songs*. A letter by him is in the Bologna Conservatory library. A Salvatore Bertezen died in France in 1792, but this may have been the unnamed nephew to whom the first edition of Bertezen's *Principj* is addressed.

FERRUCCIO TAMMARO

**Bertha, Sándor** (*b* Pest, 19 Aug 1843; *d* Paris, 24 Nov 1912). Hungarian composer, pianist and writer on music. He was a pupil of Mosonyi Mihály to whom he dedicated his first published composition, *Két dal* ('Two Songs', 1860), From 1861 he wrote numerous articles for, among others, the first Hungarian music periodical, *Zenészeti lapok*. In 1862 he moved to Leipzig, where he studied composition with Moritz Hauptmann; he studied the piano with Bülow in Berlin in the following year. From 1864 he became one of the circle around Liszt in Rome, and in 1865 moved to Paris, where he opened an artistic salon and contributed to both literary and musical journals. His articles, which were mainly about Hungarian music, were published under the pseudonym Alexandre de –. He aspired in his compositions to a synthesis of Baroque musical forms and elements of 19th-century Hungarian music; they include a comic opera, *Matthias Corvin* (Paris, 1883 and Budapest, 1884), a coronation hymn (1867), two *Suites hongroises* (1871–2), an overture to *Othello*, and various occasional marches, Hungarian dances and vocal works.

KATALIN SZERZŐ

**Berthault, Martin.** *See* BERTEAU, MARTIN.

**Bertheaume** [Berthéaume, Berthaume], **Isidore** [Julien] (*b* Paris, *c*1752; *d* St Petersburg, 19 or 20 March 1802). French violinist and composer. The nephew and pupil of the violinist Lemière *l'aîné*, he was a child prodigy whose performances of his own works and those of Gaviniès, Lolli and Felice Giardini caused a sensation at 19 appearances at the Concert Spirituel during the years 1761 and 1765–9; he continued to be a favourite soloist there, appearing on 31 occasions between 1775 and 1790,

when the concerts ended. He also studied with Lemière's teacher Gaviniès. In 1767 he became a member of the Opéra orchestra, and in 1769 published his op.1, dedicated to the Duchess of Villeroy. Bertheaume withdrew from Parisian musical life between 1769 and 1775 – it is not known why or to where – but in the latter year he returned, rejoining the Opéra orchestra (until 1781) and appearing again at the Concert Spirituel as soloist and in the orchestra. He was also leader of the Concert d'Emulation (1786) and Opéra comique (1788), and played at the Société des Enfants d'Apollon (1787–90). From 1789 to 1791 he was conductor and co-director of the Concert Spirituel with Legros. These activities were interrupted by the Revolution, and he fled to Germany in 1791 with his nephew and pupil, Carl Philippe Lafont. There he played at several courts until in 1793 the Duke of Oldenburg and Prince-Bishop of Lübeck appointed him Konzertmeister to the court at Eutin. This post he retained until 1801 when he went by way of Copenhagen and Stockholm to St Petersburg, where he briefly held a position as leader of the imperial orchestra.

Bertheaume was a worthy rival of Viotti in Paris. He was an outstanding virtuoso, if not quite of Viotti's calibre. His compositions are effective, well written for the violin and were regarded favourably by his contemporaries. Following a 1786 performance of one of his *simphonies concertantes*, a *Mercure de France* critic reported the audience's approval of both the composition and its interpretation by its composer and his pupil Jean-Jacques Grasset. The concertos are simple in structure but allow for ample display of the soloist's virtuosity. The op.2 sonata, written 'dans le style de Lolly', and the second sonata of op.4 are notable for their use of scordatura. His students, in addition to Lafont and Grasset included Bartholomeo Bruni and Antoine Lacroix.

NEAL ZASLAW

**Berthier, Jacques** (*b* Auxerre, 27 June 1923; *d* Paris, 27 June 1994). French organist and composer. He first studied with his father, organist of Auxerre Cathedral, and later (1945–6) with Guy de Lioncourt (composition) and Edouard Souberbielle (organ, fugue, counterpoint) at the Ecole César Franck in Paris. In 1960 he moved to Paris as editor to the recording company Fleurus and in the same year was appointed organist of the Jesuit church of St Ignace, a position he held until his death.

From his youthful years onwards Berthier was consistently drawn to liturgical composition. His musical output includes settings of texts by Joseph Gelineau, the Jesuit liturgical scholar and composer who was to become the inspiration for much of his mature work; a Requiem, which blends Latin texts (chorus) with French (soloists) and is exceptional for its large scale; an important corpus of settings, for use in parish churches, of the revised, vernacular liturgy; and various contributions to monastic liturgy, particularly for the Roman Catholic communities of En-Calcat, Landévennec and Maredsous and, most notably, for the ecumenical community of TAIZÉ. Berthier first supplied chants for Taizé in 1955, but his series of new, canonic and repetitive chants dating from 1975 were responsible for bringing Taizé's music to the attention of churches throughout the Christian world. These chants typify Berthier's interest in reducing music to a state of concentration and extreme simplicity, drawing equally on tonal and modal traditions within a rhythmically direct framework. His instrumental music exhibits similar qualities, although the two cantatas of his last years show a reawakened interest in writing more complex music for the concert hall. (P. Faure and D. Rimaud: 'Jacques Berthier, compositeur pour la liturgie', *Célébrer*, no.236 (1994), 3–15.)

ANDREW WILSON-DICKSON

**Berthier, Jeanne-Marie.** *See* BATHORI, JANE.

**Berthod, François** (*fl* 1656–67). French composer and poet. He was a Cordelier (a kind of Franciscan friar), but his name does not appear in the list of writers of his order. His writings for the edification of the faithful include *Le vray chemin du ciel pour les agonisans* (1656), *Emblesmes sacrez tirez de l'Escriture saincte* (1655–65) and *L'histoire de la passion de N. Sauveur Jésus-Christ* (1666). Berthod continued in the tradition of Irénée d'Eu and many other religious figures of the 17th century in specializing in the

production of sacred contrafacta. It was for the recreation of the nuns of Maubuisson and Val-de-Grâce, Paris, that he produced three books of *Airs de dévotion à deux parties* published by Robert Ballard (iii) (Paris, 1656, 1658, 1662); some of the pieces are with continuo, some without. The melodies are those of popular *airs* by Lully, Lambert, Moulinié and other French composers of the time. Normally the lists of contents cite the first lines of the secular originals; only the last six pieces in the third book are ascribed to a composer, Gobert. (Identification of other composers is given in Launay) Berthod explained that he had changed the words as little as possible so as not to spoil the melodies. He also published a book of motets for unaccompanied solo voice, *Parolles très dévotes mises en chant pour glorifier Dieu pendant l'élévation* (Paris, 1665), to Latin words taken from the liturgy. The melodies, by Berthod himself, are adapted from Gregorian chant. He stipulated in his preface that the ornaments and accidentals used in secular music should be used in their performance. With François Paschal, he was charged with revising the books of Roman plainchant that had suffered many changes after the Council of Trent. The result was the *Service de l'église* (1667), a collection of liturgical chants in Latin, printed in neumes. Berthod preached at the court notably during royal visits to Fontainebleau, where he had performed his 'Airs pieux & innocens' before the queen. Possibly to reward his faithfulness during the years of Fronde (1648–53), the king awarded him certain diplomatic assignments. His lively *Mémoires* give evidence of his audacity, his guile and even his love of sports.

**Berti, Carlo** [Bertus, Carolus] (*b* ?Florence, *c*1555; *d* Mantua, 1602, before 2 Sept). Italian composer and organist. He was born into the Florentine family of the Berti Signesi (i.e. originally from Signa); his birthplace is unknown as his name does not appear in the Florentine baptismal records. His father, Antonio di Tommaso, died in Antwerp on 4 September 1574 leaving him in the care of relatives. He was accepted as a novice in the Servite order at SS Annunziata, Florence, on 30 January 1577 and on 16 November 1580 he was ordained at the convent of the order in Lucca. In the dedication to Jacopo Corsi of his *Magnificat octo tonorum* (1593), Berti acknowledged his musical training with Maurizio Borselli, organist and *maestro di canto* at SS Annunziata. Berti was appointed *maestro di cappella* there some time before 10 January 1592, and in October of the same year he dedicated his first publication, the *Psalmi* for five voices, to Lelio Baglioni, the General of the Servite order, and to the priors of the Florentine convent, for which he was rewarded with 175 lire.

During Berti's tenure as *maestro di cappella* the musical activities at the SS Annunziata were considerably expanded; besides *putti* (boys) and the occasional castrato lent by Emilio de' Cavalieri, then superintendent of ducal music, trombone and cornett players mainly from the instrumental school of Bernardo Pagani 'detto il Franciosino' were regularly employed as *musici straordinari* on the principal feast days. On 20 January 1601 Berti left Florence for Mantua, taking a letter of recommendation to Duke Vincenzo Gonzaga from Jacopo Corsi. According to a letter addressed to the duke by Francesco Rasi (in *I-MAa*), Berti was to continue in Mantua the training in singing and counterpoint that he had already begun in Florence of Rasi's younger sisters. In another letter, Ascanio Rasi, Francesco's father, requested of the duke that Berti be allowed to reside at the Rasi home in Mantua so that his daughters' instruction might proceed without hindrance. On 2 September 1602 the Servite convent in Florence received news of Berti's death in Mantua.

Berti's three books of sacred music fill a gap in Florentine sacred music between Corteccia's *Canticorum* (1571) and Marco da Gagliano's *Officium defunctorum* (1607/8). Of the *Psalmi omnes qui in vesperis a romana ecclesia toto anno decantantur, quinque vocibus concinendi* (Venice, 1592), only the bass partbook survives. His *Magnificat octo tonum quinque vocibus concinendi* (Venice, 1593; holograph in *I-Fn*) are set out in the *alternatim* manner; the even-numbered verses are set polyphonically with the appropriate plainchant melody incorporated into the polyphonic structure, but recast rhythmically as a point of imitation pervading all the voices. In the doxology the number of voices is increased to six by the use of canon. An early example of the application of parody techniques to the *Magnificat* is the *Magnificat supra 'Vestiva i colli'*, based on Palestrina's madrigal. The *Motecta octonis vocibus concinenda* (Venice, 1596; only surviving copy in *I-Ls*) are written in the more up-to-date Venetian polychoral style, but without exploiting the possibilities of unequal voice groupings. They show a well-planned sectional organization, alternating short homophonic phrases with melismatic, triple-time and tutti episodes that closely follow the sense and rhythms of the words. Giovanni Battista Jacomelli 'detto del violino', who regularly performed at the SS Annunziata, and Luca Bati each contributed one motet to this publication. Several of Berti's *Magnificat* settings and motets were reprinted in 17th-century German anthologies and a few motets arranged for organ (in *D-Mbs*; *PL-PE*, ed. in AMP, i, 1963, p.556; vi, 1965, p.206).

DAVID NUTTER

**Berti, Giovanni Pietro** (*d* Venice, 1638). Italian composer. He seems to have been in Venice for some years before he was appointed as a tenor at S Marco on 19 February 1619. On 16 September 1624 he was made second organist, a position he held until his death. His two collections of *Cantade et arie* (Venice, 1624, 1627; 1624

ed. in ISS, vi (1986)) contain almost exclusively strophic arias for solo voice; the remaining pieces are a strophic bass cantata, a sonnet, a dialogue and three arias to be sung as duets. In addition, two solo songs appeared in Carlo Milanuzzi's *Quarto scherzo ariose delle vaghezze* (Venice, 2/1624, ed. in ISS, vi, 1986) and one in Alessandro Vincenti's *Arie di diverse* (RISM 1634[7]). Three motets by Berti survive, one in Leonardo Simonetti's *Ghirlanda sacra* (1625[2]) and two in manuscript (*PL-WRu*).

Many of Berti's strophic arias were published before 1618 as texts with accompanying Spanish guitar tablature assembled into poetic anthologies by Remigio Romano. Berti's songs are thus some of the earliest extant Venetian examples of monody, alongside those of Bartolomeo Barbarino and Carlo Milanuzzi. His choice of texts reveals his interest in sophisticated epigrams and symmetrical rhyme and metre structures, in contrast to the typically bland pastoral poetry set by other Venetian composers, who appear to have been less concerned about symmetry in verse and rhyme structure. To underscore the structural logic of his texts Berti often employed large-scale harmonic and melodic sequential repetitions; in most cases strict sequential patterning overrode the importance of individual word rhythms, as in *Ardo ma rivelar* (1624), but on occasion such rigid patterns were loosened to admit even a recitative idiom, for example in *O da Fila canore* (1624). Perhaps the most characteristic aspect of Berti's music is its prevalent mixture of duple and triple metres. More than any other Venetian composer at this time, Berti employed changes in metre to highlight structural divisions or changes of affect in a text. In many cases severely contrasting melodic styles – triple-metre aria and duple-metre recitative – help to delineate such metrical divisions. While Berti's *Fiati angosciosi* (1627, but dating from before 1620) shows him to have been the first Venetian composer to employ a contrast between aria and recitative idioms within a single strophic song, the later *Da grave incendio oppresso* (1627) reveals the significant structural potential of such a technique. Berti divided the eight-verse poem into two sections of equal length, the first six lines to be rapidly declaimed in recitative, the final two lines, with numerous text repetitions, to be sung in aria style. But the diversity of Berti's musical language extends beyond his synthesis of aria, arioso and recitative idioms in these songs; his incorporation of traditional madrigalian affective devices within his strophic arias gives his music a stylistic depth beyond that of most other Venetian composers. *Poiche à miei pianti neghi* (1624), for example, ends with a striking chain of 7–6 suspensions descending through a 6th; undoubtedly provoked by the harsh imagery of the text, the sheer density of dissonance is unprecedented in the Venetian repertory of solo song. The three non-strophic monodies found in Berti's two collections display traits common to the genre, including fluid, declamatory writing, chromaticism and extended *fioritura*. It is likely that these extended monodies represent the 'cantade' referred to in the title-pages of the two collections, as do their counterparts in similarly named collections by Alessandro Grandi (i); the Venetian publisher Alessandro Vincenti himself compiled and published Berti's two volumes after having previously published Grandi's. The wide stylistic range of Berti's music, together with his position as one of the earliest Venetian composers of monody, make him one of the most important composers of secular song of his time.

ROARK MILLER

**Bertie, Willoughby.** *See* ABINGDON.

**Bertin, Louise(-Angélique)** (*b* Les Roches, 15 Jan 1805; *d* Paris, 26 April 1877). French composer. She was the daughter of Louis Bertin and sister of Armand Bertin, successive proprietors and editors of the influential *Journal des débats*. She was brought up in an artistic and literary milieu, and her energies were channelled into painting and poetry as well as music. She had singing lessons from Fétis, who directed a private performance in 1825 of her first opera, *Guy Mannering*, following the current fashion for Scott's novels, with a libretto written by herself. In 1827 *Le loup-garou*, to a libretto by Scribe, was produced at the Opéra-Comique. But this one-act opera of intrigue, with its Rossinian music, was less characteristic of her lofty aspirations than the two larger operas that followed: *Fausto* in 1831 for the Théâtre Italien, in which a marked originality of style was observed, and *Esmeralda*, produced at the Opéra in 1836, to a libretto by Victor Hugo based on his own *Notre-Dame de Paris*. Despite the prestige of Hugo and the Bertins, or more probably because of it, and falling very much under the shadow of the success of *Les Huguenots*, the opera was not a success. Berlioz, critic of the *Débats*, gave Louise Bertin much assistance in the preparation of the production, although this did not extend, as some maintained, to composing the music for her. He acknowledged only that he suggested an improved end to Quasimodo's aria in Act 4. He held a high opinion of certain parts of the opera and criticized it for its extreme irregularity of phrasing and heavy orchestration, both evidence of the music's boldness for contemporary ears. Her style had developed very quickly in a short period.

The failure of *Esmeralda* turned Bertin away from opera, and her music thereafter, mainly a series of cantatas, was played only in private. She published two volumes of poetry, *Glanes* in 1842 and *Nouvelles glanes* in 1876. Throughout her career she had to contend with the prejudice against women which forced her sometimes to conceal her identity as a composer, and also against partial paralysis, from which she suffered from birth.

WORKS

*printed works published in Paris*

OPERAS

Guy Mannering (oc, 3, L. Bertin, after W. Scott), Bièvres, 25 Aug 1825, *US-Bp*

Le loup-garou (oc, 1, E. Scribe and E. Mazères), Paris, OC (Feydeau), 10 March 1827 (1827)

HUGH MACDONALD

**Bertin de La Doué, Toussaint** (*b* Paris, *c*1680; *d* Paris, 6 March 1743). French composer. Generally known incorrectly by the first name of Thomas, he was the son of a Parisian master carpenter, Jacques Ladoué; in 1705, the year of his marriage, he is recorded as teaching the harpsichord and 'other instruments'. The following year his first dramatic work, *Cassandre*, composed in collaboration with François Bouvard, was performed at the Opéra. He wrote two more *tragédies en musique*, *Diomède* (1710) and *Ajax* (1716), the latter enjoying particular success in the provincial theatres of Lyons, Nantes and Bordeaux as well as in Paris, where it was revived in 1726, 1742 and 1770. He later composed a *pastorale-héroïque*, *Le jugement de Pâris* (1718), and an *opéra-ballet*, *Les plaisirs de la campagne* (1719). Between 1714 and 1734 he played the harpsichord for the continuo in the orchestra of the Opéra. From 1716 onwards he gave harpsichord lessons to the regent's daughters and was organist at the Théatins church in Paris.

Bertin de La Doué was one of the most characteristic composers of the French Regency. His *tragédies en musique* were influenced by the disciples of Lully: his tempest in *Diomède* is directly inspired by the tempest in Marais' *Alcyone*. However, his work also provides evidence of the italianate tendency successfully promoted by Campra. He excelled in evocation of the then fashionable pastoral world, with 'hunting sounds' or 'musettes', and with *Les plaisirs de la campagne* he was one of the first composers for the musical theatre of Paris to abandon Lully's style of writing in five parts and adopt the four-part style (without 'quintes de violon') that was to be employed by Rameau.

WORKS

STAGE

*all first performed at the Paris Opéra*

*printed works published in reduced score in Paris, unless otherwise stated*

Cassandre (tragédie en musique, prol, 5, F.-J. de Lagrange-Chancel), 22 June 1706, full score (1706), collab. F. Bouvard
Diomède (tragédie en musique, prol, 5, J.-L.-I. de La Serre), 28 April 1710 (1710)
Ajax (tragédie en musique, prol, 5, A. Menesson), 20 April 1716 (1716)
Le jugement de Pâris (pastorale-héroïque, prol, 3, M.-A. Barbier and S.-J. Pellegrin), 14 June 1718 (1718)
Les plaisirs de la campagne (opéra-ballet, prol, 3, Barbier and Pellegrin), 10 Aug 1719, *F-Po**, autograph full score (1719)

OTHER WORKS

Airs in: Lully: Atys, Dec 1709 (1709); Lully: Psyché, 22 June 1713 (1734)
Airs sérieux et à boire (Paris, 1700, 1703, 1705–13, 1715, 1717)
Prélude non mesuré pour le clavecin (*F-Pn*)

JÉRÔME DE LA GORCE

**Bertini, (Benoît-)Auguste** (*b* Lyons, 5 June, 1780; *d* London, after 1843). French composer, half-brother of HENRI BERTINI. He was the son of a church musician, Gabriel Bertin (1746–1819), who composed a number of masses and motets. In 1793 he went to London as a pupil of Clementi and made his first public appearance as a pianist on 14 February 1793 in Salomon's second concert. He met Haydn and dedicated his Three Grand Sonatas op.1 to him. He remained Clementi's pupil until 1799 and moved in 1806 to Paris. The refusal by the Théâtre Feydeau to mount his opera *Le prince d'occasion* in 1817 caused him to move to Naples. Subsequently he taught in Amsterdam and Brussels and returned to London, where a series of 36 Grand Fantasias for piano were published in the 1830s. Some of these are fashionably descriptive, others exploit unusual combinations of hands, with curiosities such as the *One-fingered Waltz*. He also devised a musical shorthand, pincers for giving extra facility to the wrist, and various diagrammatic teaching systems.

HUGH MACDONALD

**Bertini, Gary** (*b* Brichevo, Bessarabia [now Moldavia], 1 May 1927). Israeli conductor and composer of Russian birth. Taken to Palestine as a child, he began violin lessons at the age of six. He later studied at the Milan Conservatory (1946–7), in Israel, and at the Paris Conservatoire (1951–4) while taking further studies with Nadia Boulanger, Chailley, Honegger and Messiaen. In 1954 he returned to Israel and taught conducting at the Music Teachers' College, Tel-Aviv, and later at the Rubin Academy of Tel-Aviv University, where he was appointed a professor in 1975. In 1955 he formed the Rinat Choir, which quickly acquired a wide reputation and became the Israel Chamber Choir. Bertini's orchestral début was also in 1955 with the Israel PO, with which he first toured the USA and East Asia in 1960. His British début was in 1965 with the English Chamber Orchestra at the Bath Festival, and he became a frequent visitor to Britain, conducting many BBC concerts and, from 1970, forming a close

association with the Scottish National Orchestra (of which he was principal conductor, 1971–8) and Scottish Opera. He made his Paris Opéra début in 1975 with Dukas' *Ariane et Barbe-bleue*, and his Berlin début the next year with *Die Entführung*. In Israel Bertini has given the premières of many works, notably those of Partos and Seter, and in 1965 he formed the Israel Chamber Ensemble, comprising an opera group as well as an orchestra, with which he has toured in Europe and the USA. He conducted the premières of Tal's *Ashmedai* at the Hamburg Staatsoper in 1971 and his *Massada 967* at the 1973 Jerusalem Festival. A dynamic and versatile conductor in a wide repertory, Bertini is also a skilled lecturer and has given frequent illustrated concerts for young audiences. His enthusiastic support of Israeli music is reflected in recordings of over 20 orchestral works by Israeli composers. In 1964 he became music adviser to the Batsheva Dance Company, and he has composed incidental music for some 40 plays produced by Habima (Israel National Theatre) and the Cameri Theatre. His other compositions include a Concerto for horn, strings and timpani (1952), a ballet *Delet aluma* ('Unfound door', 1962), a violin sonata, songs and choral arrangements. In 1976 Bertini became musical director of the Israel Festival. The following year he conducted the première of Tal's opera *Die Versuchung* at the Munich Festival and became musical director of the Jerusalem SO, a post he held until 1986. During this time he created the annual Liturgica Festival, which features sacred music from all periods. In 1981–3 he served as music adviser to the Detroit SO, and from 1983 to 1991 he was chief conductor of the Cologne RSO. From 1987 until his resignation in 1990 he was music director and Intendant of the Frankfurt Opera. At Frankfurt he conducted the première of Cage's *Europeras 1 & 2* in 1987. From 1994 to 1997 he was artistic director of the New Israel Opera, introducing several operas which had never been performed before in the country and conducting the première of Tal's *Joseph* in 1995. Bertini was appointed music director of the Tokyo Metropolitan SO in 1998. In May 1998 he gave the world première of Philippe Fénelon's *Salammbô* at the Opéra Bastille in Paris, where he became a regular guest conductor in 1995. Besides his recordings of music by Israeli composers, his extensive discography includes the first commercial recordings of Weill's first and second symphonies and Mahler's completion of Weber's *Die drei Pintos*, Bernd Alois Zimmermann's *Requiem für einen jungen Dichter* and a cycle of Mahler symphonies. Bertini is the recipient of several prizes and honorary titles, among them the prestigious Israel Prize (1978).

WILLIAM Y. ELIAS

**Bertini, Giuseppe** (*b* Palermo, 20 Jan 1759; *d* Palermo, 15 March 1852). Italian musician and lexicographer, son of SALVATORE BERTINI. He was educated at the Scuole Pie degli Scolopi and became a priest, devoting himself to music and to studies in archaeology and the literary and cultural history of Sicily. In 1789 he and his brother Natale Bertini (*c*1750–1828) contributed music to the memorial services held in Palermo for Carlo III and the Infante Gennaro Carlo. At that time he was deputy *maestro di cappella* under his father in the Cappella Palatina and he later became *maestro di cappella* there. In May 1828 he replaced his brother Natale as president of a *commissione di censura* for sacred music, constituted by royal decree in December 1827 to eliminate theatrical elements from church music and to draw up a list of approved works. Bertini held this post for about two years, after which the commission apparently dissolved without having accomplished anything.

Bertini is best known to music for his *Dizionario storico-critico degli scrittori di musica* (Palermo, 1814–15); one of the earliest Italian works of its kind, it relies heavily on the dictionary of Choron and Fayolle, but includes some valuable material on Italian figures. According to Fétis, he composed a large amount of music for Vespers and the Mass, but none is known to survive. Two settings of lessons for Holy Week, sometimes ascribed to him, appear with his father's name in the Santini collection (in *D-MÜs*).

**Bertini, Henri(-Jérôme)** (*b* London, 28 Oct 1798; *d* Meylan, 30 Sept 1876). French pianist and composer, half-brother of AUGUSTE BERTINI. He spent his childhood in Paris and was the pupil of his father, but more especially of his brother, who passed on the fruits of Clementi's teaching. At the age of 13 he was taken on tour by his father, playing in Belgium, Holland and Germany. Later he spent some time in London and Scotland before settling in Paris in 1821. His life was uneventful, devoted to giving concerts, teaching and the production of an immense number of compositions, reaching 180 opus numbers. As a player he had Clementi's clarity of technique and a style of phrasing akin to Hummel's and Moscheles's. He was less brilliant in manner than Kalkbrenner and Herz, and was, according to Marmontel, no dreamer or Romanticist despite his association with the leading figures of the 1830s; he concentrated more on strict pedagogy. His compositions include numerous rondos, fantasias, variations, divertissements etc., and his studies were used for over a century. He published a nonet, six sextets for the piano and strings, and many smaller chamber works. Three nonets and three symphonies for the piano and orchestra are among his unpublished works.

HUGH MACDONALD

**Bertini, Salvatore** [Salvadore] (*b* Palermo, 1721; *d* Palermo, 16 Dec 1794). Italian composer. According to his son GIUSEPPE BERTINI (*Dizionario*), he had his first music lessons from Pietro Pozzuolo, a Palermo musician; he was sent to Naples, where he studied logic at the Jesuit college and then, for eight years, music under Fago and Leo at

the Turchini Conservatory, receiving his diploma in composition in 1746. On graduating he was offered a post at the Russian court, but he refused it on religious grounds. On 9 March 1748 he was named substitute *maestro di cappella* at the Cappella Palatina, Palermo, in place of Perez, who was given leave to travel. Perez never returned, but Bertini became titular *maestro* only in 1778 on Perez's death. In 1772–3 he composed three occasional dramatic works, performed at the royal palace in Palermo – Giuseppe Bertini related that a great storm at sea on his father's return from a later trip to Rome and Naples caused him to vow to write nothing but sacred music if saved. Two oratorios, now lost, are known from the 1750s, but two *Miserere* settings, one for two choruses and another (in *D-MÜs*) for four voices and organ for Maundy Thursday, were his most famous works; two of his Lamentation settings are also extant (in *MÜs*). In 1789 he contributed considerable music to Palermo's memorial services for Carlo III and the Infante Gennaro Carlo. Bertini wrote the mass for the climactic final ceremony, performed with 40 singers and 97 players and praised by Blasi for its excellent counterpoint, original ideas and suitability to the text. A generation later, Giuseppe Bertini described his father's church music as out of date because of its theatrical style, but praised it as clearly and simply written and without excessive instrumental activity. A set of three accompanied piano sonatas op.1 (London, *c*1800), often attributed to him, is actually by Benoît-Auguste Bertini.

□

**Bertinotti(-Radicati), Teresa** (*b* Savigliano, Piedmont, 1776; *d* Bologna, 12 Feb 1854). Italian soprano and teacher. After singing at the age of 11 in a children's performance at the Teatro S Carlino in Naples, she studied with La Barbiera for four years and began her career as an operatic singer. By the time of her marriage to Felice Radicati in 1801, she was already well known in Italy as a prima donna. From 1801 to 1805 she continued to sing in Italy and, according to Schmidl, appeared in Russia in 1803. From 1805 to 1808 the Radicatis were in Germany and Austria; a Munich reviewer praised her in Cimarosa's *Gli Orazi* (September 1806) as 'a sensitive, sweet singer with a voice not too strong or brilliant, but pleasant, clear and moving'. In 1809 she sang in the Netherlands on the invitation of Louis Bonaparte, and from 1810 to 1812 she appeared at the King's Theatre in London, enjoying particular success in Mozart operas. The next two years she sang at the Teatro S Carlo in Lisbon. Thereafter her career declined; her Paris performances in 1817 and 1818 were received less favourably. She continued to sing in Italy until 1820, the year of her husband's death, but then retired from the stage and devoted herself to teaching singing.

ALBERT MELL

**Bertola, Giovanni Antonio.** *See* BERTOLI, GIOVANNI ANTONIO.

**Bertoldi, Bertoldo di** (*b* Castel Vetro, nr Modena; *fl* 1544). Italian composer. He may have been a cleric. His known output consists of a single volume of four-voice madrigals (Venice, 1544). From the dedication, to Laura d'Este, it appears that he had, or wished to have, some connection with the Este family in Ferrara. His madrigals, which are settings of texts commonly used at the time, are competently written in a somewhat unadventurous style reminiscent of Arcadelt.

JAMES HAAR

**Bertoldo** [Bertholdo], **Sperindio** [Sperandio, Sper'in Dio] (*b* Modena, *c*1530; *d* Padua, 15 Aug 1570). Italian composer and organist. On 1 January 1552 'Master Sperandio' was organist of Padua Cathedral. In 1557 he obtained a ten-year contract with a substantial increase in pay. In 1567 his income was raised again, with a 16-year contract, but in the same year he was suspended from his job for insubordination and the chapter began seriously to look for a successor. After some months the bishop informed the chapter members that their organist had apologized, and he was reinstated. Evidently things went smoothly after that; the payment of his salary was continued to his widow after his death. In the dedications of his two extant books of madrigals Bertoldo described them as the 'second and third parts' of his work; what he meant as the 'first part' is not specified.

Bertoldo's keyboard compositions, published posthumously, provide an important link between the music of Marc Antonio and Girolamo Cavazzoni and that of the Venetian composers Claudio Merulo and Andrea and Giovanni Gabrieli. The *canzoni francese* feature florid ornamentation with trills and rapid scale passages in both hands; this type of decoration also characterizes Bertoldo's two toccatas. The ricercares on the first and third tone are excerpted from ensemble pieces by Annibale Padovano, with ornaments added in the soprano and tenor parts, while the ricercare on the sixth tone appears to be an early example of monothematic ricercare.

KLAUS SPEER/KIMBERLY MARSHALL

**Bertoli** [Bertola], **Giovanni Antonio** (*b* Lonato, bap. 27 Jan 1598; *d* ? after 1645). Italian composer and bassoonist. He served as an altar boy and chorister in the parish church of Lonato and studied alongside Antonio Bertali and Pietro Verdina for the priesthood at the acolytes' school in Verona, under Stefano Bernardi. From April 1614 to July 1615 he played the cornett at Verona Cathedral. In the dedication of his *Salmi intieri* (Venice, 1639) to Emperor Ferdinand III, he declared that he had been in the service of Archduke Carl Joseph Habsburg,

Bishop of Breslau and Bressanone, presumably following on from his teacher Bernardi, who was in the archduke's employ from 1622 to 1624. In the two prefaces to his *Compositioni musicali* (Venice, 1645) he stated that he was persuaded to publish the collection by Francesco Turini, organist of Brescia Cathedral and the volume's dedicatee, and by two musicians working at the court of Ferdinand III, Bertali and Giovanni Sansoni, an indication both that he was definitely in Italy during that period and that he continued to have a stable connection with the Habsburg imperial chapel. According to the posthumous tribute by Stefano Pasino found in the preface to his sonatas of 1679, Bertoli also conducted a group of wind players active in the 'sacred chapels of Lombardy'.

His *Compositioni musicali* is not only the first published set of sonatas for bassoon, but also the first known collection devoted to solo sonatas. The elaborate structure of the pieces derives from an established improvisatory practice that involved strophic variation and an increase in technical difficulty for the player. In each sonata the continuo introduces a short motif that returns several times in the form of an interlude. A series of extended passages is varied by both soloist and continuo, each variation bringing with it an increase in acceleration and an escalation of rhythmic complexity. The earlier collection of *Salmi intieri* reveals Bertoli's mastery in adapting the most up-to-date techniques in concertato writing to a complete cycle of psalms, including a five-voice Magnificat and the four main Marian antiphons for three voices, two violins or cornetts and continuo.

GABRIELE BONOMO

**Bertolini, Orindio.** *See* BARTOLINI, ORINDIO.

**Bertolli, Francesca** (*b* Rome; *d* Bologna, 9 Jan 1767). Italian contralto. In 1728 she was in the service of the Grand Duchess of Tuscany and sang in two operas in Bologna and two in Livorno. Handel engaged her for the second Royal Academy at the King's Theatre (1729–33); she appeared in 15 or 16 of his operas, in Ariosti's *Coriolano*, Leo's *Catone* and two pasticcios. She took part in Handel's first London performances of oratorio, singing in *Esther* and the bilingual *Acis and Galatea* (1732), and in the following year in *Deborah*. From 1733 to 1736 she sang with the Opera of the Nobility in 12 operas, including five by Porpora, Veracini's *Adriano*, and revivals of Bononcini's *Astarto* and Handel's *Ottone*. She returned to Handel (1736–7) and sang in four or five of his operas, and in a pasticcio based on Vinci's *Didone*. She sang in the first performances of Leo's *Achille in Sciro* and Galuppi's *Adriano in Siria* in Turin (1740), in Vicenza (1740), Venice (three operas in 1740–41) and Genoa (1742). She retired soon after, but appeared with Bernacchi in a private concert at Bologna in February 1746. She was married to one Vincenzo Corrazza.

No singer except Strada and Senesino appeared in so many of Handel's operas. The nine parts he composed for her, Idelberto in *Lotario*, Armindo in *Partenope*, Gandartes in *Poro*, Honoria in *Ezio*, Melo in *Sosarme*, Medoro in *Orlando*, Ramisa in *Arminio*, Leocasta in *Giustino* and Selene in *Berenice*, indicate a voice of limited range and capacity; her regular compass was *b*♭ to *e″*. She specialized in male roles, as the above list suggests. Mrs Pendarves, who was contemptuous of her voice, ear and manner, described her as 'a perfect beauty, quite a Cleopatra'. In 1733 she was courted (unsuccessfully) by the Prince of Wales.

WINTON DEAN

**Bertolotti, Bernardino** (*b* Salò, 26 March 1547; *d* ?Rome, after 1609). Italian instrumentalist and composer. Bernardino was the son of Agostino, from 1571 to 1582 *maestro di cappella* of Salò Cathedral and a member of a famous family of instrumentalists and instrument makers. He was employed as an instrumentalist at the court of Ferrara from December 1578 until its dissolution early in 1598. A letter (in *I-MOs*) states that one of his functions at Ferrara was as a violinist. He served Duke Vincenzo Gonzaga of Mantua briefly in 1598 and dedicated the third book of madrigals to him. He was almost certainly employed as a trombonist at S Luigi dei Francesi, Rome, in March 1600 and, according to the title-page of the third book of madrigals, in 1609 he was instrumentalist of the pope in Castel S Angelo in Rome. He was a composer of minor importance and managed to preserve the conventional style of the canzonetta-madrigal even in the midst of the revolutionary developments in style characteristic of the early 1590s in Ferrara. A comparison of his setting of *Io t'amo* of 1593 with Luzzaschi's of 1594 well illustrates the two differing approaches. No works by Bertolotti were included in the anthologies of works by Ferrarese musicians assembled during the 1580s and 90s. Gasparo Bertolotti, known as Gasparo da Salò, was Bernardino's nephew.

ANTHONY NEWCOMB

**Bertolotti, Gasparo.** *See* GASPARO DA SALÒ.

**Bertolusi** [Bertholussius, Bertholusius, Bertulusius], **Vincenzo** [Vincentius] (*b* Murano; *d* Copenhagen, 18 Sept 1608). Italian composer and organist. He was probably educated in Venice. He went to Poland in 1595 and was an organist in the chapel of King Zygmunt III Vasa at Kraków until 1607, when he moved to the court of King Christian IV in Copenhagen. A few madrigals included in anthologies (RISM 1577[7], 1584[4], 1598[9]) are known from his Italian period. In Poland he composed 29 polychoral motets, published as *Sacrarum cantionum ... 6, 7, 8 et 10 vocibus liber primus* (Venice, 1601); ten appear reprinted in other collections or in manuscripts (*Ego flos campi*,

6vv, ed. in Musik i Danmark på Christian IV's tid, v, Copenhagen, 1988). Two other motets were included in the collection *Melodiae sacrae* (ed. W. Lilius, Kraków, 1604), which consists of works by Zygmunt III's musicians. Two instrumental pieces, a ricercare and a fantasia, survive in manuscript at the Lithuanian National Library in Vilnius.

ZYGMUNT M. SZWEYKOWSKI

**Bertomeu (Salazar), Agustín** (*b* Rafal, Alicante, 23 Dec 1929). Spanish composer. After receiving a basic musical education from his father, Manuel Serrano Folguera and José Izquierdo, he studied at the Real Conservatorio Superior de Música, Madrid, where he was taught by Conrado del Campo, Julio Gómez and others (1948–52); he also took private composition lessons from Tomás Blanco. He joined the Spanish navy as its director of music in 1955. From 1963 he attended the Darmstadt summer courses for new music, where the influence of Boulez and Stockhausen effected a radical transformation of his compositional style. Hitherto notable for his nationalist and neo-classical tendencies, he now adopted serial techniques as well. After 1970 characteristics of his works include effective formal structures, sophisticated instrumentation and graphic notation. Despite many national and international awards (for *Museo del Prado* in 1967; *Sinfonía equidistante* in 1972 and 1974; *Concierto galante* in 1980; and the Cello Concerto in 1989) and frequent performances of his music at major contemporary music festivals, his works are not well known outside of Spain.

CHRISTIANE HEINE

**Berton.** French family of composers and performers.

(1) **Pierre-Montan Berton** [Le Breton] (*b* Maubert-Fontaine, Ardennes, 7 Jan 1727; *d* Paris, 14 May 1780). Composer, conductor and arranger. He was a boy chorister in Senlis Cathedral, and studied the organ, the harpsichord and composition at the choir school. Some of his youthful motets were performed at the cathedral. He left for Paris to continue his studies, receiving encouragement from J.-M. Leclair, and at 16 joined the choir of Notre Dame as a tenor. After two years he was engaged as a singer at the Paris Opéra, but withdrew immediately (possibly because of shyness) and joined the cello section. From about 1746 he sang bass parts at Marseilles for two years and then became musical director at the Bordeaux Grand Théâtre, where he began the career of editing and arranging for which he is remembered. He also directed concerts, served as organist at two churches and composed ballet music which was well received.

Berton returned to Paris in about 1753, and in 1755 won by competition the post of orchestral director at the Opéra in succession to Boyer. In September of the same year his first stage work, the opera-ballet *Deucalion et Pyrrha*, composed in collaboration with F.J. Giraud, was performed at the Opéra. Although his own stage works had little success, he excelled in the arrangement of older stage works to suit contemporary taste. In general, this process involved cuts, reorchestration, new recitatives and the insertion of newly composed material, including ballets, arias and choruses; existing recitatives were sometimes modernized with string accompaniment. The first work known to have received such attention was Campra's *Camille, reine des Volsques* in 1756, and eventually Lully's and even Rameau's operas were modified similarly. Berton's most successful personal contribution was a chaconne (commonly known as the *Chaconne de Berton*), originally heard in the 1762 revival of Campra and Desmarets' *Iphigénie en Tauride*. All the works that Berton arranged were performed at the Paris Opéra; some were published and manuscripts survive (in *F-Pc* and *Po*), but research has yet to determine the exact extent of these revisions and the dates on which they were definitely introduced (the list below gives the most likely dates).

In 1767 Berton and J.-C. Trial succeeded François Rebel and Francoeur as managers of the Opéra; Berton remained a director when the city of Paris resumed financial control in 1769. He became general administrator of the Opéra in 1775–6 and 1777–8, retiring after the young Devismes bought control. The pension he secured lapsed with his death, this bearing upon the career of his son (2) Henri-Montan. Berton was also master of the King's music (1760), and director of the Concert Spirituel (1771–3). He had taken direction of performances at Versailles from 1768 in both the royal theatre and the chapel. He apparently died of complications following

the fatigue of directing his own arrangement of Rameau's *Castor et Pollux* on 7 May 1780.

Berton radically raised orchestral standards at the Opéra from 1755 and assiduously looked for new talent; by updating performance techniques and facilitating the arrival in Paris of Gluck and Piccinni he paved the way for those composers in France. (He composed the ballets for the 1775 production of Gluck's *La Cythère assiégée* at the Opéra.) In his own compositions no conspicuous individuality of style is apparent. There are reminders of Stamitz and Rameau and, in *Silvie*, italianate display arias and secco recitative. Occasionally there are fetching melodies (such as the musette 'L'âge d'or' in *Deucalion*) or an unexpected harmonic ellipsis (as in the 'Gigue gratieuse' from *Erosine*).

WORKS

*printed works published in Paris*

STAGE

Deucalion et Pyrrha (opéra-ballet, 1, G.-F.P. de Saint-Foix and P. Morand), Paris, Opéra, 30 Sept 1755, *F-Po*, 1 duet *Pc*; (n.d.), collab. Giraud

Silvie (opéra, prol., 3, P. Laujon), Fontainebleau, 17 Oct 1765 (1767), collab. J.-C. Trial

Erosine (pastorale-héroïque, F.-A. Paradis de Moncrif), Fontainebleau, 9 Nov 1765 (1766) [3rd entrée of Moncrif: *Les fêtes lyriques*]

Théonis, ou Le toucher (pastorale-héroïque, 1, A.-A.-H. Poinsinet), Paris, Opéra, 11 Oct 1767, *Pc*, *Po*, collab. Trial, Granier [2nd entrée of Poinsinet: *Fragments nouveaux*]

Adèle de Ponthieu (tragédie lyrique, 3, R. de Saint-Marc), Paris, Opéra, 1 Dec 1772, *Po*, frags. *Pn**, collab. J.-B. de La Borde; rev. in 5 acts, 1775

Linus, 1775 (opéra, 5, C.-A. La Bruère), inc., *Pn*, collab. Trial and Dauvergne

Addns and modifications to operas by other composers (see *OG* work-list)

OTHER WORKS

Acis et Galathée, cant. (n.d.) [parody of Berton's Chaconne]

In convertendo, motet, 1755

Songs: Selma; Vous à qui deux beaux veux assurent la victoire; Le premier amour; L'amour filial: Le jour répand sur la nature, duo

Other vocal works

Dance movements, incl. Chaconne de Berton [orig. written for Campra and Desmarets: Iphigénie en Tauride, 1762]

**(2) Henri-Montan Berton** (*b* Paris, 17 Sept 1767; *d* Paris, 22 April 1844). Composer, teacher and writer, son of (1) Pierre-Montan Berton. According to Adolphe Adam, who based his account on Berton's verbal reminiscences, Berton received little musical training from his father, who believed that proficiency came naturally. Thus, although Henri could read a score at the age of six, played keyboard instruments and the violin and later received some instruction in composition from J.-B. Rey (the conductor at the Opéra), he had no professional training; moreover Fétis wrote that Rey was not wholly sympathetic towards his pupil. What must have been a highly favoured musical household came to an end with the death of (1) Pierre-Montan. Shortly thereafter (or, according to Fétis, two years later), Henri Berton joined the Opéra orchestra as a violinist. At this time, when he was seeking further guidance in composition, his work was shown to Sacchini who subsequently helped him not, apparently, by imparting formal harmony or counterpoint, but by attempting to develop unity of style, coherence of melodies, and dramatic effectiveness in his stage compositions. From Sacchini and from Paisiello's *La frascatana*, an early model, Berton adopted the easy melodic grace of the Italian style. Today this is heard as a Mozartian feature, but Berton had not yet encountered Mozart's music.

Evidently Berton's first publicly performed works were the opera *Le premier navigateur* (in 1784) and the cantatas he wrote for the Concert Spirituel, beginning in 1786. A favourable notice appeared in the *Mercure de France* in April 1787 after one of his cantatas was performed: 'Each day this young composer increasingly justifies the expectations which he has created and stirs the public's desire to see him work on a larger scale, more appropriate to his talents'. Berton, who was now supporting a family, continued with cantatas and stage works until the outbreak of the Revolution. The subsequent changes of direction in French music and dramatic taste proved crucial to him. The first flood of anti-clericalism resulted in his setting of *Les rigueurs du cloître*, in which a young nun is saved from entombment at the hands of a corrupt mother superior. Hardly the most subtle of operas, it nevertheless advanced his reputation and stands as one of the earliest prototypes of *Fidelio*. Several operas on topical themes followed, but Berton was evidently less interested in producing music for the Revolutionary cause than were many others; most of his functional Revolutionary music postdates his appointment as harmony professor at the new Paris Conservatoire (in 1795), an institution founded partly to provide music and musicians for public festivals.

Operatic work continued after a brief interval with *Ponce de Léon* (1797), for which Berton wrote both the libretto and the music, perhaps in a deliberate attempt to create greater dramatic freedom for his music. The ensembles of this comedy are certainly lively and effective, but the general dramaturgy is commonplace. In 1799 he presented his most original operas, *Montano et Stéphanie* and *Le délire*. Both have simple stories but high passions: the first work depicts the exploitation of innocence and the second the healing of a mentally deranged husband. Both held the stage for many years. *Montano* enjoyed performances throughout Europe and was given at Weimar as late as 1845; excerpts were played at concerts well into the 19th century. These operas were exceeded in their popularity only by *Aline, reine de Golconde* (1803), which reached the USA before being revived in Paris in 1847. Many published selections from these works were in circulation.

From 1807 to 1810 Berton was musical director at the Théâtre de l'Impératrice (Opera Buffa); this was followed by a period as chorus master at the Opéra (1810–15). His last really popular work, *Françoise de Foix* (1809), marked the beginning of a long decline in public estimation, despite a total of nine further original operas and several more in collaboration with such figures as Cherubini, Boieldieu and Kreutzer. He also made new arrangements of operas by Gluck (*Echo et Narcisse*, 1806), Mozart (*Così fan tutte*, 1813), Sacchini (*Arvire et Evelina*, 1820) and Grétry (*Guillaume Tell*, 1828). Berton was elected a member of the Institut in 1815, and devoted himself to teaching and writing. He took over Méhul's composition class at the Conservatoire (on 1 January 1818) on the latter's death. Later, Rossini's great popularity prompted him to write the pamphlet *De la musique mécanique* in 1826, and it appears that he became a disillusioned man. In 1828 he suffered through the bankruptcy of the Opéra-Comique, to which he had sold the right of performing his works for an annuity of 3000

francs. Berlioz's letters suggest not only Berton's disapproval of Spontini's music but opposition to all new developments whether by Berlioz or anyone else. In 1827 Berlioz reported Berton as saying, 'There is nothing new in music ... why try to improve upon the great masters?'. He was made an Officier of the Légion d'Honneur in 1834 and received official recognition from several other countries. By his death he had taught at the Conservatoire for nearly 50 years.

Whether or not Berton really said what is reported above, it is important to know that on his own admission those masters he regarded as classics included Haydn and Mozart, and that several features of his own compositions vividly anticipate concerns of later Romantic music. His harmony treatise (1815) discloses a willingness to deduce musical laws from the relatively recent past. His analysis of phrase structure is coherent and expressed in up-to-date harmonic terms. There are sections on enharmonic and chromatic progressions including the augmented 6th chord, which he used freely in his own music. The three-volume dictionary of chords, appended to the treatise, is, however, far too rigid to be of any use.

Berton recommended fugue as an exercise, partly for its value in conferring unity in composition. Various other means of establishing unity are demonstrated in his operas; in *Le délire* and *Montano et Stéphanie*, motivic cross-reference and development are carried to impressive lengths, and the parallel-5th motif which opens *Le délire* is treated as a veritable *idée fixe*, representing Murville's derangement. Other operas seek unity by starting a new act with the music which concluded the preceding one. Berton's operas after 1789 never neglect the balanced and vocal Mozartian lyricism previously mentioned. But the second subjects of several overtures exploit the long-drawn-out, irregularly phrased instrumental melody found typically in the music of Schubert and Berlioz. He conceived many ideas directly in orchestral terms and shared with his compatriots an interest in unusual orchestration: a *romance* in *Eugène* is accompanied only by four violas.

Ex.1 H.-M. Berton: *Le délire*

Contemporary audiences were astounded by the tumultuous choral crescendo in the finale of Act 2 of *Montano* (though this was not a new feature in Berton's music). Chorus scenes later became even more prominent; in the chivalric *Françoise de Foix* the structural stiffness and the emphasis on marching choruses recall Spontini. Berton's extreme use of psychological illustration is demonstrated in the scene from *Le délire* depicting Murville's collapse after having a hallucination of his wife, whom he believes to be dead (ex.1).

There are many streaks of originality in Berton's works, though not a persistent theatrical vision, and he never established a stable partnership with one librettist. His one undisputed success was *Les deux mousquetaires* (1824), seen each year to 1834 in 117 performances; but *Ponce de Léon* (1797), to his own libretto, enjoyed no fewer than 33 performances. Opposing musical lines (and love of wit) are exploited in his numerous and varied canons for voices. An ingenious eight-part example from the first collection contrasts four chromatic and four diatonic voices (at opposite ends of the table) and incorporates a pedal point for the non-singers. Berton's *romances* were praised by Gougelot, but do not appear to exceed the narrow limits of expression usually adopted in this genre of French music.

**(3) Henri** [François] **Berton** (*b* Paris, 3 May 1784; *d* Paris, 19 July 1832). Composer and pianist, son of (2) Henri-Montan Berton. After musical instruction by his father, he entered the Paris Conservatoire in 1796. On leaving in 1804 he began to publish piano arrangements of operatic pieces (including his father's) and to compose. His first four stage works were produced in 1810 and 1811. *Ninette à la cour* displays fashionable levity with predominance of lively movements in the major mode, but no melodic originality. In fact, the first finale borrows the principal subject of the first movement of Mozart's piano duet sonata K358/186*c*. He subsequently concentrated more successfully on *romance* composition, employing a popular and sentimental style. From 1820 to 1 January 1828 he taught singing at the Conservatoire; he also gained fame as a pianist. *Une heure d'absence* failed in 1827, but *Le château d'Urtuby* was produced posthumously and found some favourable comment. Berton died in a cholera epidemic.

WORKS

STAGE

*all opéras comiques, first performed in Paris*

Le présent de noces, ou Le pari (1, R.A.P.A. de Chazet), OC (Feydeau), 2 Jan 1810
Monsieur Desbosquets (OC, 1, C.-A. Sewrin), OC (Feydeau), 6 March 1810
Jeune et vieille (1, C.-A. Chazet and C. Dubois), OC (Feydeau), 12 Jan 1811, collab. L.B. Pradher
Ninette à la cour (2, C.-S. Favart and C.A. Creuzé de Lesser), OC (Feydeau), 21 Dec 1811 (Paris, n.d.)
Les casquets (1, Mme Riccoboni and J.-B.-C. Vial), OC (Feydeau), 19 Feb 1821
Une heure d'absence (1, ?M. Loraux), OC (Feydeau), 26 Dec 1827
Le château d'Urtuby (G. de Lurieu and Raoul), OC (Ventadour), 14 Jan 1834

OTHER WORKS

Vocal: Quatuor pour la fête de Sainte-Thérèse, 1806, *F-Pc*; *c*100 songs, incl. Pourquoi tourmenter, 1814; N'est-ce pas là l'amour, 1815; La mort du chevalier, 1816; Le cour et le village; Laisse-moi te parler de Bastien; Non, vous n'êtes plus Lisette; many other titles listed in *MGG2* and catalogue of printed music, *GB-Lbl*
Pf: Les veillées parisiennes, ou Collection de contredanses, arr. pf (Paris, n.d.); 6 waltzes; arrs.; fantasias

**(4) Adolphe Berton** (*b* Paris, 1817; *d* Algiers, 28 Feb 1857). Tenor, son of (3) Henri Berton. After studying at the Paris Conservatoire, he began his career at the Opéra-Comique and the Théâtre de la Renaissance. Lack of success prompted him to seek work elsewhere in France and in 1843 he was employed in a theatre at Nice with his wife. They travelled to Algiers the same year and remained there, Berton's performances having been well received.

DAVID CHARLTON

**Bertoncini, Mario** (*b* Rome, 27 Sept 1932). Italian composer and pianist. He studied in Rome with Petrassi (composition, 1958–62) and Caporali (piano, 1948–56) at the conservatory and at the Accademia di S Cecilia, where he won the Nicola d'Atri Prize in 1962; later he won first prize in the Gaudeamus Foundation competition (1965). One of the founders of the Nuova Consonanza improvisation ensemble, he was artistic director of the Rome concert organization of the same name (1969–72). Bertoncini taught composition at the Pesaro Conservatory (1967–73) and then spent some time in Berlin on a grant (1974–6). He also taught at McGill University in Toronto before holding a long-term post at the Hochschule der Künst in Berlin (1977–98). His early works show the results of study of Petrassi, Dallapiccola and Webern. A turning-point came when he encountered the work of Cage, Feldman and Brown: after the *Sei pezzi* (1962) all of his scores allow for performer choice, and he has used graphic notation consistently since *Tune* (1965). In such pieces as *Spazio-tempo* Bertoncini came to unify sound and gesture in what he described as 'teatro della realtà'.

WORKS

*(selective list)*

Stage: Spazio-tempo (teatro della realtà), 1967–70; Illegonda (azione teatrale), 1968; Elisaveta Barn (incid music), 1984
Inst: 6 pezzi, orch, 1962; Quodlibet, va, vc, db, perc, 1964; Cifre, pf, variable no. of pfmrs, 1964–7: Tune, 5 suspended cymbals, 1965; Mariolina, hps, 1969–70; Scratch-a-matic, prep pf/any str inst, 1971; Pavana, fl, ob, cl, bn, hn, pf, 1974; Chanson pour instruments à vent, several pfmrs, 1974; Venti, 20 wind objects (40 players), 1980–82; Sinfonia 'dei respiri', 9 insts, 1997; Suite, prep pf, 1999
Other: Epitaffio in memoria di un conc., 3 sound sources, feedback, 1968; Chain reactions, multi media, wind hps, kinetic set of lights (2 groups of pfmrs), 1974, collab. P. Sedgley; Fokus, dancer, sound and light environment, 1974; Vele, 3 groups of aeolian hps (2 outdoors, 3rd operated by vocalists indoors), 1973–4; Alleluja, 8 gongs played on grand-pf mechanism, 1982; Str Qt no.1 'Die Lyra des Aeolus', 4 sound objects, 1990–92; Chanson pour instruments à vent no.2, 4 sound objects (4 players), 1992; Fuochi, 8 wind, CD, 1998–9; Exercice, 1 female dancer, interactive sound environment, 1999
Several vocal works

PIERLUIGI PETROBELLI

**Bertoni, Ferdinando (Gasparo)** [Giuseppe] (*b* Salò, nr Brescia, 15 Aug 1725; *d* Desenzano, nr Lake Garda, 1 Dec 1813). Italian composer. He studied composition with Padre Martini in Bologna. His first opera was the successful pasticcio *La vedova accorta*, first performed in Florence in 1745. It was repeated in Venice (1746) and elsewhere in Europe. The Venetian libretto identifies Bertoni as the composer of 'La Musica de' recitativi, e delle [9] arie'. His first serious opera, *Il Cajetto*, was staged privately, with puppets, in 1746. He composed two more *opere serie* within the year for commercial theatres in Venice, but was more successful in the comic genre: *Le pescatrici* (1751), on a Goldoni libretto, had 14 productions in 17 years throughout Europe, including Dresden (1754), London (1761) and Madrid (1765) in a Spanish translation by Ramón de la Cruz. *La moda* (1754) contains his earliest extant cavatinas, and Bertoni may have been the first to introduce the cavatina to opera.

With his appointment as *primo organista* at S Marco, Venice (1752), and *maestro* of the female chorus at the Ospedale dei Mendicanti (1753), Bertoni turned more to religious compositions and to serious opera, although his best comic opera, *L'anello incantato*, was written in 1771. In February of that year Mozart and his father may have heard Anna de Amicis sing in Bertoni's *Alessandro nell'Indie* (Venice, Teatro S Benedetto), and in 1778 Mozart requested a 'grand aria' by Bertoni, which Leopold sent to Mannheim. The Act 1 finale of *Alessandro* begins with accompanied recitative leading to a duet which includes a reprise of a cavatina and bravura aria from earlier scenes (sung now by opposite characters) and brilliant *passaggi* in thirds.

With the Bologna production of *L'olimpiade* (Carnival 1773), Bertoni began his professional association with the castrato Gasparo Pacchierotti, his former pupil in Venice. Following their triumphs in *Artaserse* (1776), *Medonte* (1777) and *Quinto Fabio* (1778), they travelled to London for the first of two visits with Bertoni as composer-in-residence and Pacchierotti as primo uomo at the King's Theatre. Of the seven operas Bertoni worked on during the first visit (1778–80), most were pasticcio versions of earlier works; only one new opera, *Il duca di Atene*, was composed. He wrote music for two other pasticcios: *Demofoonte*, in which Pacchierotti sang 'Non temer bell'idol mio' which became a favourite song, and *La governante* whose rondò 'La virginella' became a popular salon song, translated into English and French and transcribed for various instruments, as well as inserted in other operas.

During the second visit (1781–3), Bertoni composed two new operas, *Il convito* and *Cimene*. Pacchierotti sang in pasticcio versions of three other operas, and in a production of *Ifigenia in Aulide*. Bertoni returned to Italy with 'a bad portrait of Sacchini' and the Reynolds portrait of Burney for Padre Martini's collection.

Burney praised Bertoni's graceful and flowing melody and his 'clear and well-arranged' harmony, and found his style 'natural, correct, and judicious; often pleasing, and sometimes happy', but had qualms about his inventiveness. Caffi described his style as 'natural, clear, the voice part agreeable; the orchestration graceful, and not exaggerated'. Bertoni's progressive tendencies show mostly in his use of more flexible aria forms such as the cavatina, some 40 of which are found in his operas, and large scene complexes with accompanied recitative and fuller orchestration, as in *Armida abbandonata*. He wrote only one 'reform' opera, *Orfeo ed Euridice* (1776), on Calzabigi's libretto, patterned after Gluck's music. It was highly successful and his only opera printed in full score during his lifetime. Gluckists have never forgiven him for the similarities, yet Gluck himself 'borrowed' several Bertoni arias without attribution for his operas.

Although not a native of Venice, as was his wife, Bertoni was honoured as one of the city's greatest composers. He received many commissions for occasional cantatas and serenatas. Often set to laudatory texts in honour of Venetian nobility or visiting royalty, they were usually performed by singers currently appearing at one of the opera theatres. For the visit of the Emperor Joseph II on 15 July 1769 Bertoni conducted his cantata *La reggia di Calipso* at the Rezzonico palace with seven soloists, a chorus of 110 and orchestra, all females from the four Ospedali of Venice. More typical is his *La Galatea*, a 'serenata reduced to three voices', written for Pacchierotti, Anna Pozzi and Giacomo Panati, after their performance in Bertoni's *Armida abbandonata* at the Teatro S Benedetto in January 1781. The cantata *I voti del secolo XVIII* in 1791 again brought together two illustrious natives of Salò – the poet Mattia Butturini and Bertoni, as well as the Brescian castrato Giovanni Rubinelli, who had so impressed Michael Kelly in the 1783 Venetian revival of Bertoni's *Orfeo ed Euridice* and would repeat his role in 1795 at La Fenice. Bertoni's last cantata, *Il trionfo della virtù* (1804) for two choruses, was written for the Accademia degli Unanimi of Salò, which had elected him a member in that year.

Bertoni's religious works date from his earliest years in Venice. He achieved international recognition for his choral works written for the female chorus and orchestra of the Ospedale dei Mendicanti. Foreign visitors to Venice, such as Burney (1770), Beckford (1780) and Mount Edgcumbe (1784), later wrote enthusiastically about performances they witnessed under Bertoni. On 28 March 1775 the Emperor Joseph II, his brother Leopold and his children, attended unannounced a performance of Bertoni's oratorio *David poenitens* at the Mendicanti; it was performed later the same year in Vienna at the Kärntnertortheater in a concert of the Tonkünstler-Societät. Bertoni composed some 50 oratorios and, according to Smither, 'may have written more oratorios than any other composer of the 18th century'. His *Miserere* (1762) was performed annually at the Mendicanti. Caffi devotes four pages to a comparison between Bertoni's *Miserere* and that of Hasse (1728) for the Incurabili, also for four voices and in C minor, concluding that, if Bertoni had written no psalm other than this, he would be 'assured a place of honor among the classics'. Bertoni was elected a member of the Accademia Filarmon-

ica, Bologna, in 1773. In addition to the large repertory for female voices, Bertoni composed numerous works for mixed chorus during his 55-year association with S Marco, Venice. His Requiem for Admiral Angelo Emo in 1792 was also performed at his own funeral on 28 June 1814 at S Marco with Pacchierotti coming out of retirement to sing publicly for the last time in honour of his teacher and long-time friend.

Bertoni's earliest extant instrumental work is a solo harpsichord sonata in a collection of sonatas by 'celebrated Italian composers' published in Germany by Haffner in 1757. His six sonatas for the harpsichord or pianoforte with violin accompaniment were published as his op.1 in various European publishing centres over a 20-year span. The six string quartets, first published in London then in Venice as op.2, were dedicated to William Beckford. All of his instrumental works, including his sinfonias, are written in treble-oriented, pre-Classic, harmonic style in two and three movements.

Bertoni's success as an opera composer in Venice and admiration for his religious music led to his appointment as *maestro di cappella* of S Marco in 1785, without opposition; he succeeded Galuppi, whose career he had emulated since their collaboration in *I bagni d'Abano* (1753). He composed only two new operas after this appointment and retired in 1808. Among his pupils in his last years in Venice were Mayr and Antonio Calegari.

WORKS

OPERAS

*opere serie unless otherwise stated*

LKH – *London, King's Theatre*

GEORGE TRUETT HOLLIS

**Bertouch** [Bertuch], **Georg von** (*b* Helmershausen, 19 June 1668; *d* Christiania, 14 Sept 1743). Norwegian military officer and composer of German birth. Originally a titled family in Brabant, Bertouch's forebears emigrated for religious reasons to Germany, where his father, Jacob, was a teacher. At the age of 15 he studied the violin and composition with Eberlin, after which he proceeded to university. He matriculated at both Jena (25 April 1688) and Kiel (4 October 1691), where in January 1693 he presented a thesis, *Disputatio juridica de eo quod justum est circa ludos scenicas operasque modernas, dictas vulgo operen* (Kiel, 1693; ed. B. Kortsen, Bergen, 1970). On a

journey to Italy with Johann Nicolaus Bach, who was organist in Jena, he encountered the sons of a Danish general whose steward had died; assuming the vacant position, Bertouch travelled back to Denmark with them and embarked on a career in the Danish army. In the ensuing years he seems to have distinguished himself both militarily and musically; he is among the 13 famous musicians (along with Handel) to whom Johann Mattheson dedicated his *Das beschützte Orchestre*, where he is described as 'Königl. Dänischen Obristen von der Cavallerie, General-Adjutant des Durchl. Herzogs von Würtemberg und Haupt der musikalischen Academie zu Mecheln'. Bertouch's acknowledgement of this dedication was delayed (the war having prevented him from taking care of his personal affairs) and is dated 28 February 1719 from Akershus Castle in Christiania, of which he had just been made commandant in recognition of his long and faithful service. Mattheson made references to a cantata ('Heldenstück') *Gott zürnet über Israel*, for five voices and orchestra (his 'most recent composition'), and a *cantata da chiesa*, both now lost, as are the other compositions which Mattheson said Bertouch was in the habit of sending him. Three cantatas in the Berlin Staatsbibliothek may derive from this source: they are *Gott der Herr der Mächtige redet* for soloists, chorus, three violins and three violas da gamba, *Mein Herz ist bereit* for alto and continuo, and *Du Tochter Zion freue dich* for bass, strings and continuo.

Mattheson also owed to Bertouch the two accounts of a purported supernatural musical phenomenon experienced from time to time in the vicinity of Bergen, which he published under the title *Etwas Neues unter der Sonnen! oder Das unterirdische Klippen-Concert in Norwegen* (Hamburg, 1740). The music here included is in fact a *halling*, a Norwegian folkdance, and is apparently the earliest instance of the publication of a piece of Norwegian folk music. Bertouch was also in correspondence with J.S. Bach and, according to Spitta, wrote him a letter in 1738, probably accompanied by a copy of his *XXIV sonates composées par le canons, fugues, contre points & parties selon le sisteme de 24 modes & les preceptes du fameux musicien, componiste & polihistor Jean Mattheson a 3, avec la basse continüe*, which he said would be published the following year. No printed copy of this work, in which Bertouch imitated the plan of J.S. Bach's '48', is known, but a manuscript copy from which the first five sonatas and all but the last page of no.6 have been torn out survives (*DK-Kk* Ny kongl.Saml.Fol.110*d*).

There can be little doubt that a musician of Bertouch's international experience and standing exerted an important influence on the musical life of the Norwegian capital, but few details are known. He arranged for the Danish-born organist Johan Fredrik Clasen to be brought from Hamburg to the church of Our Saviour in 1720. Both he and Clasen contributed to the musical arrangements which celebrated the visit of King Christian VI to Christiania in 1733. He retired in 1740 with the rank of lieutenant-general.

JOHN BERGSAGEL

**Bertouille, Gérard** (*b* Tournai, 26 May 1898; *d* Ixelles, Brussels, 12 Dec 1981). Belgian composer and critic. After studying philosophy and law he applied himself to thorough music studies, taking composition lessons with Absil and Souris. If Bertouille's attachment to traditional forms was reminiscent of neo-classicism, he considered melody as the essential element in music, assigning to it the expression of feeling as its principal objective. Avoiding any aggressivity in the sphere of harmony, he advocated aesthetic ideas opposed to the avant garde. In *L'oeuvre d'art* he argued that contemporary art had lost its way: by renouncing every structural principle it had ceased to have any meaning, existing only by virtue of its negations.

HENRI VANHULST

**Bertram, Johann** [Johannes] (*b* Celle, 1535; *d* Lüneburg, 17 April 1575). German Kantor, composer and theologian. He studied first at the Johannisschule in Lüneburg where Lucas Lossius was one of his teachers, and from 1555 in Wittenberg. He was appointed town Kantor in Lüneburg in 1558. In 1562 he accepted a post as a preacher at the Nikolaikirche, Lüneburg, and performed the duties concurrently with those of Kantor until 1564; in that year Christoph Praetorius, an uncle of Michael Praetorius, took over Bertram's town post. From 1571 or 1572 until his death he was principal pastor in Lüneburg.

Bertram's life story is characteristic of many early Lutheran figures whose first occupation as a Kantor was merely a stepping-stone to the profession of pastor. His are the earliest compositions by a Lüneburg Kantor to have survived. The most important is his contribution to the *Erotemata musicae practicae* (Nuremberg, 1563), a book of instruction designed by Lossius for music teaching in Lüneburg. In the preface it is stated that Bertram had 'carefully compiled and extended the book with pleasing and suitable music examples'; it is possible that he was also responsible for the remaining music examples that cannot be identified. To the 1561 edition of Lossius's famous *Psalmodia* (RISM, BVIII 1561[20]) he contributed a poem 'to the reader' and a four-part arrangement of the song *O wir armen Sünder* (f.79*r*; also in *D-Lr* KN144). Three four-part Latin works are included in *Ein geistlich Gesangbuch* (RISM, BVIII 1612[19]).

WALTER BLANKENBURG

**Bertrand, Anthoine** [Antoine] **de** (*b* Fontanges, Auvergne, 1530–40; *d* Toulouse, between 1580 and July 1582). French composer. His third book of chansons (1578) was dedicated to Charles de Bourbon, Bishop of Lectoure, but there is no evidence that he ever held a formal salaried post. From about 1560 until his death he seems to have lived at Toulouse, relying on the revenues from his estates. He frequented the circle of humanists and Ronsardist poets around Cardinal Georges d'Armagnac; some of their verses provided him with texts for his third book of chansons. The poet Jacques Grévin included a sonnet addressed to him in the second part of *Olimpe* (Paris, 1561) which was reprinted in Bertrand's first book of chansons, along with two sonnets – more extravagant and personal in tone – by the dramatist Robert Garnier. Towards the end of his life he seems to have turned away from 'chansons d'amour follastres' to become religiously devout, probably under the influence of the Jesuits. A collection of his pieces entitled *Airs spirituels*, containing hymns and canticles for four and five voices, was printed posthumously in 1582 with a dedicatory sonnet by Michel de Bonnières, a Jesuit; a preface in prose explains Bertrand's conversion and consequent martyrdom at Toulouse. Another Jesuit, Michel Coyssard, writing in 1608, confirmed that Bertrand was assassinated on his way from Toulouse to one of his farms by Protestants who resented his ecclesiastical hymns (*Traicté du profit que toute personne tire de chanter ... les hymnes et chansons spirituelles en vulgaire*, Lyons, 1608). The *Airs spirituels* may have been published in response to the publication at Lyons in 1580 of two books of *Sonnets chrestiens*, sacred contrafacta adapted by the Protestant pastor Simon Goulart from pieces in Bertrand's first two books of chansons.

Bertrand's surviving music comprises 84 chansons, 14 canticles, 10 Latin hymns, three Latin motets and one Italian madrigal; one piece is monophonic, three are for five voices, the others for four. This probably represents about half his total output, since in the preface to the first book of chansons he expressed his intention of publishing five or six more books, including some pieces for five and six voices composed much earlier. His earliest published pieces appeared in Le Roy & Ballard's 13th book of chansons (RISM 1570[10]); all three were reprinted in his third book of chansons. In his first two books, as in collections by Boni, Maletty and others, Bertrand set only poems by Ronsard. The first book contains sonnets from Ronsard's *Amours* of 1552–5 and one piece each from his fifth book of odes (1553) and his *Bocage* (1554). The selection of poems broadly follows their ordering in the publications of Ronsard, recounting the vicissitudes of an unhappy love affair. The pieces are also grouped sequentially in a way that suggests that the composer believed in the fabled modal ethos mentioned in his preface. The second book contains 20 sonnets and five chansons taken from collections of poems originally published between 1555 and 1565. The third book contains a more varied selection of verses ranging from an Italian villanella and some *jeux* by Grévin and Ronsard to a *chanson spirituelle* (*Sur moy, Seigneur*) and sonnets by Du Bellay and Ronsard (among others), set mostly in a lighter vein described in the preface as 'un air fort humain et commun'.

Most of the sonnets have the musical structure *AAB*: the two quatrains are set to the same music and the final sestina is through-composed. Several, however, observe the old *épigramme* convention of repeating the final line, and a few divide the sestina into two matching tercets set to the same music (e.g. *Mon Dieu que ma maistresse* in the first book); in all the pieces there is a close syntactic correspondence of verse and musical phrase that is characteristic of 16th-century French chansons.

Bertrand attempted to combine the traditional French concern for structural clarity with the Italian madrigalists' preoccupation with underscoring particular words by means of rhythm, tessitura, melisma and chromaticism. In the preface to his first book he described music as a sensuous rather than intellectual art, and expressed an abhorrence of pretentious chromaticism; he accepted the theory of Affections but resisted Zarlino's idea that the enharmonic tetrachord was superior, though his *Ces liens d'or* in the first book is built solely on perfect intervals, minor 3rds and semitones, avoiding 2nds, 6ths and major 3rds; in a more extreme example, at the end of *Je suis tellement amoureux* in the second book, he followed Vicentino and Costeley by indicating microtones with dieses. His predilection for juxtaposing major and minor chords a 2nd or 3rd apart (often involving degree inflection in an inner voice) is unrelated to theoretical chromaticism, though intended for expressive effect. His harmonic language is half-modal, half-tonal, and shows a delight in unusual sequences with melodic parts that avoid difficult intervals.

Despite his repudiation of 'mathematical demonstrations' in the preface to the first book, many of his chansons reveal a geometric organization of rhythm and metre that affects their contrapuntal and structural development. Although duple metre predominates, phrases or sections in triple metre are introduced for contrast and the rhythmic periods are generally supple and varied. The preface to the first book explains that in the most recently composed pieces Bertrand took greater care in maintaining verbal accentuation; the mood of the poem clearly affects the tempo, just as nuances affect individual phrases, and Bertrand advised performers to adopt a leisurely pace. His four-part textures, alternating between homophony and rather restricted polyphony based on imitative and paired entries, are simple and conservative.

The 1582 collection includes 13 French sacred songs, three Latin motets and ten hymns, with both Latin and French texts, which use traditional Gregorian melodies in simple, homophonic settings like those of the Huguenot psalms.

WORKS

SACRED

Premier livre de sonets chrestiens mis en musique, 4vv (Lyons, 1580) [ = sacred contrafacta by S. Goulart of Premier livre des amours]

Second livre de sonets chrestiens mis en musique, 4vv (Lyons, 1580) [ = sacred contrafacta by S. Goulart of Second livre des amours]

[27] Airs spirituels contenant plusieurs hymnes et cantiques, 4, 5vv (Paris, 1582)

SECULAR

*all published in Paris*

Les amours de P. de Ronsard (35 chansons), 4vv (1576, 2/1578 as Premier livre des amours de P. de Ronsard); ed. in MMFTR, iv–v (1926)

Second livre des amours de P. de Ronsard (25 chansons), 4vv (1578); ed. in MMFTR, vi (1927)

Tiers livre de [24] chansons, 4vv (1578) (incl. 3 chansons previously pubd 1570[10]), 1 It. villanella; ed. in MMFTR, vii (1927)
3 chansons, 4vv, 1570[10]

FRANK DOBBINS

**Bertrand, Jean (Edouard) Gustave** (*b* Vaugirard, nr Paris, 24 Dec 1834; *d* Paris, 9 Feb 1880). French writer on music. After a classical education – he later became a member of the Société d'Encouragement des Etudes Grecques – at the Lycée Louis-le-Grand, Bertrand went on to the Ecole des Chartes in Paris, where he devoted himself to the study of ancient music and history of the organ. His thesis, 'L'histoire de l'orgue dans l'antiquité et au moyen âge', was partially published in the journal *La maîtrise*. He contributed to Didot's *Complément de l'Encyclopédie moderne* and to the supplement to Fétis's *Biographie universelle*, and published many articles on music in the *Journal des débats*, the *Revue moderne* and *Le ménestrel*. As a member of the Commission des Travaux Historiques, Bertrand paid a long visit to Russia: some of his conclusions, based more on personal impression than scholarly study, appeared in *Les nationalités musicales*, as well as in the form of reports for the *Revue germanique* (later *Revue moderne*) and *Le nord*. He became editor-in-chief of a number of publications, including *Le nord* (1862), then, towards the end of his life, *République française*.

GUSTAVE CHOUQUET/CORMAC NEWARK

**Bertrand, Nicolas** (*fl* Paris, *c*1687; *d* *c*10 Nov 1725). French string instrument maker. He was one of the best and most prolific of French makers of string instruments and his viols are fine examples of 18th-century craftsmanship. He held the title *faiseur d'instrumens ordinaire de la muzique du Roy*. He built other instruments besides viols, including a kit (1689) in viol shape which is now in the Musée de la musique, Paris (illustration in Thibault, 1973). A posthumous inventory of the shop, which was at the corner of the rue Grenelle and the rue Pélican, shows that he possessed an extensive collection of both old and modern instruments. This included dozens of viols (some of them English), five cellos ('violons de chelles'), several *pardessus de violes*, various parts for harpsichords and guitars, some bows (a few decorated with ivory), strings and a supply of several woods.

At least seven bass viols by Bertrand, with dates ranging from 1687 to about 1720, are known to survive (*see* VIOL, fig.14*a*). The seven-string basses have considerably different string lengths, the smallest (in the Brussels Conservatory) being 66 cm and the largest (in Geneva) 76 cm. The manuscript label on the one in the Metropolitan Museum, New York (illustration in *A Checklist of Viole da Gamba*), reads: 'Nicolas Bertrand/a Paris 1720'. A *pardessus de viole* dated 1701 is in the Brussels Conservatory. Bertrand's instruments are characterized by a red-brown varnish, often dark in colour; its ingredients he kept a carefully guarded secret.

MARY CYR

**Bertrand di Avignone.** *See* FERAGUT, BELTRAME.

**Bertran de Born** (*b* Autafort [now Hautefort], ?1150; *d* Dalon, nr Hautefort, before 1215). Troubadour. His birthplace was in the Périgord region of the former province of Limousin; he was lord of the family castle at Autafort. In about 1195 he entered the Cistercian monastery at Dalon, Ste Trie, and remained there until his death. He is probably best known for his praise of military and political exploits; in the eighth circle of Dante's *Inferno* he is referred to as the 'headless trunk that followed in the tread . . . and by the hair held its severed head'. He was punished in this way because he was the instigator of the quarrels between Henry II and his sons in the 1180s. Though his actual participation in these events has possibly been exaggerated by his medieval biographers, many of his poems do refer to the events directly or indirectly.

Of over 40 poems attributed to Bertran, only one, *Rassa, tan creis e mon' e poja*, survives with music (PC 80.37). Yet it seems that he both imitated melodies of other troubadours and was musically imitated by one trouvère. Several of Bertran's poems without melodies are

textual contrafacta of other poems for which melodies survive, including two by his contemporary Giraut de Bornelh. Three poems were models for later settings with melodies by Conon de Béthune, but it is uncertain whether any of these musical contrafacta was sung to Bertran's poems.

**Berutti, Arturo** (*b* San Juan, 27 March 1862; *d* Buenos Aires, 3 Jan 1938). Argentine composer. A brother of Pablo Berutti, he studied composition with his father, a composer and pianist, with Ignacio Alvarez, and later in Buenos Aires with Bassi. In 1882 he published the fantasia *Ecos patrióticos* as well as a series of articles, 'Aires nacionales', in the *Revista Mefistófeles*; these propounded his views on musical nationalism. He entered the Leipzig Conservatory in 1884 to study with Reinecke and Jadassohn, and in 1887 the Stuttgart court orchestra gave the first performance of his *Obertura Andes*. Continuing his studies of South American subjects, he moved to Berlin, where the *Rivadavia* and *Colombiana* symphonies were written. He then went to Paris and to Milan; there he composed several operas, including *Vendetta* (1890), *Evangelina* (1893) and *Taras Bulba* (1892–3). In 1895 he returned to Buenos Aires, where he wrote five more operas which were all performed there, and *Pampa* (1897), the first Argentine opera on a native theme. He used Latin American settings, although his technique is European, and was the most successful opera composer of the time in Argentina.

SUSANA SALGADO

**Berutti, Pablo** (*b* San Juan, 24 Sept 1866; *d* Buenos Aires, 17 June 1914). Argentine composer and teacher. A brother of Arturo Berutti, he began music studies in Mendoza, where in 1884 he conducted for a musical comedy company. By that time he had toured the Andean region of Chile and Peru as a pianist (1881), and in 1887 he was appointed professor of piano at the National College, San Juan. Later he settled in Buenos Aires, and then a grant enabled him to travel to the Leipzig Conservatory for a course in counterpoint and composition under Jadassohn, at the end of which he won the Mozart Prize. While he was in Germany the *Gran sinfonia* (1891) and the *Misa solemne*, for four solo voices and chorus, were performed. He was invited to join the staff of the Leipzig Conservatory, but instead returned to Buenos Aires, where he founded a conservatory and worked as a teacher, and where he was made inspector of military bands. His works include two operas – *Cochabamba* (1890) and the unfinished *Paraíso perdido* – a *Te Deum*, an *Offertorio* and an *Ave María*, a *Marcha fúnebre* and a volume of 60 piano pieces, *Hojas caidas*.

SUSANA SALGADO

**Berwald.** Swedish family of musicians of German origin.

**(1) Johann Friedrich Berwald** (*b* Königsberg, Neumark, 18 or ?22 March 1711; *d* Ludwigslust, 11 June 1789). German flautist. He was the son of Johann Gottfried Berwald (1679–1732), like his father before him *Kunstpfeifer* in Königsberg. After holding appointments in Copenhagen and Hohenaspe, Holstein and Schleswig, Johann Friedrich became a member of the Mecklenburg-Schwerin court orchestra at Ludwigslust in 1770. He married four times and had 21 children, of whom only 11 survived childhood. His son Johann Gottfried Berwald (*b* Copenhagen, 6 Sept 1737; *d* St Petersburg, ?1814) became a court violinist at Ludwigslust in 1770 and in 1786 moved to St Petersburg; among his writings on music is the *Sendschreiben an den Herrn J.W. Hertel zu Schwerin . . . die Frage betreffend: wie Quinten und Oktaven zulässig und nich zulässig seyn* (*B-Br* 6474).

**(2) Christian Friedrich Georg Berwald** (*b* Hohenaspe, 14 Aug 1740; *d* Stockholm, 23 Feb 1825). Swedish violinist of German birth, son of (1) Johann Friedrich Berwald. A pupil of Benda in Berlin during the 1760s, he

was a violinist in Frederick the Great's orchestra. In 1772 he settled in Stockholm, where he became a violinist in the court orchestra (1773–1806); he was also a teacher and in 1790 he founded a music lending library.

(3) **Georg Johann Abraham Berwald** (*b* Schleswig, 29 or ?26 June 1758; *d* St Petersburg, 27 Jan 1825). German bassoonist and violinist, son of (1) Johann Friedrich Berwald. He was a member of the court orchestra in Stockholm from 1782 to 1800, first as a bassoonist and later as a violinist. In 1798 he made a concert tour of St Petersburg, Moscow, Germany and Austria with his son (4) Johan Fredrik Berwald. Three years later he returned to settle in St Petersburg, where he remained active as a performer and conductor until his death. He was considered to be one of the outstanding bassoonists of the time.

(4) **Johan Fredrik Berwald** (*b* Stockholm, 4 Dec 1787; *d* Stockholm, 26 Aug 1861). Swedish violinist, composer and conductor, son of (3) Georg Johann Abraham Berwald. As a violin prodigy (his début was in 1793) he made a great impression on tours with his father of Finland, Germany, Austria and Russia (1795–1803), and also by his youthful compositions; his three quartets op.2, written before he was 13, were dedicated to Tsar Aleksandr I. When the family settled in St Petersburg he continued a brilliant career, succeeding his teacher Rode as soloist of the imperial orchestra (1808–12). After his return to Sweden he became a member of the court orchestra (1814), and in 1823 he succeeded J.B.E. Dupuy as Kapellmeister, a position he held until his retirement in 1849. From 1822 to 1847 he also conducted the concerts of the Harmonic Society. His three daughters, notably Julia [Julie] Mathilda Berwald (1822–77), became well-known singers.

(5) **Franz (Adolf) Berwald** (*b* Stockholm, 23 July 1796; *d* Stockholm, 3 April 1868). Swedish composer and violinist, son of (2) Christian Friedrich Georg Berwald. The leading Scandinavian composer of the early 19th century, he is remarkable for his bold and striking invention as well as for his originality in the handling of musical forms.

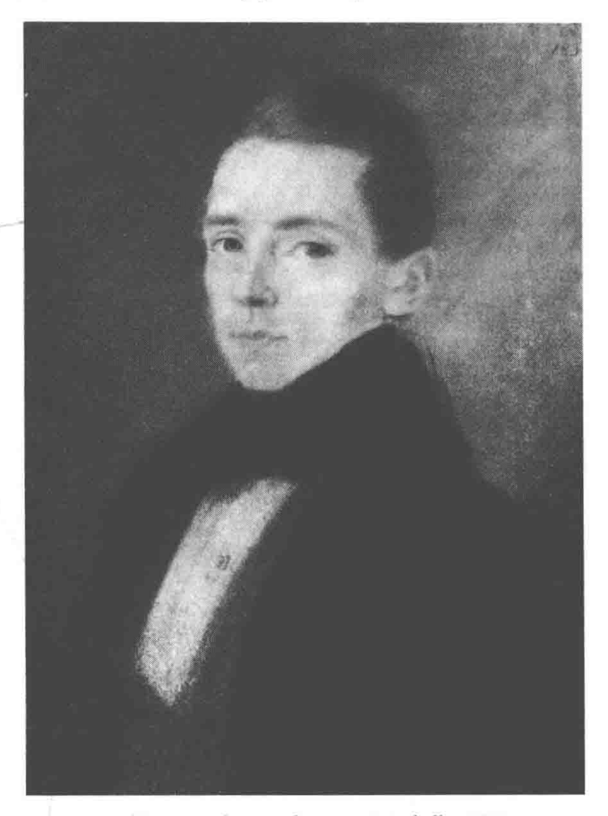
1. Life, to 1841. 2. Life, 1841–68. 3. Posthumous reputation, works.

1. Life, to 1841. Franz Berwald began violin lessons at the age of five, presumably with his father, and by 1805 he had appeared in concerts in Stockholm, Västerås and Uppsala. After Gustavus Adolphus IV closed the royal chapel and opera in 1806, Berwald appeared in the series of open concerts arranged by J.B.E. Dupuy, performing a concerto by Schobert on 14 June 1806 and a polonaise by Viotti the following September. A *coup d'état* on 13 March 1809 removed Gustavus Adolphus from the throne; his successor, Carl XIII (brother of the assassinated Gustavus III) reopened the royal chapel and by 1811 Berwald had begun formal violin lessons with Dupuy, the newly appointed director of the royal chapel. From 1 October 1812 Berwald was employed as a violinist in the court orchestra, and he continued to earn his living as a violinist and, later, viola player in the orchestra until 1828, despite two unexplained breaks (1818–20, 1823–4). The repertory of the Royal Opera during this period was eclectic, including works by Mozart (*Die Zauberflöte*, *Don Giovanni*, *Die Entführung*), Weber (*Freischütz*), Rossini (*Il turco in Italia*, *Il barbiere di Siviglia*) and Boieldieu (*La dame blanche*).

The extent to which the music Berwald performed with the Royal Opera influenced his compositional development, however, is difficult to judge. His earliest surviving compositions date from 1816, although he had presumably completed works before then. The manuscript of an Introduction, Theme and Variations in B♭ for violin and orchestra is dated 24–9 December 1816. The work was probably written for either Franz or his brother (6) August to play, but the date of the première is not known. The Three Fantasias for melodicon dedicated to Crown Prince Oscar (1799–1859, later Oscar I), probably composed the same or the next year, include sets of variations on themes from *Die Zauberflöte* and *Don Giovanni*. A benefit concert in the Exchange Hall, Stockholm, on 10 January 1818 included the première of an orchestral fantasia (now lost), a concerto for two violins and a septet for strings and wind. A review in the *Allgemeine musikalische Zeitung* (4 March 1818) observed how 'one might wish the young, truly talented man would become more friendly with the rules of harmony and composition; that will take him more surely and quickly to his goal' (quoted in Berwald's Sämtliche Werke [BW], vii, p.xiii).

During his period of employment in the court orchestra, Berwald spent his summers on tour in Scandinavia, Finland and Russia. He also seems to have come into contact with members of the Swedish aristocracy: as early as summer 1812 he spent time with the family of Count Niels Barck (1760–1822), a former president of the Swedish Royal Academy of Music. On 13 June 1818, during his first break from the orchestra, he was granted a travel permit to visit Count Frederik Bogislaus von Schwerin (1764–1834), dean of Sala. It was probably contact with von Schwerin's intellectual circle that inspired Berwald to publish his own *Musikalsk journal*. Berwald's periodical was intended for the amateur market and included easy piano pieces and songs by, among others, Dupuy, Méhul, Spohr and Viotti, as well as original compositions by Berwald himself. The journal was published in six volumes from December 1818, and was followed by the *Journal de musique*, which appeared in three volumes between 1819 and 1820. Although both publications were disseminated widely throughout southern Scandinavia, Berwald was unable to give up his orchestral work to devote himself to composition. Similarly, he never received the same aristocratic patronage as that accorded to his contemporary, Adolf Fredrik Lindblad. On 1 July 1820 he was engaged once again in the court orchestra after an absence of almost 18 months.

Nevertheless, the success of the benefit concert in 1818 must have been encouraging, because Berwald arranged



a similar event for 3 March 1821 to include the première of a symphony in A major, a violin concerto and a quartet for piano and wind. Only the concerto and quartet have survived intact, but a fragment of the first movement of the symphony is large enough to suggest that this was a substantial work. Reviews of the concert, however, were scathing. The newspaper *Argus* remarked (24 March) how 'it seems as if Herr Berwald's hunt for originality and his constant striving to impress with great effects has deliberately banished all melodiousness from his compositions'. Berwald's response was characteristically forthright (Lomnäs, Bergtsson and Castegren, 63–5):

> It was without the least surprise that I read the review *Argus* offered to the public in respect of my recent compositions; [the writer] can, on the contrary, be convinced that I had myself foreseen the least favourable impression these works, written in an entirely original style, should leave. But the reviewer should remember that all attempts to establish an uncommon system, a new handling of the instrumentation and its employment, will always begin with numerous difficulties.

The blunt tone of Berwald's reply, as much a feature of his prose as of his music, may be one reason why he found it increasingly difficult to ingratiate himself with the Swedish musical establishment in the 1820s. Nevertheless, his work did not meet with uniform hostility. A review in the *Nya Argus* (13 February 1828) of Berwald's music for Kellgren's *Gustaf Wasa*, originally set by J.G. Naumann in 1786, was largely positive, and the distinguished poet, scholar, politician and amateur composer Erik Gustaf Geijer spoke of 'a young composer with much talent' (*DSL*, 108). Even so, the pressure to combine a career as an instrumentalist with that of a composer was too great, and as early as 27 February 1822 Berwald applied for a grant from the king to travel to Germany.

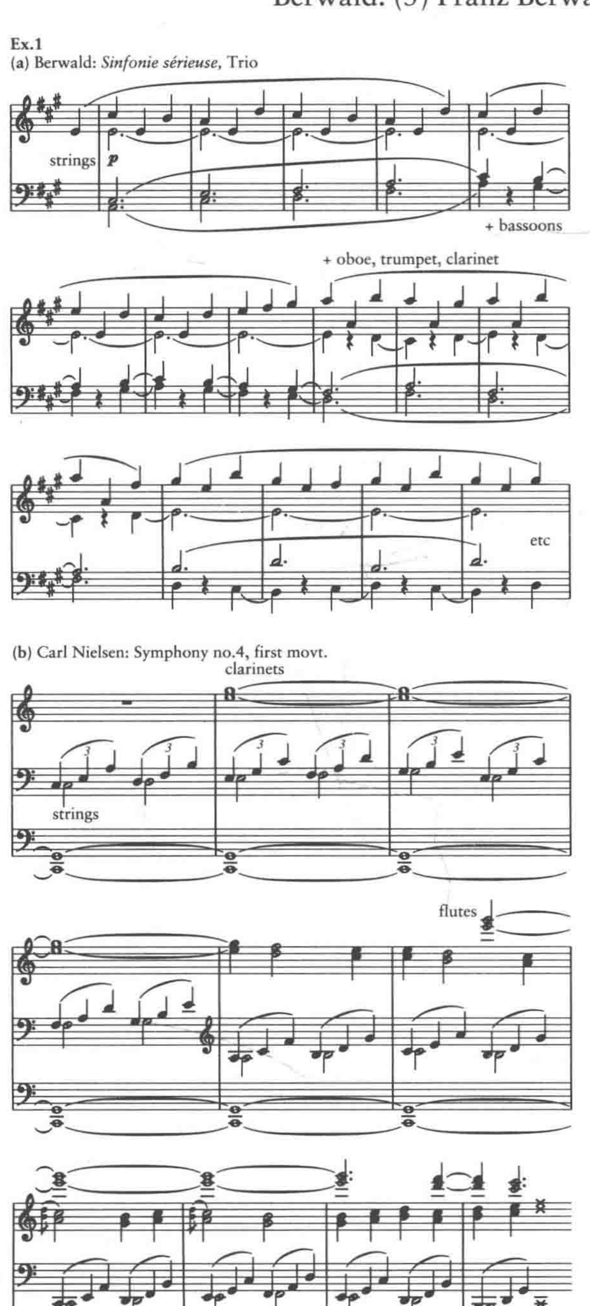
The première of a 'new' septet (the work is most probably a revision of the septet of 1818) at a concert in the Exchange Hall, Stockholm, on 6 December 1828 was well received by the critics of both the *Nya Argus* and *Heimdall*, but played before a disappointingly small audience. Berwald left Stockholm for Berlin on 26 May 1829, preoccupied with operatic plans. A duet and chorus from an opera called *Leonida*, which was probably finished in 1830 but has since been lost, were re-used in another work, *Der Verräter*, which was sent to the Royal Opera in Stockholm in 1834. Although parts of *Der Verräter* were rehearsed in 1837, the opera was never performed and has not survived. Similarly, Berwald recycled much material from a further opera, *Donna Isabella* (completed 1830–31), in the first version of *Estrella di Soria* (*c*1838–41). Significantly, however, Berlin was less receptive to the supposed radicalism of Berwald's music than Stockholm. By the late 1830s Berwald had almost completely given up composition in order to run a highly successful orthopaedic institute (founded in 1835), and it was only after moving to Vienna on 6 March 1841 that he began composing seriously again.

2. Life, 1841–68. Berwald's renewed creative activity coincided with his marriage on 1 April 1841 to Mathilde Scherer (1817–88). A concert at the Redoutensaal, Vienna, on 6 March 1842, which included the premières of several new orchestral works, the tone poems *Erinnerung an die norwegischen Alpen*, *Humoristisches Capriccio* (now lost) and *Elfenspiel*, received some of the most favourable reviews of Berwald's career. The *Allgemeine Theaterzeitung* (8 March 1842) described the new compositions as 'of great interest, notably for the originality of their material, their ideas and the disposition of their elements, and also of the treatment of the forms, and the composer's use of the manifold possibilities and the power of the orchestra' (*DSL*, 211).

*Franz Berwald: portrait by an unknown artist, chalk, c1837 (Kungliga Musikaliska Akademiens Bibliotek, Stockholm)*

Berwald returned to Stockholm on 18 April 1842, but the relative success of his orchestral compositions during his stay in Vienna seems to have been the catalyst for the series of four symphonies that he wrote in the space of the next three years. The score of the *Sinfonie sérieuse* is dated '1842. Wien', while the autograph piano score of a symphony in D, which has generally been assumed to be identical with the *Sinfonie capricieuse* mentioned in Mathilde Berwald's diary, 25 June 1842, is dated 'Nyköping 18 Juni 1842'. The *Sinfonie singulière* is dated March 1845, while the Symphony in E♭, originally entitled *Sinfonie naïve*, was written in April that year. The only symphony Berwald heard performed during his lifetime, however, was the *Sinfonie sérieuse*, which was played at a concert devoted to his recent music conducted by his cousin (4) Johan Frederik Berwald in the Royal Opera House on 2 December 1843. The symphony received appalling reviews: the *Nya dagligt allehanda* (6 December 1843) complained that the work's most distinguishing characteristic was its 'incomprehensibility', even if 'it was perhaps not executed with the punctuation and finesse or with the instrumental strength the composer desired' (BW, i, p.xvi). A planned performance of the Symphony in E♭ in Paris, supposedly arranged by Auber, was cancelled on account of the 1848 Revolution, and the work had its première after Berwald's death, on 9 April

1878 under Ludvig Norman. The *Sinfonie singulière* was not played until 10 January 1905, when it was conducted by the violinist and composer Tor Aulin, and the autograph score of the *Capricieuse* was lost, so that it could not be performed until Ernst Ellberg made a realization of the score, which was conducted by Sibelius's brother-in-law, Armas Järnefelt, on 9 January 1914. Berwald's operatic works fared little better. The operetta *Jag går i kloster*, first performed in the same concert as the *Sinfonie sérieuse*, was successful only because of the participation of Jenny Lind. The première of its successor, *Modehandlerskan* ('The Modiste'), on 26 March 1845 was a fiasco, and the operetta received only a single performance.



Berwald returned to Vienna in 1846 via Paris, where he tried unsuccessfully to interest either the Opéra-Comique or the Conservatoire in his music. His dramatic tone poem *Ein ländliches Verlobungsfest in Schweden*, written for Jenny Lind, was given on 26 January 1847 at the Theater an der Wien but had a mixed reception. Hanslick (*Geschichte des Concertwesens in Wien*, 1869) recalled that though '[a]s a man stimulating, witty, prone to bizarrerie, Berwald as a composer lacked creative power and fantasy' (*DSL*, 359). Berwald was awarded membership of the Mozarteum in Salzburg on 27 December 1847, but in other respects his second visit to Austria was not an artistic success.

Shortly after returning to Stockholm in 1849 Berwald accepted the directorship of a glassworks at Sandö in Ångermanland, north Sweden, owned by Ludvig Petré (1818–52), an industrialist and amateur violinist. During the winter, which he spent in Stockholm, Berwald also began to teach privately. He composed a piano concerto in 1855 for his pupil Hilda Aurore Thegerström (1838–1907), to whom he also dedicated his C minor Piano Quintet; Thegerström never played the concerto, which was first performed only in 1904 by the composer's granddaughter, (7) Astrid Berwald. Most of the chamber works of the 1850s were composed, at least initially, for private performance, but Berwald continued to promote his music abroad. Three piano trios and two piano quintets from 1849–53 were published by Julius Schuberth of Hamburg (a fourth piano trio, in C, from 1853, was not published until 1894). Berwald dedicated his A major Piano Quintet to Liszt, who praised the work's 'noble style and harmonious originality' (BW, xiii, p.xvi) in a letter of 22 February 1858. Earlier that month, Carl Tausig played the D minor Piano Trio in Berlin as part of a chamber series organized by Hans von Bülow. The trios were arguably Berwald's most successful work during his lifetime. Ludvig Norman, in the *Stockholm tidning för theater och musik* (30 March – 11 May 1859), placed Berwald's music next to that of Schumann and Mendelssohn; Carl Petersen in the *Neue Zeitschrift für Musik* claimed that 'the composer approached Seb. Bach in the clarity and precision of the ideas which his works express, without in any way being reminiscent of that period' (*DSL*, 501). Ironically, the assimilation of Berwald's work into the Austro-German canon by Petersen and Norman seems to have led to his belated assimilation into the mainstream of Swedish musical life. Norman's enthusiastic championship in particular was responsible for many performances during the latter half of the century.

In March 1860 Berwald was offered membership of the Concert Society, and in 1861 the director of the Royal Opera, Eugène von Stedingk (1825–71), finally agreed to perform *Estrella de Soria*. The opera opened on 9 April 1862, conducted by Norman with a chorus trained by August Söderman, and was repeated four times that month. It was subsequently revived for the inauguration of the new Royal Opera on 19 September 1898. A second major operatic work, *Drottningen av Golconda* ('The Queen of Golconda'), was completed by 1864 and accepted for performance by Stedingk. Berwald had chosen the libretto from Henri-Montan Berton's *Aline, reine de Golconde* (1803), performed in Stockholm in 1812–35. He conceived the title role for his pupil Christine Nilsson, to whom he wrote: 'not one note of the Queen's part have I written without thinking of you as her future representative' (BW, xviii, p.xi). Although the parts were copied for rehearsal, however, the première of the work was cancelled by Stedingk's successor, Erik af Edholm, and the work was not staged in its entirety until 3 April 1968, as part of the centenary events to commemorate Berwald's death. Despite the problems associated with *The Queen of Golconda*, official recognition of Berwald's work continued to grow. On 25 July 1866 he was awarded the Order of the North Star, an honour reported by two national newspapers, *Aftonbladet* and *Dagens nyheter*. The following year the Swedish Royal Academy of Music commissioned him to revise J.C.F. Haeffner's collection of four-part chorale settings, originally published in 1820. Berwald undertook a brief study tour of north German libraries in July, but he had only progressed as far as correcting the first 51 harmonizations before his death from pneumonia on 3 April 1868. The second movement of the *Sinfonie sérieuse* was played at his funeral in the German Church, Stockholm, on 14 April.

3. Posthumous reputation, works. After Berwald's death, Ludvig Norman continued to be the most active promoter of his music: a performance of the *Sinfonie sérieuse* on 18 November 1871 led to further performances in Stockholm and Helsinki in 1876, as well as the première of the E♭ symphony in 1878. It was not until the beginning of the 20th century, however, that Berwald's music emerged as an important point of reference for a younger generation of Swedish composers including Wilhelm Stenhammar and Hugo Alfvén. After Tor Aulin's performance of the *Sinfonie singulière* in 1905, Wilhelm Peterson-Berger hailed Berwald in *Dagens nyheter* (11 January) as 'our most original and modern composer'. Despite the revival of *Estrella de Soria* in Stockholm for the 150th celebrations of his birth in 1946, Berwald's music has yet to occupy a secure place in the repertory, and since Hillman's pioneering biography (1920), only two full-length biographical studies of the composer have been published (Layton, 1956, and Andersson, 1970–71). Similarly, the music has yet to receive systematic analytical attention, although the completion of the critical edition, and several recordings of the symphonies, points towards a more positive reception of Berwald's work in the future.

In a motto dated 17 August 1838 Berwald declared: 'Art may be coupled only with a cheerful frame of mind. The weak-willed should have nothing to do with it. Even if interesting for a moment, in the end every sighing artist will bore listeners to death. Therefore: liveliness and energy – feeling and reason' (*DSL*, 186). Berwald himself seems to have been uninterested in forging a Swedish national identity in his music but this does not necessarily mean that his music is not 'national'. His works could

also be heard in a broader Scandinavian context: his music reflects formal and expressive preoccupations similar to those found in the works of other Northern composers.

The most 'Northern' characteristics of Berwald's work are an obsessive concern with large-scale structure and a heightened sensitivity to the timbral characteristics of the sound object so that the music is often conceived in terms of specific sonorities rather than more dynamic process-orientated forms. A prominent feature of Berwald's music is the use of extended pedal points to create moments of virtual harmonic inaction. In the A major Trio of the *Sinfonie sérieuse* (1842), for instance, the transparent scoring for strings and woodwind anticipates the C major interlude in the first movement of Nielsen's Fourth Symphony (1914–16) (ex.1). Similarly, at the close of the development of the first movement of the Symphony in E♭ (bars 224–44) the second theme is slowly dissolved over a subdominant pedal to prepare for the abrupt reprise of the opening (ex.2).

The formalist aspect of Berwald's music is more apparent in his use of palindromic multi-movement designs. The symmetrical arch-like tonal scheme of the early Septet (?1828) is prefigured by the circle of 5ths motion of the main theme of its opening Allegro molto. In the *Sinfonie sérieuse* a fragment of the slow movement Adagio maestoso returns after the scherzo as both a reprise and a slow introduction to the finale. Berwald's use of symmetry reaches its most obsessive in the String Quartet in E♭ of 1849, in which the scherzo Allegro assai is enclosed within the slow movement Adagio quasi andante which is in turn enclosed by a reprise of the first movement Allegro di molto.

The *Sinfonie singulière* (1845) is characteristic in many ways of Berwald's works. The scherzo is embedded within the slow movement, and the sense of formal circularity this creates is emphasized by the coda of the finale, which explicitly recalls the $\hat{1}$–$\hat{5}$ oscillations with which the symphony opens. The first movement begins with a rising sequence opening harmonically from I to $V^7$, a gradual 'in-filling' of the cello's initial $\hat{1}$–$\hat{5}$ motion (ex.3). Berwald plays with the structural and rhetorical status of this opening, the insistence on $\hat{1}$–$\hat{5}$ suggesting a cadential function which is fulfilled only by the reappearance of the passage at the close of the first movement. The repercussions of the unfolded $V^7$ that is suddenly left unresolved at rehearsal figure 1 resonate throughout the movement.

**Ex.3** *Sinfonie singulière*, first movt. opening

Disruption becomes one of the 'structural topics' of the symphony as a whole, in spite of the apparently seamless continuity of the opening bars. The central musical argument of the work is therefore predicated not so much on tonal opposition or thematic development, as on the juxtaposition of different types of musical discourse: static against linear harmonic motion, predominantly melodic against predominantly harmonic progression, tutti against solo or duet instrumental textures. The opening of the second movement consists of a chain of first inversion chords that suggests an introduction to a conventionally harmonized lyric melody which never actually arrives. The interjection of the Scherzo in place of a more emotionally involved development completes the denial of Romantic pathos that characterized the opening of the slow movement. The formal design of the movement, and consequently of the symphony as a whole, signifies the renunciation of a certain type of sentimental discourse particularly associated with such German Romantic symphonists as Mendelssohn and Schumann, in favour of a more abstract, formalist aesthetic. It is this isolationist attitude which is Berwald's most thoroughly Northern characteristic, and which led Carl Nielsen to write admiringly to Stenhammar: 'neither the media, money nor power can damage or benefit good Art. It will always find some simple, decent artists who forge ahead and produce and stand up for their works. In Sweden you have the finest example of this: Berwald' (letter dated 27 January 1911, quoted in *Carl Nielsens breve*, ed. I.E. Møller and T. Meyer, Copenhagen, 1954, p.112).

WORKS

Edition: *Franz Berwald: Sämtliche Werke*, ed. Berwald-Kommitén, MMS [2nd ser.] (Kassel, 1966–) [BW]

*printed works published in Stockholm unless otherwise stated; principal MS source S-Skma*

STAGE

*unless otherwise stated, all are operas, and first produced at Royal Theatre, Stockholm*

Gustaf Wasa (after J.H. Kellgren), 1827, inc., concert perf. of Act 1, 12 Feb 1828, scene and aria from Act 2, 18 Nov 1828; lost except Christjerns marsch, vs (1828)
Cecilia, 1829, inc., lost
Leonida (Curtius), ?1829–30; lost except lib and frags.
Trubaduren (B. von Beskow), 1830, ?only projected, correspondence regarding lib in *DSL*
Donna Isabella, 1830–31, inc., lost except sketch frags., some used in Estrella de Soria
Der Verräter (?M.G. Saphir), 1830–34, 1 chorus perf., 19 May 1842, lost, frag. in BW ix
Estrella de Soria (3, O. Prechtler), *c*1838–41, 1848, rev. 1862, 9 April 1862, vs (1883), ov. (Tragische Ouvertüre) (1912); ov. and Acts 1 and 2, BW xviia
Jag går i kloster (operetta, 2, Berwald), 1842, 2 Dec 1843; excerpts, vs (1843)
Modehandlerskan [The modiste] (operetta, 3, Berwald), 1843, 26 March 1845; excerpts, vs (1845)
Ein ländliches Verlobungsfest in Schweden: nationales Tongemälde (cant., Prechtler), 1847, Vienna, An der Wien, 26 Jan 1847; vs (Vienna, 1847)
Slottet Lochleven (after W. Scott: *The Abbot*), 1863, inc., lost
Drottningen av Golconda [The Queen of Golconda] (romantisk op, 3, Berwald and L. Josephson, after J.-B.-C. Vial and E.-G.-F. de Favières: *Aline, reine de Golconde*), 1864, excerpts perf. 1933, complete op 3 April 1968; no.17 (Bröllopshymn) [Wedding Song], ed. in *Musica sacra*, ii (1867), complete op, BW xviii

CHORAL AND LARGE VOCAL

Kantat i anledning av högtidligheterna den 5 november 1821 [Ceremonial Cant.], S, T, B, mixed vv, orch, 1821, 29 Jan 1822
Kantat författad i anledning av HKH Kronprinsessans ankomst till Sverige och höga förmälning [Cant. for the Crown Princess's Arrival in Sweden and Wedding] (A.A. Grafström), S, S, T, B, B, orch, 1823, 8 April 1823
Serenad, F, T, cl, hn, va, vc, db, pf, 1825, 8 April 1826, frag.
Flagsang för den norske dampbaad 'Constitutionen' [Flag Song for the Norwegian steamship *The Constitution*], 1827, lost
Gebet der Pilger am heiligen Grabe (Bön) [Prayer], 4 male vv, orch, ?1844 [frag. of orat Der Zug nach Jerusalem]
Konung Karl XIIs seger vid Narva [Charles XII's Victory at Narva] (Schwedisches Soldatenlied) (H.W. Bredberg), 4 T, fl, 2 cl, 2 hn, 1845
Gustaf Adolph den stores seger och död vid Lützen [Gustaf Adolph the Great's Victory and Death at Lützen] (G.G. Ingelmann), solo vv, mixed vv, wind, org, 1845
Nordiska fantasibilder, solo vv, male vv, wind, org, 1846
Gustaf Wasas färd till Dalarna (H.W. Sätherberg), solo vv, male vv, wind, org, 1849, 5 April 1866
Apoteos: musik till N.N:s minnesfest över Shakespeare, solo vv, male vv, orch, 1864
Musik till industriexpositionens invigningsfest, male vv, wind, vs (1866)
Avskedssång till idoghetens representanter, male vv, wind, ?1866
Serenad, male chorus and/or 4 male vv, 1867, ed. in *Sånger för mansröster* (1894)
Choral, orch, mixed vv, 1867
Edns/arrs.: T. Boltzius: Effecit gaudium, mixed vv, orch; J.C.F. Haeffner: Svensk choralbok, chorales and chorale harmonizations, 1867–8, inc. [first 51 melodies only]; M. Praetorius: chorale, mixed vv, orch; J. Schop (i): chorale, mixed vv, orch

SYMPHONIES

*all first performances in Stockholm*

Symphony, A, 1820, 3 March 1821, lost except 1st movt MS frag.
Sinfonie sérieuse [Sym. no.1], g, 1842, 2 Dec 1843 (1875), rev. ?1843–4, arr. pf 4 hands (1874), BW i
Sinfonie capricieuse [Sym. no.2], D, 1842, 9 Jan 1914, only short score draft survives: realization by E. Ellberg (1945), realization by N. Castegren, BW ii
Sinfonie singulière [Sym. no.3], C, 1845, 10 Jan 1905, ed. (Copenhagen, 1911), BW iii
Symphony no.4, E♭, 1845, 9 April 1878, ed. (Hamburg, 1911), BW iv [orig. title Sinfonie naïve]

OTHER ORCHESTRAL

With solo inst: Introduction, Theme and Variations, B♭, vn solo, 1816, BW vii; Conc., E, 2 vn, 1817, BW vii; Vn Conc., c♯, 1820, ed. H. Marteau (Leipzig, 1911), BW v; Konsertstycke, F, bn solo, 1827, BW vii; Pf Conc., D, inc., undated, ?earlier version of following, BW vi; Pf Conc., D, 1855, BW vi;

Other works: Fri Fantasi, 1817, lost; Revûe-Marsch, E♭, military band, ?1818; Variations on 'Göterna fordomdags drucko ur horn', 1819, lost; Slaget vid Leipzig [The Battle of Leipzig], 1828, BW viii; Humoristisches Capriccio, 1841, lost; Elfenspiel, 1841, arr. pf 4 hands by H. von J. Hauer (1921), BW viii; Fugue, E♭, 1841, also arr. pf 4 hands; Ernste und heitere Grillen, 1842, ed. (1951), BW viii; Erinnerung an die norwegischen Alpen, 1842, ed. (1948), BW ix, arr. 2 org, 1866; Bayaderen-Fest, 1842, BW ix; Wettlauf, 1842, ed. (1946), BW ix

CHAMBER

Septet, B♭, cl, bn, hn, vn, va, vc, db, ?1828, ed. (1893), BW x [?reworking of lost Septet, 1817]

2 pf qnts: no.1, c, 1853 (Hamburg, 1856); no.2, A, ?1850–57 (Hamburg, 1857): both BW xiii

3 str qts: no.1, g, 1818, ed. H. Rosenberg and S. Kjellström (1942); no.2, a, 1849, ed. (1903); no.3, E♭, 1849, ed. (1885): all BW xi; ?Str Qt, 1818, lost

Quartet, E♭, pf, cl, hn, bn, 1819, ed. (1943)

Pf Trio, C, 1845 [?rev. 1850, frags.]; 4 pf trios: no.1, E♭, 1849 (Hamburg, 1851); no.2, f, 1851 (Hamburg, 1852); no.3, d, 1851 (Hamburg, 1854); no.4, C, ?1853, ed. (Copenhagen, 1896): all BW xii

Duo concertante, A, 2 vn, ?1816–17; 2 duos: B♭, vc/vn, pf, 1857 (Hamburg, 1858), D, vn, pf, ?1858, ed. (1898); Concertino, a, vn, pf, 1859, inc.: all BW xiv

OTHER WORKS

Songs (all except lost songs in BW xvi): 3 Singlieder, 1817: Glöm ej dessa dar! [Forget not these days!], Lebt wohl ihr Berge (F. von Schiller), A votre âge; 7 songs, *Musikalisk journal* (1819): Romance Jag minnes dig [I remember you] Romance (Ma vie est une fleur), En parcourant les doux climats, Aftonrodnan [Gloaming] (G. Ingelmann), Ute blåser sommarvind [Outside blows the summer wind] (S. Hedborn), ed. K.F. Valentin, *Gammalt och nytt av svenska tonsättare*, i (1901), Romance (Un jeune troubadour), Mais ne l'oublions pas; 3 songs, Journal de musique (1820): Romance (Ah! Jeannot me delaisse), Le regard, Romance (Je t'aimerai); Des Mädchens Klage (Schiller), 1831; Traum (L. Uhland), ed. [Swed. trans.] in *Svensk sång*, ii (1901); Den 4 juli 1844: Konung Oscar! (Ingelmann) (1844); Svensk folksång (H. Sätherberg) (1844); Vid konung Oscars grav (1859); Östersjön [The Baltic] (Prince Oscar Frederik), 1859 (1883); Eko från när och fjärran (F. Hedberg), S, cl obbl, 1865; 4 lost songs: Sång till de närvarende kungliga personerna [Song for the presence of their royal highnesses], ?1828, Blomman [The Flower] (Runeberg), ?1842 [?music used in Vid konung Oscars grav, 1859], Der Vogel im Walde, ?1847, Coupletter Romance och rondoletto, ?1860

Pf (all in BWxv): 11 pieces in *Musikalisk journal* (1819): Andante and Allegretto, A, Echo, B♭, Polonoise bagatelle, G, Thema con variazioni, E♭, Andantino, F, Scherzo, E♭, Thema con variazioni, g (also ed. K.F. Valentin, *Gammalt och nytt av svenska tonsättare*, ii, 1911), Polonoise, E♭, Tempo di marcia, E♭, Polonoise, A, Polonoise, B♭; 5 pieces in *Journal de musique* (1820): Thema con variazioni, E♭, Marche triomphale, A, Rondeau bagatelle, B♭, Con spirito, B♭, Poco allegro, D; Waltz, A♭, 1844, BW xv; Marche triomphale, C, ?1856, BW xv; 3 pieces: Une plaisanterie, E♭, Romance et scherzo, A♭, Presto féroce, e, ed. (1927), BW xv; Fantasia on 2 Swedish Folktunes, c, BW xv

Other kbd: 3 Fantasias, A♭, c, A, melodicon, ?1816–17, BW xv; En landtlig bröllopsfest [A Country Wedding], org 4 hands, 1844, arr. pf 4 hands by P.F. Bengtzon (1891), BW xv

**(6) (Christian) August Berwald** (*b* Stockholm, 24 Aug 1798; *d* Stockholm, 13 Nov 1869). Swedish violinist and composer, brother of (5) Franz Berwald. He enjoyed significantly more success as a performer, teacher and composer in Sweden than his brother, but none of his works have remained in the repertory. He gave the first performance, with his brother, of Franz's double violin concerto (1817), a work modelled on the double concerto by Dupuy which the brothers had performed the previous year. He was also the soloist in his brother's concerto of 1820. From 1815 he was a member of the court orchestra, becoming its leader from July 1832 until his retirement in 1861. Towards the end of his life he was head of the Conservatory of the Swedish Royal Academy of Music (1863–6). He composed an orchestral overture, several works for violin and orchestra, some string quartets and incidental music to a play for the Royal Theatre (in *S-Skma*).

**(7) Astrid (Maria Beatrice) Berwald** (*b* Stockholm, 8 Sept 1886; *d* Stockholm, 16 Jan 1982). Swedish pianist and teacher, granddaughter of (5) Franz Berwald. She studied at Richard Andersson's music school in Stockholm and later with Dohnányi at the Berlin Hochschule für Musik (1908–11). One of the leading Swedish pianists of her generation, she joined the staff of the Richard Andersson school in 1911 and was its principal from 1935 until her retirement in 1965. She gave the première of Franz Berwald's Piano Concerto in 1904 (with a piano transcription by Gustaf Heintze of the orchestral accompaniment) and in 1935 she founded the Berwald Trio, with whom she performed and recorded works by her grandfather.

**Besançon.** City in France. Julius Caesar recognized its strategic importance and established a fortress there against the German Ariovisti in 58 BCE. The settlement known as Vesontio subsequently became the metropolis of the Gallo-Roman region of Sequana. In the 5th century it became a bishopric but between 1290 and 1576 achieved the status of a free city. Administered as part of the Habsburg empire during the 16th century, it came under Spanish rule in 1595 and was later recognized as the capital of the Franche-Comté. In 1678, after Louis XIV's conquest (1665–74), it was incorporated into France, and its university was founded in 1691.

The city's two cathedrals, St Etienne and St Jean l'Evangéliste, shared one choir during the Middle Ages. A number of liturgical manuscripts from the 11th and 14th centuries are in the Bibliothèque Municipale, including one used at St Etienne which is important in the early history of notation. Another manuscript at the same library is a 12th-century musical treatise by Gerlandus who taught at the abbey of St Paul. The payments made to *primitivis scholarum* of St Jean, St Etienne and Ste Madeleine from 1262 suggest that there was polyphonic singing; this is confirmed by a 14th-century manuscript found at the Sorbonne containing the so-called Besançon Mass, a fragmentary 3-voice cycle with a troped Kyrie probably by Jean Lambelet. Other 14th- and 15th-century documents refer to the singing of 'messes à notes' and 'choriaux, ténoristes et organistes' at St Paul's. The *maîtrise* of St Jean included Du Fay's colleagues, Pierre Grosseteste (choirmaster, 1440–58) and Hugolin Folain (deacon, 1461–76), who had both served as singers in the papal chapel at Rome. Besançon's cultural life flourished during the Renaissance because of its commercially advantageous location, particularly under Nicolas Perrenot de Granvelle, minister to Margaret of Austria and then to Emperor Charles V. Richard de Renvoisy was employed at St Jean in 1545. During the 17th century the city's musical life was dominated by Jean Millet (1618–84), organist, singer and finally choirmaster at St Jean. He encouraged large polychoral performances but was also concerned with the liturgical reform directed by Archbishop Pierre de Grammont; he is specially noted for his *La belle méthode, ou l'art de bien chanter* (1666), and composed motets and sacred and secular songs.

Vaudry (1668–1742), councillor to the city's parliament, compiled two anthologies for the lute and theorbo (the larger of which is dated 1699). A musical academy was founded in 1726, giving concerts of chamber music: J.-M. Leclair 'le second' directed the orchestra in 1732. Opera productions grew in stature when a new theatre designed by Claude-Nicolas Ledoux was opened in 1786; it was burnt in 1956. The choirmaster at the cathedral of St Jean included Esprit Blanchard (1732) and Louis-Joseph Marchand (1739). The organist Jean-François Tapray assisted K.J. Riepp in the construction of a new instrument at St Jean from 1765. During the first half of the 19th century the town's musical life was undistinguished. A music school established in 1860 counted among its pupils René Emile Ratez (1851–1934) whose operas *Ruse d'amour* and *Paula* were performed at Besançon in 1886 and 1904 respectively.

Early in the 20th century the new societies of St Thomas d'Aquin and Ste-Cécile revived respectively plainchant in the Solesmes manner and polyphony in the late Renaissance and Baroque style. In 1906 the amateur Société des Concerts Symphoniques was formed to promote orchestral and choral concerts; after World War II Gaston Poulet was its director, but it was disbanded in 1970. Activity has since revolved around the amateur Orchestre Philharmonique (directed by J. Costarini), the Chorales à Coeur Joie and the Chorale des Chanteurs Comtois, as well as a professional vocal ensemble and chamber orchestra (directed by R. Pernette) specializing in modern music. In 1945 the music school acquired the status of an Ecole Nationale de Musique under the direction of Pierre Villette. André Cauvin, appointed director in 1967, extended its activities by founding a music academy and lycée in 1968. The conductor Gaston Poulet established an annual Festival International de Musique in 1948, held in September and devoted primarily to symphonic music. Soloists such as Fournier, Enescu, Rubinstein, Cortot,

Kempff, Souzay and Flagstad, and conductors such as Münch, Furtwängler, Monteux, Schuricht and Maazel have taken part. First performances of Milhaud's Second Piano Concerto (1948), Boulez's *Livre pour quatuor* (1959) and Messiaen's *Chronochromie* (1961) were given there. Some concerts take place at Les Salines d'Arc-et-Senans, the royal salt-works designed by Ledoux in 1775. The Concours des Jeunes Chefs d'Orchestre was established in 1951 (held annually until 1995 and biennially since), and from 1981 Besançon was a base for the Festival Jazz en Franche-Comté. The music collection of the Bibliothèque Municipale is notable for French music manuscripts and treatises of the 17th and 18th centuries.

Composers born in Besançon include Goudimel (*c*1520–72), Besard (*c*1567–*c*1617), Blavet (1700–68), Suard (1735–1817) and d'Ollone (1875–1959).

FRANK DOBBINS

**Besancourt** (*fl* 1549–68). French composer. Nine four-voice chansons by him, all with languishing, amorous texts, were printed in Paris by Pierre Attaingnant, Nicolas Du Chemin and Le Roy & Ballard. They are composed in a courtly musical idiom and a homophonic style that was rather old-fashioned by the late 1550s.

WORKS

*all for 4 voices*

Hélas mes yeux, 1557[9]; Jeune beauté, bon esprit, bonne grace (C. Marot), 1559[10], ed. in SCC, ix (1994); Las qui eust deu voir, 1559[10], ed. in SCC, ix (1994); Ne te voyant je languis, 1557[12]; Puisque je dois vivre en malheur, 1568[10a]; Qui le sommeil à la mort, 1549[24]; Qui pourra dire la douleur, 1553[20]; Si vostre mal, 1557[9]; Si vous eussiés le naturel préveu, 1549[24]

Vive sera et tousjours perdurable, attrib. Besancourt in 1573[6], is by Arcadelt.

FRANK DOBBINS

**Besanzoni, Gabriella** (*b* Rome, 20 Sept 1888; *d* Rome, 8 July 1962). Italian mezzo-soprano. She studied in Rome, making her début (as a soprano) as Adalgisa at Viterbo in 1911. After further study she became a mezzo-soprano, singing Ulrica in Rome and appearing throughout Italy. She first sang at the Teatro Colón, Buenos Aires, in 1918, returning there frequently; she also visited Rio de Janeiro and, in 1919, Mexico City, where she sang Ulrica, Delilah, Nancy (*Martha*), Carmen and Amneris, all with Enrico Caruso as principal tenor. Engaged at the Metropolitan (1919–20), she made her début as Amneris, then sang Isabella in the Metropolitan première of *L'italiana in Algeri*, as well as Delilah and Preziosilla (*Forza del destino*) with Caruso. Besanzoni's repertory also included Laura (*La Gioconda*) and Santuzza, which she sang at performances of *Cavalleria rusticana* conducted by Mascagni himself. At La Scala (1923–4) she sang Gluck's Orpheus under Toscanini, and also appeared as Mignon and Carmen, the role of her farewell in 1939 at the Baths of Caracalla, Rome. Her voice was rich, powerful, smoothly produced and notably flexible.

ELIZABETH FORBES

**Besard, Jean-Baptiste** [Besardus, Joannes Baptista] (*b* Besançon, *c*1567; *d* after 1616). Burgundian lutenist and composer. He received the education of a gentleman at the University of Dôle, taking the double degree of Licentiate and Doctor of Laws in 1587. He may then have spent some time in Rome, studying medicine and learning the lute. In 1597 he further matriculated at the University of Heidelberg, and also applied to teach the lute at the landgrave's court in Hesse; by this time he was established as a lute teacher in Cologne. A manuscript (*PL-Kj* 40143) compiled in Cologne for an anonymous pupil appears to testify to his activity in this field: it contains 33 pieces by Besard (dated between 12 October 1600 and 16 March 1601), 31 of which were later revised and reprinted in his *Thesaurus harmonicus*. In 1602 he returned to Besançon to marry Péronne Jacquot, and then went back to Cologne, where he published his *Thesaurus harmonicus*, a collection of lute music, at his own expense. The editing in 1604 of the *Mercurii gallobelgici*, a collection of historical documents and one of a series of collected European treaties and legal documents of the late 16th century brought out by Grevenbruch, his publisher, required the skills of a lawyer, and Besard may have undertaken it to pay for publication of the *Thesaurus*. In 1605 legal arrangements carried out in Besançon to assure his wife's marriage portion hint that he may have been somewhat spendthrift. In 1613 he inherited letters of nobility from his father. Between 1604 and 1617 Besard arrived in Augsburg, possibly to live with or use the influence of his friend Philip Hainhofer, a noted diplomat. He apparently continued his professions of law and medicine (see illustration), also teaching the lute. Here he published in 1617 *Novus partus* (a second collection of lute music) and had printed the *Isagoge in artem testitudinariam*, a German translation of the second edition of his lute manual (see below). In the same year he issued the *Antrum philosophicum*, a large, alphabetically arranged dictionary of diseases and their cures (not, as some have assumed, of alchemy) dedicated to the dukes of Pomerania. On 22 October, in Leipzig, Hainhofer wrote letters of recommendation to the Saxon, Pomeranian and Brandenburg courts, and dined with Besard. Whether Besard then actually visited these cities or gained employment at any of the courts is unknown, as are the place and date of his death.

The *Thesaurus harmonicus* is a major encyclopedic collection of 403 compositions in French tablature, arranged in ten books according to category: a manual on lute playing, *De modo*, is also part of the *Thesaurus*. Major types include most of the instrumental forms of the time: preludes, fantasias, psalm settings, chanson and madrigal intabulations, and a high proportion of dances (e.g. passamezzos, galliards, allemandes, courantes, branles). The music is for solo lute, or lute and voice (three pieces are for lute ensemble), and represents 21 different composers, the most important being Lorenzini (with whom Besard claimed to have studied), John Dowland, Vincenzo Galilei, Alfonso Ferrabosco (i) and Valentin Bakfark. About 10% of the works are directly ascribed to Besard himself, yet his significance is more as an anthologist than as a composer. The *Thesaurus* was printed in movable type, and its immense influence is

*Jean-Baptiste Besard: engraving by Lucas Kilian from 'Novus partus' (Augsburg, 1617)*

proven by the numerous copies of individual compositions that appear in later manuscripts and printed collections: Hainhofer's Lutebooks contain several of Besard's works, and at least one complete manuscript copy of the collection survives.

The *Novus partus*, while not nearly so extensive a collection as the *Thesaurus*, is of interest on several counts. It is one of the last books to have been printed from woodblock in Germany; and its 59 compositions (also in French tablature) are divided into three sections, the first having 12 pieces for three differently tuned concerting lutes and two other instruments or voices, the second containing 12 pieces for two concerting lutes, and the third consisting of 35 compositions for solo lute. Apart from Besard, who claims 35 of the works in the entire collection, 11 other composers are included, among them Michelagnolo Galilei, La Barre, La Grotte, Pietro Paolo Melli and Mesangeau. Besard also appended to the *Novus partus* a second edition of his lute manual, entitled *Ad artem testudinis*. The similarities and differences between the contents of the *Thesaurus* and those of the *Novus partus* reveal the differences in musical tastes in 1603 and 1617.

Both collections reflect the general state of early Baroque instrumental music and both are fundamentally similar in style and content. The most pervasive compositional principle is that of variation, whether it appears in sets of variations on a cantus firmus, in the *doubles* of dances, or in other applications of diminutions. Other characteristics include idiomatic instrumental techniques (e.g. *style brisé*, octave equivalence), little true counterpoint (except between outer voices), strong rhythmic accents and rhythmic experimentation, simultaneous false relations and other experimental dissonances, and the equal importance of major–minor keys and modes. The chief differences between the collections lie in the absence of vocal intabulations in the *Novus partus*, its emphasis on the expanded lower range of the 'theorboed' lute, and the increase in the number of concerted works. There is attractive music in both volumes, although the texts are often frustratingly corrupt. Nevertheless, the collections are interesting today because of their sheer size, catholicity of taste, influence, historical context, and the fact that much of the music does not appear in any other source.

There are few fundamental differences between the two versions of Besard's lute instructions, although the second (*Ad artem*) treats right-hand techniques more extensively. Like many of the other Renaissance and Baroque manuals they concentrate on fingering technique, much of it on a highly sophisticated level. The significance of *De modo* is indicated by its appearance in English translation in Robert Dowland's *Varietie of Lute Lessons* (1610) and in other manuscripts (e.g. Hainhofer's).

JULIA SUTTON/TIM CRAWFORD

**Beseda** (Cz.: 'friendly conversation'; pl. *besedy*). Several subsidary meanings developed in the 19th century; those connected with music are listed below.

(1) A type of social entertainment (often with instructive aims) or concert. This meaning developed in the 1840s during the Czech National Revival as a manifestation of middle-class cultural activity and could include declamation, music or dance.

(2) An organization, especially a club or society. The name *beseda* then became conferred on institutions which organized meetings, cultural events, lending libraries etc. The Měšťanská Beseda ('Townspeople's Club') was formed in Prague 1846 as an important centre of national life and provided a model for other similar institutions such as the Beseda Brněnská ('Brno Club', 1860), which was particularly orientated towards music and which met in the purpose-built Besední Dům ('Meeting House'). The first Czech organization which brought together writers, artists and musicians was the Umělecká Beseda ('Artistic Society', 1863); the Czech publishing firm HUDEBNÍ MATICE (later the Hudební Matice Umělecké Besedy) was formed under its auspices.

(3) A Czech ball. A *Beseda národní* ('National *beseda*'), held in Prague 1848 to raise funds for the National Theatre, was in effect a continuation of the Czech balls of the early 1840s. The *Slovanská beseda* ('Slavonic *beseda*') in Brno 1900 featured characteristic dances from different Slav nations, three of them composed by Janáček for the occasion (JW VI/11-13).

(4) A Czech salon dance popular in the 19th century, inspired by the French QUADRILLE but using steps based on Czech folkdances. It was developed in 1863 by the dancing master Karel Link at the suggestion of the writer Jan Neruda and soon became a popular society dance. Unlike the quadrille, which with one exception (in 6/8) was confined to simple duple time, the Czech *beseda* included dances in fast duple time (polka, *dvojpolka*, *kalamajka*, *obkročák*, *hulan* and *řezanka*; all but the *obkročák* were played at the polka tempo of crotchet = 92), slow to moderate triple time (*sousedská* and *rejdovák*) and the FURIANT. The resulting dance, in four sections, was performed by four couples who formed the shape of a square. It was introduced at a ball in the Convict Hall, Prague November 1863, to music arranged by Ferdinand Heller. By January 1864 it was danced by 140 couples in a *Narodní beseda* held in the Žofín Hall. A Moravian *beseda* was invented in the 1890s and a Silesian *beseda* in the early 20th century.

JOHN TYRRELL

**Besetzung** (Ger.). A convenient term meaning the combination of voices and/or instruments used to perform a composition, and for which there is no equivalent English word, although 'setting' or 'scoring' is similar.

**Besler, Samuel** (*b* Brieg [now Brzeg], Silesia, 15 Dec 1574; *d* Breslau [now Wrocław], 19 July 1625). German composer. By 1602 he was Kantor of St Bernhard, Breslau, and by 1609 was a master at the school associated with it; he was in fact a leading light in the musical life of Breslau during the first quarter of the 17th century, and his numerous published works reflect his busy life there.

Besler's earliest works are the two German Christmas carols of 1602 and the 20 contained in his *Crepundia angelica* (1609); the latter are simple four-part pieces designed, as he said, to foster Christian devotion among the young. A further 12 carols appeared in 1615. *Delitiarum mensalium* of the same year comprises 30 graces, intended principally for students and written in the same simple style. So too are 22 pieces in *Peregrinatorium spirituale* (1614); to these Besler added 'a prayer in time of pestilence', as though he had a premonition of his death during the Breslau plague of 1625.

The two parts of *Concentus ecclesiastico-domesticus*, dedicated to the great patron and collector Duke Georg Rudolph of Liegnitz, are somewhat more contrapuntal and in a style reminiscent of Johannes Eccard. When there were state visits to be celebrated in Breslau, Besler composed in an appropriately grander style, through which he seems to have spoken for all Silesia. Thus it was with *Melos harmonicum* for two four-part choirs, which commemorated the occasion, on 18 September 1611, when Archduke Matthias (later emperor) received the homage of the Silesian people. Again, in 1620, when Friedrich I of the Palatinate (the 'Winter king') received homage in Breslau early in the Thirty Years War, Besler honoured him with two eight-part psalms in the French style. A year later, after Friedrich had been overthrown, Breslau heard the *Syncharma musicum* by Schütz, whose employer, the Elector Johann Georg I of Saxony, received the homage of the Silesians as a representative of the emperor; Besler's role in these festivities is not clear. His three-part manuscript *Hymnus gratulatorius* for the building of the tower in the New Town of Breslau during 1624 was likewise written for a festive occasion (it was rediscovered only when the tower was demolished in 1838).

Besler's Passion compositions, which are closely related to the thinking of the Silesian mystic Jacob Böhme, probably stood specially close to his heart. The three sets of *Hymnodiarum et threnodiarum* (1611–14), with their monodic hymns, to some extent testify to the influence of plainsong, which was specially widely cultivated in Silesia, but they also include liturgical and devotional Passion music in a modern style, the texts of whose hymns are meditative observations on the Passion story. The same dichotomy between old and new can be seen in the four Passions of 1612; in the *St Matthew* and *St John Passions* the choruses are (according to Gerber) composed in the traditional manner but those in the *St Mark* and *St Luke Passions* are in an up-to-date style and can thus be seen as early forerunners of those in Schütz's Passions. The monodic writing of Besler's last published work, *Heptalogus in cruce pendentis Christi*, is also modern in conception.

Besler acted sporadically as a music publisher: he edited, for the first time, A. Scandello's *Gaudii Paschalis Jesu Christi* (1612) and the *St John Passion* of 1561 (1621). He was the brother of Simon Besler.

FRITZ FELDMANN/DOROTHEA SCHRÖDER

**Besler, Simon** (*b* Brieg [now Brzeg], Silesia, 27 Aug 1583; *d* Breslau [now Wrocław], 12 July 1633). German composer. He matriculated at the University of Frankfurt an der Oder in 1604 and was probably also a pupil of Bartholomäus Gesius there. He was active as a Kantor and teacher at Striegau (Strzegom) before 1610, from 1610 to 1620 he was at St Maria Magdalena, Breslau, and from 1620 to 1627 he was Kantor in the service of Duke Georg Rudolph at the princely collegiate church of St Johannes, Liegnitz (Legnica). It is still uncertain precisely when, towards the end of his life, he returned to Breslau. As a composer, apart from the six-part *Heut geborn ist uns ein Kindlein klein*, he confined himself to simple four-part writing for use in schools and churches and on special occasions. He was the brother of Samuel Besler.

WORKS

*all printed works published in Breslau unless otherwise stated*

Cantio votiva, Qui dare cuncta soles, 4vv (1615)
Christlicher Weyhnachtgesang, Von einer Jungfrau auserkorn, 4vv (1616)
Lob und Freuden Gesang, Heut geborn ist uns ein Kindlein klein, 6vv (1616)
Schönes und andächtiges Gebet, O Jesu Christ, gütigster Herr, 4vv (Brieg, 1618)
Auffmunterung, Da pacem Domine in diebus nostris, 4vv (Brieg, 1619)
Neu anmuttig Weynacht Lied, Das Jesulein nun ist geborn, 4vv (Brieg, 1619)
Trost Gesang dem Herren Friedrichen von Bebran über dem seligen Abschiede seiner Frauen Helenae, 4vv (1628)
Nobiliss. sponsor. Dn. Iohannis Hoffmann ... ac Mariae Artztiae ... sacris nuptialibus ... votiva cantio, 4vv (n.p., 1628)
Frewd und Wollust dieser Welt, 4vv, *PL-WRu*, according to Bohn (1890); Handbüchlein gottseliger Weyhnachtlieder, 4vv, ?*WRu*

FRITZ FELDMANN

**Besoyan, Rick** [Richard] **(Vaugh)** (*b* Alameda, CA, 1925; *d* Sayville, NY, 13 March 1970). American composer, lyricist and librettist. Besoyan showed an early interest in music and studied at the University of California at Berkeley. After serving in the army he went to New York City in 1946 to pursue a career as an actor and singer. For a while he toured with the Bredon-Savoy Light Opera Company performing operettas. Later Besoyan studied at the American Theatre Wing's school and became a musical coach at Stella Adler's Theatre School. He turned to writing and composing in the 1950s and, using his experience with light opera, wrote the book, music and lyrics for *Little Mary Sunshine* (1959), one of the most popular off-Broadway musicals of the era and an enduring favourite with schools, summer theatres and amateur groups. *Little Mary Sunshine* was a delicious spoof of *Rose-Marie* and other favourites of American operetta and the intimate production ran a surprising 1143 performances.

Besoyan accurately captured the old style, playfully echoing the music of Romberg and Friml while satirizing the innocence of that era. Four years later Besoyan penned a similar parody, *The Student Gypsy, or the Prince of Liederkranz* (1963), based on *The Student Prince* and other European-set operettas, but the result was much less successful, opening in a Broadway theatre but running for only 16 performances. He fared little better with his off-Broadway *Babes in the Woods* (1964). This musical version of Shakespeare's *A Midsummer Night's Dream* ran for 45 performances. Besoyan's output raises conjecture about his ability to compose beyond the level of parody, but there is an evident talent for lively and creative songwriting in his existing works.

WORKS

*dates are those of the first New York performance*

Little Mary Sunshine, 18 Nov 1959 [incl. Look for a Sky of Blue, Colorado Love Call]
The Student Gypsy, or The Prince of Liederkranz, 30 Sept 1963
Babes in the Woods, 28 Dec 1964

THOMAS S. HISCHAK

**Besozzi** [Besuzzi, Bezocy, Bezozi, Bezozzi, Bezzossi, Bisuzzi, Bizzossi, Pessozi]. Italian family of musicians. Their activities are recorded from the 16th century, when Cerborio Besozzi was a *piffaro* at Bergamo (1538) and Giovanni Francesco Besozzo was a music printer at Milan, to the mid-19th. They were mostly oboists.

(1) **Alessandro Besozzi (i)** (*b* Milan, *fl* 1680–1700). Singer and opera composer. He wrote Act 1 of the opera *Antemio in Roma*, performed at Novara in 1695, and an aria for the pasticcio opera *Etna festivo* performed at Milan in 1696. His lost *Six Sonates à violon seule et basse qui peuvent se jouer sur la flüte* was published in Paris about 1700.

(2) **Cristoforo Besozzi** (*b* Milan, 1661; *d* Piacenza, 22 Oct 1725). Oboist and bassoonist, brother of (1) Alessandro Besozzi (i). He was established in Parma as an instrumentalist in 1701, where from 1 June 1711, he was an oboist in the Guardia Irlandese, a military band founded by Duke Antonio Farnese.

(3) **Giuseppe Besozzi** (*b* Milan, 1686; *d* Naples, 22 Dec 1760). Oboist, eldest son of (2) Cristoforo Besozzi. He moved to Parma with his father and played with the Guardia Irlandese from 1711 to 1728, before becoming a *virtuoso d'oboe* at the ducal court until 1733. From 1734 to 1738 he was at the court of Naples but was dismissed because he became blind. After that he devoted himself to teaching.

(4) **Alessandro Besozzi (ii)** (*b* Parma or Piacenza, 22 July 1702: *d* Turin, 26 July 1793). Oboist and composer, son of (2) Cristoforo Besozzi. He played in the Guardia Irlandese from 1714 to 1728, after which he served Duke Farnese as virtuoso d'oboe until 1731. For the rest of his life he served the King of Sardinia, Carlo Emanuele III, as *virtuoso d'oboe* in the court chapel at Turin. In 1735 he and his brother (5) Paolo Girolamo were favourably received in Paris at the Concert Spirituel, but they soon returned to Turin. Burney heard the brothers play duets at their home in Turin on 13 July 1770. In spite of their advanced years, Burney judged their performances to be remarkable. In 1776 Alessandro was named *primo virtuoso di camera, dire Hore generale della musica istrumentale e suonatore di Hautbois*.

Alessandro's known output includes several concertos, only one of which was printed during his lifetime, and hundreds of works for chamber groups. The style of the concertos is characteristic of the late Baroque. The harmonic language lacks the simple directness developed by Vivaldi and others. There is a predominance of a sequentially generated counterpoint, but the texture frequently features contrasting sections consisting only of solo and bass. The chamber music, much of which was printed, is often jointly attributed to Alessandro and his brother (5) Paolo Girolamo.

WORKS

Concerto, G, 5 insts (n.p., n.d.)
6 Sonatas, 2 vn, vc, op.1 (Paris, n.d.), with (5) Paolo Girolamo Besozzi [may be the same as Six Sonates en trio pour deux violons et violoncello (Paris, ?1750) in *GB-Lbl*]
12 Sonatas, 2 vn, vc, op.2 (Paris, *c*1740)
6 Sonatas, fl, vn (London, ?1747)
6 Solos, fl/vn, op.2 (London, ?1750)
6 Trios, 2 vn, bc, op.2 (Paris, n.d.)
8 Sonatas, 2 fl/vn, bc, op.3 (London, ?1750)
6 Sonatas, 2 vn, bc, op.3 (Paris, n.d.)
6 Solos, fl, ob/vn, bc (London, ?1759)
6 Sonatas, 2 vn, bc, op.4 (Paris, n.d.; London, ?1760)
6 Sonatas, 2 vn/fl, bc, op.5 (London, 1764)
6 Sonatas, 2 vn ob, vc, op.7 (Paris, n.d.)
6 Trios, 2 vn ob, vn, bc (Venice, n.d.)
6 Sonatas, vn/fl, bc (Paris, n.d.)
6 Duets, 2 fl/vn (London, n.d.)
Ob conc., F, *c*1760, *D-RH* (2 copies); ob conc., D, *c*1760, *RH* (2 copies, 1 inc.), *H-Bb*; ob conc., D, *c*1760, *D-Rtt*; ob conc., B♭, *c*1760, *Rtt*; ob conc., G, *c*1760, *Rtt*, rev. with new 3rd movt in *GB-Lbl*; fl conc., G, *S-L*; ob conc., G, *c*1770, *D-Rtt* [attrib. (8) Carlo Besozzi in *H-Bb*
?Marchia da Caccia, pf, *I-Vqs* [attrib. 'Sig:ri Bisuzzi']
*c*100 trio sonatas, *D-Bsb*, *KA*, *Mbs*; *I-U Dricardi*; *S-L*, *Skma*, *Uu*; *Us-BEm*, *SFsc* [some identified by op. so may duplicate printed works]
12 Sonatas, vn, b, Genoa

(5) **Paolo Girolamo Besozzi** (*b* Parma, 17 April 1704; *d* Turin, 28 May 1778). Bassoonist and oboist, son of (2) Cristoforo Besozzi. He was a member of the Duke of Parma's Guardia Irlandese from 1717 to 1727, and in 1728 he became *virtuoso d'oboe* to Duke Farnese. In 1731 he became a bassoonist at the court in Turin. In 1735 he went to Paris with his brother (4) Alessandro Besozzi (ii) and played at the Concert Spirituel. Paolo Girolamo and his brother (4) Alessandro Besozzi (ii) are often cited as joint authors of works; no works are known which are attributed to Paolo Girolamo only.

(6) **Antonio Besozzi** (*b* Parma, 1714; *d* Turin, 1781). Oboist and composer, son of (3) Giuseppe Besozzi. He was in the service of the Duke of Parma from 1727 to 1731, in the Guardia Irlandese, and in 1734 he performed at Naples. In 1738 he joined the royal chapel in Dresden, becoming first oboist in the following year. In December 1757 he played, probably with his son (8) Carlo Besozzi, at the Concert Spirituel in Paris. From 1758 to 1759 he was at the Stuttgart court under the direction of Jommelli. He returned to Dresden and was there until 1774. In 1775 he moved to Turin. He is known to have been an active composer but none of his compositions appear to have survived.

(7) **Gaetano Besozzi** (*b* Piacenza, 25 Feb/March 1725 or Parma, 1727; *d* London, 1798). Oboist, son of (3) Giuseppe Besozzi. He was at the Naples court from 1736 to 1765. He moved to Paris in that year, where he worked in the royal chapel and appeared frequently at the Concert Spirituel. It is probably this Besozzi that Burney heard and admired there on 14 June 1770. In 1793 Gaetano moved to London, where he assumed the post of royal chamber musician and played first oboe in the Salomon concert series. His son Girolamo (*b* Naples, 1745–58; *d* Paris, 1788) travelled with him to Paris in 1765 and was an acclaimed oboist at the Paris court from 1770. Girolamo also played at the Concert Spirituel and was perhaps a composer, although no works can be attributed to him with certainty. His own son Henri (*b* Paris, *c* 1775; *d* ?Versailles, ?after 1814) was a flautist at the Opéra-Comique.

(8) **Carlo Besozzi** (*b* Naples, 1738; *d* 22 March 1791). Oboist and composer, son of (6) Antonio Besozzi. His father Carlo was undoubtedly his teacher. He must have displayed phenomenal ability for in 1755 he became a regular member of the Dresden court orchestra, a position which he retained throughout his life. His tours of Europe with his father included visits to Paris (1757) and Stuttgart (1758–9). He was judged favourably by Burney and by Leopold Mozart, who heard him play in Salzburg in

1778. Schubert heard Carlo in Augsburg and referred to him as the monarch of oboists and a great, 'but somewhat unusual', theorist.

Even though none of Carlo's music was printed during his lifetime, 23 concertos, 26 sonatas and a divertimento have survived. The concertos were clearly written for Carlo to play himself, and while conceived to display his skill, they rarely indulge in virtuoso display *per se*. The final movements are more serious than was common at that time and often introduce *Sturm und Drang* characteristics. There is an emphasis on novelty, frequently of an unexpectedly chromatic nature. The works for wind ensemble are, with one exception, in major keys and each of the four movements is usually in the tonic key.

Carlo's son Francesco (*b* Dresden, 1766; *d* 23 March 1810/1816) succeeded him as oboist in the Dresden royal chapel in 1792. Francesco was one of the best-known oboists of his time but no compositions by him are known to have survived.

WORKS

Ob conc., C, *c*1770, *D-HR*, also *H-Bb* dated *c*1800 and *CZ-K* dated 1768–74; ob conc., C, *c*1800; *H-Bb*, also *CZ-K* dated 1768–74; 4 ob concs., C, 1768–74, *K*; ob conc., G, *c*1800, *H-Bb*, also *D-Rtt* dated *c*1770; 4 ob concs., G, 1768–74, *CZ-K*; ob conc., F, *c*1800, *H-Bb*, also *CZ-K* dated 1768–74; 2 ob concs., F, 1768–74, *CZ-K*; ob conc., B♭, 1800–25, *H-Bb*; 2 ob concs., B♭, 1768–74, *CZ-K*; ob conc., E♭, 1800–25, *H-Bb*, also *CZ-K* dated 1768–74; ob conc., g, *c*1800, *H-Bb*; 2 ob concs., D, 1768–74. *CZ-K*; conc., 2 ob, C, 1768–74, *K*, inc. [1 conc., C, ed. J. Adamus (Adliswil, 1994)]

24 Sonatas, 2 ob, 2 hn, bn, *A-Wgm*; 3 printed in Alte Musik klassischer Blasermusik, cxxii–cxxiv (Munich, 1973)

Sonata, 2 ob, *c*1760, *D-Bsb*; sonata, ob, bn, *c*1770, *HR*

Divertimento, 2 fl, vc, *c*1795, *H-KE*

(9) **Louis-Désiré Besozzi** (*b* Versailles, 13 April 1814; *d* Paris, 11 Nov 1879). Pianist and composer, son of Henri, great-grandson of (7) Gaetano Besozzi. From 1825 he studied at the Paris Conservatoire. In 1836 he won second prize in the contest of the Accademia di Belle Arti for his cantata *Velléda*. In the following year he won the Prix de Rome for his cantata *Marie Stuart et Rizzio*; Gounod was among the competitors. He was an important teacher and published numerous works, mostly now lost, for piano and organ, as well as vocal music. His surviving works include: *Esquisses*, 24 pieces for Piano (Paris, 1867); *Musique Chorale ... solfèges sans accompagnement* (Paris, 1868); 84 versets on *préludes* for organ or harmonium, op.101 (Paris, ?1880); and a manuscript (in Brussels) of a Benedictus from one of his masses.

GUIDO SALVETTI/T. HERMAN KEAHEY

**Bessaraboff, Nicholas** [from 1945 Nicholas Bessaraboff Bodley] (*b* Voronezh, 12 Feb 1894; *d* New York, 10 Nov 1973). American musicologist of Russian birth. Actively interested in music from childhood, he was trained as a mechanical engineer in St Petersburg (1912–15). In 1915 he was sent to the USA to join a Russian Artillery Commission seeking to procure munitions. After the 1917 Revolution, Bessaraboff stayed in the USA, working as an engineer in Rochester, New York; it was there that he began the serious study of musical instruments. In 1927 he became a naturalized American citizen. Four years later he moved to Boston, where in 1935 he began a short catalogue that grew into a general compendium of western European instruments, arranged in the form of a systematic classification of instruments. *Ancient European Musical Instruments: an Organological Study of the Musical Instruments in the Leslie Lindsey Mason Collection at the Museum of Fine Arts, Boston* was published in 1941, after which time Bessaraboff devoted himself mainly to his engineering career and to the study of prime numbers. For further information, see D.D. Boyden: 'Nicholas Bessaraboff's *Ancient European Musical Instruments*', *Notes*, xxviii (1971–2), 21–7

DAVID D. BOYDEN

**Bessel, Vasily Vasil'yevich** (*b* St Petersburg, 13/25 April 1843; *d* Zürich, 16 Feb/1 March 1907). Russian music publisher. He received his music education at the St Petersburg Conservatory, where he studied the violin with Wieniawski and music theory with Nikolay Zaremba, and graduated in 1865 from I.A. Veykman's viola class. From 1866 to 1874 he played the viola in the ballet orchestra of the imperial theatres. In August 1869 he and his brother Ivan opened a music shop on the Nevskiy Prospekt and this swiftly expanded into a thriving publishing house. An important centre of Russian musical life, Bessel's firm published works by all the prominent Russian composers, notably Tchaikovsky, Dargomïzhsky, Anton Rubinstein and the members of The Five. Bessel was known also as a writer, and several of his articles appeared in the weekly journal *Muzïkal'nïy listok* ('The musical leaflet'), which he edited and published from September 1872 to May 1877. He also contributed to the *Neue allgemeine Musik-Zeitung*, and from 1878 until 1887 was the St Petersburg correspondent of the *Neue Musik-Zeitung* published in Leipzig. From September 1885 to December 1888 he published the weekly *Muzïkal'noye obozreniye* ('Music review'), and in 1901 his book on music publishing, *Notnoye delo*, appeared in St Petersburg. After his death the firm passed to his sons Vasily and Aleksandr, who in 1920 moved the business to Paris.

GEOFFREY NORRIS/CAROLYN DUNLOP

**Besseler, Heinrich** (*b* Dortmund-Hörde, 2 April 1900; *d* Leipzig, 25 July 1969). German musicologist. He studied musicology with Gurlitt in Freiburg, with Adler and Fischer in Vienna and with Ludwig at Göttingen, along with philosophy (Heidegger) and German philology as secondary subjects. He obtained the doctorate under Gurlitt at Freiburg in 1923 with a dissertation on the German suite in the 17th century and completed his *Habilitation* there two years later with a work on the motet from Petrus de Cruce to Philippe de Vitry. In 1928 he was appointed reader in musicology at the University of Heidelberg. From 1935 to 1939 he oversaw all publications emanating from the Staatliches Institut für Deutsche Musikforschung. He became professor in musicology at the University of Jena in 1948 and in 1956 at the University of Leipzig, where he remained until 1965. Besseler edited the series Heidelberger Studien zur Musikwissenschaft (1932–9), Musikalische Gegenwartsfragen (1949–53), Jenaer Beiträge zur Musikforschung (1954–61) and Musikgeschichte in Bildern (with M. Schneider and W. Bachmann), and oversaw the publications of Corpus mensurabilis musicae. Many of his students, including Bukofzer, Gerson-Kiwi, Lowinsky, E.H. Meyer, Hewitt and Salmen, became active at universities in and outside Germany. Among the honours he received were his election to full membership in the Sächsische Akademie der Wissenschaften in Leipzig and an honorary doctorate from the University of Chicago.

Besseler won an international reputation with his monumental study of the history of Western music to 1600, *Die Musik des Mittelalters und der Renaissance* (1931). There followed numerous works on the music of the late Middle Ages, including *Bourdon und Fauxbourdon* (1950), which provoked discussion about the question of insular or continental origin of fauxbourdon. Almost simultaneously with this book he began his edition of the complete works of Du Fay. Shortly before his death he completed preparations for the publication of the Schedel Liederbuch (*c*1460), an important early source of German polyphonic song. In addition to his authoritative work in early music, Besseler gave much impetus throughout the 1950s to the study of Bach's work, preparing editions of instrumental works for the Neue Bach-Ausgabe and promoting the idea that Bach's instrumental music prepared the way for 'German Classicism'. Besseler also made significant contributions in examining the differences between vocal and instrumental style ('Singstil und Instrumentalstil in der europäischen Geschichte', 1953), to which he contributed the concepts of *Prosamelodik* and *Korrespondenzmelodik*. Throughout his career, Besseler paid close attention to the different functions of music throughout the ages, and his writings covered a broad chronological range. He also contributed valuable essays in aesthetics and organology and was one of the first to give serious consideration to the study of paintings as a means of understanding the nature of early instruments and performing practice, leading to his co-editorship of the broadly conceived Musikgeschichte in Bildern.

In addition to his scholarly accomplishments, Besseler played a pivotal role as organizer in German musicology. Active during his student days as a music critic and a leader in the German youth movement, Besseler had a keen sense of the workings of contemporary musical life and the role of musicology in it. Pursuing a career in a volatile economic and political climate, Besseler learnt how to use politics to benefit musicology and strengthen its relationship with the state and the public, a skill which served him well in dealing with the authorities of the Third Reich and the German Democratic Republic. Although politics rarely comes through in his scholarly writings, his activities clearly reveal his engagement, such as the speech he delivered in 1934 ('Musik und Nation') endorsing plans to forge a bond between music and the Nazi state and to isolate German music from unsavoury influences. Thereafter, Besseler played a central role in the Staatliches Institut für Deutsche Musikforschung, supervising its periodicals and the expansion and transformation of the Denkmäler deutscher Tonkunst into Das Erbe deutscher Musik. Besseler cultivated a deep trust with the Nazi education minister and assumed the role of protecting Germany's interests at international conferences. His strong political position actually allowed him to defy Nazi anti-Semitic policy and to promote two Jewish doctoral students, Lowinsky and E.H. Meyer. After the war, Besseler's organizational skills combined with his high scholarly profile launched him to the position of leading musicologist in East Germany. Despite his dismissal from Heidelberg University owing to his activities during the Third Reich, Besseler was sought after by East German authorities to restore Leipzig's musicological stature and oversee important collaborative ventures with Leipzig publishers that would rival musicological productivity in West Germany and the USA.

Many of Besseler's innovative approaches have long stood the test of time. His concepts of *Umgangsmusik* (communal music making) and *Darbietungsmusik* (presentational music making), later developed by Doris Stockmann and others, served as an important basis for the sociology of music. Also widely accepted in both historical and pedagogical inquiries were his theories on hearing, in which he coined the designations of active-synthetic and passive listening and treated hearing as a phenomenon that can be traced historically. Scholars further adopted his notions of the inner structural unity of Viennese Classicism, his theories on metre, and his formulation for analysing Bach's works by isolating 'character themes'. Many of his ideas have been traced to the influences of Heidegger (his concept of musical discourse as an expression of subjectivity, and the basis for his ideas related to *Gebrauchsmusik*), while others of his theories have only recently been called into question and challenged, such as his assumptions about the development of French music, interpretations of Ockeghem and their applications in performing practice, attributions to Du Fay and theories concerning *fauxbourdon*. Besseler was nevertheless recognized by generations of musicologists for his gift for lucid and pointed argument and his rigorous development of historical concepts. His organizational talent, effectiveness as a teacher, universality of his work, multi-faceted interests and excursions into understanding the functions of art allowed Besseler to make a name for himself as one of the most influential musicologists of the 20th century.

PAMELA M. POTTER

**Besses (i Bonet), Antoni** (*b* Barcelona, 1945). Spanish pianist and composer. He studied at the Barcelona Conservatory with Joan Gibert Camins, Zamacois and Joan Massià. He was awarded a grant to further his studies in Paris with Sancan and Messiaen, and at the Antwerp Conservatory with Frederic Gevers. He was also awarded the 'María Barrientos' and special piano prizes by the Barcelona Conservatory, the first prize for orchestral conducting by the Antwerp Conservatory, first prizes in the Sabadell and French Institute competitions and the Silver Dragon at the International Competition in Tenerife.

As a pianist, he participated in the Santiago de Compostela, Siena and Waterloo festivals, and has performed in Brussels, Copenhagen, Geneva, London, Milan, Paris, Warsaw, Vienna and other places. His repertory ranges from the Baroque to contemporary composers. He has collaborated with the violinist Gonçal Comellas and with the cellists Marçal Cervera and Radu Adulescu. He has made recordings with important recording labels and his compositions have often been included in festival programmes (such as Cuenca, Royan and Barcelona), in concert cycles and in television and radio programmes.

WORKS

F. TAVERNA-BECH

**Besson.** French and English firm of brass instrument manufacturers. It was founded by Gustave Auguste Besson (*b* Paris, 1820; *d* Paris, 1874), an apprentice to L.-J. Raoux's pupil Dujariez. It is unlikely that Besson founded his Paris firm at the age of 14 (as stated in the Besson catalogues) or in 1837 (as given by Arthur), but 1838 (Pierre) may be the correct date. The London branch of the firm was opened on the occasion of the Great Exhibition of 1851, first at the address of Pask, and from 1855 at that of Jullien. It was due to unsuccessful litigation against Adolphe Sax that Besson established a second London factory in 1858, leaving his wife in charge of the Paris plant. She is thought to have been Florentine Besson, who in 1864 was given a British patent for a multi-pitched cornet. Among Besson's notable inventions and improvements in brass instrument making were the straight bore (1854), going directly through the valves rather than in the more common zigzag pattern; the full bore, which in affecting the size of the holes in the pistons improved response (1855); and, most important, the 'prototype' system of mandrels, which assured exact duplication of instruments and marked the birth of modern instrument manufacture (1856).

On Besson's death the French firm passed to his widow and their daughters, Cécile and Marthe. Following the death of her mother a year later, Marthe, a woman described as 'astute', 'businesslike' and 'energetic' who had trained under her father, took over both the Paris and London firms. She married one Adolphe Fontaine in 1880, after which the firm took on the name 'Fontaine-Besson'. Presumably the French trade name 'F. Besson' was adopted at that time, while the British instruments bear the simple attribution 'Besson'. In the early 1890s Fontaine became ill and prone to fits of violence, leading Marthe to withdraw to London and sue for divorce. His provocative behaviour induced the French workers to strike in September and October 1894, but he stayed on and their salaries did not improve. The instruments invented by Marthe include: a cornet (1882) with two extra transposing rotary valves on the main tubing to eliminate the various loose mouthpipes previously in use; a trumpet in F♯ (1884) with various crooks down to C, three valves and a slide; the first piccolo G trumpet, in straight form and crooking down to F and E♭, for a performance by Teste of Bach's *Magnificat* in 1885; other high-pitched trumpets in F/E♭, E♭/D, C/B♭/A and B♭/A; a bass trumpet in C for the performance of works by Wagner: a C tuba with four valves, and a bass C tuba with five; the family of cornophones, with conical tubing and a large bore and played with a horn-type mouthpiece (1890); and a contrabass clarinet in B♭ (1890). The F. Besson large-bore B♭ trumpet, called the 'Meha' model, was the first modern B♭ trumpet, and provided the point of departure for Elden Benge and Vincent Bach.

G.A. Besson's granddaughter Mathilde Sabatier managed the F. Besson factory before World War II, moving it after the war to 16 Faubourg Saint Denis. On her death (before 1957) Couesnon took over the firm. It was in private hands from about 1973 and ceased to exist in 1994.

During World War II, the British factory made no instruments. It has been owned by Boosey & Hawkes since 1948. While the French factory was known for its orchestral brass instruments, the British output consists mainly of band instruments.

EDWARD H. TARR

**Besson, (Michel-)Gabriel** (*b* c1689; *d* Versailles, 22 Aug 1765). French violinist, *musette* player, flautist and composer. He may have been related to the three Bessons of 17th-century Marseilles described as 'lieutenants du roi des violins', or to a family of musicians of the same name living in Lyons in the 17th and 18th centuries. In 1717 he was playing the violin in the king's Musique de la chambre, as a *symphoniste*, and he was in the orchestra of the royal chapel in 1722. In Paris in 1720 he published his ten *Sonates à violon seul et la basse continue*. The violin part does not go beyond the 3rd position, but Besson employed the entire technical range of the period, with arpeggios and double stops. In 1723 he acquired the reversion of François Duval's position with the 24 Violons du Roi, and he took up the duties of the post on Duval's death in 1728. At the same time he succeeded Pierre-Alexandre Pièche (1693–1728) as *musette* player and flautist, and he married Pièche's daughter Henriette-Claude in 1732. He was also a violinist in ensembles playing at the many court concerts. In 1746 he made over to his son the reversion of his posts, which by 1758 he himself no longer occupied (except for continuing to play in the orchestra of the royal chapel).

ELIZABETH KEITEL/BERNARD BARDET

**Bessón, Gabriel Díaz.** *See* DÍAZ BESSÓN, GABRIEL.

**Besson, Gabriel-Louis** (*b* Versailles, 10 April 1733; *d* Versailles, 24 Aug 1785). French violinist, flautist, *musette* player and composer, son of GABRIEL BESSON. He was given the reversion of his father's appointments as a member of the 24 Violons du Roi, *musette* player and flautist of the Chamber in 1746, and in 1758 he was in charge of those posts, which were abolished in 1761. He and his father also played the violin in the royal chapel and in court concerts. He taught the violin and harp to Louis XV's daughters Mmes Adélaïde, Sophie and Louise-Marie, and in 1764 he was appointed *huissier de la chambre* to Mme Victoire. He received substantial pensions in his retirement. Leopold Mozart mentioned him in the journal of his visit to Versailles (1763–4), and his name appears in a letter that Leopold wrote from Salzburg to his son while the latter was in Paris (1778). Besson dedicated two collections of *airs* from *opéras comiques* and plays to Mme Victoire, one entitled *Airs choisis, arrangés et variés pour le décacorde* op.1 (Ver-

sailles and Paris, *c*1784), the décacorde being a ten-string lute-guitar hybrid he had invented, and the other *Chansons et ariettes dont les accompagnements [sont] variés pour le décacorde* op.2 (Versailles and Paris, *c*1785).

ELIZABETH KEITEL/BERNARD BARDET

**Best, Matthew** (*b* Farnborough, Kent, 6 Feb 1957). English bass-baritone and conductor. He studied at Cambridge and at the National Opera Studio in London, and in 1982 won the Decca-Ferrier Award. He joined the Covent Garden company in 1980, and he has also sung frequently with Opera North, Scottish Opera (notably as Amfortas in 2000), WNO and Nederlandse Opera. In 1995 he toured with John Eliot Gardiner, singing Pizarro in his production of Beethoven's *Leonore*, which was also recorded. In the same year he sang the High Priest in *Alceste* at Glyndebourne, and was praised for the dignity of his voice and his commanding presence. He is perhaps less favourably heard on recordings, which expose a certain roughness of production and where his more valued contribution has been as conductor of the Corydon Singers, founded by him in 1973. Particularly fine have been their Beethoven and Bruckner recordings; but their repertory is large and the standard of performance invariably high. Best has also worked with orchestras in Britain and Europe, being appointed principal conductor of the Hanover Band in 1998.

J.B. STEANE

**Best, W(illiam) T(homas)** (*b* Carlisle, 13 Aug 1826; *d* Liverpool, 10 May 1897). English organist. He abandoned a career as a civil engineer to take up music professionally some time after 1840, and held appointments at churches in Liverpool before becoming organist to the Liverpool Philharmonic Society in 1848. From 1852 to 1855 he resided in London and for short periods was organist at the Royal Panopticon of Science and Art (Leicester Square), the Lincoln's Inn Chapel and St Martin-in-the-Fields. In August 1855 he was elected to the post of organist at St George's Hall, Liverpool. During his long tenure of this office Best became nationally known for his solo performances, and despite heavy commitments undertook many engagements in other cities. In 1871 he opened the Willis organ at the Royal Albert Hall, and in 1873 gave the inaugural recital on a Cavaillé-Coll instrument in the Albert Hall, Sheffield. During 1872 he resumed his connection with the Liverpool Philharmonic Society, also officiating at local churches. His appearances at the great Handel Festivals in London were kept up from 1871 to 1891; when in Rome during 1882 he gave a recital at which Liszt and Sgambati were present, and in 1890 he opened the Sydney Town Hall organ. He was granted a civil list pension in 1880; but in 1894 ill-health forced him to resign from his post with Liverpool Corporation.

Best was one of the greatest organ virtuosos of the 19th century, his powerful improvisations and fine pedal technique being especially admired. He also holds a distinguished place among the new class of civic musicians brought into prominence by the installation of concert organs in large public buildings. Although an experienced church musician, his real genius lay in the interpretation of secular music: he exploited his opportunities at Liverpool in such a way as to make the organ serve as a substitute for a municipal orchestra. His carefully planned recital programmes included not only masterpieces from the standard organ repertory but also arrangements of piano solos, chamber music, oratorio choruses and orchestral works. His fondness for adaptations inevitably dismayed purists; yet despite his enormous popularity Best rarely played to the gallery. Few of his contemporaries could equal his skill in demonstrating the potentialities of the large-scale modern organ: some of his suggested improvements were adopted by organ builders.

Best's original compositions (anthems, keyboard works and some orchestral pieces) are unimportant; but his editions of Bach, Handel and Mendelssohn are highly professional, and he did useful work on the music of the Anglican liturgy. He also published instructional manuals, and reissued J.C.H. Rinck's *Practical Organ School* (1864). His various anthologies of organ solos are exhaustive in scope, and include transcriptions from the works of most major composers from Bach onwards. He did much to reveal to a large public the full extent of Bach's genius as a composer for the organ.

**Béthizy, Jean Laurent de** (*b* Dijon, 1 Nov 1702; *d* Paris, 19 Oct 1781). French theorist and composer. His opera *L'enlèvement d'Europe* was produced at Versailles in 1739 and two of his motets were performed at the Concert Spirituel: *Laudate Dominum* in 1749, and *Domine, Dominus noster* in 1756 and 1757. His only compositions to survive, however, are two *cantailles*: *Le transport amoureux* and *Le volage fixé* (both Paris, n.d.). Although best-known for his *Exposition* (1754), Béthizy also clarified, expanded and revised some of Rameau's ideas and formulated several of his own. His concept of 'censée-toniques' and his use of barred figures for dominant chords were adopted by Rameau in his *Code de musique pratique* (1760). D'Alembert and Béthizy quarrelled over Rameau's theories in the *Journal oeconomique* following the publication of d'Alembert's *Elémens* in 1752. Nevertheless in the second edition (1762) d'Alembert recommended the *Exposition* as a practical supplement.

Franceschini has identified Béthizy with Eugène-Eléonore de Béthisy de Mézières (1709–1781), a lieutenant general and governor of Longwy. However, there is

evidence to suggest that they were different individuals, and the brochure *Effets de l'air* (1760), sometimes attributed to Béthizy, was written by Béthisy de Mézières.

**Bethlehem Bach Festival.** Annual festival featuring the music of J.S. Bach, held at Lehigh University in Bethlehem, Pennsylvania. It is presented by the Bach Choir of Bethlehem, founded in 1882 by John Frederick Wolle, organist of the Central Moravian Church, as the Bethlehem Choral Union, and renamed in 1898. The origins of the festival are rooted in the religious traditions of the Moravians, who settled in the area in the 18th century. The festival was initiated on 27 March 1900 with the first American performance of Bach's B minor Mass, conducted by Wolle. Festivals were held in 1901, 1903 and 1905; after reorganization of the choir in 1911 they were resumed annually under Wolle (1912–33), whose successors include Ifor Jones (1938–69), Alfred Mann (1970–80), William Reese (1980–83) and Greg Funfgeld (from 1983). In addition to the festival in May, the choir presents the *St Matthew Passion* and *St John Passion* during Lent; it also performs in August at Bethlehem's Musikfest and at Christmas.

**Béthune, Conon de.** *See* CONON DE BÉTHUNE.

**Bethune (Green), Thomas** [Blind Tom] (*b* Columbus, GA, 25 May 1849; *d* Hoboken, NJ, 13 June 1908). Black American pianist and composer. He was blind from birth and was bought as a slave with his parents in 1850 by James N. Bethune, a journalist, lawyer and politician in Columbus. He demonstrated musical aptitude and exceptional retentive skills by his fourth year and was given musical instruction by Bethune's daughter Mary. He was exhibited throughout the state by his master in 1857, and then hired out to Perry Oliver, a planter of Savannah, who took him on an extensive concert tour throughout the slave-holding states; this included a command performance at Willard Hall in Washington DC, for visiting Japanese dignitaries. His programmes included works by Bach, Beethoven, Chopin, Liszt, Thalberg and other European masters, improvisations on operatic tunes and popular ballads, and several of his own published and unpublished compositions. He could perform difficult pieces after one hearing, sing and recite poetry or prose in several languages, duplicate lengthy orations, and imitate the sounds of nature, machinery and various musical instruments. On the outbreak of the Civil War he was returned to the Bethunes, who continued to exhibit him in the South to raise money for the Confederacy. After the Bethunes were successful in a guardianship trial in July 1865, Tom was taken abroad, with W.P. Howard of Atlanta as his musical tutor; he received testimonial letters from such musicians as Moscheles and Hallé. The Bethunes moved to Warrenton, Virginia, on their return, and Tom was shown throughout the USA and Canada; he studied with Joseph Poznanski in New York during the summers. In 1887 Bethune's son's widow gained legal control over Tom, and continued to exhibit him in major concert halls and as a vaudeville attraction. His final appearances were on the Keith Circuit, in 1904–5.

Tom wrote more than 100 piano works which are typical examples of 19th-century parlour pieces; they include *The Rainstorm* (1865), *The Battle of Manassas* (1866), *March Timpani* (1880), *Cyclone Galop* (1887), *Blind Tom's Mazurka* (1888), and *Grand March Resurrection* (1901). His vocal compositions reveal a familiarity with revival hymns.

**Betini, Matteo** [Matheus]. *See* MATHEUS DE BRIXIA.

**Betscher, Nikolaus** [Leonardus Wolfgangus] (*b* Berkheim, Upper Swabia, 31 Oct 1745; *d* Rot an der Rot, 12 Nov 1811). German composer. He was educated at the Premonstratensian abbey of Rot an der Rot and later became a monk there, taking the name Nikolaus; in 1769 he was ordained priest. He served as abbot from 1789 until the dissolution of the abbey in the secularization of 1803. As a composer he was decisively influenced by Michael Haydn. His works are in the early Viennese Classical style and show him to have been accomplished in the forms and techniques of church music of his day; they are marked by a consistent use of sonata form, melodic inventiveness and originality of texture and instrumentation. Betscher's music lay largely forgotten until interest in it was renewed in 1984.

WORKS
*most MSS in D-Tl*

Sacred: 11 masses, incl. 1, C, 1794, ed. A. Šumski (Wasserburg, 1984); 2 requiem settings; 2 TeD, 1 ed. A. Šumski (Wasserburg, 1985); Mag, Vespere de confessore, Salve regina, psalms, hymns, pilgrimage songs, devotional songs

Other: Wider die Mode (12 social songs), unacc. choir; Sonata, hpd/pf; 24 pieces, various insts

ALEXANDER ŠUMSKI

**Betschwarzowski, Antonín František.** *See* BEČVAŘOVSKÝ, ANTONÍN FRANTIŠEK.

**Bettella** [Betella], **Paolo** (*fl* 1677). Italian composer. He was a pupil of Simone Vesi at Padua, where he became a chaplain at the cathedral. He published *Messa e salmi* op.1 (Venice, 1677), for one, three and four voices, with violins and continuo. There is also one piece by him in a manuscript at the University of Uppsala.

□

**Bettendorf, Emmy** (*b* Frankfurt, 16 July 1895; *d* Berlin, 20 Oct 1963). German soprano. She made her début in 1914 at Frankfurt in Conradin Kreutzer's *Nachtlager in Granada*. After two years with the company at Schwerin and an appearance in Vienna as Agathe in *Freischütz* she joined the Berlin Staatsoper, where her roles included Eva, Elsa and Desdemona; she also sang Ariadne and the Marschallin in performances conducted by Strauss. During the 1920s she undertook much concert work and appeared in opera with an impressive German company touring Spain and the Netherlands. Increasingly important in her career were broadcasts and recordings, through which she became one of the most popular singers of her time. She retired in 1934, but toured the eastern front singing to troops in wartime, and from 1947 to 1952 taught at the Städtisches Konservatorium, Berlin. Recordings reveal her exceptionally pure and mellow voice, the style sometimes lacking in vitality but well suited to the quieter and more relaxed parts of her extensive repertory.

**Bettlerleier** (Ger.: 'beggar's lyre'). *See* HURDY-GURDY.

**Betterton, Thomas** (*b* London, 1635; *d* London, 28 April 1710). English actor, manager and opera director. Generally regarded as the greatest English actor before Garrick, he played a key role in the invention of SEMI-OPERA. In 1668 he became co-manager of the Duke's Company, which was already featuring plays with musical interludes, many of them set by Matthew Locke. In 1671 the troupe moved into the new Dorset Garden Theatre, specially equipped with the machines necessary for opera. Betterton visited Paris to study stagecraft and may have seen the famed *comédies-ballets* of Lully and Molière. He then produced a series of musical extravaganzas, or semi-operas: adaptations of Shakespeare's *Macbeth* (1673, music by Locke) and *The Tempest* (1674, music by Locke, Humfrey and others), Thomas Shadwell's *Psyche* (1675, music by Locke) and Charles Davenant's *Circe* (1677, music by John Banister (i)). In addition to coordinating the production and devising the scenery, Betterton often acted the protagonists, roles that never required singing.

In late summer 1683 Charles II sent Betterton – now manager of the United Company, an amalgam of the former Duke's and King's companies – back to Paris to engage Lully and the Académie de Musique to produce a *tragédie lyrique* to celebrate the 25th anniversary of the Restoration. When this proved impossible John Dryden was commissioned to provide a libretto for setting by Luis Grabu. Originally this was to have been a semi-opera, *King Arthur*, with a sung prologue, but the latter was expanded into a full-length, all-sung opera, *Albion and Albanius*. After this failed, no new musical work was attempted until 1690, when Betterton turned Philip Massinger and John Fletcher's *The Prophetess* (or *Dioclesian*) into a semi-opera; with music by Henry Purcell this proved a great success. He was probably also responsible for the adaptation of *The Fairy Queen* (1692). In 1694 he was paid £50 to adapt and stage Sir Robert Howard and Dryden's *The Indian Queen*, but any further involvement in Purcell's last semi-opera was prevented by the Actors' Rebellion: in spring 1695 Betterton and a group of senior colleagues left the United Company and set up a makeshift theatre in Lincoln's Inn Fields. He continued to produce musical plays, even an occasional semi-opera, and in 1700 staged the first public production of Purcell's *Dido and Aeneas* woven into an adaptation of *Measure for Measure*.

CURTIS PRICE/MARGARET LAURIE

**Bettinelli, Bruno** (*b* Milan, 4 June 1913). Italian composer. He graduated in piano at the Milan Conservatory in 1931, and in choral singing, conducting and composition, studying with G.C. Paribeni and Bossi, in 1937. In 1941 he won the Accademia di S Cecilia prize in Rome and in 1955 the Busoni prize in Trieste. He began to teach theory in 1938 and harmony in 1941 at the Milan Conservatory, and he was professor of composition there from 1957 to 1979. His students included Corghi, Abbado, Chailly, Gentilucci, Muti and Pollini. He has been a member of the Accademia di S Cecilia, Rome.

His earlier music (e.g. *2 invenzioni* and the symphonies nos.2 and 3) owes much of the discipline of its rhythmically clear contrapuntal lines to the neo-classical approach of Hindemith. After the subsequent harmonic and timbral experimentation of the *Sinfonia breve* and the Second Concerto for Orchestra, he abandoned tonality for atonal chromaticism (e.g. in *Musica*), and a reconsideration of Webernian principles, as in *Episodi*, *Varianti*, *Studio* and the symphonies nos.5–7. His exploration of avant-garde elements led him to the use of electronics, for example in *Count Down*; but works such as *Sono una creatura*, *Quadruplum* and *Contrasti* demonstrate the emphasis he has continued to place on constructive rigour and on communication with the listener.

VIRGILIO BERNARDONI

**Bettini, Giovanni** (*b* Prato; *fl* 1616–24). Italian organist and composer. He studied under Antonio Brunelli, possibly while the latter was serving at Prato in the early 1610s. Later, following Brunelli, he moved to Pisa, where he probably stayed for the rest of his life, for his only printed music appeared in volumes by composers connected with that city – Brunelli and Vincenzo Calestani. On 22 August 1618, doubtless on Brunelli's recommendation and after an audition by Marco da Gagliano and Jacopo Peri, he was appointed organist to the Knights of St Stephen 'nel sonare senza concerto come in concerto', a post he held until May 1624. He may also have had connections with the Tuscan court, for the first of the three agreeable songs (two solos and a trio) by him in Brunelli's *Scherzi, arie, canzonette, e madrigali* (RISM 1616[12]/*R*1986 in ISS, ii) is dedicated to Grand Duke Cosimo II and its text reads as though it may have been part of an entertainment staged at court. His setting of 'O primavera, gioventù dell'anno' in Calestani's *Madrigali et arie* (1617[12]) is less attractive: it may have been modelled on Domenico Visconti's setting published the previous year. There are also five competent secular duets and trios by him in *CZ-Pnm* Sign.II La 2 (formerly in the Lobkowitz library at Roudnice) and *I-Bc* Q 49, though three of the pieces attributed to him in the latter manuscript are anonymous in the former. The manuscript at Prague also includes a solo aria and a *lettera amorosa* by him.

TIM CARTER

**Bettino, Geronimo** (*b* Verona; *d* ?Verona, before 1 Sept 1643). Italian composer. He is known only from two published volumes of music: *Concerti accademici* (Venice, 1643, inc.) and *Messa e salmi concertati* (Venice, 1647); both were issued posthumously by his pupil Carlo Calzareti [Calzaresi]. Of the 1643 volume of secular music only the quinto partbook survives; its list of contents includes a sectional canzonetta for two voices and other music for two, four and five voices, with continuo. The collection also includes four works by Dionisio Bellante. The 1647 volume, which is all for five voices, contains, in addition to the mass, seven vesper psalms, a *Magnificat* and a motet, *Jesum omnes agnoscite* (these are also extant in manuscript in *PL-WRu*).

JOHN WHENHAM

**Betts, John** (*b* Stamford, Lincs., 1755; *d* London, March 1823). English violin maker and dealer. He learnt violin making as a pupil of RICHARD DUKE, for whom he worked for 17 years, and the first instruments bearing his label and brand are very similar to those of his master. At the end of 1782 he took over Maurice Whitaker's shop in the Royal Exchange, London, and was joined by his nephew 'Ned' who had also been apprenticed to Duke. He seems on the evidence of his labels to have dealt in music and instruments, including his own. By 1790 his instruments, particularly the cellos, had absorbed something of the influence of Stradivari, and were most cleanly made on a good individual outline. They are often branded at the top of the back at this period. At the beginning of the 19th century Betts was employing some of the best workmen in London, including at times the Panormos and Lockey Hill. Many inexpensive new instruments were made for the shop, as well as bows of all qualities. After Betts's death the business was continued by his nephew, Charles Vernon, and younger brother Arthur (1775–1846), and the new instruments were labelled 'Arthur Betts'. After the departure of Vernon and the death of Arthur Betts, the firm was carried by Arthur's sons, Arthur (ii) (1804–69) and John (ii) (1807–80) under the name of Arthur & John Betts. Some of the best English imitations of Stradivari bear this label, doubtless made by one of the FENDT family. By 1850 the style of the instruments was again an individual one, elegantly made but varnished a rather dark brown. The firm was discontinued in 1869. Accounts of other members of the Betts family working as violin makers exist, but these

cannot be confirmed, nor do any instruments by them survive.

Betts was one of the first to import Italian instruments and was certainly the leading dealer of his time in London. Justly or unjustly, his reputation as a dealer became somewhat tainted. The 'Betts' Stradivari of 1704, regarded as one of the finest in existence and now in the Library of Congress, Washington, DC, was purchased by John Betts for £1. An anecdote is also told in the *Musical World* of 15 August 1839, in which Viotti had the idea of exchanging a noble acquaintance's Stradivari for a copy to be made by Betts. Betts, understanding Viotti's motive for commissioning the copy, made not one but two, and retained the Stradivari himself.

CHARLES BEARE

**Betz.** *See* BÄTZ.

**Betz, Franz** (*b* Mainz, 19 March 1835; *d* Berlin, 11 Aug 1900). German baritone. He studied in Karlsruhe and made his début at Hanover in 1856 as Heinrich in *Lohengrin*. In 1859 he sang Don Carlos in Verdi's *Ernani* at the Berlin Hofoper and was immediately engaged there, remaining until his retirement in 1897. He sang Valentin in the first Berlin performance of Gounod's *Faust* (given as *Margarethe*) in 1863. At the Munich Hofoper he sang Telramund in *Lohengrin* (1863) and Hans Sachs in the première of *Die Meistersinger* (1868), repeating the role in the first Berlin performance (1870). He was also Berlin's first Amonasro in *Aida* (1874) and King Mark in *Tristan und Isolde* (1876).

Having sung in Beethoven's Ninth Symphony at the ceremony for laying the foundation stone of the Festspielhaus (1872), Betz sang Wotan at Bayreuth in the first complete *Ring* cycle in August 1876. He took part in a gala performance of Spontini's *Olympie* in Berlin (1879) and visited London in 1882 to sing at the Crystal Palace and at a concert conducted by Richter. Returning to Bayreuth in 1889, he alternated as Kurwenal and King Mark in *Tristan*, and also sang Hans Sachs. He made guest appearances in Vienna and other cities in Austria and Germany. His vast repertory included the Dutchman, Wolfram in *Tannhäuser*, Pizarro in *Fidelio*, Don Giovanni and Falstaff, which he sang at the first Berlin performance in German of Verdi's opera (1894), but his favourite role was Hans Sachs, which he sang over 100 times in Berlin alone; it perfectly displayed the strength, evenness and warmth of his generous voice, and the humanity of his dramatic style.

ELIZABETH FORBES

**Betzwarzofsky, Antonín František.** *See* BEČVAŘOVSKÝ, ANTONÍN FRANTIŠEK.

**Beurhaus, Friedrich** (*b* Immecke, nr Meinerzhagen, 1536; *d* Dortmund, 6 Aug 1609). German theorist, teacher and Kantor. He was educated first in Münster and Dortmund, and later at Cologne University where he received the MA in 1560. After serving as teacher, Kantor and administrator for several years in various schools, mainly in Dortmund, he took up a post in 1567 as Kantor at the famous Reinoldi School there; he became Rektor in 1582 in succession to his former teacher and long-standing friend and colleague, Johann Lambach. His work in this post was widely acclaimed and in 1587 he was made *Comes Palatinus* by Emperor Rudolf II.

He is important for his treatise *Erotematum musicae*, originally published in 1573 under the title *Musicae erotematum*, and subsequently reprinted three times. The treatise, of the *musica practica* type, presents the fundamentals of music in question and answer form. For his formulations Beurhaus borrowed considerably, as was customary in a treatise of this kind, from other German theorists of the time, notably Agricola, Faber (both Gregor and Heinrich), Figulus, Galliculus, Ornithoparchus, Wilflingseder and Zanger.

The *Erotematum musicae* is notable for its adaptation of the teaching principles of Petrus Ramus (1515–72), which found considerable acceptance in Germany at the time. Instead of following the customary organization of a *musica practica* treatise, according to which first the elements of plainsong and then the elements of polyphony would have been treated, Beurhaus first discussed the basic elements of music ('de sonorum ratione') and then showed how they work in combination and association ('de sonorum harmonia'). Philosophical terminology is employed extensively. The treatise is also noteworthy for its presentation of counterpoint. A shorter version of the treatise, *Musicae rudimenta*, appeared in 1581.

F.E. KIRBY

**Beuron.** Benedictine abbey near Sigmaringen, in the province of Baden-Württemberg, Germany. It was founded as a house of Augustinian canons about 1077 and was granted ecclesiastical sanction by Pope Urban II in 1097. The buildings date from the 17th and 18th centuries; the church was built between 1732 and 1738. In 1802, when church property was secularized, the house went into the Hohenzollern-Sigmaringen family's possession, and the buildings were later presented by the Dowager Princess Katharina von Hohenzollern (1819–93) to two Benedictine monks, Maurus and Placidus Wolter. Beuron thus became a Benedictine monastery (1863) and in 1868 it was made an abbey. It became the parent monastery of a Benedictine congrega-

tion, with daughter houses in Belgium, Great Britain, Bohemia, Styria, Germany and Brazil. Although it was closed from 1875 to 1887 (because of Prussian *Kulturkampf* legislation) it became a leading centre of the 19th- and 20th-century liturgical movement, distinguished for its cultivation of the Roman liturgy, the monastic Offices and Gregorian chant, according to the regulations formulated at Solesmes by Guéranger and Pothier. The most prominent Kantors after 1863 were Benedikt Sauter, Ambrosius Kienle, Dominicus Johner and Maurus Pfaff, while renowned composers of sacred music included Corbinian Gindele, Dominicus Johner and Gregor Molitor. In 1907 Molitor founded the Kirchenmusikschule St Gregoriushaus in Beuron.

The new library, containing about 300,000 volumes, was built in 1925; the monks study arts and sciences and devote themselves to pastoral care. The monastery's most important project has been an edition of the *Vetus Latina*.

MAURUS PFAFF/MANFRED SCHULER

**Beveringen** [Bevernage], **Andreas** [André, Andries]. *See* PEVERNAGE, ANDREAS.

**Bevignani, Enrico** (*b* Naples, 29 Sept 1841; *d* Naples, 29 Aug 1903). Italian conductor and composer. He studied in Naples, where his melodrama *Caterina Blum* (3 acts, libretto by D. Bolognese; in *I-Nc*) was produced with great success at S Carlo on 3 September 1863. The next year he was engaged by Mapleson for Her Majesty's Theatre, London, remaining there until he moved with Mapleson to Covent Garden in 1869. He stayed at Covent Garden with Gye from 1871 until the end of Gye's management in 1877; he returned later, leaving finally in 1896. Bevignani conducted the first London performances of *Aida* (1876), *La Gioconda* (1883) and *Pagliacci* (1893). He was 'the most admirable of orchestral "accompanists"', according to Sir Dan Godfrey. He conducted several seasons of Italian opera in St Petersburg and Moscow (where he was decorated) and in New York (1893–5 and 1900). Tchaikovsky greatly admired him, and he conducted the first Bol'shoy performance of *Yevgeny Onegin* (1881). Shaw, however, considered his tempos to be too fast, and added: 'There are few persons whom I have less desire to see alive again than Costa; but there are moments when Bevignani makes me miss him.' 'Signor Bevignani's orchestra has . . . no force; but it is polite and delicate.' Bevignani's compositions are full of unexpected harmonic twists which immediately distinguish them from those of his Italian contemporaries. He also composed piano pieces and songs.

NIGEL BURTON, KEITH HORNER

**Bevilacqua, Mario** (*b* Verona, 8 Oct 1536; *d* Verona, 1 Aug 1593). Italian patron of music. He was a member of the nobility. He graduated in law at Bologna in 1567, and on returning to Verona he entered the Accademia Filarmonica in 1568. He was an important member of the city government but his main interests lay in the arts and culture. In the Palazzo Bevilacqua, built by Sanmicheli in about 1535, he created a museum of Greco-Roman antiquities, a picture gallery, a library and the famous *ridotto*. Among the salaried musicians of the *ridotto* were Sebastiano Pigna, Paolo Masnelli, Ercole Pasquini and Domenico Lauro. Stefano Bernardi also probably served there as a boy chorister. Pietro Pontio's dialogue *Ragionamento di musica* (1588) is dedicated to Bevilacqua and is set in the *ridotto*, which the author described as a place where 'almost daily, many gentlemen gather and exercise themselves in virtuous things such as playing and singing and discussions of similar topics'. Many composers, including Lassus, Marenzio, Leoni, Orazio Vecchi, Claudio Merulo, Philippe de Monte, Girolamo della Casa, Massaino, Gabriele Martinengo, Filippo Nicoletti and Maddalena Casulana also dedicated their works to Bevilacqua. On 6 August 1593, just after his death, an inventory of his collection of musical instruments was drawn up. Although this has survived, the collection has not, which is particularly unfortunate since it contained a number of rare and unusual instruments including a claviorgan, six *bassanelli* and six *curtalte*.

ENRICO PAGANUZZI

**Bevin, Elway** (*b c*1554; *d* Bristol, bur. 19 Oct 1638). Composer, theorist and organist of Welsh extraction. There seems to be no evidence for the alternative name 'Ap Evan'. He is said to have been a pupil of Tallis. He was admitted a vicar-choral at Wells Cathedral on 10 May 1579, but on 2 January 1580, together with another vicar-choral, he was suspended 'until they mend their ways' for not having communicated for four years. He signed a Wells charter in 1584. At Michaelmas 1585 the dean and chapter of Bristol paid him six months' salary, for he had become Master of the Choristers there at Lady

Day; by 1589 he was described as organist. Between 1590 and 1603 the baptisms of six of his children were recorded in the parish registers of St Augustine-the-Less, Bristol. The date and place of his marriage are unknown but in 1611 he and his wife, Alice, were witnesses to the will of Nathaniell Pownell, registrar to the Bishop of Bristol.

On 3 June 1605 Bevin was sworn as Gentleman Extraordinary of the Chapel Royal. Possibly this came about through the influence of Godfrey Goodman, subsequently Bishop of Gloucester, to whom he dedicated his *Briefe and Short Instruction in the Art of Musicke* (1631). Goodman was the only Anglican bishop to enter the Church of Rome. Although many years his junior, Bevin claimed that he was 'bound by many favours' to Goodman and it seems likely that they were both lifelong recusants.

It has been claimed that Bevin's most notable pupil was William Child. Child was, however, actually apprenticed to Thomas Prince, a petty canon in the cathedral choir. On 14 February 1637/8 the dean and chapter 'capitularly ordered and decreed that Elway Bevin be expelled and dismissed from his office of organist and master of the choristers'. No reason was given but it is significant that when he died 20 months later he was buried, not in the cathedral, but in his parish church of St Augustine-the-Less.

Bevin's reputation rests on two achievements. His complete 'Short' Dorian service in four and five parts, consisting of *Venite*, *Te Deum*, *Benedictus*, Kyrie, Creed, *Magnificat* and *Nunc dimittis*, was included in Barnard's *First Book of Selected Church Musick* (1641/*R*) and subsequently by Tudway and Boyce in their collections. It is a creditable example of the period. Bevin had a considerable reputation as a composer of canons and his *Briefe and Short Instruction in the Art of Musicke* contains many ingenious examples. The preface promises instruction to the uninitiated, but little tuition is given; the author contented himself with explaining the difficulties. Christopher Simpson and Purcell both praised the work. In his dedication to Bishop Goodman, Bevin implied that his 'tyred brain' could no longer cope with the difficulties of polyphony. He promised the possibility of a larger book, but this did not materialize. (G. Hooper: *Elway Bevin*, Bristol, 1971)

GRAHAM HOOPER

**Bevington.** English firm of organ builders. It was founded about 1794 by Henry Bevington, who had worked as a journeyman for Robert Gray (*see* GRAY & DAVISON before establishing his own business in Greek Street, Soho, London. Bevington took over John Snetzler's old premises in Rose Yard (used by Ohrmann & Nutt after Snetzler's time) a few years later. He was succeeded by his four sons, Henry (*b* 1813), Alfred (*b* 1817), Martin (*b* ?1821) and Charles (*b* 1823), and the business later descended to a grandson, Lewis H. Bevington (*c*1859–1938). It was acquired by Hill, Norman & Beard in 1950.

The firm's early success was in the manufacture of barrel organs and small church instruments. They later became more ambitious, building a 30-stop organ for St Mary's Catholic Chapel, Moorfields, London (*c*1830), with duplication of the open and stopped diapasons, principal and trumpet on the Great and inclusion of a double in the Swell Organ. A number of other large instruments followed including a 41-stop concert organ for the Mechanics' Hall, Nottingham (1849), designed by H.J. Gauntlett and incorporating a 32′ on the short-compass Swell, and organs for Cashel Cathedral (1846), St Martin-in-the-Fields, London (1854), and the Foundling Hospital, London (1855).

The firm built many organs for Ireland and the colonies. Their *métier* remained the smaller church organ (increasingly using pneumatic action) with characteristic stops such as the Bell-diapason, Clarionet & Bassoon, Höhl Flute and Bell Gamba. The organ in St Paul's, Covent Garden, London (1862) is one of the few larger instruments to survive.

NICHOLAS THISTLETHWAITE

**Bewegt** (Ger.: 'agitated', 'moved'; past participle of *bewegen*, 'to move'). A tempo mark sometimes used in the same sense as the Italian AGITATO but also having further shades of meaning. For although *etwas bewegt* means 'somewhat agitated', Wagner gave the extremely steady Bridal Chorus in *Lohengrin* the tempo mark *mässig bewegt*, meaning simply 'at a moderate speed', and the exaggeratedly formal opening to *Die Meistersinger* the mark *sehr mässig bewegt*. In many cases *mässig bewegt* was used as the German equivalent of *allegro moderato*.

*See also* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

**Bewerunge, Heinrich** [Henry] (*b* Letmathe, Westphalia, 7 Dec 1862; *d* Maynooth, 2 Dec 1923). German church music scholar, active in Ireland. He studied at Würzburg University (1881–5) and the Bayerisches Staatskonservatorium der Musik and was ordained priest in 1885; he then took a diploma at the Kirchenmusikschule in Regensburg. After one year as Kantor at Cologne Cathedral, he was appointed to a newly created chair in chant and organ at St Patrick's College, Maynooth, in 1888. During this period (1891–3) he was also editor of *Lyra ecclesiastica*, the journal of the Irish Society of St Cecilia, whose aims he propagated. In 1914 he became the first professor of music at University College, Dublin;

however, that same year war broke out while he was on holiday in Cologne and he was barred from re-entering Ireland. The post was declared vacant due to his alleged failure of duty and passed on to C.H. Kitson in 1916. He finally managed to return to Maynooth in 1920, but the war had undermined his health and he died shortly thereafter.

Bewerunge contributed significantly to the study of church music in Ireland. His translations of Riemann (*Catechism of Musical Aesthetics*, London, 1895; *Harmony Simplified*, London, 1896) were among the first published in English and his articles on the theory of metre in plainchant along with his commentary on the Editio Vaticana helped establish his renown as a scholar. He brought international standards of plainchant and polyphonic singing to St Patrick's College, partly by means of his many arrangements of Lassus and Palestrina, and his trenchant journalism fostered an awareness of Continental art music and performance standards within Ireland.

HARRY WHITE

**Bexfield, William Richard** (*b* Norwich, 27 April 1824; *d* London, 29 Oct 1853). English composer. He became a chorister at Norwich Cathedral, where Zechariah Buck, the organist, was so impressed by his talents (as shown for example by an anthem in eight parts, composed at the age of 11) that he took him as an articled pupil at the age of 14. He became a proficient organist, playing Bach's fugues at 17. In 1845 he was appointed organist of St Botolph's, Boston, and in 1848 organist of St Helen, Bishopsgate, London. He took the Oxford BMus in 1846 and the Cambridge MusD in 1849. He played some of his 'concert fugues' for organ at the Crystal Palace during the Great Exhibition of 1851, creating a considerable sensation, particularly with an improvisation which he called 'Representation of a Storm'.

Bexfield's oratorio, *Israel Restored*, was performed by the Norwich Choral Society in October 1851, and at the Norwich Musical Festival on 22 September 1852, with the composer conducting. It had been given great advance publicity, and attracted much attention in the musical world because it seemed to be placed in rivalry with Pierson's *Jerusalem*, which was performed for the first time the following day. Pierson's work, undoubtedly the more original of the two, was the more popular both among Norwich audiences and with the national press. Bexfield's was conservative: it contained fugal choruses along Handelian lines and even a fully-fledged French overture. But it was by no means worthless, and was well received when revived by Barnby at the Royal Albert Hall in 1880.

Bexfield was undeniably a gifted composer, and at the time of his early death was regarded by some as giving promise of becoming 'another Purcell in church music'. His actual achievement, besides the oratorio, includes learned but rather heavy fugues, some attractive songs (for which he wrote the words as well as the music) and some church music.

WORKS
*all published in London*

8 Chorales, vv, org (1845)
6 Songs (1847)
[7] Church Anthems, 5–8vv, org (*c*1850)
Israel Restored (orat), 1851, vs (*c*1852)
A Set of 4 Concert Fugues, org (1860)
2 separate anthems; 2 glees and a trio, mentioned in Baptie

NICHOLAS TEMPERLEY

**Beydts, Louis (Hector Antoine)** (*b* Bordeaux, 29 June 1895; *d* Caudéran, 19 Sept 1953). French composer. The son of a wine merchant, he initially intended to go into business; he also began a course of classical studies, but abandoned this after two years and turned to music. He worked with Fernand Vaubourgoin in his native city until 1924, and then moved to Paris, where his first works were performed, notably at the Colonne and Lamoureux concerts. In 1931 he obtained permission to write a musical setting of *La noce*, a comedy by Pierre Wolff and Henri Duvernois, which he made into the operetta *Moineau*. This work was hugely successful, and marked him out as a master of the genre. Sacha Guitry wrote the libretto of *La S.A.D.M.P.* and then of *Le voyage de Tchong-Li* for him. He also wrote many *mélodies* and much incidental music, as well as several scores for the cinema, especially for films by Sacha Guitry. In parallel to his career as a composer he was also a music critic, and in 1952 became director of the Opéra-Comique. The best of Beydts's work is in his operettas and comic operas. Less influenced by jazz and dance rhythms than his contemporaries Yvain and Christiné, he is in the tradition of Messager and Hahn. The quality of his orchestration, the elegance of his style and the smiling irony of his scores make one regret that they have fallen out of the repertory.

WORKS

JACQUES TCHAMKERTEN

**Beyer, Andreas.** *See* BAYER, ANDREAS.

**Beyer, Ferdinand** (*b* Querfurt, 25 July 1803; *d* Mainz, 14 May 1863). German composer and pianist. He was well known as a composer of light music, and especially for his piano arrangements of popular orchestral works. He is best known for his piano method *Vorschule im Klavierspiel* op.101 (*c*1851), which has been reprinted by many publishers (including Henle, Peters, Schirmer and Universal). This widely used method gained particular renown in Japan, after the American music educator L.W. Mason imported Carl Prüfer's edition in 1880, and also in Korea. The 106 pieces are harmonically unadventurous, but serve their didactic purpose.

ISAAC NAGAO

**Beyer, Frank Michael** (*b* Berlin, 8 March 1928). German composer and organist. He studied the organ with Joseph Ahrens at the Berlin Church Music School (1946–9) and composition with Ernst Pepping at the Berlin Hochschule für Musik (1951–4). From 1950 to 1963 he was active as an organist; he served as lecturer in organ, improvisation and theory at the Berlin Church Music School (1953–62) and from 1960 at the Hochschule, where he was appointed professor of composition in 1968 and founded the Institute for New Music in 1990. He has also organized the Musica Sacra Nova concerts series, Berlin and co-directed the Berlin Bach-Tage. His numerous honours include membership in the Berlin and Munich academies.

Beyer's early compositions are practical liturgical works. After 1956, however, he wrote more ambitious music influenced by Webern. An individual style characterized by lightness and lucidity emerged in the 1960s. For him, the most important element in a work is the tension resulting from intervallic development. A number of compositions refer to Renaissance and Baroque music; the *Streicherfantasien* (1977–9), for example, reflect motifs by J.S. Bach. He has also completed arrangements of works by Josquin and Bach. (*KdG*, C. Stahl)

H. KUNZ

**Beyer, Johanna (Magdalena)** (*b* Leipzig, 11 July 1888; *d* New York, 9 Jan 1944). American composer of German birth. She moved to the USA *c*1924, where she studied with Dane Rudhyar, Charles Seeger, Henry Cowell and Ruth Crawford. She was a close associate of Cowell's, acting as his administrative assistant during his San Quentin years. Despite prolific composition between *c*1932 and 1940, she was largely ignored as a composer, even by the experimental music community in New York to which her music most appropriately belongs. Several of her works from the early 1930s, particularly those for the piano, show the influence of Crawford and Seeger in their use of dissonant counterpoint; the works for percussion are particularly innovative. Formalist tendencies are combined with a quirky sense of musical humour in the two string quartets. At the time of her death, Beyer's compositions had received few performances. The only work published in her lifetime, IV (1936), appears in Cowell's *New Music Edition*.

LARRY POLANSKY (with JOHN KENNEDY)

**Beyer, Johann Baptist.** *See* PEYER, JOHANN BAPTIST.

**Beyer, Johann Samuel** (*b* Gotha, 1669; *d* Carlsbad, 9 May 1744). German composer. After working as a music teacher in the house of the Jena lawyer Wildvogel, he became Kantor and teacher in Weissenfels in 1694. On 28 August 1699 he was chosen from 12 applicants as Kantor and director of music in Freiberg, a post he held until his death (while taking a cure at Carlsbad). He was succeeded by J.S. Bach's pupil J.F. Doles, who after Beyer's death continued to perform the latter's five Passion settings. As Schilling wrote, Beyer was a 'diligent composer, a thorough teacher and an excellent musical writer, particularly of didactic works'. His *Musikalischer Vorrath* contains 97 hymns for feast days, catechism and special occasions; it is addressed to young people studying music and consists mainly of schematically treated figured chorale variations (in the cantus firmus, the bass or both) which, according to Frotscher, carry the south German principle of unity of figuration to its extreme. He also attempted to use 'melodies from the oldest hymn books in the cantus, according to their nature and origin'. Like Kuhnau, he believed that the keyboard could not be surpassed for variety and sensitivity. The preface to the collection contains interesting remarks on the style of chorale composition at the beginning of the 18th century.

Beyer's other main didactic work was a kind of singing textbook, *Primae lineae musicae vocalis*, in which simple singing instruction is given, in dialogue form, with a supplement of examples including canons, fugues, bicinia and arias, and a list of foreign musical terms. His vocal and instrumental works are otherwise hardly more than competent 'utility art'. Besides numerous cantatas, funeral hymns, and partitas, the collection *Geistliche musicalische Seelen-Freude*, 'consisting of 72 concert arias with two vocal and five different instrumental parts, for use on every Sunday and feast-day', should be mentioned; these compositions, like several unpublished cantatas by Beyer, use texts by Erdmann Neumeister.

WORKS

Primae lineae musicae vocalis, das ist, kurtze ... Anweisung in Frag und Antwort, wie die Jugend ... ein musicalisches Vocal-Stück wohl und richtig singen zu lernen, mit ... canonibus, Fugen, soliciniis, biciniis, Arien und einem Appendice, worinnen allerhand ... termini musici zu finden (Freiburg, 1703/*R*, abridged 2/1730)

Musicalischer Vorrath, neu-variirter Fest-Choral-Gesänge, auf dem Clavier, im canto und basso (Freiburg, 1716–19, 2/1720)

Geistlich-musicalische Seelen-Freude, in 72 Concert-Arien, 2vv, 5 insts, bc, auf alle Sonn- und Fest-Tage zu gebrauchen (Freiberg, 1724)

Numerous cants. (*D-Dlb, FBa, MÜG, Rtt*); 2 ed. R. Fricke, Meisterwerke alter Kapellmeister aus Sachsen und Thüringen, i, nos.5 and 9; 1 ed. R. Fricke (Kassel, 1929)

5 partitas, fl, vn, bc; 1 (in C) ed. I. Gronefeld (Leipzig, 1959)

2 funeral songs

5 passion settings, only printed librettos extant (*FBa*)

**Beyle, Henri.** *See* STENDHAL.

**Bèze, Théodore de** (*b* Vézelay, 24 June 1519; *d* Geneva, 13 Oct 1605). French poet, humanist and writer. He was one of the leaders of the Calvinist Reformation, and went to Geneva from Paris on 24 October 1548 after the publication in that year of a collection of his verse entitled *Poemata juvenilia*. He was professor of Greek in Lausanne (1549–59) and became Rector of the Geneva Academy in 1559. He succeeded Calvin as head of the Church in Geneva in 1564.

Clément Marot had collaborated with Calvin on the production of a French metrical psalter (beginning in 1542) and at his death (1544) Calvin asked Bèze to complete the work. 34 of his psalm translations appeared in print in 1551, and these, along with 49 paraphrases by Marot, formed the text of Loys Bourgeois' *Pseaumes octante-trois de David* (Geneva, 1551/*R*). By 1554 Bèze had added another six translations, which were added to the Genevan editions in the following years. In 1562 the translation of the Psalms was completed, and the monophonic Psalter was printed simultaneously in Geneva, Lyons and Paris. It has been suggested that Bèze's musical collaborator for the final segment of the Psalter may have been Pierre Davantes.

A tragedy by Bèze, *Abraham sacrifiant*, contains directions for the musical performance of certain verses, but no music has survived.

PAUL-ANDRÉ GAILLARD/RICHARD FREEDMAN

**Bezekirsky, Vasily Vasil'yevich** (*b* Moscow, 26 Jan 1835; *d* Moscow, 8 Nov 1919). Russian violinist and composer. The son of an instrument maker, he began learning the violin at the age of 12, and in 1850 joined the Bol'shoy Theatre Orchestra. After two years in Brussels (1858–60) studying violin with Hubert Léonard and composition with Berthold Damcke, he returned to Moscow as a solo violinist in the Bol'shoy orchestra (1861–8 and 1871–91). In 1868 he performed his own violin concerto at the Leipzig Gewandhaus and toured in western Europe. He began to give violin classes in Moscow in 1871, and from 1882 to 1902 was a professor at the Moscow Philharmonic Academy. In 1903 he moved to St Petersburg, where he taught in Yevgeny Rapgof's music school. A brilliant virtuoso, he was also an excellent performer on the viola d'amore and a distinguished teacher, his best pupils being Karol Gregorowicz and Aleksey Yan'shinov. Bezekirsky composed numerous pieces for violin and several orchestral works, including a suite, a concert overture and a symphonic picture. He made an arrangement for violin and piano of Tchaikovsky's Valse-scherzo

op.34 and in 1913 published an edition of Bach's solo violin sonatas and partitas.

Bezekirsky's son Vasily Vasil'yevich (*b* Moscow, 15 Jan 1880; *d* East Windham, NY, 8 Nov 1960) was also a violinist. Taught by his father, he began his career as a child prodigy and in 1914 moved to the USA, where he was active as a soloist, orchestral player and teacher.

I.M. YAMPOL'SKY/R

**Bezić, Jerko** (*b* Kranj, Slovenia, 10 June 1929). Croatian ethnomusicologist. He studied musicology with Dragotin Cvetko at the Academy of Music in Ljubljana (BA 1956). In 1970 he completed the doctorate at the University of Ljubljana with a dissertation on Glagolitic chant in the Zadar area. After working in Zadar as an assistant at the Institute of the Yugoslav Academy of Sciences and Arts (1958–64), he worked, first as assistant, and from 1979 as scientific counsellor, at the Institute of Ethnology and Folklore Research in Zagreb. He taught ethnomusicology at the University of Zagreb (1966–93). In 1980 he became a collaborating member of the Yugoslav (later Croatian) Academy of Sciences and Arts, and a full member in 1991. His research has focussed on rural and urban folk music in Croatia, music-making of Croats outside Croatia, religious and church folk music, rhythm, and the classification of folk music. He has edited folksong collections and ethnomusicological publications, and has been a member of the editorial boards of *Demos* (1969–84), *Narodna umjetnost* (1973–94), *Arti musices* (1980–), *International Review of the Aesthetics and Sociology of Music* (1989–) and *Bašćinski glasi* (1997–).

GROZDANA MAROŠEVIĆ

**Bezifferter Bass** (Ger.). *See* FIGURED BASS.

**Beznosiuk, Lisa (Maria)** (*b* Sheffield, 20 Aug 1956). English flautist. She studied at the GSM in London under Kathryn Lukas and, for baroque flute, Stephen Preston. Her playing, distinguished by exceptional warmth and sensitivity, was soon much in demand among the burgeoning period-instrument orchestras, notably the English Baroque Soloists, the English Concert and the Academy of Ancient Music. She was a founder member of the Orchestra of the Age of Enlightenment, and in 1992 became principal flute of the London Classical Players. She has recorded many Baroque concertos with these orchestras since her solo début in London's Barbican Concert Hall in 1983. Beznosiuk has frequently performed in partnership with musicians including Stephen Preston, lutenist Nigel North, harpsichordist Maggie Cole, and her husband, the cellist Richard Tunnicliffe.

GEORGE PRATT

**Beznosiuk, Pavlo (Roman)** (*b* London, 4 July 1960). English violinist. He studied from 1978 to 1982 with David Takeno at the GSM, specializing in the Baroque

violin. He has worked with many leading period-instrument orchestras, and following his solo début at the Proms in 1993 has appeared increasingly as soloist and director. In 1992 he formed the Beethoven String Trio of London. Beznosiuk is noted particularly for his energetic and communicative performances, both on the concert platform and in his many recordings, which include music by Purcell, Vivaldi, Bach, Mozart and Schubert. He is also remarkably versatile. He played the lira da braccio with the New London Consort in 1985, performs on the medieval fiddle and rebec, and, as leader of the Parley of Instruments (1984–7), pioneered the modern use of Renaissance violins.

GEORGE PRATT

**Bezocy** [Bezozi, Bezozzi, Bezzossi]. *See* BESOZZI family.

**Bezuglova, Irina Fedotovna** (*b* Leningrad, 23 March 1952). Russian musicologist. She graduated in 1977 from the Leningrad Conservatory in theory and composition and completed her postgraduate studies at the Russian Institute for the History of the Arts in Leningrad in 1980. That same year she began working at the Russian National Library, Leningrad, in the department of manuscripts and rare books. In 1982 she defended her *Kandidat* dissertation on 17th-century sacred chant ('Opekalov chant'); in 1987 she was appointed head of the department of music editions and manuscripts of the National Library. Her chief interest lies in early Russian music and the traditions of Russian monastic chant.

NATAL'YA SEMYONOVNA SERYOGINA

**B fa** [Befa]. (1) In the untransposed medieval HEXACHORD system with hexachords on G, C and F, the fourth degree of the hexachord on F, hence B♭. The letter-name of this note was written as a round or 'soft' B (for an illustration *see* SOLMIZATION, fig.2), and the note was therefore also known as 'B rotundum' or 'B mollis'. When the system was transposed (*see* MUSICA FICTA, §1(iv)), the term 'B fa' could designate the fourth degrees of other hexachords: E♭, A♭, F♮, C♮, or even other notes.

(2) In medieval treatises the term was also used for the round B (or 'fa') sign when used as a notational symbol; this symbol was the forerunner of the modern flat sign.

**Bhangra.** A music and dance genre of the Punjab. The term is also used for loosely related modern popular music styles based in South Asia and Great Britain. Traditional *bhangra* (bhāgṛā), associated in particular with the vernal Vaiśākhī festival, features vigorous male dancing accompanied by *ḍhol* (barrel drum) and occasional sung verses (*boliyā*). In India the term *bhangra* also came to denote syncretic popular Punjabi songs disseminated initially via films, but subsequently on cassettes, fusing traditional Punjabi modes, melodies, and rhythms with modern Western-influenced ones. In the mid-1980s *bhangra* emerged as a parallel popular music and dance phenomenon among South Asians, especially people of Punjabi descent, in Great Britain. Stylistically UK-based *bhangra* de-emphasizes lyrics and often reflects a greater degree of syncretization. It combines characteristically Punjabi elements with sampling techniques, drum machines and influences drawn from electronic dance music and, most prominently, Jamaican dance-hall reggae. By the early 1990s the innovative *bhangra*-informed music of Bally Sagoo and the more reggae-oriented Apache Indian (Steve Kapur) had extended its popularity to urban Indian audiences and, to a lesser extent, to aficionados of world music genres.

PETER MANUEL

**Bharata.** A sage (*muni*) in ancient Indian legend. The *Nāṭyaśāstra*, a Sanskrit text on drama and its ingredient arts composed or compiled from earlier source probably in the early centuries CE, is ascribed to him. The work was the first comprehensive treatise on the ancient Indian drama, and as music and dance were an important element in the production of such works it contains detailed chapters on the theory and practice of these arts. Like all early Sanskrit technical treatises it was traditionally ascribed to a mythical or legendary sage. There is internal evidence to show that many other treatises had been composed previously and were used for this compilation. It is thus a composite work, but in the material it describes and in its method there is also some appearance of unity and consistency; some scholars have argued that there was a strong unitary guiding authorial or editorial hand

behind its composition. The *Bharata-Nāṭyaśāstra* in some form or other was cited constantly for its authority in dramaturgy, poetics, music and dance by authors from early medieval times on; it was the most influential source in the early discipline of *saṅgīta-śāstra*, and all subsequent theoreticians tended at least notionally to trace their intellectual tradition back to Bharata. However, the text as we now have it became available to modern scholarly scrutiny only over the last century. The American Sanskrit scholar Fitz-Edward Hall referred to manuscripts of the work in his 1865 edition of another Sanskrit treatise on dramaturgy. The history of the subsequent transmission of the text is related by Rocher (1981); there has not yet been sufficient clarity in the manuscript evidence for a fully critical edition and translation, and the different printed editions reflect the differences in coverage and chapter divisions between the regional manuscript recensions. Nevertheless a good idea of the scope of the *Nāṭyaśāstra* can be gained from the translations and summaries that have been published. Joanny Grosset, whose pioneering study of Indian music and its history was published in 1921 in Lavignac's *Encyclopédie*, based his earlier (1888) book on manuscript evidence, and in 1898 published a part of the Sanskrit text in Paris.

Musical references are scattered throughout the work in places where musical practice impinges on other topics in dramaturgy. Music is extensively and systematically treated in its own right in the last quarter of the work. This includes general theory of melody (pitch, intervals, scales and modes) and rhythm (basic concepts of time division, metrical organization, uses of metre in song compositions, tempo and punctuation), ornamentation and configuration of notes in melodic invention, formal structure of song compositions, variations of melodic style, instrumental classification and playing techniques, and qualitative criteria for assessing the characteristics of singers, players and teachers and disciples. There are many difficulties in the interpretation of this material, but English translations may be found in Ghosh (1961) and Rangacharya (1996). The musical topics are summarised in order, with comparative material from other early Indian texts, in Nijenhuis (1981).

JONATHAN KATZ

**Bhatkhande, Vishnu Narayan** (*b* Bombay, 10 Aug 1860; *d* Bombay, 19 Sept 1936). Indian musicologist. He was educated as a lawyer and from about 1875 also studied music; from 1884 he was an active member of the Gayana Uttejak Mandali, a newly formed Bombay music society, where he learnt hundreds of traditional raga compositions. Concurrently he studied well-known Sanskrit works on music. In 1900 he collected between two and three hundred *khayals* from the son of a senior musician at the court of Jaipur (Rajasthan), subsequently persuading the father, Muhammad Ali Khan, to accept him as a disciple, thus legitimizing his musical standing by becoming associated with a recognized professional lineage (*gharana*). In south India (1904) he encountered the other flourishing canonical system of Indian art music – Carnatic music – and from a study of the 17th-century treatise *Caturdaṇḍi prakāśikā* evolved his system of classifying Hindustani ragas primarily according to ten *ṭhāṭ* (scale types). He did further research in central and east India (1907) and north India (1908–9) before retiring from legal practice (1910) to devote himself to musicology. He was an initiator of the first four All-India Music Conferences (Baroda, 1916; Delhi, 1918; Banaras, 1919; Lucknow, 1924); he also provided educational guidelines for state music schools in Baroda and Gwalior and for the Marris College of Hindustani Music in Lucknow (founded 1926). Becoming a disciple of the Nawab of Rampur (Rohilkand), he gained access to the rich repertory and traditions of his court and to its senior musicians, notably Wazir Khan (of the musical lineage of the Emperor Akbar's musician Tan Sen).

In his research Bhatkhande was concerned chiefly with the raga and never dealt with rhythm or instrumentation in isolation. His four-volume *Hindustānī saṅgīta-paddhati* (Bombay, 1910–32; Hindi trans., 1954–68; Eng. trans., 1990–) is an analysis of the ragas of the north Indian oral traditions, based on years of collection and notation of the performing practices and an exhaustive investigation of the theoretical literature. One of the most far-reaching and most resisted of his conclusions was that the earliest Sanskrit treatises (pre-15th century) are only marginally relevant to 20th-century Hindustani music theory, but he used numerous passages from later Sanskrit sources in discussing ragas. (Many treatises from the 15th century to the 18th were first published by Bhatkhande or at his instance.) The six-volume *Kramik pustak mālikā* (Bombay, 1913–37; Hindi trans. 1954–68; Eng. trans., 1990–) contains his conclusions (as opposed to his findings and arguments), hundreds of traditional compositions, and lengthy sets of model phrases for improvised *ālāp* (slow introduction) printed in his own refinement of the Indian letter notational system. Volume i (1919) is an introductory primer and with volume ii (1921) concerns ten major 'foundation' ragas, whose scale degrees and names were those of the ten *ṭhāṭ* of his primary classification; the larger volumes iii and iv (1922–3) contain music in 35 additional ragas, and the two posthumous volumes (1937) concern ragas less familiar or less consistently agreed on than those of volumes iii–iv, grouped according to the ten scale types.

Bhatkhande was the most important and influential Indian theorist of the first half of the 20th century. His position with respect to raga in Indian music resembles Rameau's with respect to harmony in European music, in that even those who most vigorously rejected his hypotheses have done so in terms he set. His other writings include the treatise *Śrīmal-lakṣya saṅgītam* (Bombay, 1910/*R*), in traditional Sanskrit verse form; the paper 'A Short Historical Survey of the Music of Upper India' given at the Baroda Conference in 1916 (published separately, Bombay, 1934/*R*); and brief accounts of Sanskrit musical

treatises collected after his death as *A Comparative Study of some of the Leading Music Systems of the 15th, 16th, 17th and 18th Centuries* (Bombay, *c*1940/*R*).

HAROLD S. POWERS

**Bhosle, Asha** (*b* Satara, 8 Sept 1933). Indian film playback singer. She is the younger sister of the playback singer LATA MANGESHKAR, and has earned enormous renown for her renditions of Western-influenced rock, pop and disco film songs as well as film *ghazals*. Like her elder sister, Asha received classical music training from their stage actor-singer father, Dinanath Mangeshkar, and started working in films as a child artist. She sang in a chorus at the age of ten for the Marathi film *Majha bala* (1943), in which her 14-year-old sister Lata played the heroine. After the family moved to Bombay in 1945, she recorded her first Hindi playback song *Sawan aya re*, a chorus led also by the singers Geeta Roy and Zohrabai, composed by the music director Hansraj Behl for the film *Chunariya* (1948). Her first Hindi solo playback recording was *Hain mauj main apne begane, do char idhar ...* for *Raat ki rani* (1949).

In the early 1950s Asha's elopement and marriage to Ganpat B. Bhosle alienated her from the Mangeshkar family. During the 1950s she recorded more film songs than any other singer, although many were for low-budget films that failed to earn her the same recognition and success as her elder sister. A fruitful partnership with the music director O.P. Nayyar led to several successful songs in 1957 (in *Naya daur* and *Tumsa nahin dekha*) and others into the 1960s. After having three children and her subsequent divorce from Bhosle, the family accepted her back in 1960. In 1974 Asha married the music director Rahul Dev Burman (1939–94). This bond grew out of an enormously successful trio which also included the playback singer Kishore Kumar. Her song *Dum maro dum* by Burman (in *Hare rama hare Krishna*, 1971) topped the annual Binaca Geetmala film song charts. Asha received an EMI award for recording the most songs – seven – in one day and won the Best Female Playback Singer annual Filmfare award seven times between 1967 and 1978. In 1998 she won a MTV award for her song *Janam samjha karo*; she continues to record both film and non-film songs and regularly tours abroad.

ALISON ARNOLD

**Bhutan.** Country in Asia. Its system of government is a hereditary monarchy; it is the last independent Buddhist kingdom in the Himalayas. Bhutan shares its southern border with India, on the edge of the Brahmaputra plain, and its northern border with the Tibetan Autonomous Region of China in the high mountain ranges of the eastern Himalayas.

One of the most striking features of Bhutan is its isolation. Until the 20th century there was virtually no contact with people to the south of the country. The easier routes to travel had always been to the north and therefore Tibetan culture has had the most influence on Bhutan's religious and ethnic make-up over the centuries. The Drukpas, people who mostly live in the western half of Bhutan, have origins connected with Tibet. Another significant group, the Sharchop people in eastern Bhutan, are thought to be descendants of peoples who pre-date the Tibetan influxes. Around 95% of the population practises subsistence farming, which mainly consists of growing rice in terraces. The capital city, Thimphu, in the western part of the country and halfway between India and Tibet, is at an altitude of 2300 metres.

Little is known about the early history of Bhutan. The Bon religion was widespread before Mahayana Buddhism was introduced from Tibet during the 7th–8th centuries. The Drukpa school of Tantric Buddhism, a branch of the Kagyupa sect in Tibet, was established in Bhutan in the 13th century. In the 17th century the powerful lama Ngawang Namgyel of the Drukpa school unified the country and set up a theocratic system of government. Since that time the Bhutanese have called themselves Drukpas. Ngawang Namgyel was called the shabdrung, a title which means 'at whose feet one submits'; beneath him were the *je khempho* (*rje mkhan-po*), the religious leader, and the *desi* (*sde-srid*), the temporal leader. The *shabdrung* (*zhabs-drung*) began to build a series of fortress-monasteries (*dzong*/*rdzong*) throughout Bhutan. These *dzong* still house the administrative offices of the regions. The system of *shabdrung* leaders was perpetuated through reincarnation until the 20th century. In 1907 a monarchy was founded with the coronation of Ugyen Wangchuck, a former regional governor. The current monarch is the fourth king, Jigme Singye Wangchuck.

The first outside assistance came from India in the 1950s. However, the widespread effects were not felt until the 1980s, when schools and health units became available

to the majority of people across the country. In order to foster a sense of national identity the king strictly enforces a code of conduct called *driglam namzha* (*sgrigs-lam rnam-bzhag*), which deals with adherence to traditional behaviour and respect for customs. For example, national dress is to be worn at all times and all houses are to be built in traditional style. Outside influences are carefully monitored and controlled: until 1999 the use of television receivers was banned, and the number of foreigners allowed into Bhutan annually is limited.

A large minority group in Bhutan, called Southern Bhutanese (ethnically Nepalese), staged demonstrations in 1990 over the rigid enforcement of *driglam namzha*. Since then many Southern Bhutanese have been denied nationality and have left the country for refugee camps in eastern Nepal. Their music is not discussed here and there has been no known research into their traditions.

There are 18 classified languages in Bhutan and many more dialects. Dzongkha is the official language. Classical Tibetan, Choeki, is the language of the Buddhist texts. Both Dzongkha and Choeki belong to the Tibeto-Burman subgroup of the Sino-Tibetan language group.

1. Non-ritual music: (i) Song genres (ii) Instruments (iii) Change and the mass media. 2. Ritual music. 3. Music and the sacred world.

## 1. Non-ritual music.

*(i) Song genres.* The two major non-ritual song genres heard in Bhutan are the *boeda* (*bod-sgra*) and the *shungda* (*gzhung-sgra*). *Boeda* literally means 'song from Tibet', but the Bhutanese today consider it very much their own genre. The form is characterized by short phrases and a regular rhythm (ex.1).

**Ex.1** *Kawa Chag Chag*

Traditionally *boeda* are sung in Dzongkha or, less frequently, in Choeki. Recently *boeda* have been written in other Bhutanese languages, particularly Sharchop. The lyrics of a *boeda* are typically about nature, travelling or love. The song is generally performed as entertainment in the home, at village celebrations or to entertain senior government, royal or religious figures. It is usually accompanied by the *dramnyen* (*sgra-snyan*), the Bhutanese lute, in heterophony with the voice. With larger groups, and if the *boeda* is being used for dance, the song is unaccompanied. It is common for the Bhutanese to sing unaccompanied *boeda* when travelling on foot.

The *shungda* is characterized by a long melodic line and a lack of regular rhythm. The *shungda* is known to have existed in Bhutan in the 17th century, at the time of the first *shabdrung*. The Bhutanese consider the *shungda* an indigenous genre and it does not appear to have musical characteristics similar to those of songs in neighbouring countries. The word *shungda* means 'sound of the centre', a reference to the centre of government or governing power, and is a song generally performed by musicians of the court and a few specialist musicians in villages. The Bhutanese national anthem is a *shungda*. Most *shungda* are sung in Choeki, the rest in Dzongkha. Although the *shungda* has a non-ritual text, the most common theme is religious (e.g. about the origins of Buddhism or a religious ethical issue). The *shungda* was probably originally sung unaccompanied. Today the solo singer usually accompanies himself or herself on the *dramnyen*. The phrases are long, melismatic and highly decorated with a type of ornamentation called *nyenku* (*snyan-khu*), a combination of trill and mordent-like figures added according to the taste of the individual musician (ex.2).

The *dramnyen* is played in heterophony with the voice, with a characteristically rapid rhythm. If the *shungda* is danced to, the dancers stand in a straight line and move their bodies and arms slowly in an undulating motion. The *shungda* may be performed as private entertainment, at village events such as an archery competition, for government officials or royalty, or before a lama as a non-ritual offering to the gods.

Other song genres can be heard throughout Bhutan and are usually not accompanied by the *dramnyen*. There are village songs called the *tsangmo* (*gtsang-mo*) or *jhe* (*gzhas*) (*jhem* (*gzhas-ma*) if sung by women), and a popular eastern Bhutanese song called the *alo* (*a-lo*). There are also songs which accompany manual labour (e.g. for working in the fields, or for building houses).

*(ii) Instruments.* There are five musical instruments considered by the Bhutanese to belong to the non-ritual sphere of music. The *dramnyen* is a long-necked, fretless lute with seven strings, one of which is only half the length of the others (its peg appears half-way along the neck). It is played with a wooden plectrum. The bowl and neck are made of hollowed-out wood. The soundholes are two spiral shapes carved out of the front wooden panel above the soundboard. Traditionally snake- or crocodile-skin is stretched across the soundboard; today instrument makers tend to use more easily available materials, such as cow- or goatskin. The strings are tuned in 4ths in two double courses and one triple course; the approximate pitches are g–G–c′–c–c–f–f. The whole instrument is ornately painted in several colours. Traditional Buddhist motifs, such as clouds or a floral design, typically decorate the neck and the back of the bowl. Some instruments have a painting of Lama Yangchenma, the goddess of music, or other religious symbols, on the front between the soundboard and the neck (fig.1).

The Bhutanese *dramnyen* has the head of a mythical sea animal called a *chusing* (*chu-srin*) carved into its

**Ex.2** *Gasa Lami Singye*

*1. Thankha (cloth hanging) of Lama Yangchenma, goddess of music, playing a dramnyen (private collection)*

semicircular pegbox. Whereas *dramnyen* are also found in other parts of the Himalayas, such as Tibet, Nepal, Ladakh and Sikkim, instruments from these regions may also use other fauna such as a bird, horse or lion on the pegbox. The Bhutanese instrument uses the *chusing* exclusively.

The *dramnyen* accompanies singers of *boeda* or *shungda* songs. It is also used to play solo instrumental versions of these genres. The *dramnyen* is played by specialist villagers or by urban dwellers who play in ensembles. Some monks also play the *dramnyen*. However, this is a private activity and they would never play it as part of their ritual duties.

The Bhutanese *lim* (*gling-bu*) is a six-holed duct flute, made of bamboo. The vertical flute is called a *dunglim* (*dung-gling*), and the transverse flute a *zulim* (*zun-gling*). Its repertory is that of popular Bhutanese songs. It is commonly played by young animal herders in remote pastures.

The *kungtha*, a jew's harp, is usually made of bamboo or metal. It is normally played by village women performing melodies especially composed for the instrument. The *dramnyen*, *lim* and *kungtha* are the three instruments most commonly played by Bhutanese villagers.

The *pchiwang* (*pyi-wang*) is a two-string bowed fiddle, similar to the Chinese *erhu* and the Tibetan *piwang*, and is said to have come to Bhutan from Tibet. The bow of the *pchiwang* is threaded between the two strings. The strings are metal, the soundboard cow- or goatskin and the cone is made of animal horn, often buffalo. The *pchiwang* was originally played in Bhutan by mendicants who would travel from village to village playing popular melodies in exchange for food. Today the *pchiwang* is more commonly heard as part of an ensemble of instruments.

The *yangchen* (*yang-chin*), the most recent instrument to be introduced to Bhutan apart from Western pop music instruments, is derived from the Chinese *yangqin*. It is thought that the first *yangchen* to become part of a Bhutanese music ensemble was brought into the country in the 1960s by a Tibetan refugee who joined the Royal Academy of Performing Arts. The *yangchen* is a hammer zither with a hollow wooden trapezoidal box and several triple or quadruple courses of metal strings. There are two bridges, each supporting alternate courses of strings. The instrument is struck with two long, thin, flexible bamboo sticks, one held in each hand.

Bhutanese ensembles typically consist of a *dramnyen*, a *lim*, a *pchiwang* and a *yangchen*, or any combination of these. There are several ensembles based in Thimphu, composed of professional or semi-professional musicians. The ensembles, often joined by singers and dancers, play at most important royal, state or important Bhutanese events such as funerals, weddings and promotion celebrations. They also hold occasional concerts or make recordings for sale on cassette. The musicians play in heterophony and usually perform *boeda* rather than *shungda*, the former having a more regular rhythmic structure suitable for ensemble playing.

*(iii) Change and the mass media.* Bhutan's wider contact with the outside world is a recent phenomenon and older Bhutanese can recall the period prior to the arrival of motor vehicles, aeroplanes and money. The national flag and national anthem were first introduced in Bhutan during the second half of the 20th century. Bhutan began joining international organizations in the 1960s. The first road to cross the country from west to east was not built until the mid-1980s. This road has had a huge impact on communications throughout the country, and has resulted in the opening up of previously isolated valleys and the growth of small towns which have developed from clusters of trading shops and inns along the roadside.

The Bhutanese have tried to acquire some of the benefits of the outside world without losing the country's heritage and identity. 'Bhutanization', a concept that requires any project to be sensitive to traditional Bhutanese culture, is a component of nearly all development plans made by the government. Despite the national policy of cultural protection, outside influences are being felt in Bhutan. Although receiving television transmissions from other countries was banned until 1999, videos, mostly of Hindi movies, have been widely available in the capital Thimphu since the 1980s. Cassettes of Hindi, Tibetan and Western music are popular, and several shops in Thimphu have a good trade in foreign music. Magazine photos of Western pop stars are common wall decorations for the young and young amateur musicians in the capital are learning to play guitars and drums. However, the musicians of Bhutanese ensembles are also producing cassettes of their own traditional music which are popular. As well as playing traditional arrangements these ensembles are experimenting with recordings of well-known Bhutanese songs played by a standard ensemble with, for example, synthesizer and electric guitar. In other innovations the *dramnyen* may accompany a song with a Hindi melody and Bhutanese words.

The Bhutan Broadcasting Service (BBS) is Bhutan's national radio station and has played a key part in recent developments in Bhutanese music. Prior to the building of the lateral road and the founding of the BBS in the early 1980s, the majority of people heard only the music

of their own valley, or of one or two neighbouring valleys. The isolation and difficult travelling conditions caused by Bhutan's mountainous terrain resulted in the development of 18 distinct languages and dozens of dialects. This phenomenon also produced songs which varied slightly from valley to valley. The BBS has undertaken a huge project to travel throughout Bhutan to record and catalogue music and songs in an attempt to preserve the individual characteristics of each valley. These recordings are also being used as material for on-air programmes; the BBS plays very little non-Bhutanese music. Therefore, with the advent of radio a type of 'cross-pollination' is occurring, with people for the first time hearing songs from regions other than their own.

2. Ritual music. Buddhism as practised in late 20th-century Bhutan is of the Drukpa school of the Kagyupa sect and the Nyingmapa school, both forms of Mahayana Tantric Buddhism. Buddhist practices have been mixed with older, indigenous traditions, particularly of the Bon religion. Ritual music in Bhutan closely follows the practices of Tibetan ritual music and performing practice is laid down in detail in religious texts and musical scores. The music consists of chanting and the playing of a group of instruments. Monks play instruments, usually in pairs, such as *dungchen* (*dung-chen*), a metal trumpet two metres long; *bjelling* (*rgya-gling*), a shawm; *rolmo* (*rol-mo*), cymbals; and *nga* (*rnga*), a double-headed drum. Ritual music may be heard in temples throughout the country as an integrated part of the prayer ritual. Ritual music can also be heard at annual religious festivals called *tshechus* (*she-bcu*). These are held in monasteries across the country in honour of Guru Rinpoche who came to Bhutan to teach Buddhism in the 8th century. These festivals last for several days and attract people from distant villages who come to watch the moral teachings of Buddhism being enacted in dances and ceremonies (fig.2).

The monks also perform rituals with musical accompaniment outside the monastery. These rituals are most commonly held in village houses and are ceremonies for events such as funerals and house blessings. There has been, to date, little known research into the ritual music of Bhutan.

3. Music and the sacred world. All music in Bhutan is thought to have some association with the divine. Non-ritual as well as ritual music is played to bestow peace and goodwill both on player and listener. The non-ritual instruments of Bhutanese music, although not part of the formally structured music of the temples, nevertheless have a symbolic part to play in Bhutan's religious life. The *dramnyen* is never played in ritual Buddhist music, but it nevertheless has an important place in the temples of Bhutan, as a symbolic representation of music (it may appear on an altar as a silent offering to represent the faculty of hearing). The *lim* may also appear in this context. The *dramnyen* is often depicted in artwork in temples. It appears at the entrance to nearly all Bhutanese temples in the hands of the *sharchop gyalpo*, the King of the East, one of the four Guardians of the Directions. The goddess of music, Lama Yangchenma, is shown on Bhutanese *thankas* (painted or appliqué cloth scrolls hung on temple walls) playing the *dramnyen*. The *dramnyen* also appears in a dance which is part of the *tshechu*, the annual religious festival (fig.2). The dance is called a

*2. Dramnyen dance at the Paro tschechu, 1991*

*dramnyen cham* (*sgra-snyan 'cham*) and the dancer plays the instrument as he dances. Here, however, the instrument's sound is too soft to be heard by the crowd and the *dramnyen*'s role is symbolic.

Of particular importance to the Bhutanese musical culture is Lama Yangchenma. She is the patron of music, the arts and learning, and is the goddess of the aural sense and of wealth. According to mythology, music was created on earth when she first rose up from the river Ganges, sitting on a lotus leaf and playing the *dramnyen* (fig.1). Devout Bhutanese *dramnyen* players offer a prayer to Lama Yangchenma and invoke her presence before they begin to play.

Bhutanese musicians traditionally believe that the music produced by their instruments has the power to attract spirits and creatures. For example, the *chusing*, the mythological creature on the head of the *dramnyen*, is supposed to frighten away evil spirits which hover around the player listening to the sound of the instrument and which might send the player mad. Similarly the *lim* and the *kungtha* are not supposed to be played during the winter as their music might wake dormant insects and small animals and draw them outside, where they would die of cold.

SARA NUTTALL

**Biaggi, Girolamo Alessandro** (*b* Calcio, nr Bergamo, 2 Feb 1819; *d* Florence, 21 March 1897). Italian music critic and composer. He studied the violin in Milan, and was taught composition by Vaccai. While still a student he wrote a comic opera *Don Desiderio disperato per eccesso di buon cuore* (1839) and his later works include the opera *Martino delta Scala* (1856, Messina), a Requiem (1856) and other sacred music, cantatas and songs. He was for some time a conductor. In 1847 he founded *L'Italia musicale*, and (as Ippolito d'Albano) contributed to the *Gazzetta musicale di Milano* and other periodicals. From 1863 he taught at the Istituto Musicale in Florence and was critic of *La nazione*; he played a major role in the city's flourishing musical life.

Although Biaggi was a supporter of the German instrumental and chamber tradition, as an opera critic his standard was the Italian tradition that culminated in Rossini (he had met the composer in Paris), and he showed limited sympathy for opera of his own time. He did, however, adopt advanced ideas on Rossini, defending him against the formalistic criticism that categorized the composer as a mediocre dramatist and an unorthodox church composer. In his reviews of Beethoven performances, at that time manifestations of the avant garde in Italy, he on the one hand rejected any hedonistic concept of music, and on the other opposed the notion of 'musical truth' to the old canon of verisimilitude (the imitation of nature), that is, he stood for the principle of artistic creation according to its own laws. He consequently also upheld the artistic autonomy of sacred music, defending the composer's freedom of language even in that sphere. A large work on the life and work of Rossini, the outgrowth of his essay of 1869, was left unfinished at his death, as was a *Dizionario storico-critico della musica*. 'L'arte del pianista nel suo stretto significato', sometimes attributed to him and published in 1868 in the *Atti dell'Accademia del R. Istituto musicale di Firenze*, was actually written by Alessandro Biagi, professor of the piano at the Istituto.

SERGIO LATTES

**Biagi** [Blasi], **Luca** (*b* Perugia, *c*1545; *d* 13 Dec 1608). Italian organ builder. He was the son of Marino and Margherita Biagi. He had several brothers and sisters, one of whom, Stefano, was also an organ builder. Nothing is known about Luca's apprenticeship and first works; he is first heard of in connection with the organ of S Maria Nuova in Perugia in 1585: 'the first and worthy work of the Cavalier Luca of Perugia'. The S Maria Nuova organ was replaced by a new electro-pneumatic instrument in 1960, although its spectacular façade survives. The pipes are arranged in seven groups: two extreme groups of two rows each (the upper rows consisting of dummy pipes), and five central fields, the largest pipe of each being spirally embossed.

Biagi was in Rome by 1593, when the organist Zucchelli obtained work for him on the organs of S Lorenzo in Damaso and the Cappella Gregoriana in S Pietro, and shortly afterwards in the construction of an organ at Frascati. In return, Biagi completed without charge a small transportable organ that Zucchelli had bought from the nuns of Monte Magnapoli and used to hire out to churches for services.

Biagi is known especially for the new organ for S Giovanni in Laterano, commissioned by Clement VIII to be ready for Holy Year 1600. Biagi built the instrument between 1597 and 1599; it was restored by Barthélémy Formentelli between 1987 and 1989. It has a spring chest of 66 channels and 15 stops. It originally had one manual with a compass of *F′G′A′–f‴*, including seven split keys providing enharmonic notes for *a*♭, *a*♭′, *a*♭″, *a*♭‴, *d*♯′, *d*♯″ and *d*♯‴; a second manual was added in the 18th century. It probably had a pull-down pedalboard, although this was not mentioned in documents until 1731: in 1776 this was said to have ten pedals. It had six wedge-shaped bellows, a tremulant and the following stops: Principale Profondo 24′, Principale Ottava 12′, Flauto in VIII, Flauto in XV, Decimaquinta 6′, Decimanona 4′, Vigesimaseconda 3′, Vigesimasesta, Vigesimanona I, Vigesimanona II, Trigesimaterza I, Trigesimaterza II, Trigesimasesta I, Trigesimasesta II, Zampogne-Trombe 12′. Biagi looked after the maintenance of the instrument until his death in 1608.

As a result of the novelty and success of Biagi's WATER ORGAN in the Quirinale gardens, completed about 1598, Clement VIII gave him a 20-year privilege in 1600 for the construction of such instruments. Between November 1601 and March 1603 Biagi completed the two-manual organ built by Domenico Benvenuti and Francesco Palmieri (1586–7) for the church of S Maria in Aracoeli, Rome. In 1602 he built the organ of SS Annunziata, Sulmona, and in 1604 he enlarged the keyboard of the organ of Santo Spirito in Sassia, Rome, by adding three keys (*C′*, *D′*, *E′*) in the bass, and also lowering the pitch by three semitones by shifting all the pipes upwards and

adding new ones to the bass end of each stop. His obituary stated that he was 'supra sexaginta' when he died.

GUY OLDHAM/UMBERTO PINESCHI

**Bialas, Günter** (*b* Bielschowitz, Upper Silesia, 19 July 1907; *d* Glonn, 7 Aug 1995). German composer and teacher. In his childhood he absorbed musical influence through personal connections, since his father was business manager at the local German theatre. He studied the piano and music theory with Fritz Lubrich in Katowice (1922–5), musicology and German language and literature at the University of Breslau (1926–8) and music education and composition at the Berlin Akademie für Kirchen- und Schulmusik (1928–31). His first and principal composition teacher was Max Trapp whose masterclasses he attended at the Preussischer Akademie der Kunst (1936–8), although he had already been profoundly influenced by Fritz Jöde's work in the youth music movement. In 1939 he became lecturer in music theory at the Institute of Music Education in the University of Breslau, but was called up for military service in 1941. After the war he moved to Bavaria and in 1946 became choral conductor of the Munich Bachverein. In 1947 he taught theory at the Weimar Musikhochschule and then became teacher of composition at the Nordwestdeutsche Musikakademie in Detmold where he was awarded a professorship in 1950. In 1959 Bialas was appointed professor of composition at the Musikhochschule in Munich, a post he held until 1974. His numerous honours included the music prize of North-Rhine Westphalia (1954), the Munich music award (1962), the Stamitz prize (1964), the Bavarian Academy of Fine Arts Music Award (1967), the Upper Silesian Cultural Award (1971), the Lower Saxony Silesian Art Award (1980), the Munich Cultural Prize (1987), the Schleswig Holstein Hindemith Award (1988) and the Bavarian State Foundation Cultural Award (1989).

Bialas belongs to the generation of German composers whose careers began to develop at a time when modernism was proscribed by the Nazis. However, his relatively conventional early compositions did not enjoy the same degree of exposure as those of his contemporaries Fortner and Höller. Since war service also caused a hiatus in his development, Bialas only emerged as a figure of consequence after 1945. Even then, the process of establishing an individual identity happened only gradually. In Detmold he was able to analyse for the first time musical developments from which he had been isolated during the Nazi era. But this exposure to modernism never resulted in a dogmatic approach to compositional style. He rejected 12-note composition, adopting a more flexible approach that allowed for free movement between tonality and atonality, and between simple and complex rhythmic procedures.

A master of all musical genres, Bialas received wider recognition relatively late in life. The real breakthrough occurred after the widespread acclaim accorded to his three chamber operas *Hero und Leander* (1966), *Die Geschichte von Aucassin und Nicolette* (1969) and *Der gestiefelte Kater* (1975), all of which revealed a great versatility of dramatic expression. Even more remarkable is the later song-play *Aus der Matratzengruft* (1992) which, in surveying the life of the 'outsider' Heinrich Heine, poses uncomfortable questions regarding the notion of German unity during the 1990s. Outside the theatre, Bialas produced a series of impressive concertante works which were given their premières by distinguished soloists including Heinrich Schiff, Eschenbach and Huguette Dreyfus. Probably his best-known composition, however, is the *Meyerbeer-Paraphrasen* (1971) in which a youthfulness of expression combined with wit and irony creates a brilliant orchestral showpiece.

WORKS

DRAMATIC

Oedipus der Tyrann (incid music, Sophocles), 1962; Hero und Leander (op, 7 scenes, E. Spiess, after F. Grillparzer and Musaios), 1966, Mannheim, National, 1966; Die Geschichte von Aucassin und Nicolette (op, 13 scenes, T. Dorst), 1969, Munich, Cuvilliés, 1969; Der gestiefelte Kater, oder Wie man das Spiel spielt (op, prol, 2, epilogue, Dorst, after L. Tieck), 1973, rev. 1974, Schwetzingen, Schloss, 1975, rev. version, Munich, Staatstheater, 1987; Meyerbeer-Paraphrasen (ballet), Hamburg, Staatsoper, 1974; Aus der Matratzengruft (song-play, after H. Heine) (1991), Kiel, Bühnen des Landeshauptstadt, 1992; Die Frau von der Insel (incid music, after T. Wilder)

Arr., with H.W. Henze: K.A. Hartmann: *Der Mann, der vom Tode auferstand (Wachsfigurenkabinett)*, Munich, May 1988

ERIK LEVI

**Bianca** (It.). *See* MINIM (half-note); *minima* is also used. *See also* NOTE VALUES.

**Biancardi, (Nicolò) Sebastiano.** *See* LALLI, DOMENICO.

**Bianchi** [Bianco], **Andrea** (*b* Sarzana, nr Genoa; *fl* 1611–26). Italian composer. In 1611 he was a musician employed by one Carlo Cybo, Marchese di Carrara, possibly in Genoa, and in 1626 *maestro di cappella* of the cathedral at Chiavari, also on the Ligurian coast. Like many north Italian church composers of the time, he was equally capable of writing in the conventional double-choir style and in the more expressive and intimate concertato idiom for a few voices and organ. The former characterizes his masses and motets of 1611: the double choir is used more than merely antiphonally, and valuable information on liturgical usage can be gleaned from his marking two motets, *O sacrum convivium* and *Adoramus te, Christe*, 'for the Elevation' at Mass. The motets reprinted in Antwerp in 1626 (one of which, most unusually, sets an Italian text) are in the modern manner, their small forces well suited to limited local resources; even with the simplest of all textures – solo voice and organ – Bianchi wrote in a pleasantly varied declamatory manner, as in the Communion motet *Domine, non sum dignus*.

WORKS

Motetti, e messe a 8vv . . . con dui motetti, a 5, e uno a 12, con bc (org), libro primo (Venice, 1611)

JEROME ROCHE/ELIZABETH ROCHE

**Bianchi, Antonio (i)** (*b* Venice, *c*1710; *d* Venice, ?1772). Italian poet and librettist. Although his early career as a gondolier implies a humble family background, the high quality of his writings clearly indicates a thorough education. His patron, Doge Pietro Grimani, for a time was accused of correcting his poetry or even writing it for him. Many Venetian aristocrats subscribed to several of Bianchi's works, and he provided occasional verses for state occasions. A number of his oratorio texts (including *Elia sul Carmelo* and *Il Davide re d'Israele*, both 1751, *Il transito del giusto*, 1755 and *Il vitello d'oro*, 1760) were published, but some remain among his unpublished papers in the Museo Correr, Venice. He also wrote several comic opera librettos: *Le villeggiatrice ridicole* (music by A. Boroni, performed 1765), *L'amore in ballo* (G. Paisiello, 1765) and *La buona figliuola supposta vedova* (G. Latilla, 1766), a parody on Goldoni's libretto for Niccolò Piccinni, in turn based on Samuel Richardson's novel *Pamela* (translated by E.R. Dunu, 1750). Musical settings of *Camma*, his *componimento sacro* dedicated to Carl Eugen of Württemberg (1767), and *L'Alcibiade*, a *tragi-commedia*, have not come to light.

SVEN HANSELL

**Bianchi, Antonio (ii)** (*b* *c*1750; *d* ?Venice, after 1816). Italian composer. As he became a member of the Bologna Accademia Filarmonica in 1772, he was probably born about the middle of the century. He probably worked in Venice, where most of his extant scores are (including some autographs). Several liturgical works for the feast of S Filippo Neri suggest that he could have served S

Maria della Consolazione, commonly called the Fava church, belonging to the Padri Filippini. A manuscript score in the Biblioteca Oratoriana dei Filippini, Naples, as well as autographs in the Fava church library further support this supposition. His masses, psalms and the *Te Deum* for eight voices prove him to have been skilled in counterpoint.

WORKS

Masses: di S Filippo Neri, 3vv, *I-Vnm*; 2, 8vv, both *Vnm* (1 autograph); Missa toni mixti, double choir, *Nf*; Kyrie, 3vv, orch, *GB-Lbl*; Missa pro defunctis, 4vv, *I-Vnm*

Propers: ints, grads, offs, post-comms for Advent Sundays, 3–4vv, org, *Vsmc*; ints for Nativity and Circumcision, 2vv, *Vsmc*; ints, grads etc. for Sundays in Lent, 2vv, 1815, *Vsmc*; int, off, comm for Palm Sunday, 3vv, *Vsmc*; grad, off, comm for Maundy Thursday, 3vv, *Vsmc*; int for feast of S Filippo Neri, 2vv, *Vnm*; Domine ad adiuvandum, off, 3vv, *Vnm*

Psalms: Ad te Domine levavi, 2vv, Rovereto, S Marco; De profundis, 4vv, 1772, *Baf*; 3 In convertendo, 3vv, 1797, *Vnm*, *Vc*, 4vv, *Vnm*; 3 Laetatus sum, 3vv, *Vnm*, 3vv, 1798, *Baf**, inc., *Vsmc*; 4 Nisi Dominus, 3vv, 2 hn, org, *Pc*, 3vv, str, *Pc*, 3vv, *Vnm*, 4vv, *Vnm*; Qui habitat, 2vv, *Vsmc*; others, 3vv, *Vnm*

Marian ants: Regina coeli, 2vv, org, *Vsmc*; Salve regina, 3vv, org, *Vsmc*

Miscellaneous: Adoramus te Christe, 3vv, 2 ob, org, *Vsmc*; Cibavit, 2vv, 3 insts, *Vsmc*; 2 Lit della BVM, 3vv, str, *Bc*, another, *Vnm*; Mag, 3vv, 1807, *Vnm*; other sacred works, *Vnm*

SVEN HANSELL

**Bianchi, Antonio (iii)** (*b* Milan, 1758; *d* after 1816). Italian singer and composer. He began a career as a baritone in Milan and Genoa and may have sung in Paris in the 1780s. Touring Germany in the early 1790s, he became court singer to the Prince of Nassau Weilburg and sang at the Berlin Königliches Nationaltheater from 1792. His performances in German (including roles in Mozart's *Don Giovanni* and J.M. König's *Lilla, oder Die Gärtnerin*) were criticized, but those in Italian comic operas by Paisiello, Sarti, Cimarosa and Astarita were highly praised. On 16 February 1794 his own serious opera *Die Insel der Alcina* (2, G. Bertati; manuscript in *D-SWl*) was staged at the Berlin Hoftheater, and in 1796 his pastoral intermezzo *Fileno e Clorinda* was given in Charlottenburg and Potsdam. Bianchi remained a member of the *opera buffa* company at the Prussian court until late 1797, when Friedrich Wilhelm II died. He then visited various German cities and became co-director with Krüger of an opera troupe touring Thuringia. His ballets *Die Entführung, oder Das Feldlage bei Desengamo* and *Die Spanier in Amerika* both dating from about 1798, featured special roles for himself and his wife, a dancer. After leaving Krüger's company in the late 1790s he sang in Hamburg, where some of his songs were reviewed for the *Allgemeine musikalische Zeitung* (June 1802).

The last notice of him, dated 1817, is a petition to allow him and his family to perform briefly in Aachen. He may have performed in Paris about the turn of the 19th century. Bianchi's considerable number of songs, written in French, Italian and German, were published and republished, mostly in Berlin and Hamburg; songs by Giacomo Bianchi, published in Paris, London and Vienna, have sometimes been attributed to Antonio. He may be the author of the song 'Vienqua Dorina bella' (also attributed to Francesco Bianchi), on which Weber wrote a set of piano variations.

IAIN FENLON

**Bianchi, (Giuseppe) Francesco** (*b* Cremona, *c*1752; *d* Hammersmith, London, 27 Nov 1810). Italian composer. A Cremonese priest financed his studies at a conservatory in Naples, where he studied with Cafaro and assisted Jommelli in exchange for instruction. In 1772 he returned to Cremona, where his first opera, *Giulio Sabino*, successfully launched his career. In the summer of 1775 he went to Paris, where he worked as harpsichordist and composer of comic operas for the Théâtre-Italien and where he tried unsuccessfully to establish a conservatory after the Neapolitan model. His published op.1, six trio sonatas, dates from this period, as does a group of sacred pieces. He was admitted to membership of the Accademia Filarmonica of Bologna in August 1776 but did not return to Italy until 1778. From 1782 until 28 February 1793 Bianchi served as *vice-maestro* at the Metropolitana, Milan. On 21 January 1785 he was named second organist of S Marco, Venice. Except for a hiatus from 20 November 1791 to 20 February 1793, he remained there until the fall of the Venetian Republic in 1797. Although never officially the *maestro* at the Mendicanti, he composed several oratorios for it during the 1780s.

In 1778 Bianchi began working with the progressive librettists De Gamerra and Sertor, and later also with Foppa, Botturini and Pepoli, Venetians moving away from the century-old *opera seria* conventions that were to prevail in Italy until the 1790s. Apparently influenced by Gluck and by Verazi's librettos for the opening of La Scala (1778–9), his *Erifile* contains one of the earliest action-ensemble finales in an *opera seria*, and his *Castore e Polluce* is replete with French-inspired choruses and dance; both were given in Florence during the reign of Archduke Leopold. In Venice 1780 his *Demetrio* acquired a final sextet, one of the earliest Italian examples of an extensive action-ensemble finale to conclude a Metastasian opera – not a finale in *buffa* style but a fluid, seamless ensemble spanning several abrupt changes of mood but without clear sectional delineations until an obbligato recitative breaks the continuity and paves the way for an extensive joyful conclusion.

Bianchi's collaboration with Sertor spanned 11 years, beginning in 1781, and yielded six new *opere serie*. Consequently, innovatory elements such as *introduzioni*, programmatic storms and battles, solos and ensembles with chorus, ensembles with increasing numbers of personnel and action-ensemble finales appear much more frequently and much earlier in Bianchi's works than in others. Perhaps the most influential of his collaborations

with Sertor was *La morte di Cesare* (1788), which initiated a decade of 'morte' operas.

Bianchi was the first composer to work with Foppa. *Alonso e Cora* (1786) and *Calto* (1788) initiated a new era in Venetian opera, and their innovations soon became common operatic components. Both operas treat non-classical subjects, employ ballet and chorus along with a duet for two men with chorus (an early *giuramento*), and have extensive final scene complexes (one of which makes up the whole of the short Act 3 of *Alonso*). *Calto* contains a ghost scene in which the chorus takes part in the action and an aria with interjections from a second character (*pertichino*). Also in *Calto* Bianchi introduced the clarinet to Venice, where it did not become a regular orchestral instrument for another five years.

By the early 1780s Bianchi was already bypassing the lengthy static solos that normally opened each ensemble and moving directly into animated musical dialogue. Programmatic battle music replaces the *marcia*. Extensive stretches of obbligato recitative move freely among changing accompaniment patterns. Wind colour, chromaticism, excursions deep into the flat keys and occasional use of the *voce umana* heighten the terror of dungeons or ghost scenes (for example in *La vendetta di Nino*, an opera with several innovatory features). Still contemporary critics praised his 'lively, light and graceful music' and the 'softness and sweetness of his melodies'.

Bianchi took particular advantage of the wind instruments both as soloists and as a section, especially in his Neapolitan works. The bassoons have their own parts, and the violas often join with the upper strings or with the winds. In obbligato recitatives Bianchi employed a broad range of wind colour (oboe, bassoon, clarinet, horn and english horn) for expressive purposes. By the early 90s his orchestrations frequently combine the entire wind section. His accompaniments seldom adhere to a single figure throughout an aria. Often either the first violin or the voice states the melody, while the other provides embellishment or elaboration. The first violins may also join the seconds in maintaining rhythmic motifs, oscillating arpeggiation or tremolo. Wind instruments alone or with strings add musical commentary in caesuras and ritornellos, and solo winds answer each other, the strings and the voice. Wind instruments also reinforce dynamic contrasts and assist in building long crescendos.

Bianchi specialized in serious opera more than his contemporaries did, but he continued to write comic operas throughout his career. In a preface to the printed libretto of *Il disertore* (Venice, 1784), he defended its amalgam of serious and comic elements; nonetheless, audiences were shocked to see the castrato Pacchierotti singing the principal role in bourgeois dress.

Bianchi went to London in 1795 to direct a revival of *La vendetta di Nino*, performed 41 times in six seasons. Between 1795 and 1802 he prepared 14 other works for the King's Theatre – six of them in collaboration with Da Ponte, the poet there from 1793 to 1798. Between 1802 and 1807 Bianchi travelled between London and Paris, composing operas and directing revivals in both cities. For a time his works dominated the *opéra comique* productions at several Parisian theatres. Of his comic opera *Corali, ou La lanterne magique* (1804) the Parisian *Courrier des spectacles* wrote: 'The plot [is] weak by itself ... but what rightfully received much applause was the lively, light and graceful music with which Signor Bianchi has embellished it'. A theoretical treatise, *Trattato d'armonia*, probably dates from this period, since R.M. Bacon, who published extracts in English in the *Quarterly Musical Review* (1820–21), claimed that a French institute had declined to publish the work at the time of English-French hostilities. In the preface to Selvaggi's *Trattato di armonia* (Naples, 1823) this treatise, or possibly another by Bianchi (referred to as *Analisi della corda sonora*), was highly praised. On 15 November 1800 Bianchi married, but separated soon afterwards; his one child, Caroline Nelson Bianchi, died in January 1807. The *Morning Chronicle* (November 1810) and the *Gentleman's Magazine* (December 1810) reported Bianchi's suicide at his home in Hammersmith. The *Daily Advertiser* aptly reviewed a revival of *Erifile* on 20 February 1805: 'Mr Bianchi's bent, in this, as in all his former musical efforts, is certainly directed toward the tender and pathetic, and if he does not ravish or surprise us by novelty and boldness of composition, he seldom fails pleasing us by the softness and sweetness of his melodies'. His operas enjoyed revivals for another 15 years.

MARITA P. McCLYMONDS (with SVEN HANSELL)

**Bianchi, Giovanni** (*b* Ferrara, *c*1660; *d* ?Milan, after 1720). Italian composer and violinist. He had settled in Milan early enough to be described in his op.1 of 1697 as 'violinista milanese'. He was active there for many years as a violinist and his name, along with that of his son, Giuseppe, appears in lists of instrumentalists at the court in 1711 and 1720: 'Bianchi, padre e figlio'. The sonatas of opp.1 and 2 are typical in style for the late 17th century; slow and fast movements alternate, the fast movements being somewhat more substantial. Bianchi's concertos (op.2) are in three or four movements, some first movements having several sections. Similar in some respects to Corelli's concerti grossi, these large-scale works are of a particularly high calibre and exhibit great melodic richness. Bianchi's style is characterized by extensive use of sequences, violinistic writing (including broken chord figures and fast repetitive notes), contrapuntal entrances in all parts and (in the concertos) fanfare endings. His music shows marked stylistic affinities with that of Carlo Antonio Marino.

WORKS

12 sonate a 3, 2 vn, vc, bc (org), op.1 (Modena, 1697/R)
6 concerti di chiesa a 4, 2 vn, va, vc, bc (org), e 6 sonate a 3, 2 vn, vc, bc (org), op.2 (Amsterdam [1703]); facs. (of scores in *US-NYp*) in *Three Centuries of Music in Scores*, ii: *Concerto I: Italy (c1703–1750)* (New York, 1988); viii: *Chamber Music II: Trio Sonatas, Part 1 (1688–1769)* (New York, 1990)
12 sonate a 3, *D-Bsb*; cited in *EitnerQ*
2 arias, 1v, clvd, *A-Wgm*; cited in *EitnerQ*

ROBIN BOWMAN/ELEANOR F. McCRICKARD

**Bianchi, Giovanni Battista (i)** (*b* Genoa; *fl* 1675). Italian composer. According to Eitner he was also an organist and moved to Bologna. He is described in his *Madrigali a due e tre voci* op.1 (Bologna, 1675) as an Augustinian monk and 'bachelor' ('bacciliere'), although in which discipline is not stated. The madrigals, his only known music, comprise 15 trios and two duets; he dedicated them to Signora Livia Grilla, who 'was pleased to admit him into her service'.

COLIN TIMMS

**Bianchi, Giovanni Battista (ii)** (*fl* London, 1780–82). Italian conductor and composer. He was music director at the King's Theatre, London, succeeding Bertoni, for the seasons 1780–81 and 1781–2. He added arias to several pasticcios and, with Rauzzini and Tommaso Giordani, composed *L'omaggio di paesani al signore de contado*, a *festa teatrale* performed on 5 June 1781 in celebration of the king's birthday. He has sometimes been confused with Francesco Bianchi, to whom he was not related.

ALFRED LOEWENBERG/R

**Bianchi** ['dal Cornetto'], **Giulio Cesare** (*b* Cremona, 1576/7; *d* ?Cremona, in or after 1637). Italian cornettist and composer. He served the Gonzaga court, Mantua, from 26 March 1602 to June 1612. Bertolotti's report of service in Milan in 1603 appears to be incorrect. At Mantua Bianchi was in charge of the wind band – we have notice of him recruiting wind players in 1609 (from Cremona) and 1611 – and he worked closely with the *maestro di cappella* (and fellow Cremonese) there, Claudio Monteverdi. Bianchi also supplemented his salary with a position in the paymaster's office. He was dismissed by 8 June 1612 during the extensive restructuring of the court music after the succession of Duke Francesco Gonzaga; perhaps he annoyed the new duke by seeking a position (unsuccessfully) with Cardinal Borghese in Rome. By 1620 he was back in Cremona, from where he published his *Libro primo de motetti in lode d'Iddio nostro Signore*, 1–5, 8vv (Venice, 1620[3]), including four motets by Monteverdi, and *Libro secondo de motetti: in lode della gloriosissima Vergine Maria*, 1–5vv, *e una messa*, 4vv (Venice, 1620[4]), again with music by Monteverdi (the notice in *FétisB* of a reprint of the second book in Antwerp in 1637 remains unconfirmed). Bianchi may have taken religious orders: in 1631 he was residing with Countess Hieronima Terzi in Piacenza for whom he celebrated Mass. In 1637, at the age of 60, he leased Monteverdi's house in Cremona.

Bianchi's motets (all for voices and continuo) are typical of the small-scale concertato church music proliferating in early 17th-century Italy: as is normal for the style, they focus on strong melodic writing and textural contrasts between imitative episodes and homophonic tuttis. One canzonetta survives (in RISM 1605[12]).

TIM CARTER

**Bianchi, Giuseppe** (*fl* 1637–63). Italian castrato. In 1637 his name appeared among the singers of the papal chapel in Rome; he then entered the service of Taddeo Barberini,

prefect of Rome. The Abate Elpidio Benedetti, who was commissioned by Cardinal Mazarin to recruit Italian singers for the French court, named him in 1643 as the best castrato in Rome, and as a result he took part in a private performance of an opera in the Palais Royal, Paris, during Carnival 1645. In 1646 he was back in the papal chapel in Rome, but subsequently was probably in Germany, in the service of several rulers. On 14 April 1654, under the name 'Giuseppe da Torino', he sang at the Petit Bourbon in Paris in Carlo Caproli's opera *Le nozze di Peleo e di Theti*. In 1658 he sang in the Hofmusikkapelle in Vienna and in 1662 and 1663, and almost certainly earlier, he was among the chamber musicians of the court of Turin.

PAOLA BESUTTI

**Bianchi** [Tozzi], **Marianna** (*b* ?Venice, *c*1735; *d* after 1790). Italian soprano. She made her *opera seria* début as *ultima parte* at Parma in 1753 and sang mostly secondary roles, sometimes appearing in *opera buffa*, before going to Vienna as prima donna in 1762, where she created Eurydice in Gluck's *Orfeo ed Euridice*. She then sang as prima donna in Italy and with her husband, the composer Antonio Tozzi, was engaged at Brunswick (1765–8) and Munich (1773–5); her Italian career then declined to secondary theatres and, after 1780, to *opera buffa*, ending in 1790. According to Burney, she had 'a sweet and elegant toned voice, always perfectly in tune, with an admirable *portamento*; I never heard any one sing with more ease, or in a manner so totally free from affectation'.

DENNIS LIBBY

**Bianchi, Pietro Antonio.** *See* BIANCO, PIETRO ANTONIO.

**Bianchiardus, Francesco.** *See* BIANCIARDI, FRANCESCO.

**Bianchini** [Bianchini Veneziano], **Domenico** ['il Rossetto', 'il Rosso'] (*b* ?Udine, *c*1510; *d* Venice, *c*1576). Italian lutenist and mosaicist. He was a younger brother of Vincenzo Bianchini (*fl* Venice, 1517–63), the most noted member of the family of Venetian mosaicists. He was admitted to the guild as a master mosaicist in 1537, and between 1540 and 1576 worked regularly at S Marco, where his mosaics include works after cartoons by Salviati and Tintoretto. As a musician he was praised and cited among the 'moderns' of the mid-16th century by Andrea Calmo. Girolamo Parabosco reported his participation in 1544 at Venice as a lutenist in an ensemble of two singers, a transverse flute, two viols, two cornetts, cembalo, lute and violone. Bianchini's *Intabolatura de lauto* is dedicated to the German merchants of the Fondaco dei Tedeschi (the German hostelry near the Rialto), with whom he appears to have had some business dealings. 11 pieces from the volume were reprinted in Hans Gerle's lutebook of 1552 (RISM 1552[31]).

The collection is typical of the mid-16th century, and contains arrangements of vocal music, eight dances and six ricercares. They include Gombert's motet *Ave sanctissima*, a *napolitana* by Willaert, and chansons and madrigals by Sermisy, Berchem, Arcadelt and Certon. Three of the dances provide an early instance of the passamezzo–paduana–saltarello suite, and the pavan *Forze d'Ercule*, which uses the same *passamezzo antico* bass, may have been intended as an additional movement to this suite. Other dances use popular Venetian street songs including the *Cara cosa*, *Meza notte* and *El burato*. The ricercares are exceptional in their use of imitation and consistent textures, and may be intabulations of instrumental ensemble music rather than works conceived originally for lute. One uses the famous *Faulte d'argent* melody and bears some resemblance to Cavazzoni's organ canzona on the same melody. Others include tabulations of a vocal bicinium by Richafort and of two ensemble ricercares (one now lost) by Segni. Several pieces, including a harmonization of the superius of Sermisy's *Tant que vivray*, and most of the dances have an underlying structure of parallel 10ths between the outer parts, a technique favoured in improvisations in the earlier decades of the 16th century (see D. Heartz, *JAMS*, xix, 1966, pp.13–36).

ARTHUR J. NESS

**Bianchini, Francescho** [Blanchin, François] (*b* Venice, *fl* Lyons, 1547–8). Italian lutenist and composer, active in France. His only known works are printed in the undated *Tabulature de lutz* (RISM 1547[27], ed. C. Dupraz and J.-M. Vaccaro, Paris, 1995), published in Lyons by Jacques Moderne. The date of 1547, generally assigned to the print, is assumed from the fact that the print's dedicatee, François Gouffer, Bishop of Béziers, took up his position in 1547 and died the following year (see Pogue). This collection, the first Italian lute tablature to be published by Moderne, contains one fantasia (the first time this term was used in France) and 15 intabulations. The fantasia that opens the print is a collage of musical ideas drawn from two ricercares by Julio Segni; following this are six intabulations of chansons by composers represented in Moderne's *Parangon des chansons* volumes (1538–43), including Crecquillon, Maillard and Lheritier, and three psalms by Mornable and Certon. Two *basse danses* (the last use of the term in France) follow: these draw on the superius parts of chansons by Clereau or Certon (*Fortune alors*; entitled *La mestresse* in the print), and Sandrin (*Quant ieu congneu a ma pensee*). The final four pieces are Italian: two pavans on forms of the *passamezzo antico* and romanesca, and two galliards on Venetian street songs.

It is not known if he was related to Pierre Blondeau (possibly known as Pietro Bianchini), who worked for Attaingnant in a similar editorial capacity.

JEANETTE B. HOLLAND/ARTHUR J. NESS

**Bianchini** [Blanchino], **Giovanni Battista** (*b* Rome, 2nd half of 17th century; *d* Rome, 26 Sept 1708). Italian organist and composer. He was *maestro di cappella* of Orvieto Cathedral in 1678 and of S Giovanni in Laterano, Rome, between 1684 and 1708. He was appointed *phonascus* (*maestro di canto*) of the Oratorio di S Marcello there in 1687, and subsequently, *praefectus musicae*. A member of the Congregazione di S Cecilia, he was *guardiano dei maestri di cappella* in 1687 and 1691. His name appears in connection with the performance of an 'opera in musica' at the Accademia del Teatro in Orvieto for Pentecost and Corpus Domini in 1693; he was probably director or *maestro di compagnia* for this occasion. In 1694 he was also *maestro di cappella* and organist of S Salvatore in Lauro, Rome. From 1685 he composed several oratorios for the Oratorio di S Marcello; nine other oratorios, for from three to six voices, are listed in the *Poesie . . . dialoghi sagri e morali per musica* (Orvieto, 1679) of the poet Alberici.

ANGELA LEPORE

**Bianchy, Jacobelus** (*fl* 2nd half of the 14th century). Italian composer. His only known works are two two-voice ballatas in *F-Pn* 6771 (ff.25*v*–26 and f.26*v*; ed. in PMFC, x, 1977, p.72): *Chi ama ne la lengua* (possibly cited in Prudenzani's *Saporetto*, sonnet no.33) and *L'ochi mie piangne* (text incomplete). Both exhibit 'popular' features that come from a local north Italian repertory.

KURT VON FISCHER/GIANLUCA D'AGOSTINO

**Bianciardi** [Blanchardus, Bianchiardus], **Francesco** (*b* Casole d'Elsa, nr Siena, ?1571–2; *d* Siena, between 1 March and 21 Sept 1607). In the preface to his *Sacrarum modulationum* (1596) he said that he was of humble origins. Until not later than 1596 he was organist and from no later than 20 June 1597 *maestro di cappella* of Siena Cathedral. In his manuscript *Notitia de contrapuntisti e de compositori di musica* Pitoni called him a 'grandissimo suonatore di organo', and he was praised as *maestro di cappella* by Banchieri in his *Conclusioni nel suono dell'organo* (1609). By 1601 and probably until his death he was responsible for musical affairs in the Accademia degli Intronati. According to Isidoro Ugurgieni Azzolini (*Pompe sanesi*, Pistoia, 1649) Bianciardi was 35 when he died. He was mainly a composer of church music in the style of Palestrina, whose pupil he may have been. The *Canzonette spirituali* is in a lighter style, however, and another late collection, the fourth set of *Sacrarum modulationum* (1608), is in the concertato tradition inaugurated by Viadana. Bianciardi's posthumous fly-sheet *Breve regola* is a useful source for the early practice of thoroughbass.

JOSEF-HORST LEDERER

**Bianco, Andrea.** *See* BIANCHI, ANDREA.

**Bianco, Giovanni Battista** (*b* Venice; *fl* 1610–21). Italian composer. In the first of his two publications he is described as an Augustinian monk, and he appears to have been employed at Concordia Cathedral from January 1613 for one year. He is known by his *Musica a due voci utilissima per instruir i figliuoli a cantar sicuramente in breve tempo* (Venice, 1610), which includes settings of Latin texts, and by his *Salmi che si cantano a terza, con*

*una messa a cinque voci*, with organ continuo (Venice, 1621).

COLIN TIMMS

**Bianco** [Bianchi], **Pietro Antonio** (*b* Venice, *c*1540; *d* Graz, bur. 2 Feb 1611). Italian composer and singer. He was probably educated in Venice, and he became a canon at S Salvatore there. On 1 November 1578 he was appointed a tenor in the Graz Hofkapelle, to which he belonged for the rest of his life. In 1580 he became court chaplain and in 1595 Hofkapellmeister; by then he was also principal court chaplain and almoner. His appointment to both posts resulted from the Graz court's efforts in support of the Counter-Reformation. Bianco resolutely continued the italianization of the Hofkapelle, a task already begun by Annibale Padovano; in order to recruit musicians and obtain music, he visited Venice several times, and Venetian music became the most important influence on music at the Graz court. Bianco attracted musicians such as Georg Poss, who was trained in Venice, and Giovanni Gabrieli's friend Francesco Stivori and pupil Alessandro Tadei. His testimonials on the Graz court musicians (in *A-Gl*) reveal his dedication to high artistic and social standards. In 1603, in recognition of his services, he was granted as a benefice the provostship of Maria Saal, Carinthia. He travelled to Poland in 1592 and to Spain in 1598 in the retinue of the dowager Archduchess Maria and went with Archduke Ferdinand of Inner Austria to the parliament at Regensburg from 1607 to 1608.

Bianco's talent as an administrator was combined with an above-average ability as a composer; his style was greatly influenced by Giovanni Gabrieli. Although his output covered a period of some 35 years, it was not extensive. His secular vocal music was influenced by the villanellas and madrigals of his Italian contemporaries. Later he seems to have devoted himself solely to sacred works, of which his motets are the finest: the combination in them of contrasts in texture and rhythm is characteristic of polyphonic music of the period. His only known mass and his *Magnificat*, both in eight parts, are based on the eight-part motet *Percussit Saul mille* by Giovanni Croce; they are typical of Venetian church music of the time. Contrary to the usual practice of setting only alternate verses of the *Magnificat* polyphonically, he set all the verses in the manner of the papal chapel. His litanies in *falsobordone* style were written to satisfy the tastes of the dowager Archduchess Maria.

HELLMUT FEDERHOFER

**Bianconi, Lorenzo (Gennaro)** (*b* Minusio, Ticino, 14 Jan 1946). Swiss musicologist. He studied musicology with Reinhold Hammerstein and Wilhelm Seidel at Heidelberg University and took the doctorate in 1974 with a dissertation on Cavalli and the diffusion of Venetian opera in Italy in the 17th century. In 1969–70 he worked for RISM (series A/I) in Italy and returned there permanently in 1973. In 1977 he was visiting professor at the department of music, Princeton University, and became professor of *Drammaturgia musicale* at the Università degli studi, Bologna. He also taught music history at the universities of Macerata (1978) and Arezzo (1980–83). He has been on the editorial boards of a number of publications including *Rivista italiana di musicologia* (1973–9), *Monumenti musicali italiani* (1979–86), the series *Studi e Testi per la Storia della Musica* (from 1979), *Acta musicologica* (1987–81), and *Historiae Musicae Cultores* (from 1999). In 1993–4 he founded with others the journals *Musicae Storia* and *Il saggiatore musicale*. He was a committee member of both the Società Italiana di Musicologia (1979–82) and the IMS (1982–92) and he was elected a corresponding member of the AMS in 1995. He was awarded the Dent medal by the RMA in 1983. His chief fields of research are Italian opera of the 17th–19th centuries, the theory of opera history and the Italian madrigal.

CAROLYN GIANTURCO/TERESA M. GIALDRONI

**Biandrà** [Blandrati, De Blandrate], **Giovanni Pietro** (*b* late 16th century; *d* after 1633). Italian composer. Although styled 'romano' in his publications, he may have been born at Biandrate, near Novara, his surname and its variants thus deriving from that place. He appears to have been *maestro di cappella* of the Seminario Romano, Rome, possibly from 1618 to 1619, and from 1619 to 1633 he was *maestro di cappella* of Faenza Cathedral. By 1626–7 at least he was also *maestro di cappella* of the Accademia degli Spennati in Faenza, to which he dedicated his opp.1 and 2. He composed primarily in the monodic and concertato styles. His first book contains 19 solos, five duets and two trios, all set to spiritual texts, while among the polyphonic madrigals of the second book are three 'resposte' to madrigals by Domenico Brunetti, Ignazio Donati and Angelo Peracini, and an extended setting of the 'Giuoco della cieca' in Guarini's *Il pastor fido*.

WORKS

Il primo libro de madrigaletti, 1–3vv, op.1 (Venice, 1626)
Madrigali, 4–5vv, bc, op.2 (Venice, 1626)

COLIN TIMMS

**Bianqing.** *See* LITHOPHONE. *See also* QING.

**Bibalo, Antonio** (*b* Trieste, 18 Jan 1922). Norwegian composer. He studied at the Trieste Conservatory with Luciano Gante (piano) and Viozzi (composition). He also spent three years studying composition with Lutyens at the Trinity College of Music, London, which he found to be of decisive significance. He settled in Norway in 1957. In 1991 he was made a Knight of St Olav, first class.

With an output including five operas and three ballets, Bibalo is regarded as the leading Norwegian musical dramatist. He achieved an international breakthrough at the Hamburg Opera in 1965 with *The Smile at the Foot of the Ladder*, followed by *Frøken Julie* ('Miss Julie', 1975). For the opera in Kiel he wrote *Gespenster* ('Ghosts', 1981) on Ibsen's play. The music of Bibalo's operas is centred on textual and dramatic expression, the musical techniques ranging from late Romantic tonality through dodecaphony and serialism to a free avant-garde style. The free stylistic diversity is bound together through integrating musical structure on the one hand and preserving a scenic-dramatic unity on the other. The resulting originality of sound gives the music a highly personal and uniform character. Piano works, chamber works and orchestral concertos also feature highly in Bibalo's output, and they share the same personal integration of undogmatic mixing of styles and advanced compositional techniques.

WORKS
(*selective list*)

Opera: The Smile at the Foot of the Ladder (H. Miller), 1958–62, Hamburg, 1965; Frøken Julie [Miss Julie] (A. Strindberg), 1974–5, Århus, 1975; Gespenster [Ghosts] (H. Ibsen), 1981, Kiel, 1981; Macbeth (W. Shakespeare), 1989, Oslo, 1990; Die Glasmenagerie (T. Williams), 1996, Trier, 1996
Ballet: Pinocchio, 1967; Nocturne for Apollo, 1969; Flammen, 1973

ERLING E. GULDBRANDSEN

**Biber, Heinrich Ignaz Franz von** (*b* Wartenberg [now Stráž pod Ralskem], nr Reichenberg [now Liberec], Bohemia, bap. 12 Aug 1644; *d* Salzburg, 3 May 1704). Austrian violinist and composer of Bohemian birth. He was the outstanding violin virtuoso of the 17th century and a first-rate composer; he wrote instrumental or vocal, sacred or secular music with equal ease. His fame rests mainly upon his violin sonatas, especially those which require scordatura, but his polychoral church music has also attracted interest and admiration.

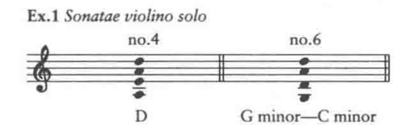
1. LIFE. Biber may have had some music lessons, perhaps by the organist Wiegand Knöffee, in his birthplace, which was the property of Count Maximilian Liechtenstein-Castelcorno, brother of the Bishop of Olmütz. He may have studied at a Jesuit Gymnasium in Bohemia, and in the early 1660s he was already on friendly terms with

Pavel Vejvanovský, who was then studying with the Jesuits in Troppau. Before 1668 Biber was a musician in the service of Prince Johann Seyfried Eggenberg in Graz, where Philipp Jakob Rittler and Jakob Prinner were also employed. In 1668 he became a *valet de chambre* and musician to the Bishop of Olmütz, Karl Liechtenstein-Castelcorno, in Kroměříž, where Pavel Vejvanovský was director of the Kapelle. Biber was popular among the courtiers at Kroměříž, and was highly valued as a violin virtuoso. In late summer 1670 the bishop sent Biber to the violin maker Jacob Stainer in Absam to negotiate the purchase of new instruments for his ensemble. Instead of visiting the violin maker, however, Biber entered the service of the Archbishop of Salzburg, Maximilian Gandolph von Khuenburg. Liechtenstein felt greatly injured by this action but refrained from reprisals against his former employee out of friendship for Archbishop Khuenburg. He contented himself with waiting until 1676 to make out the document officially releasing Biber from his service. Biber regularly sent works to Kroměříž in order to win the bishop's goodwill.

Biber's career flourished in Salzburg. At the end of 1670 he had been classed among the *valets de chambre*, porters and stokers of fires at court, with a relatively small monthly salary of about ten florins, but the archbishop appreciated music for string instruments and Biber rose rapidly in the social scale. In the years 1676–84 he dedicated four printed collections of instrumental music to the archbishop. On 30 May 1672, in Hellbrunn, he married Maria Weiss, daughter of a merchant and citizen of Salzburg. In 1677 Biber performed several of his sonatas in Laxenburg before Emperor Leopold I, who gave him a gold chain, and early in 1679 he was appointed deputy Kapellmeister. When he performed before the emperor for the second time, in 1681, he petitioned him for promotion to the ranks of the nobility. Biber distinguished himself as a composer on the occasion of the jubilee celebrations of 1682 (see below), and in 1684, after the death of Andreas Hofer, was appointed Kapellmeister and dean of the choir school. After a second application to Emperor Leopold in 1690, he was raised to the noble rank of knight, with the title of Biber von Bibern. Subsequently the new archbishop, Johann Ernst, Count Thun, appointed him lord high steward, a title that marked the culmination of the composer's social career.

*1. Heinrich Ignaz Franz von Biber: engraving from his 'Sonatae violino solo' (Nuremberg, 1681)*

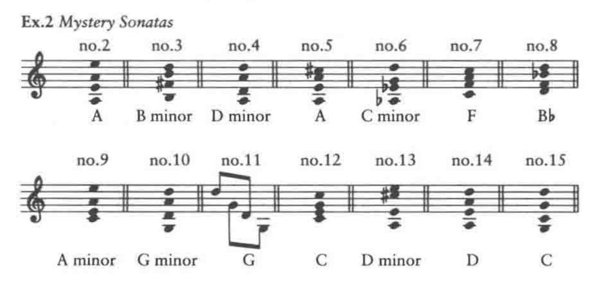
In the same year Biber visited his birthplace of Stráž pod Ralskem, where his wife stood as godmother to his nephew. In 1690 his salary had risen to 60 gulden a month, with free board and lodging including such items as wine, bread and firewood. According to Chafe, Biber had some 75 to 80 excellent singers and instrumentalists at his disposal in the 1690s. He was acquainted with Pavel Vejvanovský, P.J. Rittler, Jakob Prinner and J.H. Schmelzer, but whether he was Schmelzer's pupil must remain uncertain. No light has been cast on his relationship with his colleague at Salzburg, the cathedral organist Georg Muffat, but it does not appear to have been particularly friendly.



Biber had 11 children, only four of whom survived childhood: his sons Anton Heinrich (1679–1742) and Karl Heinrich (1681–1749) and his daughters Maria Cäcilia (*b* 1674) and Anna Magdalena (1677–1742). They were all musically gifted and received a good musical education from their father. Both sons were violinists at the Salzburg court, and Karl Heinrich (*see* BIBER VON BIBERN, KARL HEINRICH), the more gifted of the two, rose to become deputy Kapellmeister in 1714 and Kapellmeister in 1743. Biber's daughter Anna Magdalena entered the Benedictine convent of Nonnberg in 1696. A fine alto singer and violinist, Maria Rosa Henrica (the name taken by Anna Magdalena in religious life) became mistress of the novices in her convent, and was appointed director of its choir and Kapelle in 1727. Biber composed and directed his *Missa S Henrici* for her investiture as a nun on 15 July 1697. As a singing teacher, Maria Rosa Henrica made use of her father's manual, the *Singfundament*. Her elder sister Maria Cäcilia was also a nun, in the convent of S Clara in Merano.

One might think that the most highly honoured violin virtuoso of his time would have made some professional tours. Curiously there is almost no information on the subject. The final paragraph of Biber's biography in Mattheson's *Grundlage einer Ehren-Pforte* of 1740 (written by Karl Heinrich, the composer's son) indicates that he was well known in the emperor's dominions and in France and Italy for his music rather than for concert appearances. There is evidence that he was well known in Munich, since he was decorated at the Bavarian court on two occasions. In his later years Biber seems to have devoted himself to the composition of sacred music, operas and school dramas. Of the dramatic works only one opera is extant; only the librettos of the others remain. He wrote his last school drama in 1698, his last opera in 1699.

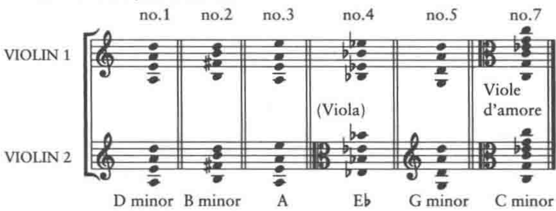
2. WORKS. Burney wrote: 'of all the violin players of the last century Biber seems to have been the best, and his solos are the most difficult and most fanciful of any music I have seen of the same period'. When Burney saw the Biber sonatas, 100 years after they had been written, interest in them was mainly historical. Quite early in the 18th century German violinists had turned towards the more formal and fully tonal compositions of Corelli and



his followers. Burney's opinion of Biber was based mainly upon the *Sonatae violino solo*, eight sonatas for violin and continuo published in 1681. These sonatas are elaborately developed, show a keen sense of formal structure and are completely uninhibited in their virtuosity. While they differ from one another to some extent in form and choice of movements, sets of variations are to be found in all of them. It was in the free preludes, in equally free and elaborate finales, in brilliant passage-work over ostinato basses and in polyphonic passages (in which multiple stops seem never to have been a problem) that Biber was able to give full rein to a formidable violin technique. In range he was able to reach the 6th and 7th positions and return from them with an ease and abandon which set him apart even from his only peer, Johann Jakob Walther. (In both left-hand technique and bowing these two men from the north far outstripped their Italian contemporaries.) Although Biber achieved his greatest technical brilliance in the sonatas with normal tuning, two of the *Sonatae violino solo* require the altered tunings shown in ex.1.

Ex.1 *Sonatae violino solo*

In contrast to the sonatas of 1681, in which conventional tuning by 5ths is the rule rather than the exception, 14 of the 16 Mystery (or Rosary) Sonatas for violin and bass (completed about 1676) require scordatura. These works were not printed; in the one surviving manuscript each sonata is identified by an engraving depicting one of the 15 Mysteries of the Rosary. The remaining work, the Passacaglia for unaccompanied violin, is prefixed by a picture of a guardian angel and child. Biber probably performed these sonatas as postludes to services during October, the month specially devoted to the Rosary Mysteries at Salzburg Cathedral. The Passacaglia may have been written for performance at a special 'Feast of the Guardian Angel' falling on 2 October. The tuning chosen for each Mystery Sonata, shown in ex.2, helps to



Ex.2 *Mystery Sonatas*

set the mood by providing for special tone-colours, rich sonorities and many multiple stops not ordinarily obtainable on the violin. Only occasionally does the chosen scordatura contribute to a clearly descriptive or programmatic passage. In these sonatas there are many dance movements, highly stylized forms which the composer moulded to his expressive purposes. As in many of his other works, the more conventional distinctions between church and chamber sonata are not observed. Like the *Sonatae violino solo*, the Mystery Sonatas include many sets of variations, all with strict ostinato basses. The unaccompanied Passacaglia, built on 65 repetitions of the descending tetrachord (*g′–f′–e♭′–d′*), is a monumental polyphonic piece, the oustanding work of its type before the Bach Chaconne.

Biber wrote another set of scordatura pieces, *Harmonia artificiosa-ariosa*, seven partitas for two instruments and bass. Five of the partitas are for two violins, one is for violin and viola, and one is for two violas d'amore. Six of them require the altered tunings shown in ex.3. Since

Ex.3 *Harmonia artificiosa-ariosa*

these works are trios for two equal instruments and continuo, the fantastic, seemingly improvisational elements of the solo sonatas give way to more regularly patterned passages and to a richer polyphony, sometimes in as many as five parts – two solo instruments, each carrying two real parts, supported by an independent bass line. The trios are spectacular pieces for two soloists, taking full advantage of the sonorities and polyphonic possibilities of the scordatura; they are not typical of Biber's chamber music for large forces. In his ensemble sonatas, partitas and ballettos, whatever the combination or number of instruments, he never used scordatura and always adhered to strict part-writing: one line only for each instrument and no double stops, even at cadences.

The Mystery Sonatas and the *Harmonia artificiosa-ariosa* represent the summit of the violin scordatura literature. Including the two scordatura sonatas of 1681 there are 22 works, having among them 18 different tunings. As shown in exx.1, 2 and 3, there is in each case a clear relationship between the open strings and the key of the piece, an obvious contribution to sonority. All the altered tunings are narrower in range than the *g* to *e″* of the conventional tuning. Bringing some of the strings closer together in pitch makes possible or simplifies the production of the most resonant intervals and chords: unisons, 3rds and 4ths, and triads and chords of the sixth in close position. The result is a smoother, more easily flowing, richer-sounding polyphony than is possible with conventional tuning. Some of the tunings do provide for special effects, most notably the interlocking octaves of Mystery Sonata no.11. The tuning *g–g′–d′–d″* (in the order noted, from the fourth string to the first) was planned for a highly resonant performance in octaves, each octave stopped across two strings by one finger. Historically, instruments tuned by 5ths have always been primarily melodic; Biber, in his very personal use of the scordatura, enlarged the polyphonic possibilities of the violin.

Much of the finest of Biber's ensemble music was published during his lifetime. The *Sonatae tam aris quam aulis servientes* (1676) consists of sonatas in five, six or eight parts; some are for strings alone, others include one or two trumpets in the ensemble. The *Mensa sonora* (1680) is a group of six partitas. The stylized dance movements are often framed between an opening sonata or intrada and a closing sonatina or retirada. The *Fidicinium sacro-profanum* (1683) is a set of 12 sonatas

*2. Opening of the violin part from the autograph manuscript of Biber's 'Laetatus sum', 1676 (CZ-KRa A.422, formerly B.III.73)*

for either one or two violins, two violas and bass. Biber, like many of the composers represented in the Liechtenstein-Castelcorno collection, frequently wrote fewer violin than viola parts. In the ballettos, the dance suites used for court entertainment, the usual four-part combination was one violin, two violas and violone.

Biber's sacred compositions make up a considerable part of his work. They are distinguished by their masterly vocal writing, the use of all kinds of musical instruments, their strict counterpoint and Biber's brilliant technique in writing variations over a basso ostinato. His magnificent masses and vespers are particularly notable, and were composed with a fine understanding of what could be done in the specific conditions of Salzburg Cathedral. Biber's predecessors had already made use of the opportunity to situate different musical ensembles in spatially separated pillared galleries in front of the presbytery, but he was the first to make full use of the possibilities that this offered. An example of his art in this respect is represented by the *Missa Salisburgensis*, which, together with the 53-part hymn *Plaudite tympana*, was erroneously attributed by A.W. Ambros in 1878 to Orazio Benevoli. Hintermaier proved that Biber composed this mighty work in 1682 to celebrate the 1100th anniversary of the founding of the archbishopric of Salzburg by St Rupert. The ensemble is divided into seven groups: Choro 1 (eight singers and organ), Choro 2 (two violins and four violas), Choro 3 (two oboes, four flutes and two trumpets), Choro 4 (two cornetts and three trombones), Choro 5 (eight singers, two violins, two violas and organ), Loco I and Loco II (each with four trumpets and timpani, Loco 2 also providing the basso continuo). The *Missa S Henrici*, *Missa Bruxellensis* and the 32-part *Vesperae* are also polychoral works.

In his sacred music Biber was capable of writing *a cappella* masses as well as huge concerted works for solo and ripieno voices with large orchestra. The *Missa quadragesimalis* is in pure *a cappella*style; although it is provided with a figured bass it may be performed just as well without it. As a composer of his own time Biber's strong sense of late 17th-century tone-colour may be heard in the full vocal and orchestral sound of the Requiem in F minor.

Between 1679 and 1699 Biber wrote three operas and at least 15 school dramas. The only extant work is the opera *Chi la dura la vince*, a beautiful leather-bound copy of which was dedicated to Archbishop Johann Ernsthun. The opera was probably composed in 1690–92. It is less advanced than the Viennese operas of the time. Biber used an incipient form of da capo aria when that form was fully developed in Vienna. The school dramas were produced at the Benedictine University in Salzburg. The librettos that remain indicate that some of them had so many musical scenes that they might possibly be classified as operas with dialogue.

Most of Biber's manuscripts, including all the known manuscripts of the chamber music, remain at the Kroměříž archbishop archive. Among them are a wide variety of interesting compositions. A few may be chosen at random to illustrate the range of Biber's work; the 32-part *Vesperae* for solo and ripieno voices, strings, trumpets, trombones, timpani and '4 bassi continui'; *Laetatus sum*, an elaborate motet for two bass voices, violin solo, three violas and continuo (fig.2); the *Serenada* for strings, continuo and bass voice (singing the 'Nightwatchman's call'); the *Battalia*, a typical battle piece of the period; *Sonata violino solo representativa*, a programmatic piece in which Biber joins other violinists of the 17th century in using bird and animal sounds as part of the basic material of an extended violin solo; the *Sonata S Polycarpi* for eight trumpets and timpani; and a large number of dance suites, simply entitled 'Balletti' or 'Arien'.

There have been very few composers of the first rank – and Biber must be counted in the first rank of his time – who were so completely outstanding in their instrumental virtuosity. Fortunately his virtuosity as a violin composer was at the service of a splendid musical mind. He had a gift for melody and was a master of counterpoint – and that mastery had its effect, even in the most fanciful of his violin preludes. As a composer of sacred music and instrumental ensemble music he was at least the equal of his Viennese contemporaries; as a virtuoso and composer for the violin his position is unique and of historic importance.

WORKS

OPERAS, SCHOOL DRAMAS, LARGE CANTATAS
*music lost unless otherwise stated*

Applausi festivi di Giove (cant.), Salzburg, 1687, *SI-Lf* (lib only)

ELIAS DANN/JIŘÍ SEHNAL

**Biber von Bibern, Karl Heinrich** (*b* Salzburg, 4 Sept 1681; *d* Salzburg, 19 Nov 1749). Austrian composer, son of HEINRICH IGNAZ FRANZ VON BIBER. As the son of Salzburg's dominant late 17th-century musical personality, Karl Heinrich's career was by and large predetermined. By the age of 11 he had performed in at least two school dramas, *Rex catholicus, seu Hermenegildus rex et martyr* and *Rex invictus, seu D. Wenceslaus, Bohemiae, rex et martyr*, both with music by his father, and in 1704, the year of Heinrich's death, Karl Heinrich travelled to Rome, presumably to study violin playing and composition; some years later he also visited Vienna. Biber was first appointed to the court music in 1704; promoted to deputy Kapellmeister in 1714, he succeeded Biechteler as Kapellmeister in 1743.

As a composer Biber wrote exclusively for the church. His sturdily crafted and traditionally contrapuntal works, however, made little impression in Salzburg; he was considered far less important a composer than his contemporary Biechteler. About 120 of Biber's works survive in the Salzburg Cathedral archives, among them 20 masses, 18 litanies and vespers settings and 31 church sonatas (six ed. in Accademia musicale ii, iv, v, Mainz, 1969); a late 1780s catalogue of the cathedral holdings additionally lists 14 offertories, three *Dixit* and *Magnificat* settings, three *Te Deum*, eight *Regina coeli*, three *Miserere* and a *Recessit et tenebrae*. Biber also wrote a brief biography of his father (published in *MatthesonGEP*).

CLIFF EISEN

**Bibiena** [Bibbiena]. *See* GALLI-BIBIENA family.

**Biblical instruments.** The various musical instruments mentioned in the Bible (Old and New Testaments). The nature and significance of the biblical instruments has been the subject of considerable discussion from the early Middle Ages onwards. The following article focusses on the meaning of the words as they appear in the original languages of the various biblical texts (Heb., Aramaic, Gk.), using archaeological evidence and other literary sources to establish as far as possible the identity of the individual terms; it also addresses the interpretation of other musical terminology in the Bible. (*See also* JEWISH MUSIC, §II.)

References to particular biblical passages follow the Revised Standard Version and the abbreviation IAA is used for the Israel Antiquities Authority.

1. THE PROBLEM. The controversy surrounding the identity and significance of the 'biblical instruments' derives from the complexity of the original source. Even the term itself is ambiguous, since it may denote the instruments of the period described by any given text of the Bible, those of the period and environment in which the written tradition originated, or those that have remained in the memory of society from a certain stage of the oral tradition. Furthermore, should a reference to an instrument be regarded as a theological symbol or a historical document? Must it be placed in the relevant context by archaeological finds before it may be regarded as concrete fact? It is possible to discuss the subject only if an interdisciplinary approach is adopted involving 'new and processual archaeology', recent studies of the Pentateuch, and modern archaeomusicology. Although the organological information provided by the biblical texts themselves is scanty, the social and symbolic context of the music can often be established quite precisely (see Kolari, 1947).

Study of the significance, closeness to reality and symbolism of biblical musical instruments goes back to the first translations of the authentic text from its original language of Hebrew. Even the Septuagint, the Peshitta (Syriac translation), the Targum (Aramaic translation) and the Vulgate provide evidence of uncertainty on the part of the earliest translators: for example, *kinnor* and *'uġav* (*Genesis* iv.21) are translated in the Septuagint as *psaltirion* and *kithara*, in the Peshitta as *kinnora* and *zimara*, in the Targum as *kinnora* and *'abbuba* and in the Vulgate as *cithara* and *organo*. Various different translations are also given for the same instrument within these languages: for instance, *kinnor* appears in the Septuagint as *kithara*, *kinira*, *psalterion* and *organon*. The interpretation of *nebel* as 'harp', now refuted by archaeological evidence, is partly based on confusing translations of this kind. The etymology of the names of instruments, however, may be helpful in identification: the derivation of *kinnor* from the root *knr*, for instance, clearly indicates that it is an instrument of the lyre type (Ellermeier, 1970). Comparative approaches – textual, etymological, archaeological and ethnological – often complement and elucidate questions of biblical organology.

Secondary sources such as the post-biblical scriptures (the Mishnah, and the Jerusalem and Babylonian Talmuds), the Apocrypha, the Qumran scrolls (1QM, 1QS), the writings of Jewish authors in the Roman period (Flavius Josephus, Philo of Alexandria) and of the Church Fathers (see McKinnon, 1987) – may also be used in biblical interpretation. The Middle Ages regarded the range of musical instruments that features in the Bible as allegorical: *musica practica* was ignored, and *scientia musicae* studied only for the theological significance of the instruments.

Modern biblical organology begins with two works that appeared at almost the same time, one by a Jewish author (Portaleone, 1612) and one by a Christian (*PraetoriusSM*, 1614–19/*R*). The former refers to contemporary instruments for the interpretation of the biblical text; the latter bases its discussion exclusively on textual material, on the grounds that there were no relevant musical antiquities in Israel/Palestine (vol.ii, f.4), a claim still being made as late as *NOHM* (Kraeling and Mowry, 1960, p.295). Since Praetorius, scarcely a work of general historical musicology has been written that does not include a chapter on biblical instruments. In the 17th and 18th centuries the landmarks on the subject were the writings of Hawkins (1776), Pfeiffer (1779) and Forkel (1788). From the 19th century to the early 20th, biblical organology was concentrated on Jewish antiquity studies (Jahn, 1817; Saalschütz, 1829; Wellhausen, 1898) but reached its peak in the work of Engel (1864), who emphasized the necessity of an interdisciplinary approach. With Sachs (1940), biblical musicology entered a new era. Although his work has not lost its importance, the outmoded equation of biblical texts with the musical history of ancient Israel/Palestine is dominant in Sachs and indeed in some writers up to the present day (Kraeling and Mowry, 1960; Sendrey, 1969; Werner, *Grove6*, and 1989; Seidel, 1989). The first study devoted to the archaeomusicological finds of ancient Israel/Palestine was Sellers, 1941. A series of studies from the second half of the 20th century (Bayer, 1963, 1968, and 1971; Keel, 1972; Beck, 1982; Mazar, 1976; Meshorer, 1982; Meyers, 1987; Braun, 1994, and 1999) consider archaeology to

be the primary source for studying the musical instruments of ancient Israel/Palestine.

2. ATTEMPTS AT CLASSIFICATION. The text of the Old Testament suggests the possibility that there was an internal ('culture-emerging/natural', Kartomi, 1990) classification of biblical instruments, although it remains difficult to prove for certain. For example, the musical instruments of the priests (*ḥaṣoṣerah*) and the Levite guilds of musicians (*kinnor*, *nebel*, *meṣiltayim*) appear as a group in *Chronicles* (*1 Chronicles* xvi.5–6). Gerson-Kiwi (1957), for instance, used such evidence to distinguish between 'les instruments "sacerdotaux"' (*shofar*, *ḥaṣoṣerah*), 'les instruments lévitiques' (*kinnor*, *nebel*) and 'les instruments "laics"' (*'uġav*, *ḥalil*, *abuv*, *magrefah*; the last is no longer considered to have been a musical instrument). Avenary (1958) attempted a socio-historical classification: magic sound-generating items of the Nomadic Period (*shofar*, *ḥaṣoṣerah*, *meṣiltayim*); art music instruments of urban cultures (*kinnor*, *nebel*, *ḥalil*); and Temple instruments (*shofar*, *ḥaṣoṣerah*, *ḥalil*, *kinnor*, *nebel*, *meṣiltayim*). Sachs (1940) preferred a classification based on the sequence of references to individual instruments in the Old Testament. The greater part of the literature on this subject is based on artificial patterns rooted in the contemporary musical culture of period in which it was written ('observer-imposed/artificial', Kartomi, 1990). The earliest such classifications are found in Portaleone as instruments designated as suitable and unsuitable for art music, and in *PraetoriusSM* as musical instruments mentioned in the texts of the *Psalms*, string instruments, cymbals and so on. Since Pfeiffer (1779) and Forkel (1788) a tripartite division into string, wind and percussion instruments has been accepted, and more recently has been equated with the Hornbostel and Sachs classification of 1914.

An internal classification clearly appears in the New Testament: the *salpinx* and *kithara*, both of which are identified with the voice of God, are sacred symbols, while the *aulos* and cymbals are secular instruments.

3. OLD TESTAMENT INSTRUMENTS.

*(i) 'Aṣei beroshim* (*2 Samuel* vi.5).

This instrument (pl. of *'eṣ berosh*: 'cypress tree') is mentioned only once in the Bible (*bekhol 'aṣei beroshim*: 'all manner of instruments made of fir wood'); in the parallel passage (*1 Chronicles* xiii.8) it is replaced by the phrase *bekhol-'oz uvshirim* ('with all their might, with song'), apparently to evade the instrument's secular and orgiastic aspect. Modern studies interpret it as a cypress-wood clapper (Avenary, *MGG1*). Evidence exists for the use of bone clappers in the shape of the head of the goddess Hathor in Canaan in the late Bronze Age, and it is probable that clappers made of the widespread local cypress were used for ritual and pararitual mass events during the period of the Kings (10th–8th centuries BCE).

*(ii) Ḥalil* (*1 Samuel* x.5. *1 Kings* i.40. *Isaiah* v.12; xxx.29. *Jeremiah* xlviii.36).

The root word *ḥll* ('to hollow out' or 'to bore through') is widely distributed throughout the Semitic language area (Gesenius, 17/1921, p.233b). The word also means 'profane', 'reprehensible' (Köhler, Baumgartner and Stamm, 1967–90, i, 305), and in the Old Testament usually signifies 'to desecrate' or 'to profane' (Botterweck, 1973–, iii, 972 and 981–2). The Septuagint translates it as *aulos*, the Vulgate as *tibia*, but the Peshitta and Targum present a very confused picture, variously making it a drum, cymbals, a string or wind instrument. Modern editions of the Bible usually translate it as 'flute', although the Septuagint and Vulgate provide grounds for interpreting it as a double- or single-reed instrument. The talmudic literature confirms this viewpoint (Mishnah, *'Arakhin* ii.3), and modern musicology is inclined to accept the interpretation (Sachs, 1940; Bayer, 1968; Marcuse, 1975). Other scholars, supported by the Jerusalem Talmud (*Sukkah* 55b), prefer to see the word as a collective term for wind instruments (Gerson-Kiwi, 1957; Sendrey, 1969).

The *ḥalil* is mentioned as being played at rejoicings for the anointing of the king (*1 Kings* i.40), at victory celebrations (*Isaiah* xxx.29) and in connection with prophetic ecstasy (*1 Samuel* x.5), but it is also a symbol of lamentation (*Jeremiah* xlviii.36) and an instrument of sinners (*Isaiah* v.12). The talmudic texts indicate that the *ḥalil* was made of reed (Mishnah, *'Arakhin* ii.3) or bone (Mishnah, *Kelim* iii.6). Sometimes it was plated with copper or bronze, as is confirmed by archaeological finds from the Romano/Hellenistic Period, but this new technique was opposed by the religious establishment on the grounds that the *ḥalil* then lost its sweetness of tone (Babylonian Talmud, *'Arakhin* 10b). The only Iron Age wind instrument in ancient Israel/Palestine for which archaeological evidence exists is the double reedpipe (fig.1), which is usually interpreted as an instrument of the clarinet or oboe type.

According to the Jerusalem Talmud, the *ḥalil* was played before the altar on only 12 days in the year (*Sukkah* 55a) and the Temple orchestra was to contain no less than two and no more than 12 such instruments (Mishnah, *'Arakhin* ii.3). This, however, contradicts the Old Testament texts where none of the five passages where the *ḥalil* is mentioned relates to liturgical or Temple music. It was often used on paraliturgical and secular occasions: an offering of fruits (Mishnah, *Bikkurim* iii.3–4; *see* JEWISH MUSIC, §II, fig.13), at festivals of pilgrimage or rejoicing (Mishnah, *'Arakhin* ii.3), and at funerals (Mishnah, *Ketubbot* iv.4: 'even the poorest man in Israel shall have no less than two *ḥalilim* and a female mourner at his wife's funeral'). Archaeological and written sources confirm that the *ḥalil* was an ecstatic and orgiastic instrument. The dualism whereby the *ḥalil* is an instrument of both the Temple and sinners, of joy and lamentation alike, has been characteristic from ancient times to the present day (Avenary, 1971).

*(iii) Ḥaṣoṣerah* (*Numbers* x.2 and 8–10; xxxi.6. *2 Kings* xi.14; xii.13. *Hosea* v.8. *Psalms* xcviii.6. *Ezra* iii.10. *Nehemiah* xii.35 and 41. *1 Chronicles* xiii.8; xv.24 and 28; xvi.6 and 42. *2 Chronicles* v.12–13; xiii.12 and 14; xv.14; xx.28; xxiii.13; xxix.26–8).

The term, for which no clear etymology is known, is possibly linked to the Arabic verb *ḥṣr* ('to howl', 'to scream'). Translated in the Septuagint as *salpinx* and in the Vulgate as *tuba*, the *ḥaṣoṣerah* is generally understood to be a metal trumpet.

The *ḥaṣoṣerah* appears in the books written before the Babylonian Exile as an instrument of war and rejoicing, and was played by the people. After the Exile the instrument assumed a ritual and priestly status in the Temple (*2 Kings* xii.14), but was also played at assemblies of the community (*Numbers* x.2), on feast days (*Numbers* x.10), when the Ark was borne in procession (*1 Chronicles*

xv.25), at the taking of an oath (2 *Chronicles* xv.14), in war (*Numbers* x.2), and on such solemn occasions as the king's accession to the throne (2 *Chronicles* xxiii.13) and the laying of the foundation stone of the Temple (*Ezra* iii.10). Two forms of sound production are mentioned (*Numbers* x.1–7): *teqi'ah*, a long, strong note (for 'the journeying of the camps' and the assembly of army leaders); and *teru'ah*, a blaring tone for an alarm warning of enemy attack or divine admonition.

This is the only instrument whose construction and material are mentioned in any real detail in the Old Testament: it was to be made of hammered silver (*Numbers* x.2), about an ell (40 cm) in length, with a narrow tube and a broad bell (Josephus, iii.12, 6; fig.2). The two pieces of archaeological evidence most frequently cited – the depictions of trumpets on the Arch of Titus in Rome and the Bar Kokhba coinage, however are not reliable sources. The widespread hypothesis that the *ḥaṣoṣerah* derived from such Egyptian instruments as the pair of trumpets found in the tomb of Tutankhamun has not been proven. Consequently, a Graeco-Roman or Philistine-Phoenician provenance should not be ruled out.

*1. Terracotta bell-form figurine of a musician playing the double pipes (probably the ḥalil), from Achziv, 9th–8th centuries* BCE *(IAA 44.56)*

The Old Testament, and more particularly the post-biblical literature (Mishnah, *Rosh ha-shanah* iii.3) and the apocalyptic Qumran scroll 'The War of the Sons of Light against the Sons of Darkness' (1QM ii.15–iii.11 and vii.1–ix.9), illustrate the many everyday, ritual and warlike functions of the *ḥaṣoṣerah* (Seidel, 1956–7). Here the signals of the *ḥaṣoṣerah* are further subdivided, for instance as a 'long, drawn-out tone', a 'sharp, blaring tone', and a 'great warlike noise'. The instruments themselves had inscriptions engraved on them, probably invocations and descriptions of their functions (e.g. 'called by God', 'trumpet of summons', 'trumpet of pursuit'). The *shofar* and *ḥaṣoṣerah* have often been confused in the interpretation of their significance and symbolism. Although there is a certain continuity in the function and symbolism of both instruments, the *ḥaṣoṣerah* was both a ritual instrument and a symbol of sanctioned and institutionalized secular autocratic power, while the *shofar*, had from ancient times been an instrument with magic and mystical theophanic connotations.

*(iv) Kinnor* (*Genesis* iv.21; xxxi.27. *1 Samuel* x.5; xvi.16 and 23. 2 *Samuel* vi.5. *1 Kings* x.12. *Isaiah* v.12; xvi.11; xxiii.16; xxiv.8; xxx.32. *Ezekiel* xxvi.13. *Psalms* xxxiii.2; xliii.4; xlix.4; lvii.8; lxxi.22; lxxxi.2; xcii.3; xcviii.5; cviii.2; cxxxvii.2; cxlvii.7; cl.3. *Job* xxi.12; xxx.31. *Nehemiah* xii.27. *1 Chronicles* xiii.8; xv.16, 21 and 28; xvi.5; xxv.1, 3 and 6. 2 *Chronicles* v.12; ix.11; xx.28; xxix.25).

The *kinnor* is a central organological concept in the Old Testament. As a 'cultural word that cannot be limited to a linguistic and geographical area . . . a word the origins of which cannot yet be defined' (Botterweck, 1973–, iv, 212), the term appears in literary sources long before the Old Testament was written: *kinaratim* (pl. of *kinaru*: 'lyre') – are first mentioned in a document of the 18th century BCE found at Mari (now Tell Hariri, Iraq; Ellermeier, 1970). The root *knr* appears in Canaanite, Phoenician and Cypriot names of deities (Kinyras, Kinnaras, Kuthar), in the Akkadian and Ugaritic languages (*kinaru*), in place names (Kinneret, i.e. the Sea of Galilee, *Numbers* xxxiv.11), as a description of wood (*kunar*: 'lotus wood') and as a Semitic loan word in the New Kingdom of Egypt (*knwrw*: 'lyre').

The *kinnor* was unusually versatile in its functions: in the first biblical mention of musical instruments (*Genesis* iv.21) it is a symbol of professional activity, and thereafter appears at festivals of rejoicing (*Genesis* xxxi.27), at times of mourning (*Job* xxx.31), in connection with magical cures (*1 Samuel* xvi.16) and prophecy (*1 Samuel* x.5), and played in praise of God (Psalm xliii.4) as well as by harlots (*Isaiah* xxiii.16). Although the Septuagint and the Vulgate show uncertainty regarding the translation of the term (see above, §1), and despite the centuries-old tradition of depicting, both in writing and iconography, the *kinnor* as the 'harp of David', modern scholars are in no doubt that the instrument was in fact a lyre.

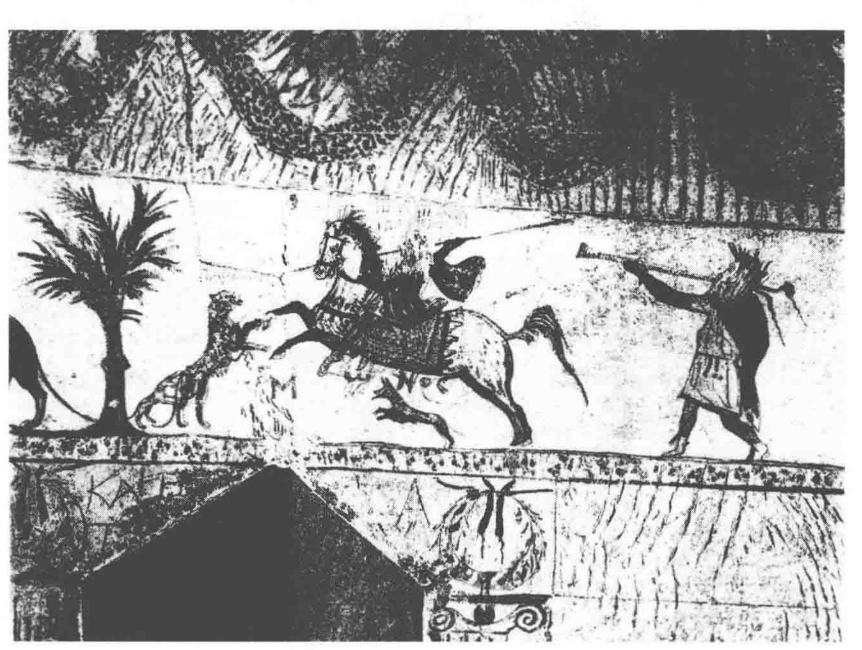
In the time of Solomon (*c*974–*c*937) 'almug' wood (perhaps sandalwood) was imported to Israel/Palestine from Lebanon and used in the making of string instruments (*1 Kings* x.11–12). Josephus (viii.3.8) mentions

electrum, an alloy of gold and silver used for making the *kinnor*. Post-biblical literature provides information about the number of strings (ten in Josephus, vii.12.3; six in Jerome, *PL* xxvi, 969; seven in the Babylonian Talmud, *'Arakhin* 13b). All sources agree that the *kinnor* had fewer strings than the *nebel* (Josephus, op.cit.; Jerusalem Talmud, *Sukkah* 55c). As a rule the *kinnor* was played with a plectrum (Josephus, op.cit.). It was struck with the hand only in order to achieve special expressive force in therapeutic treatment (*1 Samuel* xvi.23).

The identification of the *kinnor* as a lyre is confirmed by archaeological evidence: more than 30 depictions of lyres date from the period relevant to the biblical scriptures in ancient Israel/Palestine, while not a single find has been discovered relating to any other kind of string instrument. Depictions of lyres fall into four types: large asymmetrical box lyres with divergent side arms and a rectangular resonator (fig.3; *see also* JEWISH MUSIC, §II, fig.5 and fig.7), asymmetrical lyres with parallel side arms and a rectangular resonator (Braun, *MGG2*, 'Biblische Musikinstrumente', Tafel 2, no.6), small symmetrical lyres with a round or rectangular resonator (ibid., no.11), and Hellenistic-Roman symmetrical lyres with rounded, horn-shaped side arms (fig.4).

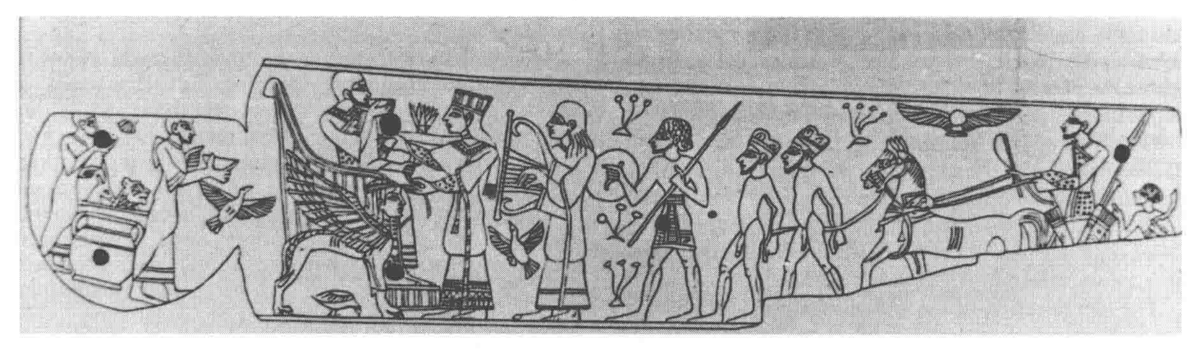
Important evidence for the Judaean *kinnor* also comes from Assyria, where a relief showing captive Judaean lyre players from Lakhish (701 BCE; *see* JEWISH MUSIC, §II, fig.8) was discovered at Sennacherib's palace in Nineveh.

Although all Middle Eastern lyres were clearly related (Lawergren, 1998; *see* LYRE (i), §2), the lyres of ancient Israel/Palestine constitute a distinct group within southern Levantine musical culture (see Dever, 1997) with regard to both social context and performing practice. Confirmed by iconographic sources and textual evidence, the social functions of the *kinnor* ranged from pagan ritual dance and the worship of Cybele to Canaanite and Israelite victory celebrations, and from its use in Judaean worship to its status as an attribute of Dionysus.



*(v) Mena'ane'im* (*2 Samuel* vi.5).

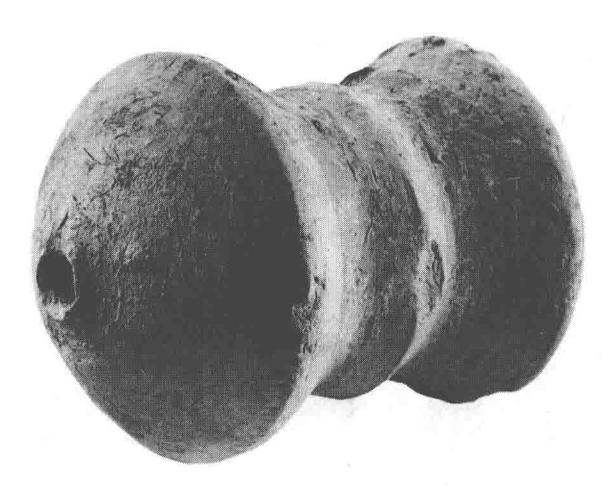
Mentioned a single time in the Bible, this term is known only in the plural and is derived from the verb *ni'ana'* ('to shake'). Like the *'aṣei beroshim* (see above, §3(i)) the instrument has been omitted from the parallel passage in *1 Chronicles* xiii.8. The Septuagint and Vulgate agree that it is an idiophone (*kimbalon* or *sistra*) and various interpretations have been suggested, but Bayer's identification of it (1964) as a pottery rattle is the most convincing. To date archaeological finds have provided over 70 intact specimens of such percussion instruments of Israelite/Palestinian origin (fig.5). Most have been found in tombs and can be regarded as ritual instruments.



*(vi) Meṣiltayim and ṣelṣelim* (*Meṣiltayim*: *Ezra* iii.10. *Nehemiah* xii.27. *1 Chronicles* xiii.8; xv.16, 19 and 28; xvi.5 and 42; xxv.1 and 6. *2 Chronicles* v.12–13; xxix.25. *Ṣelṣelim*: *2 Samuel* vi.5. *Psalms* cl.5).

Onomatopoeic in nature (from Heb. *ṣlṣl*: 'to clink', 'to jingle'), the word *meṣiltayim* (an idiomatic Hebrew dual form) appears only in the post-Exile books of the Old Testament. All written sources confirm the interpretation of the instrument as cymbals (*kimbalon* in the Septuagint, *cymbala* in the Vulgate, *mzlt* in Ugaritic – a dual form). The function of the *meṣiltayim* was that of a ceremonial cult instrument. In the Bible, it is never performed by women, but is a guild instrument of the Levites (*Ezra* iii.10; *1 Chronicles* xv.19), played together with other ritual instruments to accompany exclusively religious occasions (e.g. the dedication of the Temple in *2 Chronicles* v.13; an expiatory sacrifice in *2 Chronicles* xxix.25). Two texts give a description of the instrument: made of copper with a bright sound (*1 Chronicles* xv.19); and 'of metal, large and broad' (Josephus, vii.12.3).

The *ṣelṣelim* (pl.), possibly a metal rattling instrument, appear in the Old Testament long before *meṣiltayim* in a scene imbued with pagan frenzy and describing the carrying of the Ark in procession (*2 Samuel* vi.5); the institutional *meṣiltayim* replaces it in the parallel passage in *1 Chronicles* xiii.8. The instruments are also called *ṣilṣelei-shama'* ('sounding *ṣelṣelim*') and *ṣilṣelei teru'ah*



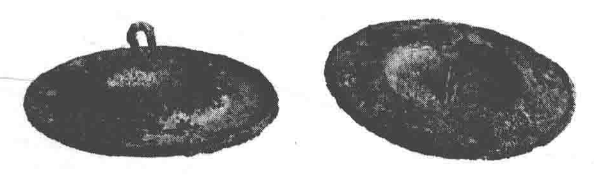
*2. Wall painting depicting a hunting scene with a trumpet, from Beit-Govrin Necropolis, 3rd century* BCE

*3. Ivory tablet depicting a victory symposium with a musician playing the lyre (probably a 'kinnor'), from Megiddo, 12th century* BCE *(IAA 38.780)*

*4. Coins from the Bar-Kokhba Revolt (132–5* CE*) depicting lyres: (a) probably a 'kinnor' (private collection); (b) probably a 'nebel' (Ha'areṣ Museum K-4647)*

*5. Clay rattle (probably 'mena'ane'im'), height 11·5 cm, from Hazor, Bronze Age (IAA 67.1160)*

('clashing *ṣelṣelim*') in the context of a paraliturgical mass ceremony of a syncretic nature (Psalm cl.5).



There is a great deal of archaeological evidence for cymbals: at least 28 finds, with diameters of 7–12 and 3–6 cm, have been discovered in 14 cities of ancient Israel/Palestine. The two sizes of these cymbals may correspond to the two descriptions of the *ṣelṣelim* in the *Psalms* (see above). They are slightly vaulted discs with a small metal loop at the centre (fig.6) and give a loud and resonant sound. Such finds fall into two chronological groups: one from the late Canaanite period (14th–12th centuries BCE) and the other from the late Hellenistic-Roman period (1st century BCE – 3rd century CE). At present it is difficult to explain this wide archaeological gap; it is possible that the references in the Bible to cymbals in the service of God and the Temple are later interpolations.

*(vii) Nebel* (*1 Samuel* x.5. *2 Samuel* vi.5. *1 Kings* x.12. *Isaiah* v.12; xiv.11. *Amos* v.23; vi.5. *Psalms* lvii.8; lxx.22; lxxxi.2; xcii.3; cviii.2; cl.3. *Nehemiah* xii.27. *1 Chronicles* xiii.8; xv.16, 20 and 28; xvi.5; xxv.1 and 6. *2 Chronicles* v.12; ix.11; xx.28; xxix.25. *Nebel 'asor*: *Psalms* xxxiii.2; xcii.3; cxliv.9).

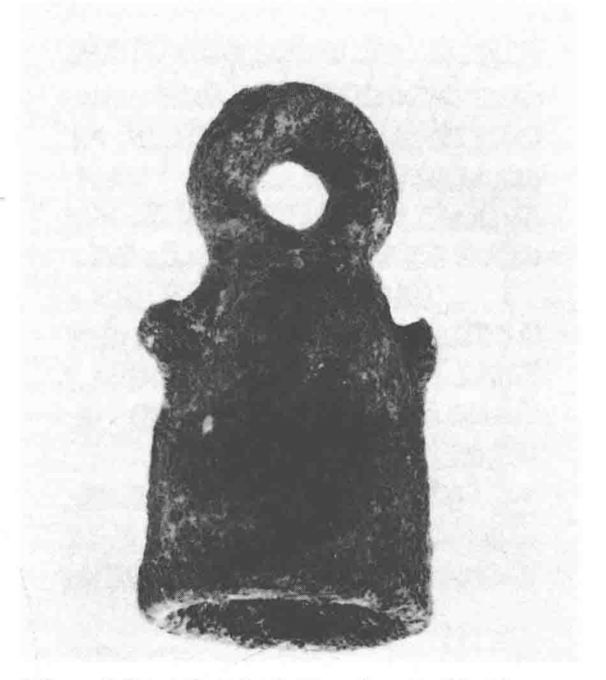
The root *nbl* can be vocalized in two ways, *nabal* and *nebel* (Heb. and Akkadian *nabal*: 'ritually unclean', 'godless', 'a rogue', 'a carcass'; Heb., Ugaritic and Syrian *nebel*: 'pitcher', 'leather bag to contain liquids', 'string instrument'; Botterweck, 1973–, v, 185). The word is clearly of Semitic or Phoenician origin (Botterweck, 1973–, v, 186), which may indicate a local origin for this instrument. The translations given in the Septuagint and Vulgate are not consistent (*nabla*, *psaltiron*, *organon*, *kinira*, *lyra*, *kithara*).

The function of the *nebel* was similar to that of the *kinnor* (see above, fig.4*b*; significantly, the two instruments are nearly always mentioned together). A Levite guild instrument (*1 Chronicles* xv.16), it was played when the Ark was carried in procession (*2 Samuel* vi.5), at the dedication of the wall (*Nehemiah* xii.27), at victory celebrations (*2 Chronicles* xx.28) and as an accompaniment to prophecy (*1 Samuel* x.5). However, it was also an instrument of the hostile royal power of Babylon and associated with sacrilege (*Isaiah* v.12). It resembled the *kinnor* in being made of the wood of 'almug trees' (*1 Kings* x.12).

Unlike the *kinnor*, the *nebel* seems to have had 12 strings and was played with the fingers (Josephus, vii.12.3) rather than a plectrum. The Mishnah limits the numbers of *nebel* instruments used in divine worship (two to six) by comparision with the numbers of *kinnor* instruments (no less than nine, and with no upward limit; Mishnah, *'Arakhin* ii.5). The strings of the *nebel* were made of thick gut and those of the *kinnor* of thin gut (Mishnah, *Qinnim* iii.6); the sound of the *nebel* could be loud and noisy (*Isaiah* xiv.11). Although the instrument has been widely

*6. Cymbals ('meṣiltayim'), from Megiddo, 12th–10th century* BCE *(IAA 16.1986)*

interpreted as a harp, this theory is not supported by archaeological finds as there is no evidence for any pre-Hellenistic harps in the territory of ancient Israel/Palestine. In the present state of research, the hypothesis put foward by Bayer (1968) is convicing: the *nebel* was a local form of lyre that underwent very little Hellenization, and had a resonator resembling the kind of leather bag used to hold fluids; it produced a loud sound, had more and thicker strings than the *kinnor*, was played without a plectrum and served as a tenor or bass instrument. The depiction of lyres on the Bar Kokhba coinage may be taken as iconographic evidence (see above, fig.4*b*). Recently, a crucial proof of the interpretation of the biblical *nebel* as a lyre has come to light: a stone carving of the Roman period was discovered at Dion in Greece, showing the first instance of text and image side by side: a relief of a lyre next to the carved wording of a hymn of praise on the *nabla* (see Pandermalis, 1998; Yannou and others, 1998, p.80).



*(viii) Pa'amon* (*Exodus* xxviii.33–4; xxxix.25–6).

The Semitic root *p'm* (Ugaritic, Phoenician, Heb.), meaning 'foot' or 'step', occurs frequently in Old Testament words, although less often with the sense of 'to strike', 'make resound' on which the identification of this instrument as a bell depends (Kolari, 1947). Translated in the Septuagint as *kobon* and in the Vulgate as *tintinnabulum*, these jingles and bells are mentioned in connection with the high priest's purple robe. The sound of the delicate little golden bells (Josephus, iii.7.4) 'shall be heard when he goes into the holy place before the Lord, and when he comes out, lest he die' (*Exodus* xxviii.35). Iconographic evidence dating from Assyria in the 15th century BCE shows the use of little bells on priestly garments. The earliest finds of bells from ancient Israel/Palestine date from the 9th–8th centuries BCE, and from this period onwards these instruments were an indispensable component of the musical sound of the area (fig.7). The Old Testament suggests that even in later centuries they had a prominent symbolic and protective function, sometimes being mentioned as items used in rites of exorcism. Archaeological finds confirm that bells were attached to cloth (see Braun, *MGG2*, 'Biblische Musikinstrumente', Abb.8*b*), and recently a depiction of bells on the robe of Aaron was discovered in a mosaic from the Sepphoris synagogue (5th century CE; Weiss and Netzer, 1996, p.20).

*(ix) Qeren ha-yovel* (*Joshua* vi.5).

The Hebrew term *qeren* ('animal's horn') occurs only once in the sense of a musical instrument: in the mythical tale of the destruction of the Wall of Jericho at the blowing of the *qeren ha-yovel* (ram's horn). Indistinguishable in practice from the *shofar ha-yovel*. Its semantic field is amplified by the term *yovel* ('jubilee', 'leader').

*(x) Shofar* (*Exodus* xix.16 and 19; xx.18. *Leviticus* xv.9. *Joshua* vi.4, 5, 8, 9, 13, 16 and 20. *Judges* iii.27; vi.34; vii.8, 16, 18–20 and 22. *1 Samuel* xiii.3. *2 Samuel* ii.28; vi.15; xv.10; xviii.16; xx.1 and 22. *1 Kings* i.34, 39 and 41. *2 Kings* ix.13. *Isaiah* xviii.3; xxvii.13; lviii.1. *Jeremiah* iv.5, 19 and 21; vi.1 and 17; xlii.14; li.27. Ezekiel xxxiii.3–6. *Hosea* v.8; viii.1. *Joel* ii.1 and 15. *Amos* ii.2; iii.6. *Zephaniah* i.16. *Zechariah* ix.14. *Psalms* xlvii.5; lxxxi.3; xcviii.6; cl.3. *Job* xxxix.24–5. *Nehemiah* iv.18 and 20. *1 Chronicles* xv.28. *2 Chronicles* xv.14. *Shoferot ha-yovelim*: *Joshua* vi.4, 6, 8 and 13)

*7. Bronze bell ('pa'amon'), height 6·3 cm, from Megiddo, 9th century BCE (Oriental Institute of Chicago, M936)*

The *shofar*, mentioned more frequently than any other instrument in the Old Testament, is the only one to have retained its place unaltered in the Jewish liturgy from biblical times to the present day. The etymology of the word (Akkadian *sapparu*; West Sumerian SEG.BAR: 'goat's horn') is not clear (Köhler, Baumgartner and Stamm, 1967–90, iv, 1343). The instrument is recognized to be the horn of a goat or a ram, and translations such as *salpinx* (the Septuagint), *tuba* (the Vulgate) and such modern renderings as 'trumpet' are misunderstandings. Typologically, *shoferot ha-yovelim* (pl.) are the same as the *shofar* (see above, §3(ix)).

Details of the instrument's construction are known only from post-biblical writings, mainly the tracts of the Talmud (Mishnah, *Rosh ha-shanah*; Babylonian Talmud, *Sabbath*). Two forms of the *shofar* are mentioned: a straight horn with a bell (*piyyah*) covered in gold and played at the New Year (Rosh hashanah), and a curved horn with a bell covered in silver for festive occasions (Mishnah, *Rosh ha-shanah* iii.3–4). Pictorial representa-

*8. Mosaic floor of a synagogue depicting two symbolic groups of cult objects, including a shofar, Hamat Tiberias, 3rd century CE*

tions from the Roman period show a separate mouthpiece. In making the instrument the utmost care was taken to preserve its natural tone (Babylonian Talmud, *Rosh ha-shanah* 27a–b).

Iconographic evidence of natural horns in the Middle East dates back to the 2nd millennium BCE. In the Israelite and Judaean contexts, depictions of the *shofar* do not appear before the Roman period, and then only in the context of a group of Jewish symbols, supplemented first by the *menorah* (seven-branched candelabrum) and the *maḥtah* (a small incense scoop), later by the *lulav* and *etrog* (palm branch and citrus fruit). This symbolic group may be found as an architectural element (mosaic floors in synagogues – fig.8 – and public buildings, on pedestals, sarcophagi and tombstones) and on such small items as oil lamps, seals and amulets. A survey of these finds shows that it was a symbol of ethnic and national identity used in both sacred and secular contexts (Braun, 1999, Abb.V/8).

The two to three notes (with 2nd and 3rd overtones) produced by the *shofar* have an alarming tremolo horn sound described in the Old Testament as *qol* ('voice'), *teqi'ah* ('blowing of the trumpet'), *teru'ah* ('rejoicing') and *yevavah* ('sobbing', 'groaning'). The Mishnah describes the notes as long, short, calm and agitated; the Qumran Scroll of War speaks of the 'great noise of war' (1QM viii.10). Rabbinical writings of around the 4th century employ the terms *teqi'ah* ('long tone'), *teru'ah* ('agitated' or 'tremolo tone') and *shevarim* ('broken tone'; Babylonian Talmud, *Rosh ha-shanah* xxxiii.2). The Talmud gives information about the three kinds of signals: 'The order of the blowing of the trumpet is by three times three. The length of the *teqi'ah* is like three *teru'ot* (pl. of *teru'ah*). The length of the *teru'ah* is like three *yevavot* . . . ' or *shevarim* (Mishnah, *Rosh ha-shanah* iv.9). Sachs (1940, p.110) sees a relationship with the *modus perfectum* of the Middle Ages here. Some idea of the *shofar* signals of the Roman period may be gleaned from the oldest known depictions of a *shofar* signal in the prayer book of Sa'adyah Gaon (10th century; fig.9) and the 13th-century Adler Codex (*USA-NYjts* 932, f.21b; see *MGG2*, 'Biblische Musikinstrumente', Abb.10). Modern *shofar* signals in synagogues correspond to these written sources (ex.1).

In the Old Testament the *shofar* is mentioned in both sacred and secular contexts: as the omen of transcendental powers (*Exodus* xix.13), at Yom kippur (Day of Atonement; *Leviticus* xv.9), at the festival of the new moon (Psalm lxxxi.3), on a day of penitence (*Joel* ii.1), at the carrying of the Ark in procession (*2 Samuel* vi.15), in war (*Judges* iii.27; *Joshua* vi.4), at victory celebrations (*1 Samuel* xiii.3) and during a coup d'état at court (*2 Samuel* xv.10). The dual function of the *shofar* as an instrument of communication and of divine worship may be followed in the Old Testament; the former function came to an end with the destruction of the Second Temple (70 CE) and the beginning of the Exile, the latter continues to the present day. In Israel the *shofar* is sometimes blown at state or secular political events

*(xi) Tof* (*Genesis* xxxi.27. *Exodus* xv.20. *Judges* xi.34. *1 Samuel* x.5; xviii.6. *2 Samuel* vi.5. *Isaiah* v.12; xxiv.8; xxx.32. *Jeremiah* xxxi.4. *Psalms* lxviii.25; lxxxi.2; cxlix.3; cl.4. *Job* xxi.12. *1 Chronicles* xiii.8).

The Ugaritic word *tp* ('drum', recorded in the 14th century BCE), probably onomatopoeic in origin, is a widely distributed root and *verbum denominatum* (drum–drummer–to drum) found in almost all Middle Eastern languages, from the Sumerian DUB and Akkadian *dadpu* to the Egyptian *tbu* and Arabic *daff* (see Köhler, Baumgartner and Stamm, 1967–90). Translated as *timpanon* in the Septuagint and as *tympanum* in the Vulgate, *tof* (pl. *tupim*) is generally understood to be a drum.

The *tof* was usually played by women (*Judges* xi.34; *Jeremiah* xxxi.4; Psalm lxviii.25). A classic example is the women's dance with *tof* and singing after the crossing of the Red Sea (*Exodus* xv.20), a tradition preserved to this day among Yemenite women of Jewish descent. The solo drum was played only by women, but when combined in an ensemble with other instruments could be struck by men as well. Although it is never mentioned as part of the music of the Temple, the *tof* was always played for ritual dances (*Exodus* xv.20; 1 *Samuel* xvii.6 etc.), for paraliturgical songs of praise (Psalm cl.4), at festivals (Psalm lxxxi.2) and processions (2 *Samuel* vi.5). In Psalm lxviii.25

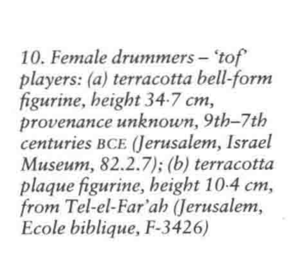
**Ex.1** Shofar call: teqi'ah-shevarim-teru'ah-teqi'ah (Sendrey, 1969, p355)

the position of the women players of the *tof* at liturgical processions is described: the singers went first, followed by the women drummers, with all the other instrumentalists bringing up the rear. The secular function of the *tof* as an instrument of joy (*Genesis* xxxi.27) and ecstasy (1 *Samuel* x.5) seems to belong to an older tradition.

The *tof* is usually described as a round wooden frame drum with a diameter of 25–30 cm, without any attached jingles. However, other forms of drum (hourglass and rectangular drums) might also have been used. The Mishnah (*Qinnim* iii.6) indicates that the material of the head of the drum was ram's leather. Archaeological finds of round frame drums from ancient Israel/Palestine are uniform in structure, and appear as a distinct iconographic subject particular to the region in two types of pottery: (a) a statue of a female form in a long dress without any ornamentation, holding her drum upright against her breast, and (b) the relief of a half-naked female form, richly ornamented, wearing a head-dress or wig and holding the membrane of the drum flat against her breast (fig.10).

The synthesis of the sacred and the secular in these figures reflects the situation as it appears in the Old Testament texts: they may be domestic icons or amulets (cf *terafim*, *Genesis* xxxi.19), but attempts at interpretation have ranged from identifying them as deities to supposing that they were toys (Winter, 1983, p.127; Meyers, 1987). As in many other ancient musical cultures, in the Old Testament the drum functions as a sexual symbol: in *Judges* xi.34, Jephthah's daughter mourns her virginity by playing the drum. The eroticism of the naked female forms of the Israelite period is clear, and conflicts with the official orthodox faith of the time. In later books of the Old Testament the sexual aspect is sublimated in the metaphor of the 'virgin of Israel': 'O virgin Israel! Again you shall adorn yourself with timbrels' (*Jeremiah* xxxi.4).

*(xii) 'Uġav* (*Genesis* iv.21. *Psalms* cl.4. *Job* xxi.12; xxx.31).



The name of this instrument is controversial, and its etymology has not been entirely explained. The root 'gv is related to the Hebrew and Arabic *'agava*: 'the ecstasy of love', 'sensual longing', 'desire' (see also *Ezekiel* xxiii.5; Köhler, Baumgartner and Stamm, 1967–90, iii, 740). As early as the Septuagint and the Peshitta, translations are inconsistent (see above, §1). The Targum, however, which gives *abbuba* (double- or single-reed instrument) and the Vulgate, with *organum*, are clearer. The possibility that a banned instrument was disguised in translation should not be excluded.

The *'uġav* appears in the very first mention of musical instruments in the Bible (*Genesis* iv.21), and only three times thereafter: as an instrument of mourning; as a sacrilegious instrument played outside the Temple; and associated with the *tof* and dancing in the doxology of the *Psalms*. In the Hebrew variant of the apocryphal Psalm cli (1st century CE), which links an Orphaic and a Christian David – the instrument maker – with the *kinnor* and *'uġav*, the meaning of 'organ' given to the *'uġav* seems plausible. Iconographical evidence confirms the existence of this instrument during the 2nd and 3rd centuries CE in ancient Israel/Palestine, and the *'uġav* is also interpreted as a 'hydraulis' in the Jerusalem Talmud (*Sukkah* 55c). In the Aramaic of the Targum, the *'uġav* is equated with the *abuva*, the instrument of the Roman *ambubiae* – prostitutes who performed music (Horace, *Satires* i.2.1). In the Mishnah (*'Arakhin* ii.3) the *abuva* is equated with the *ḥalil*.

Interpretations of the word *'uġav* range from a term denoting a musical instrument in general to identification as a pipe, bagpipe, lute or harp, none of which can be supported on either historical or etymological grounds. Sachs (1940, p.106) offers what is currently the only plausible interpretation: the onomatopoeic effect of the word (u-u), typical of flutes, and the connotations of love attached to the instrument suggest that it was a long end-blown flute of the kind found in neighbouring cultures

*10. Female drummers – 'tof' players: (a) terracotta bell-form figurine, height 34·7 cm, provenance unknown, 9th–7th centuries* BCE *(Jerusalem, Israel Museum, 82.2.7); (b) terracotta plaque figurine, height 10·4 cm, from Tel-el-Far'ah (Jerusalem, Ecole biblique, F-3426)*

(the *ma'tof* Egypt and the Sumerian TI.GI), and later distributed over a wide area of Israel/Palestine as the *nāy*.

*(xiii) The instruments of 'Daniel'* (*Daniel* iii.5, 7, 10 and 15).

The Book of *Daniel* (written 167–164 BCE) contains a recurring phrase listing a group of musical instruments, often called the 'Nebuchadnezzar orchestra', whose playing served as a signal for the worship of an idol to begin. This part of the text is written in Aramaic, and the names of the musical instruments are given in a mixture of Greek, Aramaic and Hebrew.

*Qarna* derives from *qeren* (Heb.: 'natural horn'), although a metal or pottery trumpet is more likely in the Babylonian kingdom. The *mashroqita*, from the Hebrew root *shrq* ('to pipe'), was often used for apotropaic effects and at the mass events described in *Daniel* iii; it should most likely be identified with a tongued instrument (of the *zmr* type). The *qaytros* (from Gk. *kithara*) belongs to the tradition of Babylonian military bands (lyres accompanied by drums and cymbals) and could have suited a mass ceremony of adoration. *Sabbekha* is a term of Greek origin (cognate with Gk. *sambukē*); its etymology indicates a Phoenician provenance. Although this instrument is often identified as a lyre, Sachs's suggestion that it was a vertically-held angular harp (1940, p.84) seems better founded: there are written mentions of a type of harp of Phoenician origin in ancient Palestine (*sambucinae* of the whores; McKinnon, 1987, p.50). The *pesanterin*, from Greek *psaltyrion*, has been seen as deriving from an ancient Greek harp-type instrument (Sachs, 1940, p.83), although Kolari (1947, p.78) suggests that it was possibly a zither. *Sumponyah* is a much disputed term from the Greek, interpreted mainly as a bagpipe until the middle of the 20th century, but since Sachs (1940, p.84) it has been generally understood as a term meaning 'the whole ensemble'; Mitchel and Joyce (1965, p.56), however, suggest it refers to a drum.

The phrase *ve-khol zenei zemara*, which occurs at the end of the recurring passage, is translated as 'all kinds of music'. *Kol zenei* means literally 'all kinds', while *zemara*, from the Akkadian root *zmr*, is a widely distributed term in the Middle East and appears in the Old Testament in the sense of musicians, singers, song of praise, singing and instrumental playing, in particular of wind instruments (the last-named on the basis of a single find combining text and image from ancient Palestine in the Roman period; see Braun, 1999, Abb.V/3), allowing a strict translation of the verse from *Daniel* as 'the whole ensemble, and other kinds of singing/songs of praise with instrumental music'.

The author of *Daniel* was describing a distinctively Seleucid group of musicians, and these are the only names of musical instruments in the Old Testament that belong to a non-Israelite tradition. At a time when Jewish and Hellenistic confrontation was becoming more acute, these enigmatic instruments, recurring four times as an ominous ostinato, symbolize an alien and hostile musical culture.

*(xiv) Collective terms* (*Kelim*: *1 Chronicles* xxiii.5. *Klei-david*: *2 Chronicles* xxix.26–7. *Keli-nebel* and *klei-nebalim*: *Psalms* lxxi.22; *1 Chronicles* xvi.5. *Klei-'oz*: *2 Chronicles* xxx.21. *Klei-shir*: *Amos* vi.5; *1 Chronicles* xv.16; xvi.42; *2 Chronicles* v.13; vii.6, xxiii.13, xxxiv.12; *Nehemiah* xii.36. *Minnim*: *Psalms* xl.8; cl.4).

*Keli* (pl. *kelim*) is used in the Old Testament primarily to denote an implement, vessel, weapon or art object. In texts concerned with worship in the Temple (e.g. *Exodus* xxv.9), *keli* is understood to be a ritual utensil. As a musical instrument the word is used only in the plural as a descriptive part of a compound: *klei-david*, 'instruments of David'; *klei-nebel*, '*nebel* instruments'; *klei-'oz*, 'loud instruments'; *klei-shir*, 'instruments for song'. These nouns appear 11 times as Temple instruments of the Levites, and three times in connection with other activities.

*Minnim* (pl.), from the Syrian *mina* and Akkadian *manani* ('hair', 'string'), has been interpreted since Pfeiffer (1779) as a collective term for string instruments. Organological names for types of instruments occur only in the post-Exile books, indicating a radical change in the cultural and musical life of the country that represents a new stage in rationalization.

*(xv) The terminology of the 'Psalms', and unexplained terms.* The 117 superscriptions in the *Psalms*, most of which have musical implications, are among the most difficult lines to interpret in the Old Testament. There is a rich history of research into their meaning (e.g. Sachs, 1940; Sendrey, 1969; Bayer, 1982; Werner, 1989). They are principally of significance for the study of performing practice and contribute little to organology.

Foxvog and Kilmer (1980) treat the psalm titles in a section headed 'Musical Performance', which divides the material into functional or social titles, indications of the manner of performance and the incipits of songs. It is possible that there is a parallel with Arabic *maqām* or Indian *rāga* names. The diversity of variants given in the earliest translations shows that the meaning of these texts had already been forgotten in Antiquity, as even the most frequently mentioned words are not consistently interpreted. *Lamnaṣṣeah* (from *niṣṣaḥon*: 'victory') – variously translated as 'to the end' (the Septuagint and Vulgate), 'for the master of victory' (Aquila translation), 'to sing publicly' (Luther), 'for the choirmaster' (*New Jerusalem Bible*) – seems to have little musical significance. On the other hand, *mizmor* (from the root *zmr*; see above, §3(xiii)), understood as a song with instrumental accompaniment, has a decisive meaning in the context of actual performance.

Words with organological implications are always used in a prepositional sense, prefixed by *bi-*, *'al-* or *el-* ('with, to, on, in accordance with'). *'Al-'alamot* (Psalm xlvi.1; sing. *'almah*: 'maiden') is interpreted in several ways as having musical significance: *bi-nvalim 'al-'alamot* (*1 Chronicles* xv.20) has been variously understood as a high-pitched string instrument with a soprano register, as a wind instrument, as a female drummer (on the basis of Psalm lxviii.25: *'alamot tofefot*), as a specially trained female musician or as the playing of an octave. *'Al-ha-gittit*: (*Psalms* viii.1; lxxxiv.1), has been translated as 'of the city of Gath, where David was' (cf 1 *Samuel* xxvii.2), 'in the style of Gath', 'on the instrument of Gath' and, assuming the word to derive from *gat* ('winepress' in the Septuagint and Vulgate), as 'song of the wine pressers' or 'song of the wine merchants'. *Al-mahalat* (*Psalms* liii.1; lxxxviii.1) was interpreted in two different ways as early as the period of the first translations: as 'dance' and as 'pipe' (from *ḥll*). In the 18th and 19th centuries a syncretic interpretation of the word covering music, poetry and dance was favoured, and in modern times such translations as 'wind instrument accompaniment', 'round dance' or 'quiet, muted performance' (Foxvog and Kilmer, 1980, p.48) have been suggested.

*Bi-nginot, 'al-neginati* (*Psalms* iv.1; vi.1; liv.1; lv.1; lxi.1; lxvii.1; lxxvi.1), with its root *ngn*, was already interpreted as meaning instrumentalists, musicians and song in the early translations; other meanings ('skilled player of the *kinnor*', *1 Samuel* xvi.16; 'professional instrumentalists', Psalm lxviii.26) point to a meaning connected with instrumental playing; Sachs (1940, p.126) sees *neginah* as an early form of the later *nigun* (Heb.: 'melody', 'melodic formula', 'tune').

*El-ha-neḥilot* (Psalm v.1) is translated with some consistency by modern authors, relating it to *ḥll, ḥalil* as 'for playing on flutes'. This interpretation, however, contradicts the early translations, which exclude any musical context and link the word to the meaning of 'inheritance'.

*'Al-ha-sheminit* (*Psalms* vi.1; xii.1) means 'on the *sheminit*' (*sheminit*: 'one eighth') and with the article *ha* is interpreted as an instrument with eight strings, or an instrument an octave distant from the fundmental tone. In Psalm vi.1, *'al-ha-sheminit* is linked to *bi-nginot* (see above), and in *1 Chronicles* xv.20 David arranges his Levites in accordance with various groups of instruments, including *bi-nvalim 'al-'alamot* (see above) and *be-kinnorot 'al-ha-sheminit*. This may indicate a system of playing in octaves in ancient Israel; the heptatonic system was known in Ugarit (Foxvog and Kilmer, 1980, p.446). making it possible that octaves were also part of ancient Israelite music.

*'Al-shushan* (*Psalms* xlv.1; lx.1, lxix.1; lxxx.1) derives from *shushan* ('lily'; also translated as 'water lily' and 'lotus'). Early translations made no connection with any musical meaning, but the majority of theologians and musicologists now think that this is the incipit of another song; many other such references in the psalm superscriptions are also thought to indicate contrafacta of texts once well known but now long forgotten (Werner, 1989, p.91).

*Shalishim* (pl.), mentioned only once in the Bible (*1 Samuel* xviii.6), has been called 'the most disputed musical term of the Hebrew language' (Sachs, 1940, p.123). Using the root *shlsh* ('three') as a starting point, interpretations have dwelt on the number three as the characteristic of a musical instrument (e.g. a sistrum with three bars, a three-string lute, a triangle etc.). Taking an onomatopoeic angle, cymbals could be plausible (cf the *kimbala* of the Septuagint). Sachs cites the Latin *tripudium*, a dance in three measures, in understanding the term to mean 'dance', a sense that the text itself could easily support: *be-tupin be-simḥah u-vshalishim* ('with drums, with joy and dancing').

*U-nqavekha* (*Ezekiel* xxviii.13) 'and your *neqavim*' (pl. of *neqev*: 'hole', 'perforation') has been translated only since Luther as 'pipes', probably on the grounds of the sequence of *tupim* and *neqavim* in the enumeration of decorative items in the text here. There is no real support for this interpretation, and the verse remains obscure.

4. New Testament instruments. (*Matthew* vi.2; ix.23; xi.17; xxiv.31. *Luke* vii.32; xv.25. *1 Corinthians* i.1; xiv.7 and 8; xv.52. *1 Thessalonians* iv.16. *Hebrews* xii.19. *Revelation* i.10; iv.1; v.8; viii.2, 6–8, 10 and 12–13; ix.1 and 13–14; x.7; xi.15; xiv.2; xv.2; xviii.22).

Interest in references to musical instruments in the New Testament is limited for two reasons: there are not many of them, and their organological value is relatively small. The Greek names of instruments are contemporary with the authorship of the texts. In addition to mentions of particular instruments (see below), two verses (*1 Corinthians* xiv.7–8) are of particular significance for their emphasis on the clarity of the music: 'If even lifeless instruments, such as the [*aulos*] or the [*kithara*], do not give distinct notes, how will anyone know what is played? And if the [*salpinx*] gives an indistinct sound, who will get ready for battle?'. This repeated reference to clarity in performance, which is compared with the intelligibility of the spoken word, suggests the development of a new musical aesthetic and a new kind of musical practice striving to concretize the meaning of the music. To some extent it may be possible to see the beginnings of modern Western performing practice in these words.

*(i) Aulos* (Lat. *tibia*). This occurs as both the name of an instrument (*1 Corinthians* xiv.7) and a term for an instrumentalist (*Matthew* ix.23). The reference is to the single or double *aulos* of the Roman period, for which there are several items of archaeological evidence in Roman Palestine (the best is the Sepphoris mosaic, *see* Jewish music, §II, fig.13). In the New Testament, as in the Old, this reed instrument was played in mourning for the dead (*Matthew* ix.23) and at weddings (*Matthew* xi.17).

*(ii) Kithara* (Lat. *cithara*). Like *aulos* this terms occurs as both the name of an instrument (*1 Corinthians* xiv. 7) and to describe an instrumentalist (*Revelation* xiv.2). The *kithara* is an instrument of God and the 'voice from heaven' (*Revelation* xiv.2 and xv.2). The passage from *Revelation* contains the unusual comparison of the *kithara* to 'the voice of many waters, and . . . the voice of a great thunder' (ibid.). In two cases (*Revelation* v.8 and xiv.2–3) the instrumentalists are performing 'a new song'. The *kithara* – a large lyre – may have acquired a new tonal quality at around this time as a result of changes in instrument-making, producing an effect that overwhelmed listeners with its dynamic power. However, a more likely interpretation is that the instrument of God symbolizes the spiritual force of Christianity in this passage. It is plausible that in the New Testament names of instruments 'like aulos, kithara may have been used loosely to refer to more instruments of a general class' (Smith, 1962).

*(iii) Salpinx* (Lat. *tuba*). In the New Testament the *salpinx*, the long, straight Roman trumpet, is an instrument of communication and for the giving of signals; it is also credited with supernatural power, usually of an apocalyptic nature – the 'trump of God' (*1 Thessalonians* iv.16), the *salpinges* of the seven angels (*Revelation* viii–xi), and the *tuba mirum/terribilis* (*1 Corinthians* xv.52). The theophany of the sound of the *salpinx*, already indicated in the Old Testament (*Exodus* xx.19) and its eschatological significance are taken to extremes in the New Testament, where the instrument becomes a symbol of supremacy in the praise of God, the Resurrection and the Last Judgment (Giesel, 1978, p.101).

*(iv) Cymbalon* (Lat. *cymbalum*). These are the familiar Graeco-Roman cymbals. The instrument is mentioned only once, in *1 Corinthians* xiii.1, together with 'sounding brass', a term which may denote a gong (Montagu, 1965) or signify not a musical instrument but a resonating device at the back of a stage to amplify the voice of a singer or actor (Harris, 1982). This interpretation explains the real sense of Paul's metaphor when he compares speaking

without love and deeper understanding to the noise of 'tinkling cymbals' and artificial sound amplification.

*(v) Simphonias* (Lat. *symphoniam*). This word, used only once (*Luke* xv.25), is a collective term for the playing of musical instruments, in this case at a merry feast with dancing.

JOACHIM BRAUN

**Bibliography of music.** The study and description of musical documents and of the literature about music, especially in published form. The most widespread use of the word 'bibliography', in music or in any scholarly endeavour, refers to lists, appended to publications, of other scholarly writings which the author used while writing, or which would be useful to an interested reader. This usage is represented at the end of nearly every article in the present dictionary, and might be called 'citation bibliography'. It is a reflection of a selection process, drawing on and assessing a detailed listing of as much of this secondary literature as possible. The preparation of such full-scale listings is called 'reference bibliography'. Yet the term has arrived at this usage from more detailed and scholarly practices. The etymology of the word implies the writing of books, but (in common with most other terms ending in '-graphy'), it has come also to mean their study, or at least their description, and usually refers to printed material. This leads to two other usages, specifically concerned with the character of books and editions, and only secondarily with their contents. Under the specifier 'descriptive', bibliography refers to a listing (with detailed descriptions) of the make-up of books. 'Analytical' bibliography goes further, involving the study of books as objects, the manner of their making, their history, and their place in the history of their contents.

1. REFERENCE BIBLIOGRAPHY. This involves collecting, assessing and arranging lists of earlier studies in a particular field. This is an essential process for the researcher, for without this evidence of past advances in thought or data-collection, we would be unable to climb upon the shoulders of our predecessors, and our work would advance no further than theirs. Bibliographical listings of the music itself are equally important, for they point the musician to compositions and their sources, for performance as well as for study.

Two central issues concern the preparer of such lists: one is the definition of the area to be covered (in particular the rigorousness or porousness of the topic's boundaries); the other is the level of annotation. For bibliographies in the present dictionary, neither of these is a problem. For most other writings, however, the first (in particular) regularly raises thorny issues, some of which will be discussed below.

*(i) Music.* Bibliographies of music fall into a number of obvious basic genres: listings by composer, by genre or form, by performing resources, by date, by country of origin or by present-day library. Each is valuable in its own context, presuming a different interest on the part of the user, and therefore implying the different types of information that should be included. By far the best access to these bibliographies is through the listings in Duckles (B5/1997).

Composer bibliographies are used by the whole spectrum of scholars and performers. They supply the essential information about dates of composition, performing resources, available editions, texts being set and details of individual movements (preferably with musical incipits). These facts enable performers to find suitable material. If the list is arranged by genre, rather than simply by date, it shows at once the forms that interested the composer at different times during his or her life. The scholar has additional needs, and recent catalogues have attempted to meet these by extending the coverage to include material that would fall more easily within the definition of 'descriptive bibliography'. Therefore, basic information on manuscripts – including sketches and drafts – and first editions, as well as revised versions, early sets of parts and corrected proofs, is often expanded to include a description of their structure and contents. Additional material might include reports on the critical reception of early performances, and subsequent writings about the work, as well as discussion of compositions that may have been incorrectly assigned to the composer. These ranges of information (not always found only in bibliographies) have forced revision of our view of composers as diverse as Bach and Ives, Rore and Beethoven, Mozart and Elgar.

For some composers the various layers of material have been catalogued separately. A bibliography of the early editions of Handel's music was compiled by Smith (C1970), and there are similar catalogues of early editions of Brahms and others; the manuscripts and printed editions of Chopin's music are listed in two distinct volumes (Chomiński and Turło, B1990), and Beethoven's sketchbooks have been the subject of a specialized

bibliographical study, which goes far beyond the basic requirements of a descriptive bibliography.

Equally important, especially for performers, is scoring, and there is an increasing number of catalogues which list works for individual instruments or singers, or for various combinations. Early examples include Altmann's *Kammermusik-Katalog* (B1910), or Sears's *Song Index* (B1926). The genre shows no sign of diminishing, either in production or in usefulness, especially given the increasingly diverse ensembles for which composers are writing and the spread of bibliographical control to more ephemeral publications.

Bibliographies of repertory can be paralleled by a group of genre bibliographies. At first sight, they may seem similar, often providing material for consistent performing groups. Catalogues of violin sonatas, lieder or 16th-century madrigals clearly do fulfill that function, though others equally do not. But they also serve to stimulate research into how a genre (or a form) emerges, changes, and dies with the passage of time.

These listings raise a number of problems for both compiler and reader, of which the most important lies in decisions about what to include or exclude. The standard bibliography of printed Italian secular music, 1500–1700 (Vogel, B1892) would seem to face few such problems, but it includes works composed before 1500 though published later, and works composed by non-Italians working in Italy as well as elsewhere, while omitting secular works written in Italy but in another language. These seem to be reasonable decisions, ones that can be reached without difficulty, and justified without hesitation. But a similar catalogue of villanellas (Galanti, 1954) evidently heavily dependent on Vogel, faces the more difficult issue of trying to define the borders of a genre. The compiler chose to be inclusive rather than exclusive, and included canzoni and canzonettas, as well as spiritual villanellas, when she believed that they were related. The problem is even greater for later music: a bibliographer of opera, the Baroque cantata, or the 18th-century symphony or sonata is faced with almost intractable problems of defining the field, and of limiting the range of material to be included.

There is also the problem of how far to range in terms of date and type of source. An attempt at listing all the manifestations of a genre will immediately run into this problem, as will a decision to list all the extant sources. The *Census-Catalogue* of Renaissance polyphonic manuscripts (1979–88), while an ambiguously defined project as far as a catalogue or bibliographical description is concerned, also has porous chronological boundaries, including music probably composed before the cut-off date of 1550, but to be found in manuscripts compiled as much as 100 years later. Tyson (C1963) demonstrates that sources distant from the composer are often very important, and yet, for example, other sources with music printed by Petrucci between 1501 and 1520 span a period of over 150 years. The bibliographer must decide the relevance of the sources when they were copied far from the composer, or much later in time, and whether to include them. Several volumes of RISM face this problem, although they fall more correctly into the category of 'descriptive bibliography', for their first intention is to list sources for specific repertories, rather than to provide a conspectus of the repertory in them. Other volumes, such as those of *Das Deutsche Kirchenlied* or of *Hebrew Notated Manuscript Sources* (RISM BVIII and BIX), can reasonably take a restrictive view of their repertories.

Other volumes in RISM and many other bibliographies of music adopt a chronological series of boundaries – one that is particularly satisfactory for the music historian interested in the rise and decline of musical taste. Sometimes the dates chosen or implied represent a real historical shift: catalogues of electronic and computer music necessarily do so, as do the famous volumes prepared by Friedrich Ludwig of music in the Notre Dame sources (B1910). The boundaries in others seem to some extent to reflect convenience. In either case, the contents can rarely be arranged in a true chronological order, given the absence of so much data. However, the exercise is a historiographical one, and, like all reference bibliography, is designed as an aid to further research.

More frequent are similar lists which cover the contents of individual libraries or groups of libraries. Often seeming more like catalogues than bibliographies, these are designed to accommodate a number of different readers. A first use, of course, is for the librarian, as a control on the collection: the bibliography will then give sufficient detail to identify the individual items precisely. Other users include local musicians, looking for copies of specific works, works with specific scorings, or by specific composers. These readers need enough detail and a clear arrangement, as well as the call-number, to allow reader or librarian to find the book. Finally, scholars wish to know, if possible, whether the book listed is worth a research journey: this is often asking too much of the catalogue, for it requires information that, again, falls within the bounds of 'descriptive bibliography'. With a music collection the size of that at the British Library, the Civico Museo Bibliografico Musicale in Bologna, the Bibliothèque Nationale in Paris or the Library of Congress, it is not feasible either to gather or to print so much detail. The same is true for those volumes of RISM which set out, on the largest scale, to catalogue the musical contents of all possible libraries: series A comprises lists of editions, arranged by composer, with minimal additional information, and notes as to the libraries which hold copies (including incomplete copies). This type of listing, arranged by composer or repertory, but giving in addition the locations of copies, is not new. In the late 19th century, when attempting single-handedly to do something similar, Robert Eitner was already providing statements of the libraries holding copies.

Each of the categories and volumes mentioned so far has listed material found up to the date of publication – each is a 'cumulative' bibliography. However, at least as important are 'current' bibliographies, which reappear like journals, and attempt to list music that has appeared since the previous issue. The most important of these are the various national bibliographies of music, of which the *British Catalogue of Music* (1957–) is one of the best. Similar catalogues are published for a number of countries, among them Germany and the USA, as *Deutsche Musikbibliographie* (1829–) and *The Library of Congress Catalogues* (1954–). These cover music published within their area during the preceding year, with one important exception. They are almost invariably compiled from the music that is placed in one of the national 'deposit libraries', as part of the process of registering for copyright protection. This means that a small percentage of editions does not get listed, often comprising short-lived material

or work from small presses – sometimes the most valuable for specific research projects. This percentage is likely to increase as editions are made available over the Internet, rather than by traditional means.

Many publishers issue similar lists of their own editions, or those from other publishers with whom they have agreements. Similarly, a few specialist music dealers (among them Theodore Front and Otto Harrassowitz) issue occasional lists which help librarians and collectors keep up-to-date. The range of catalogues produced by antiquarian and second-hand dealers obviously lies beyond the scope of the present article, for they do not aim to present complete coverage of any repertory other than the fortuitous collections acquired by the dealer.

Finally, there is one particular problem, encountered with anthologies of music, and particularly acute in repertories which largely comprise small-scale compositions – most music before 1600, piano *Characterstücke* and the like. The anthologies themselves will probably appear in one or other of the types of bibliographies already described, and there may even be an 'analytical' entry, listing the contents. But each item will not normally be entered separately, under the composer's name, or in any manner by which it can easily be found. As a result, a few bibliographers (most recently Hill and Stephens, B1997) have compiled catalogues of these compositions, both as the contents of anthologies and separately as works listed by composer. Such volumes serve the classic function of reference bibliography: they provide the reader (whether or not a specialist) with immediate guidance to works and editions otherwise difficult to trace.

*(ii) Music literature.* Many of the same problems pertain here. There is a vast number of books and articles about all sorts of music and musical topics; they are not automatically arranged by subject – and even when books are so arranged, as in a library, most readers have specific (and different) enquiries in mind. Much published scholarship appears in anthologies (such as Festschriften) which often include a range of subjects; even more appears in journals, which must also cover various topics if they are to maintain their subscription lists. In almost all these categories, scholarship continues to appear at apparently ever-increasing rates. So great is the current rate of production that a comprehensive bibliography of writings on any major composer is bound to be a large volume. Similarly, a reasonably thorough bibliography of significant writings on music between 1400 and 1600 would include at least 15,000 items. When bibliographies begin to approach even several hundred entries, they cease to be of use unless the entries are carefully sorted into categories and supported by critical annotations.

Again, as with bibliographies of music, there is a major division between 'cumulative' and 'current' bibliographies – those listing works issued before the publication date of the bibliography (as in this dictionary), and those that behave like journals, appearing at regular intervals and listing the newest material, in each issue. As with musical editions, the first and simplest guide to these bibliographies is Duckles (B5/1997), although this too is a cumulative bibliography.

'Current' bibliographies are clearly essential for active researchers, just as they are for scientists working at the cutting edge of their field. With the emergence of computer databases for current research, and easy access to the Internet, these bibliographies are taking a leading role in making research accessible. Among the earliest to emerge, and still an invaluable guide, is *The Music Index*, which began appearing in 1949, and has steadily increased the number of journals which it covers. Other similar series have also included monographs, dissertations, and the contents of anthology volumes. The most important of these, RILM (1967–), now provides coverage for a large proportion of the writing about music, including reviews of editions and books. This publication relies heavily on the willingness of authors to submit references to their own writings, and to provide what is one of its most useful attributes, the addition of abstracts and key-words to almost all entries. Even so, RILM and all the other such current bibliographies demand vast amounts of labour to chase down relatively obscure material, such as is to be found in congress reports and anthology volumes of all sorts, or published in volumes not primarily devoted to music, or even in reprints of earlier volumes, and to sort and enter it in the database. In addition, current bibliographies, by their nature, do not include any coverage of publications dating from before their first issue, although RILM is beginning to work backwards in certain areas. For detailed bibliographical listing of scholarly work before the 1950s, it is still necessary to track down earlier or specialist bibliographies, sometimes concentrating on publications in a geographical area, or more often focussed on a topic (such as performing practice) or a specific composer. (These are not listed at the end of the present article, for they can be traced through the relevant entries elsewhere in the Dictionary.) The cumulative bibliography is therefore far from obsolete, and will continue to be necessary for many years to come.

2. Descriptive bibliography. Occasional references have already been made to bibliographies and catalogues that include descriptive bibliography. The essential point in each case has been that the catalogues include commentary not merely on the music, but also on the nature of the sources listed. Both descriptive and analytical bibliography are concerned with the document – with the form of presentation of the content, rather than solely (or even primarily) with the content itself. The presumption underlying this interest is that the manner in which music is presented can tell us a great deal about the music itself, or about the circumstances of its use.

The description of a printed book involves three groups of components: two are obvious, one recording particular characteristics of the copy in hand, and the other listing and commenting on the contents. These are preceded by what is bibliographically the fundamental component, describing an 'Ideal Copy' (*see* §4 below). In brief, this is a description of a (notional) copy that represents what the printer and publisher wished to see put on the market; it provides a yard-stick against which surviving copies can be measured, and it is built up from examining many of those copies.

The first and fundamental part of the description of a book is therefore a description made from the study of a number of copies, sometimes with the addition of editorial material where, for example, one part is missing from all copies. This precedes the discussion of extant copies, and the description of their contents, even though it can not be prepared until after they have been examined.

It will be obvious that the structure of any book, and particularly that of musical volumes, is directly influenced by the contents: for example, the size of a score reflects the number of instruments and voices involved, as does the number of parts; for well over a hundred years, popular music has been laid out on the pages so that a decorative cover can act as a magnet for potential purchasers; and there are other similar instances. But the act of beginning a description with the structural aspects of the books partly reflects the bibliographer's primary concerns, and partly ensures that these features are seen as significant, thereby highlighting their relevance to the content.

The description contains a number of basic elements, common to all books and musical volumes. By convention, these follow certain patterns, in both the order and the style in which they are presented. The most thorough introduction to the techniques by which they are discovered, and the manners in which they are laid out, can be found in Bowers (C1949) with supplementary comments in Tanselle (C1982). Some of these elements are self-evidently necessary, and are to be found in any respectable catalogue and bibliography of sources (whether arranged by composer, by genre, by printer or by library). They include:

(i) an accurate transcription of the title-page (which offers an immediate first approximation for identifying a copy). This is presented in a conventional manner, following standardized procedures for indicating such features as borders and designs, coats of arms and pictures, line-ends and rules;

(ii) a statement of the size and format of the volume. The various formats – folio, quarto, octavo, etc., are of course vague indicators of the dimensions of the book (and are so used by dealers and auctioneers), but they are also indicative of the publisher's view of where a book fits in a hierarchy of functions and values. Piano music published in octavo (as were the Lea Pocket Scores) serves a different function from that in the more normal folio format, and organ music in landscape (horizontal) formats is more common than that in portrait (upright) arrangement. In bibliographical terms, the format is a reflection of the number of leaves that are printed from a single sheet of paper, and thus the number of times that sheet has been folded;

(iii) a statement of the collation of the book. This describes the formal structure in clear terms, indicating the gatherings and their sizes, which, in earlier volumes, can usually be determined from the signatures printed throughout the book. With engraved music, the collation is harder to detect, and sometimes seems almost random. However, it is a clear indicator of how the printer divided up the work, and will sometimes (as with 19th-century Italian opera) reveal whether two copies of the same work could have been printed at the same time;

(iv) a description of the style of signatures and the pages on which they appear. Equally important is a listing of plate numbers, also giving the abbreviated title, or other initials that appear with them. As with other parts of the description, any anomalies or errors are also cited;

(v) a similar sequence of page or folio numbers, again giving erroneous or missing numbers. It is surprising how frequently errors in pagination yield important information about how a book was planned and printed. Similar significance attends the evidence in those volumes, again not uncommon in the 19th century, in which two sets of pagination are used;

(vi) transcription of some other peripheral matter, all part of the production of the book rather than its contents. This may include direction lines and running heads. In addition, the presence of catchwords, part-names or similar indicators is usually noted, for they serve as evidence of the printer's technique and his concern for accuracy;

(vii) a transcription of other important material in the preliminary pages, or acting as support for the musical or verbal text of the book. This may include a dedication, a letter to the reader, a subscription list, a cast list for an opera or a colophon. All, of course, have a direct bearing on the history of the contents of the book, but they also bear in significant ways on its printing history;

(viii) the presence of advertising pages or sections, with a comment on their contents. These pages are sometimes dated; they will often have been prepared more recently than the musical contents, especially with engraved music. Since so many editions published after 1700 carry no dates, and since they could be reprinted as long as the plates remained usable, the evidence of a dated advertisement, or of the most recent compositions on an undated one, may be the best information we have for dating a copy in hand;

(ix) a comment on the technique used by the printer. When this involved type, a description of the material used for both music and text is expected, together with comments on how it was used. If the book was printed from engraved plates, or by one of the lithographic or later processes, the process should be described (as far as possible). In particular, for engraved plates, the size of the plate, the plate number and other identifying features are presented;

(x) the presence and style of a publisher's binding. Although publishers did supply bound copies of music on demand from the 16th century, providing their own bindings only began to be standard practice at the end of the 18th, when they begin to have titles, descriptions, and advertisements printed on them. These printed bindings are useful for dating and placing editions, in the same way that advertisements are.

This list includes the standard ingredients for the description of an Ideal Copy: in some cases, a few of these items may not be relevant, and in others there will be special additional information to include. However, at this point, the bibliographer turns from description of an Ideal Copy to the copies that actually survive. Each of these deserves individual attention: for music printed before the end of the 18th century, at the earliest, it is safe to assume that every copy is different in at least some significant aspect. Even later, copies continue to be produced apparently as part of the same edition, but with noticeable changes to structure and content. Each copy must therefore be examined, and each deserves discussion of the following elements:

(xi) the library or private collection where it is located, with a call number;

(xii) a note of the extent to which it is incomplete or defective;

(xiii) the size of the copy, and of its print area, the so-called 'Spiegel' or 'text-block'. In many cases, the second of these items is listed under discussion of the Ideal Copy, for it is assumed that the printed area remains the same

in all copies of the same edition. This is largely true, though paper shrinkage can affect the issue;

(xiv) a description of the paper, and the watermarks used (when present). These will often vary from copy to copy, and may be the best indicator of the presence of cancel leaves or of a later impression: in issues of 19th-century editions printed from the same plates, changes in the paper type or quality are sometimes the only sure indicator;

(xv) a note of any variations in text, especially the following: changes to the title-page, including new prices or publisher's agencies; the presence or absence of a dedication; different advertisement pages; a different publisher's binding, etc. Many of these serve to distinguish not merely different impressions, but actually different issues of the same edition, and are therefore crucial for dating. Of course, changes to the content are also important, and may be the result of proof corrections or of a later impression;

(xvi) a note of the binding, if specific to a particular copy, and not part of the book as published. The style and quality of the binding tells us much about the owner, and about the history of the copy;

(xvii) evidence of the music's use or history after it was printed. This may include simple inscriptions of donation or ownership, but it may equally include manuscript corrections or performance indications, suggestive of the musical taste and abilities of the owner.

Each of these features is peculiar to the copy in hand, and may be assumed to have arisen after the book left the publishing house. In this respect they represent the history of the individual copy and its musical contents, rather than its publishing history.

The third stage of description involves the contents:

(xviii) a simple list, accounting for every page, and supplying the original wording of the title, composer's or poet's name, and text incipits, as well as scoring, key, tempo indications, and any unusual features. It is still important at this stage to use the spelling or attributions found in the book, even if they are known to be inaccurate or erroneous. The corrected version can be supplied as well, of course, but the version found in the edition often indicates something of the history of the music before it was printed, as well as something of the background of the printer or editor;

(xix) some descriptions also add at this point references to other sources containing the same pieces, or to authoritative or recent editions. These are not part of the description proper, but they do provide an easy way of confirming the identity of each composition. The alternative, or an additional item, is to include:

(xx) a musical incipit for each composition, and for each part or movement;

(xxi) a final and most important section involves a commentary. This may include valuable information about the music, or the version presented in the edition. In the present context, it is the place for noting the existence of related editions, issues or states, for explaining the presence of bibliographical anomalies, and for drawing connections between the structure and the musical contents.

For much music, especially sheet music published after the late 18th century, some of these items will be irrelevant. For example, many such editions comprise a single bifolio, without pagination or advertising material, and were never intended to be bound by the publisher. However, they were often reprinted by the same or another company, and the detailed differences between copies and issues are of the greatest value. The many editions of such popular works can only be related or arranged in order, and the variations in musical content can only be evaluated, once the most careful bibliographical description has been completed. While this is evident for much ephemeral music of the 19th and 20th centuries, it is also true for much music of more lasting significance: many editions published before 1800 included dates that were misleading or reflected earlier editions, while few editions published after 1800 carry dates: even the works of great composers need careful bibliographical analysis.

This level of research and description vastly increases both the labour involved in preparing a descriptive bibliography, and the cost of disseminating it. In many cases, therefore, some elements are presented in a skeletal form or even omitted. However, as bibliographical control over the musical repertory gradually improves – and with the ability to circulate materials by CD-ROM and the Internet – such problems should gradually become less important. For example, RISM has begun producing its catalogues of musical manuscripts dating after 1600 on CD-ROM, and making them available on the Internet, allowing for much more detail to be stored and available to the scholar. There is still the labour of collecting the data and adding them to the data-base, so that progress is likely to remain slow, even with the willing cooperation of many international scholars. The benefits to scholarship, though, should be enormous.

It was early realized that such descriptive bibliographies were essential to any study of musical repertories, and examples date back into the 19th century: significant examples include Ludwig's study of the Notre Dame repertory (which goes into much greater detail, both of the music and of the sources, the first part appearing in 1910) or Sonneck's *A Bibliography of Early Secular American Music* (B1905). These were followed by a number of catalogues of printed repertories, sometimes arranged by printer: Humphries and Smith's catalogues of Walsh's editions (which do not give detailed lists of contents, B1968), Hopkinson's of editions of Berlioz' music (C1951), or Lesure's of various French publishers (B1955; C1979–88). Excellent recent demonstrations of what is possible are to be found in the studies of theory manuscripts in RISM, in the catalogues of early printed editions of music by Brahms (Hofmann, C1975), or in Vanhulst's catalogue of the editions published by Phalèse (B1984).

A number of later bibliographies, especially of early music printers, have gone beyond the necessary descriptive features, and begun to introduce elements of analytical work: examples include Weaver's division of his work (C1994) on the printers Waelrant and De Laet into two volumes – a 'descriptive bibliographical catalog' and a study which is partly analytical, or Gustavson's study of Formschneider (C1998).

3. Analytical bibliography. If there is a clear distinction between descriptive and analytical bibliography (other than in the depth of investigation), it lies in the underlying motivation for the study. Analytical bibliography is concerned primarily with understanding the printed document as a document, and its place in the history of printing and publishing. It is further concerned

with the individual copy or copies, because we cannot assume that any two copies will be identical, and the variations are often of much significance for the musical text. Analytical bibliography examines the document as a carrier of the text, and as a vehicle for some musical function. While these may seem to be disparate topics, they are tightly bound together. A volume produced as a 'vanity' publication, or one in an old-fashioned printing technique, will often reveal much through this aspect of its motivation: for instance, it may not do justice to details of the musical text, or it may not be easily usable by performers.

In practice, analytical bibliography has come to be a separate discipline in its own right. It involves study of the history of the press and type-faces, patterns of engraving or lithography, of trade practices and marketing, and indeed of every decision made by printer and publisher. Printing house practice is a central concern, for the normal practices will indicate much about the priorities behind a publication, at the same time as they will highlight any anomalies found in surviving copies. This covers everything, from layout on the title-page to details of typesetting or engraving; from the routines of paper-use to filling blank space with advertisements; from the treatment of score layouts to patterns of signatures, pagination, and other non-text material – the so-called 'meta-text'. Publishers' practices are equally central topics of study, and for the same reasons. These might include the ways of presenting different editions and issues, the patterns by which parts of a large-scale work are published separately, or by which vocal scores, piano reductions or study scores are marketed, or the patterns of relationships between publishers and sellers. Any one of these can turn into a lifetime's study, and any one may produce some slight piece of non-musical evidence that will allow the scholar to reach conclusions involving the music, its detailed readings, its market and popularity, its relation to other editions of the same works, or its place within a genre or a repertory.

Additional areas of interest include anything that will bear on dating the edition: trade catalogues, city census records, and (on the document itself) details of partnerships with other companies, of plate numbers, of the advertisements on spare pages. Since engraved plates, in common with the materials of more recent printing processes, can be re-used for many years, and can be corrected along the way, procedures for dating become increasingly important as we trace changes in a score, especially if they were overseen by the composer. Important examples concern a number of editions of Wagner's *Tannhäuser* (Hopkinson, C1973), and the series of revisions and new mistakes to be found in scores of Stravinsky's *Rite of Spring* (Cyr, C1982).

Further discussion of the breadth of topics involved in analytical bibliography could easily turn into a catalogue of things that scholars have learned by studying printed music and the means by which it was prepared and circulated. There are many ways in which this type of study has improved, and even changed, our perceptions of specific repertories and their circulation (for examples *see* §6 below). Here, instead, there follows a brief survey of some of the types of research that are fruitful, and of some serious lacunae in the field.

The bibliographer starts with the assumption, common among students of manuscripts, that the way in which the music is presented always affects the content. Study therefore includes a focus on the preparation of music for printing, and decisions affecting its visual impact.

Typefaces are distinctive, and the distribution of individual faces to printers in different cities is significant. This is particularly true for music, where the faces are fewer in number, but more closely related to the music to be printed, ranging in size from small faces for psalm books to large ones for chant and Catholic liturgical books, and in character from elegant rounded forms intended to imitate script to nested types for keyboard music. Since there were fewer different type-faces, cast by fewer founders, their dissemination tells us something about the distribution of the repertories to be printed, as well as the aesthetic taste of local purchasers. For example, the spread of German and French founts of type into the Low Countries can be related, in part, to the migrations of printers, but also to the ranges of repertory that were popular (Krummel, C1985; Guillo, C1997).

Study of lithographic and engraving processes focusses on similar details. The differences in style of the music to be printed are still part of the style of a specific printer working with a specific repertory at a specific time, but they are also a reflection of the individual preferences and practices of each craftsman working for that printer. Study of Walsh's editions or those put out by Ricordi over a hundred years later shows clearly that different craftsmen engraved different pages. In some cases, such study has been able to show how certain types of error were perpetrated (Poole, C1980) or the presence of a replacement plate, perhaps indicating a problem in the musical text.

This study of the musical notation thus is closely related to how it is laid out, and leads to a consideration of the general shape and character of musical books – what Krummel (C1976) called 'bibliographical forms'. Beyond assuming a conservative mentality on the part of publishers and purchasers, we cannot yet explain the reasoning behind continuing to publish organ music in the landscape (or 'oblong') format long after virtually all other genres have changed to the more current portrait (or 'upright') orientation. A similar conservative practice involves the continuing production in Germany of vocal parts for large-scale choral works. While these are curious instances, more important is the emergence of new lay-outs – the adoption of partbooks as a regular format in the 16th century, the very unusual proportions of solo songbooks during the 17th, or the production of single operatic numbers in full score in England around 1800. Each of these must, on purely commercial grounds, have met a felt need, but until the bibliographer has fully studied them and their like, and traced the patterns of their use, we have little hope of understanding exactly what need they met, or how it arose.

Coupled with this is the significance of all the supporting verbal text – title, dedication, preface, etc. – as well as advertising pages. The wording of titles needs much study. We rarely understand fully the meaning of many words used by publishers: 'printed for', 'published by', 'issued by', 'can be purchased at'; each of these seems to have had a specific meaning, which itself varied from time to time and place to place, perhaps (for all we know) from occasion to occasion. But our understanding of the financial arrangements which led to any given publication

are closely bound up with our interpretation of these and similar phrases.

Nowhere is this more true than with the dedication. In some cases, it seems to represent the composer's thanks for past favours, as in the 16th-century examples which refer to a patron who, we happen to know, was the composer's employer. In others, it was probably an attempt at currying favour, or soliciting future employment. No doubt many of those keyboard works of the 19th century which are dedicated to young lady students represent a little of both, as well as an indication of the social acceptability of the composer in other affluent houses. Other dedications stem from the publisher, and in these cases, we have to assume a slightly different range of possible meanings.

But the dedication is only one of a number of texts attached to published music. When the publisher adds a page 'To the Reader', pointing out some feature of musical style or raising issues of performance, we hope we are justified in assuming that he (or the composer) has developed a clear view of who will be purchasing that music, even though we cannot always understand that view. Only considerable bibliographical research will clarify this issue, and so many others.

That research regularly has to be undertaken away from the book of music itself. It involves questions such as the following: what was the range of music this publisher put out? Does the appearance (the format and size of notation, etc.) differ from one repertory to another from the same publisher? Is this a reflection of different costs for different repertories? How did the publisher market these repertories, or advertise them? What about pricing? How fast did he expect to be able to recoup his expenses? These are all questions within the realm of publishing history, and yet they frequently produce results which illumine the content and function of an individual published musical work.

More immediately significant are questions related to reprints – new editions put out by the same or another publisher, new issues from the same plates, the separate issue of numbers from an opera, or of units from a set of quartets or a song cycle. Tied in with this is the evidence of published (as opposed to manuscript) parts for orchestral music or opera, of full as opposed to vocal scores, or of piano and piano duet versions of string quartets or symphonies. It is obvious that a publisher's decision to issue any one of these represents a calculation as to the popularity of the music or its composer. In addition, the geographical and temporal spread of such publications will help to define where and for how long that popularity lasted, just as the format of the publication, the nature of the arrangement and its cost, all define the types of musicians among whom such popularity continued. The publication of Arcadelt's madrigals over a period of 150 years is a significant example, and so is the proliferation of editions of Handel in different countries, or the pattern by which J.S. Bach's music was revived and printed throughout Europe.

Many of the ranges of topics touched on in the preceding paragraphs have not been studied in enough detail – at least in music. In this respect, the analytical bibliography of music is still in its infancy. Much of the best work in recent decades has been laying the groundwork, collecting the data and producing preliminary analyses. It is only recently, for example, that serious study of groups of publishers in Rome or Vienna has provided us with some of the basic material from which we could begin to answer the types of questions discussed above. Yet, as should by now be evident, analytical bibliography is almost certainly the key to a large number of issues of interest to contemporary musicologists.

4. Basic terminology. This article is not the place to discuss definitions or problems of terminology in bibliography, even less to give a guide to practices and procedures. Information on the former can be found in Glaister (C1960) and Boorman (C1990); for the latter, the standard reference source remains Bowers (C1949). However, there are a few basic terms that do need to be discussed briefly, in part because music printing and publishing presents a slightly different picture from the procedures and practices of textual printing, which form the basis for most scholarly thinking.

Central to the identification of any printed matter are the concepts of edition, issue, impression and state. These terms define the series of actions that printers and publishers go through when producing a series of copies of a book across a period of time, and they also locate any individual copy within that series. An understanding of their implications is therefore necessary for any work in musical bibliography.

The most important is the term 'edition', which is used to define all the copies that are printed from basically the same printing surface, whenever they appear. When they are printed from type, they will usually have been printed at one time; music printed from engravings or lithographed plates can obviously be printed at any later date, for the surfaces can be retained for long periods. Photographic processes have extended the possibilities, so that a copy printed from a photograph of an earlier book is deemed to be part of the same edition, for it is based on the same printing surfaces.

This definition places the edition at the centre of all bibliographical work, for it asserts that all copies printed from the same edition will carry fundamentally the same text. It allows for corrections to a plate, for the replacement of a single page with a corrected version, and for later copies to be sold for a different price, or even by a different publisher. The copies need not be identical throughout: indeed, before the 19th century, it is unusual for several copies to be the same in every respect.

An 'impression' comprises all those copies that were printed at the same time, as part of one sequence of activities. As already implied, when printing from type, the impression usually comprised the whole of an edition, because the type would have to be dismantled after printing and distributed ready for use in the next volume. This is evidently not true for music printed from plates, stones, photographs and similar surfaces. Here, any number of impressions can be taken: indeed, it is the advantage of the processes that the publisher only need invest in as many copies as would sell relatively quickly, and then commission more copies from the printer.

In such instances, there may be almost no way of detecting consecutive impressions: they can be identical in every detail of the content, including the supporting details on the title-page, and even printed on similar paper – particularly after the middle of the 19th century. Sometimes, a change in paper may be the only evidence of a new impression.

This is not true for a new 'issue', for here we assert that some aspect of the publishing details has been changed. The change may be as slight as the substitution of a new price, to reflect the impact of inflation, or the addition of a second address for the publisher. It may be larger, showing a completely new cover or the addition of a dedicatory letter, or it may be primarily bibliographical, involving a different gathering structure and format (usually also indications of a new impression). In any of these cases, there need not have been any change to the musical content, for the concept of issue is tightly bound to the manner in which the music was put on the market.

When there are changes to the content, we speak of a new 'state'. This presupposes that a page or pages have been changed or replaced. The change need not imply that the earlier version was erroneous, for a composer may have decided on a new version, perhaps of the orchestration or dynamics, or the language of a text set to music might have been changed, or a second language added as a translation. But, in other cases, there may have been a serious error, or the plate itself has been damaged during the printing process. All these potential reasons argue that several copies of a publication need to be studied and arranged in order by the bibliographer, before the content can be used by the musicologist or performer.

Clearly, a volume can go through a multiplicity of states, as individual plates are replaced or as the composer continues to tinker with the text, and the volume could gradually be transformed into something completely different, in effect a new edition. This has led to some discussion as to when this sequence of changes must be seen as producing a new edition. There is no clear-cut answer here – in part because it depends on the size of the changes – but there is a consensus among musical bibliographers that any sequence that changes more than 50% of an edition should be seen as introducing a new edition. This is not a very happy solution, for there may have been no such intention on the part of the publisher. In one sense, therefore, it is wiser to talk about states, not of a whole book of music, but of the individual pages or gatherings that make up the whole. Since the changes are made to each page separately, without any intention of changing the character (musical or bibliographical) of the whole, this reflects the process more accurately.

However, whatever decision is made, it is clear that each individual 'state', like each individual 'issue' and 'impression', is normally subordinate to the whole 'edition', and that this last is the fundamental categorization of copies. The other subdivisions are just that, usually subordinate to the edition, even though they are themselves essential to any understanding of the date, the reliability or the hierarchical place of the contents of a given copy of music.

In discussing each of these, describing and cataloguing them, and placing them in sequence, the bibliographer relies heavily on the ability to detect whether a copy is complete, and whether it actually represents what the publisher wanted to see sold. Many copies survive incomplete, adapted and annotated by performers and scholars, rebound or collected into a set with other works: sometimes these changes are of the greatest interest, as when a conductor such as Mahler annotates and modifies the parts for a Beethoven symphony, or when a collection of music can be taken as representing the taste of a known social circle. But such changes would be misleading for the bibliography of the music as published, and have to be discounted: the scholar needs to work with a mental construct, the Ideal Copy.

This concept of the Ideal Copy is central to all bibliographical research: Tanselle (C1980) regards it as 'the element that distinguishes bibliographical description from cataloguing'. It is defined as a copy that survives complete and as the printer or publisher would like to have seen it leave the shop. For many books, and even more often in the case of music, copies no longer survive in that complete, corrected and pristine condition: pages (especially blank leaves) are missing; several printer's corrections are not found in any one copy; various publishers' or dealers' marks have been stamped on the copy; it has been bound, perhaps with other works, by a later owner, and this has affected its completeness; or perhaps some instrumental parts have disappeared. If the bibliographer were to describe such a copy as if it represented a newly published copy, the results would clearly be misleading. So the bibliographical version of an Ideal Copy is created – representing a copy with everything present, without later additions (owners' bindings and annotations), and with all corrections that the printer and publisher made – a version that may survive in only a few copies, if at all.

5. History of musical bibliography. The earliest attempts at cataloguing music and musical books were, without exception, made during the process of listing the contents of libraries: thus a number of early monastic library catalogues include treatises about music, and a few institutions also listed the musical books they owned. An important early example is the catalogue of the library of the Duke de Berry, which included music by Machaut. In this case, however, as in most others, any music books were entered not because they were performing copies, but specifically because they were worthy to be placed alongside the other valuable books in the collection. Other books were often listed as a group, without any detail beyond perhaps a general categorization or, more often, an indication of their size or binding. This is particularly frequent in descriptions of the estates of the recently deceased. There are few lists of musical books used in performance, no doubt because they were usually kept in a different location, or were the private property of the musicians. This is particularly true for music used in liturgical situations. Most chant books were kept close to the church itself, while other musical books would have been kept in the library. Extant catalogues reflect this division.

However, the 16th century saw a significant change in this pattern. It opens with one of the most useful of all early book (and music) catalogues, that made of the acquisitions of Cristoforo Colòn during the early decades of the century. Colòn's various catalogues are remarkable, not merely because he attempted to acquire a copy of every book he came across, including music, but because he also entered the opening and closing items, where and when he had purchased the book, and the price he paid. This provides unparalleled evidence, on a grand scale, about the circulation and costs of early printed music. Colòn's catalogue is but the earliest of a series of lists that record musical volumes, appearing with increasing frequency throughout the next two centuries: these include catalogues of collections (the Fugger Musikbibliothek in Augsburg or the Lumley Collection now in the British

Library), of institutions with performing traditions (the collections at Rheinpfalz or at St Anna, Augsburg), of publishers (Alessandro Gardano or Vincenti in Venice, or Gerlach in Nuremberg) or book-dealers (Martin and Playford in London or Mayr in Ljubljana), or for the book fairs in Frankfurt and Leipzig. All these have proved invaluable for modern scholars, for they list many books that have since disappeared. The book fair catalogues are particularly useful, for they list all books which publishers were intending to bring to the fairs. While there are evident errors and problems of interpretation (especially for the dates), the lists still give much detail otherwise unavailable, and in particular illumine patterns of the spread of musical repertories and the contacts between publishers and dealers.

At the same time, scholars were compiling lists of the known literature in specific fields (or, still during the 16th century, of all fields), and these included lists of music or books on music. The earliest were the work of Conrad Gesner (D1548) and Antonfrancesco Doni (D1550–51): Gesner attempted to be comprehensive, while Doni concentrated on Italian secular music. These, and subsequent works, are examples of bibliographical work, although they hardly exceeded the limits of reference bibliography, providing lists of contents with little or no description. This is not surprising, for their function was as a display of the material available in a given field.

This pattern seems to continue for much of the 17th century. A number of catalogues of libraries (many of which contained important musical editions or manuscripts) survive, and one – the catalogue of the vast collection of João IV of Portugal – was actually printed (D1649). Other writers used the book fair catalogues to provide a bibliography of music and writings about music: these include Willer (D1592) and Draudius (D1610), the latter writing very much in the Gesner tradition. Similarly, publishers' catalogues grew in significance and scale (see, among others, Mischiati, D1984), a practice that continued well into the 20th century.

Near the end of the 17th century, the growth in writings about musical history followed a pattern of scholarship in many other fields: with it, there came the practice of citing one's sources – not necessarily in the form of footnotes, but at least as a bibliography of works consulted. J.K. Trost seems to have been the first to do this: his *Ausführliche Beschreibung* (Nuremberg, 1671) included such a list at the end. He was followed by many other writers, including those who compiled historical dictionaries. Brossard (D1703), Walther (D1732) and Adlung (D1758) all listed their musical sources, including earlier treatises, while Gruber (D1783) and particularly Forkel (D1792) added earlier scholarly writing. These lists were early examples of a number of bibliographical catalogues that have remained of value for modern scholarship. Perhaps the greatest achievements, and still the most useful, were the work of Gerber (1790–92/*R*), Fétis (D1835–44) and Eitner (B1900–04). These progressively increase the range and depth of material covered, at the same time as they respond to the growing sophistication of citations to be found in bibliographical work.

After about 1800, many of the attempts at cataloguing and studying musical material reflect new interests, particular the growth of a market in antiquarian books. Whereas Padre Martini in Bologna had acquired many of his books by exchange or gift, more and more collectors were now purchasing their rare and early books, and dealers emerged to specialize in the material. At the same time, details of the books themselves became more important – such features as the book's completeness, the presence of blank leaves, an early binding, large paper copies or autograph annotations made a book more valuable. Cataloguers and bibliographers therefore turned to studying the make-up of the books in more detail, and providing detailed descriptions. It was a short step from this to the emergence of bibliography as a discipline. At first, the field developed most strongly in the study of incunabula, and only slowly spread to 16th-century books. By the end of the century, however, scholarship had reached relatively recent volumes, books that had been produced less than 100 years earlier.

For music, a parallel development can be seen. Early work included both the study of incunables proper – which meant almost entirely treatises on music, with a little work on liturgical printing – and of what were called 'musical incunabula', books printed within the first 50 years or so of the start of music printing (i.e. the first half of the 16th century). It was natural that this growth of descriptive bibliography should be connected with the earliest music printing: apart from the value of those books on the commercial market, they had the fascination attaching to the 'first' examples of anything, and they were in some respects easier to describe than later editions. Typeset music books lend themselves to quantitative description more easily than does engraving, and the structure of the books was also easier to understand. It is true that there were many apparent anomalies, but these could usually be detected by an astute observer, and added their own fascination to the process. As a result, the basic processes for making typeset books came to be understood fairly well, and catalogues of incunables show considerable sophistication.

It is unfair, however, to characterize 19th-century musical bibliography as being driven by a commercial market or restricted to the earliest material. Many bibliographers were turning further afield, studying or cataloguing music from all periods to some of the most recent. Some were music librarians: Gaetano Gaspari worked at the Liceo Musicale in Bologna, Anton Schmid was librarian at the court library in Vienna, and Emil Vogel was librarian for Peters, the publishing house in Leipzig. This pattern still continues: important work has been done by Alec Hyatt King and Oliver Neighbour at the British Library, by François Lesure at the Bibliothèque Nationale in Paris, by Mariangela Donà in Milan and by Mary Kay Duggan in California, although the interests displayed by these scholars have changed as the field itself has expanded. Other early bibliographers were archivists and historians who became interested in printing history; yet others were essentially freelance scholars: Carl von Winterfeld was an early example, followed by Robert Eitner.

It was in the early years of the 20th century that musical bibliographers began to turn to other, often more detailed and analytical issues. One of the first of these issues was the significance of plate numbers, explored by Barclay Squire (C1913–14), followed by many scholars, most importantly Deutsch (C1946), and Tyson and Neighbour (C1965). There were other purely bibliographical

explorations: questions of typefaces and their uses (Meyer-Baer, C1962, since intensively developed in Duggan, C1992); issues of terminology and describing editions (Meyer, C1935; Hoboken, C1958); and problems of defining and dating first editions, especially of the major 18th- and 19th-century composers (Kinsky, C1934).

Since the middle of the 20th century, musical bibliography has expanded enormously: on one hand, many more scholars and librarians are addressing the issues, exploring new repertories (finally coming to grips with musical and other ephemera, for example), employing sophisticated analysis to explore new ranges of evidence, and attempting to face the difficult questions. In these respects, the discipline has begun to catch up with the skills deployed by bibliographers of English and American literature, or scholars studying engravings and etchings of the major artists. There is still ground to be explored, particularly in the realms of publishing history, of the 'meta-text', and of the relationship of the printed edition to its potential and actual consumers. Some current problems of this sort will not be usefully resolved until much more detailed research of many repertories has been undertaken. For example, the high level of research into 16th-century printing and publishing in Italy and the Low Countries is matched, in research into later periods or the rest of Europe, only by a number of excellent local or specific studies; work on editions of music by the major late-18th- and 19th-century composers is not equalled by that on the second- and third-rank masters, or by studies of composers before Haydn and Mozart; and we need serious research into 17th- and 20th-century printing and publishing.

There have been some recent efforts to survey the whole field of musical bibliography, placing its different aspects in context, perceiving trends and trying to suggest directions for work. Among these a most useful review of the more analytical end of the field is Krummel 1992.

It is evident that all forms of bibliography will change drastically under the impact of modern technologies. CD-ROM and the Internet have already made a difference. Large-scale bibliographical resources can be circulated on the former, and many details that have not reached a publishable condition are obtainable from the latter. While many scholars would perhaps be reluctant to see the printed page decline in importance, and there are some ranges of research that can not be conducted via the Internet, it must be acknowledged that the new resources are already making bibliographical control much more feasible, and thereby opening new doors for the analytical and speculative bibliographer.

6. Musical bibliography as music history. There have already been many references to ways in which bibliographical work can aid the musician and scholar. Most obviously, catalogues and descriptive bibliographies are the tools by which we discover new materials, but they are useful in other ways. Behind the data presented in bibliographies are many strands of evidence waiting to be uncovered: the data show trends and patterns; they present evidence of popularity or salesmanship and reveal details of performance practice and of patterns of patronage.

The general rise in the numbers of editions over the past 500 years indicates a general increase in musical literacy and the desire to use notation in performance. These increasing numbers far outstrip the rate of growth of population, presenting an argument for the spread of notated music through increasing sectors of the population, an argument which is well supported by the advance of editions into popular genres of all sorts. Whether this expansion will continue under the impact of newer technologies is a moot point. But the pattern, over hundreds of years, both reflects and has its own impact on the styles in which composers write and the genres which publishers choose to promote, and the details of the pattern are most important for understanding historical developments.

In different periods, some repertories have been printed extensively, while others have more often remained in manuscript. Little keyboard music was printed in the first half of the 16th century: while this was partly due to the technical problems of printing chords, it is notable that the pattern continues even after engraving becomes widely used. The scarcity of printed church cantatas in 17th-century Germany can be contrasted with the many editions of *Gelegenheitskompositionen* – occasional pieces for weddings, funerals, degree ceremonies and the like. In the late 18th century and early in the 19th, few songs and opera arias were published in full score, appearing largely with piano reductions; this contrasts markedly with the practice in 17th- and 18th-century France.

The superficial reason for these phenomena must be that publishers decided that they could not sell enough copies of the neglected repertories, and would take a financial loss with them. But, beneath that, the deeper reasons are more diverse: the opera example is of course a reflection of the large number of domestic musicians, wanting to play and sing their favourite pieces, music heard at Vauxhall and similar places, or from stage works they had seen. There was no corresponding number of chamber orchestras willing to devote their energies to supporting singers. (This does raise the question of why *any* scores of single numbers were published.)

The contrast with published scores of French Baroque opera is highly significant. The historian is forced to believe that the French editions must have been subsidised, or else bought by many people who had no intention of performing them. Given that the scores often represent works presented before the French court, and that they were published in elegant form, it is probable that both explanations are correct, working in combination.

A related argument justifies the printing and sale of occasional compositions in 17th-century Germany: indeed, it is tempting to see the honoree buying, or commissioning, virtually all the edition, to serve as gifts to guests, friends and potential patrons. However, this raises another question, one for which we have few answers: how large was an edition, or how many copies were printed? Contracts do survive, giving specific figures, but there are far too few of them for us to be able to extrapolate. Instead, it seems likely that many print runs (at least before the late 18th century) were very small. It is hard to believe that a death in a small town in Germany could stimulate sales outside the area, and just as hard to believe that the heirs would give away more than 100 copies at most. Much the same argument can be raised for the French Opera scores, for vihuela music in Spain, and elsewhere. Given the relative costs of labour and materials, this is not unreasonable, and it was apparently cheaper for a printer to prepare a new edition, if more

copies were needed, than to tie up capital in slow-moving copies.

The last point seems the best explanation for the many hidden editions that are being found as a result of detailed study of 16th- and even 17th-century editions. A small print run could well explain why new editions were so often printed within one or two years of the first.

Such arguments raise questions about how large the market for music ever was. We can only speculate about this for most generations before the 19th century. Two pieces of late evidence, however, are important: one is the continuing practice of publishing manuscript copies. Publishers in Italy and elsewhere, even as late as the middle third of the 19th century, continued to employ copyists, certainly working on sets of parts for hire, but also preparing piano-vocal arrangements of popular songs and arias for sale to the general public. There was evidently not enough demand (in a short enough period) to justify engraving the plates and running off copies. It was still cheaper to prepare manuscript copies as they were required.

The second evidence lies in the occasional survival of publisher's records, of which Ricordi's *Libroni* are among the most important. The small size of the print run indicated for many entries in these ledgers also argues a smaller market than we have tended to assume.

Parallel with this range of evidence is the presence on many title-pages of phrases such as 'newly corrected', 'revised' or 'with additional compositions'. These wordings suggest that publishers, while recognizing that a second (or later) edition was being sought, were afraid that there were not enough purchasers to justify the cost of preparing it: they were therefore trying to persuade some of the original buyers to return for the new edition.

The few editions of keyboard music in the 16th century are significant not only by virtue of their scarcity, but also for the repertory they contained. It seems that, by contrast with the ready market for professional-level lute music, evident from the 1540s on, the potential purchasers of keyboard music were not regularly as skilled (at least before late in the century). There seem to have been fewer virtuosic keyboard players around, or (more probably) skilled organists and harpsichordists preferred to create their own music. If these types of evidence argue for the size and character of the market for particular repertories, there are also signs of publishers working to expand the number of purchasers of their music.

The pattern in the second half of the 18th century, whereby the title-pages of editions of keyboard music moved from the designation 'for harpsichord' to 'for harpsichord or fortepiano' and eventually to 'for fortepiano', is certainly an indicator of the progressive take-over by the latter instrument. While many of the compositions described as being for either instrument were evidently written for one rather than the other, the additional listing on the title-page implied that many amateur musicians had only one of the two instruments, and it was clearly intended to increase sales. Similarly, the mid-17th-century title-pages offering some version of the formula 'for four soloists, with a four-part chorus *ad placitum*' or '*ad libitum*' tell us something about the number of institutions which could not afford, or find, enough qualified singers to cope with full choral music. These works, by Cazzati and others, are indeed composed so that the chorus is optional. They show the composer writing for as many situations as possible: the prominence given to the option on title-pages indicates that the publisher (probably influenced by Cazzati himself) also saw the commercial advantages implicit in this mode of writing. This sort of conclusion, while fairly obvious, is only justifiable once the bibliographical work has been completed. The evidence uncovered by such work is interesting for other aspects of musical history as well.

The problem of dating many 18th- and 19th-century editions has already been mentioned, and indeed the bibliography and cataloguing of 19th-century music remains one of the most important lacunae in the field. Major composers and their works have been studied in detail, and many of their editions have been dated, often with the aid of personal correspondence, newspaper advertisements and other external data. However, as soon as one turns to composers who are only marginally less important, such as Dussek, Thalberg or Humperdinck, the research is so uneven in coverage that few editions have been even approximately dated. Standard reference works give very different dates for first editions, often relying on opus numbers as a guide, or depending on the particular copy examined by the writer. The problem is of course compounded by the number of editions that went through series of impressions and issues, each without date. Careful work on the early editions of Brahms has shown what can be achieved (Hofmann, C1975).

It is clear that the history of styles and taste, as much as local histories of music and its reception, needs all these data, and needs this type of research to be undertaken. Given the extent to which publishing and dissemination were influential in the development of musical taste, to some extent taking the place of actual performances of the original form of the music in all but the most important cultural centres, much research is dependent on clarifying publication and selling data. The new edition of Ricordi's *Libroni* has again led the way here, allowing the reader to see the relative importance of selections from operas, arrangements of inidividual numbers for instruments, and fantasias or potpourris of themes. Each of these genres had a different function, and their relative importance (as measured by their appearance and the size of the print run) tells us something about the character of the market for the music. Similar studies of publishers' advertisements, dealers' catalogues, and purchasing records will certainly aid in our understanding of how, for example, features of Beethoven's music were so rapidly absorbed and imitated in different parts of Europe and America.

This highlights the extent to which bibliography is always at the service of our study of the content of the document. The bibliographer has to be immersed in the technicalities of printing and publishing, and has a whole armoury of research tools as complex and detailed as those available to the musicologist: he or she may in practice hardly look at the music itself. The end, product, though, is always either a deeper understanding of the processes of producing a musical edition or a better grasp of how a particular copy of an edition relates to the content which it purports to present to a musician. A few examples of the impact of such research follow:

(i) almost all early music printers seem to have preferred to reprint, going through the labour of preparing a new edition, rather than having larger initial print runs. This

is true of the first publisher of music, Petrucci, and continues throughout the 16th century and as late as Thomas East (Smith, C1996–7). Such a pattern tells us something about the cost of labour as opposed to supplies, but it also says much about the speed with which publishers expected to be able to sell copies, and hence something about the extent to which purchasers were not only interested in 'the latest thing';

(ii) detailed study (Bernstein, C1985–6) of the typographical material found in several Venetian music books of the 1540s and 50s, which carry no printer's or publisher's name, but do include the device of a salamander, has shown that they were connected with one of the major Venetian publishing houses of the time. We still can not answer why he chose not to acknowledge these editions;

(iii) the relative numbers of editions of different repertories – congregational music, simple part-music, complex madrigalian styles and church or instrumental music at various levels – and the format and manner of their presentation, taken together, allow us to detect different patterns of music-making in Italy as opposed to the Low Countries, reflecting different approaches in the various strata of society;

(iv) demonstrations of the value of studying every available copy of each printed edition abound in the literature, revealing manuscript corrections of misprints made in the printing shop or by early owners (Charteris, C1995);

(v) analysis of the use of ornamental initial letters has helped in dating editions, and in the study of work-patterns, for French music of the 16th and 17th centuries (Guillo and Noailly, C1988);

(vi) study of the engravers for editions of Handel's instrumental music has led to detailed re-evaluations of the texts they prepared (Burrows, C1983);

(vii) analysis of how London engravers divided up their work on editions of Haydn has helped identify the characteristics of each craftsman and the range of errors each was liable to make (Poole, C1980);

(viii) Tyson's study (C1963) of the business arrangements for publishing Beethoven's works in England has shown that some English editions reflect the composer's intentions better than those published closer to home;

(ix) study of the engraved scores of 19th-century Italian operas reveals that some pages, while carrying the same plate numbers as their neighbours, are engraved in a different hand. While, in some cases, these pages appear to be replacements for defective ones, in others they represent necessary changes in layout as more popular numbers, published earlier, were incorporated into complete editions;

(x) close examination of copies of the original editions of works by Brahms throws light on the lack of care with which engravers handled many details of the composer's score, as well as the extent to which Brahms felt it necessary to notate corrections and improvements on his proof (Pascall, C1983; Grassi, C1995);

(xi) study of normal practice is beginning to draw attention to differences in the boldness with which a printer displays on the title-page the composer's name, the genre or title of the work, and the name of the dedicatee. This is important evidence for assessing the contemporary stature of the individual composer, the reputation of different genres (and particularly of the works that lay behind potpourris and fantasies), and the selling power attached to the name of a distinguished or accomplished and beautiful member of society;

(xii) the various editions of Stravinsky's *The Rite of Spring* show in an exemplary manner how a new edition, intended to correct errors or to carry a composer's latest thoughts, will inevitably also carry new errors (Cyr, C1982).

These are all exemplary, not merely for the study itself, but because they show what can be done with other repertories. Similar problems abound, and remain untackled, throughout music history. In each case, bibliographical study will force us to reconsider the history of the music itself (of its composition and revision), of the ways in which it was performed, or of the manner in which it reached and was received by an audience.

STANLEY BOORMAN

**Bibyk, Valentyn Savych** (*b* Khar′kiv, 19 July, 1940). Ukrainian composer. In 1966 he graduated from the Khar′kiv Conservatory, where he had studied composition with D. Klebanov. Of the Ukrainian composers who came into prominence in the 1970s, he is one of the more interesting and original: even pieces written during the first decade of his creative career reveal a vivid and mature talent. His style is linked with folklore, though folk elements are always radically modified. Rooted in strong Slavic melodic traditions, his harmony is based on polytonal combinations of triads, layered so that each line – which is often laced with diatonic elements – has a harmonic life of its own. In his early works, he explores a single idea with the most economical use of pitches; drama is produced through melodic development which alternates sections with and without pulse, a device that Bibyk continues to exploit to the present day. He attempts to maximize the colouristic and formal dimensions of each musical gesture; in doing so he makes use of a wide range

of techniques, including massive canons, tone clusters and simultaneous multiple tempos, as exemplified in two of his best known works, the fourth and seventh symphonies (1976, 1982). The result is a style that exhibits the contrasting natures of immobility and motion, of quietude and tempestuous outbreaks, of contemplation and activity. Continual variation – or troping – is applied in a slow and inexorable manner which gives his music both weight and a feeling of suspense. One of Bibyk's more memorable and emotionally powerful works of the early 1990s is the 12-part cycle of psalms *Do Tebe pidnoshu ya, Hospody . . .* ('To You I Raise my Soul, O Lord . . .') op.91, for soprano and instrumental ensemble (1992). In 1994 Bibyk moved with his family from Khar'kiv to St Petersburg, where he headed the Department of Recording Arts at the university. In 1997 he emigrated to Israel.

WORKS
(*selective list*)

Stage: Beg [Flight] (op, after M. Bulgakov), 1972; rev. 1981; Guttapercheviy mal'chik [The Gutta Percha Boy] (ballet, D. Grigorovich), 1986

Choral: Duma pro Dovbusha [Meditation on Dovbush] (cant., folk poems), chorus, inst ens, 1972; Ekho [Echo] (chbr cant., A. Blok), S, perc, org, 1988; Do Tebe pidnoshu ya, Hospody . . . [To You I Raise my Soul, O Lord . . .], 12 psalms, S, inst ens, 1992

Orch: 12 syms.: no.1, 1966; no.2, 1969; no.3, 1970; no.4 'In Memory of Shostakovich', 1976; no.5, 1978; no.6 'Dumy moii, dumy moii' [My Thoughts] (T. Shevchenko), 1980; no.7, 1982; no.8, 1986; no.9 'Pastoral', 1989; no.10 (M. Tsetayeva), 1990; no.11 (J. Brodsky), 1991; no.12, 1994; numerous inst concs.

Chbr and solo inst: Pf Trio no.1, 1972; 34 Preludes and Fugues, pf, 1973–8; Malen'kiy kontsert [A Little Concerto], vn, vc, pf, 1976; Partita on the Theme DSCH, vn, vc, pf, 1982; Sonata no.1, vn, pf, 1988; Pf Trio no.2, 1989; Sonata no.1, vc, pf, 1990; Sonata no.2, vc, pf, 1991; Ww Qnt, 1992; Sonata no.2, vn, pf, 1995; Garmonii tishinï [Harmonies of Silence], fl, vn, pf, 1996

Songs and choruses to texts by Y. Bondareva, H. Hdalia, O. Mandelstam, T. Shevchenko, O. Vyshnia

VIRKO BALEY

**Bicci, Antonio** (*b* Florence, 4 Jan 1552; *d* Florence, 16 Sept 1614). Italian composer. He was born in the Santo Spirito district of Florence. In 1591 he was elected one of the 'Four Captains of Orsanmichele', an important legal-administrative institution. He was buried in the family tomb in S Maria del Carmine. The distribution of Bicci's music suggests that his musical reputation may have been largely due to a handful of important connections in Florence. His seven madrigals were all included by other composers in collections of their own works. Most important among these was Luca Marenzio, who was employed at the Medici court in 1587–9. Marenzio included two of Bicci's madrigals in two of his own publications. Among the others who published his works Luca Bati was a native of Florence and Stefano Venturi del Nibbio was there by 1594. Bicci may have belonged, between 1608 and 1614, to the Accademia degli Elevati, founded by Marco da Gagliano.

Described by Einstein as 'pleasant, though shallow and musically uninteresting', Bicci's music is nevertheless significant for the high quality of his poetic choices. In his setting of a text from Guarini's *Il pastor fido*, included in Marenzio's seventh book for five voices, the verses are stripped of explicit references to scenes and characters in the play (the first verse is added; 'mio core' is substituted for 'Mirtillo'); this is in keeping with Marenzio's treatment of excerpts from Guarini's play in the same book and is well suited to the refined and intimate tone of Bicci's musical setting. His most effective piece is perhaps *Candide perle*, in which the lively overall texture is punctuated by episodes of considerable expressive intensity.

WORKS
*all madrigals; for 5 voices unless otherwise stated*

Candide perle e voi labbra ridenti, 6vv, 1591[21], repr. with Eng. text, 1597[24], repr. with Latin text, 1610[2]; Baciatemi cor mio (L. Celiano), 1594[11]; Deh, dolc'anima mia (B. Guarini, *Il pastor fido*), 1595[10]; Quasi tra rose e gigli (F. Alberti), 1596[17], inc.; Cogli la vaga rosa (F. Alberti), 1598[14], inc.; Il dolce mormorio (E. Cavalletto), 1598[14], inc.; Pargoletta è Laurina (C. Rinaldi), 5vv, 1602[7], inc.

PIERO GARGIULO

**Bicilli** [Becilli, Biccilli], **Giovanni** (*b* Urbino, 1623; *d* ?Rome, Oct 1705). Italian composer. Although nothing is known about his musical training it may be assumed that he finished his studies in Rome, where his brother Cesar was a member of the Congregazione dell'Oratorio at the Chiesa Nuova. On 16 December 1648 he was elected *maestro di cappella* of the Chiesa Nuova. In 1650 his motets began to appear in printed collections. Documents from the 1660s indicate that he conducted a private music school. He was particularly active in Roman oratories: he was in charge of the music at the Oratorio del SS Crocifisso in 1665 for the first and fifth weeks in Lent, in 1667 for the second week and in 1671 for the first week. Between 1675 and 1684 he was *maestro di cappella* of S Giovanni in Laterano and in 1686 became a *guardiano* of the division of *maestri di musica* for the Congregazione di S Cecilia. It is not known when he took up again the position of *maestro di cappella* at the Chiesa Nuova, but he held it from at least 1693 to 1705. He is important primarily as a composer of oratorios. In 1693 he presented manuscripts of 46 of them to the Congregazione dell'Oratorio; a list of these works, most of which are lost, is in the Archivio della Congregazione dell'Oratorio dei Padri Filippini, Rome (14.I.66; published, but not related to Bicilli, in Gasbarri, 314).

HOWARD E. SMITHER/R

**Bicinium** (from Lat. *bis*: 'twice' and *canere*: 'to sing' or 'to play'). A term applied by many modern scholars to any two-part vocal or instrumental composition of the Renaissance or early Baroque. In its stricter, historically more correct definition, it was used in German-speaking areas of the period, mainly by Lutheran Latin schoolteachers, to designate pedagogical duos. Duos were written for this purpose in the 15th century (see Bernstein, 1980), but the Lutherans were the first to realize their value as aids for teaching and practising contrapuntal music in all clefs and church modes.

The term's earliest known appearance is in Jan z Lublina's *Tabulatura* (manuscript, 1540), which contains a definition, rules for composition and examples (see Chybiński). Georg Rhau first used it in a printed collection in his two volumes of bicinia published in 1545. These provided an international repertory of 194 duos (followed by a smaller assortment of three-to eight-part compositions) with secular French (borrowed mainly from Moderne's, Gardano's and perhaps also Attaingnant's chanson publications of the 1530s; see Bernstein, 1980), and sacred and secular German and Latin texts, in canonic, freely imitative and homophonic textures. The Latin duos, most closely reflecting Luther's desire to train children both in music and in the Bible, are two-part sections usually from masses ('Pleni', 'Benedictus', the second Agnus Dei), *Magnificat* settings and motets by the Franco-Flemish composers of Josquin Des Prez's generation. In borrowing duos from this large repertory, Rhau sometimes retained the original texts, but more frequently replaced them with biblical moralizing contrafacta (in spite of his claim in the dedication to *Secundus tomus biciniorum* of 1545 that he had 'attached to the individual songs the words that properly belong to them', as he did not wish to 'commit an injustice against artists of great worth and renown'). His procedure provided a model for other Lutheran editors, notably Rotenbucher who in his *Diphona amoena* (1549) borrowed 91 Latin duos from similar sources (including some from Eustachio Romano's *Musica* of 1521) and added biblical texts to them.

Although not specifically recommending use of bicinia, contemporary Lutheran school ordinances frequently cited treatises with duo and trio examples. The early Lutheran theorists (including Rhau, Listenius and Lampadius) still followed the 15th-century tradition of Tinctoris, Gaffurius, Cochlaeus and Ornithoparcus in composing their own examples for illustrating rules of proportions. *Artis canendi* (1537) by Sebald Heyden marked a turning-point by providing for his schoolboys exercises 'sought out with especial care from the best musicians ... Josquin, Obrecht, Pierre de La Rue, Heinrich Isaac and the like'. Many of these 'marvels of the musical art' are duo- and trio-canons (or *fugae*), considered particularly good pedagogical material because they could be 'correctly sung by boys of the same age among themselves'. Heyden's method of progression from duos to trios to larger compositions may have been the model for Glarean (in his *Dodecachordon*) and definitely was for Wilfflingseder.

The most widely used textbook, the tiny *Compendiolum musicae* by Heinrich Faber (so popular that it was recommended by 49 school ordinances from 1559 to 1613 and was the basis of later revisions by Christoph Rid and Gumpelzhaimer, and the model for Colhart, Vulpius and Walliser), includes 12 duo and trio examples 'extremely well suited to beginners'. Faber suggested that teachers supplement his own pieces with 'many more examples, especially considering there are two-voice songs in print' (perhaps referring to Rhau's 1545 collections). In the 1560s Wolfgang Figulus and Ambrosius Wilfflingseder gathered their exercises in supplements to their books. In 1581 Friedrich Beurhaus designated his examples, many borrowed from Faber and Figulus as well as Rhau, as 'bicinia', 'tricinia' and 'quadricinia' in his supplement. By the 1590s, Lindner's and Gumpelzhaimer's large collections dwarfed the size of their brief handbooks of rules. Lindner's title shows the changing emphasis in pedagogy: a collection of 80 bicinia (many by Lassus) 'to which is added a handbook'. The Lutheran conservativeness continued well into the 17th century with bicinia collections and handbooks that maintained a duo style little changed from Josquin's time.

Compared with the Lutheran bicinia, the Italian duo publications of the same period are progressive. Intended for a more exclusive clientèle, and particularly for private instruction of amateurs, most of the Italian collections include more contemporary music: chansons, madrigals and especially instrumental ricercares. The publications of Metallo, Lupacchino and Tasso, each with numerous editions, dominated the market.

The early wave of bicinium cultivation was not without influence on Catholic composers such as Castro and notably Lassus. The latter's popular *Novae aliquot* contains 12 Latin pieces (whose style resembles that of the earlier Lutheran bicinia) and 12 textless ricercares (after the style of the contemporary Italian instrumental duos). A 1601 edition of his duos with a third part added, considered by Boetticher to be a 'document of early monody', illustrates a later manifestation of bicinium style, the *concerto ecclesiastico* in Italy and the *geistliches Konzert* in Germany (see Adrio). The amalgamation of various styles, including the bicinium and tricinium, in numerous early 17th-century publications such as Grimm's *Fest-Bicinia, nebst dem Generalbass* (1636) and his *Tyrocinia* (1624), really tricinia with and without figured bass, is worthy of more research. By the late 17th century, a further alteration of the term occurred with the Lutheran Pezel's *Bicinia* for *Stadtpfeiffer*; it continued to be used to designate duos for brass instruments by Mattheson (*Der vollkommene Capellmeister*, 1739), Altenburg (*Versuch einer Anleitung*, 1795) and Koch (*Musikalisches Lexikon*, 1802), the latter two including tricinia and quadricinia in a similar style. Numerous 20th-century composers, notably Kodály, have revived the term for compositions with a pedagogical purpose.

BRUCE A. BELLINGHAM

**Bickel, Conrad.** *See* CELTIS, CONRADUS PROTUCIUS.

**Bickerstaff, Isaac (John)** (*b* ?Dublin, 26 Sept 1733; *d* ?1808). English playwright of Irish birth. He served in the army before moving to London and drew on his military experience in his libretto for the patriotic afterpiece *Thomas and Sally* (1760). His successful Covent Garden piece *Love in a Village* (1762) started a new fashion in opera, as *The Beggar's Opera* had done decades earlier. He combined a witty, romantic plot in spoken dialogue with sophisticated music drawn from continental comic opera. The pasticcio score is derived mostly from Italian opera, from oratorio, and from the songs of Thomas Arne, but uses little traditional English music, which Bickerstaff despised. As in ballad opera, the songs help to advance the action, but they also demand well-trained singers and full orchestral accompaniment.

Bickerstaff's innovation spread quickly in the London theatre. He continued to vary the form: *The Maid of the Mill* (1765) had a strong continental flavour with its sentimental plot and borrowed French music; the farcical

intrigue of *The Padlock* (1768), on the other hand, had a lively original score by Charles Dibdin. However, his successful career ended abruptly in 1772, when he fled from England rather than face charges of homosexuality. He probably died in 1808, the last year in which he received his military pension, although reports persisted for years that he was still alive. The genre of English comic opera that he pioneered eventually developed into the musical comedy.

LINDA TROOST

**Bickham, George,** jr (*b* ?London, ?1706; *d* London, bur. 23 June 1771). English engraver, publisher and bookseller. He worked in Covent Garden, London, having learnt the trade from his father George Bickham (*b* ?1684; *d* London, 4 May 1758), an engraver best known for *The Universal Penman* (1733–41). He was principally famous in music circles for his two illustrated folio volumes *The Musical Entertainer*, first issued in fortnightly parts, each containing four plates, from January 1737 to December 1739. The 200 plates are songs, headed and surrounded with pictorial embellishments illustrative of the song (see illustration), and engraved in the style of and even copied directly from Gravelot and Watteau. This work was the first of its kind to be published in England and quickly produced imitators such as Lampe's *British Melody*, engraved by Benjamin Cole.

A second edition, corrected by Lampe, was also issued in parts (1740–41), and a third, printed from the original plates, appeared in 1765, issued by John Ryall. Other musical works engraved by Bickham include *Songs in the Opera of Flora* (1737), *An Easy Introduction to Dancing* (1738) and the frontispiece for Simpson's *The Delightful Pocket Companion for the German Flute* (*c*1745).

FRANK KIDSON/H.G. FARMER/PETER WARD JONES, DAVID HUNTER

**Bidera, Giovanni Emanuele** (*b* Palermo, 4 Oct 1784; *d* Palermo, 8 April 1858). Italian librettist. He studied law in Naples but returned penniless to Sicily, to work as an actor and playwright. Back in Naples, he turned to librettos, altering Mercadante's *Gabriella di Vergy* for Genova (1832). He contributed the synopsis for Cammarano's *Ines de Castro* (Persiani, 1835), becoming involved in a year-long struggle with the censors, and provided Donizetti with *Marino Faliero*, for performance in Paris, which the Neapolitan censors considered a highly subversive text and which was also submitted as *Antonio Grimaldi* and *Il pascià di Scutari* to escape their notice. His best libretto, *Gemma di Vergy*, was also set by Donizetti; his later librettos, of variable quality, were for minor composers. Bidera's versification was better than his dramatic instinct, but he was willing to tackle 'strong' (notably Byronic) subjects. He was also the author of a popular book on travel around Naples and of one on declamation. He retired to Sicily in 1848.

JOHN BLACK

**Bideri, Ferdinando.** Italian firm of music publishers. It was founded in Naples in about 1875 and rapidly established itself as one of the leading producers of popular Neapolitan songs. As well as printing songsheets (the firm's main output), Bideri also produced a series of musical postcards which depicted favourite comic or ballad singers of the day shown opposite the melodies of popular songs. Bideri's printing equipment was modern and he was able to publish songs with colour covers. The firm enjoyed huge commercial success and a constant flow of new songs was ensured by placing many of the firm's favoured composers under exclusive contracts. Bideri also organized an annual song-writing competition. For over 30 years the firm had a prolific production schedule, but it appears to have gone into decline after World War I.

NIGEL SIMEONE

**Bidermann** [Biderman]. German makers of mechanical musical instruments. Samuel Bidermann (i) (*b* Ulm, *c*1540: *d* Augsburg, 7 Dec 1622) and his eldest son David (1582/3–1622) learnt the art of 'barrel-pinning' from the composer and organist H.L. Hassler, who built mechanical instruments as a side-line. They were also influenced by the organist Erasmus Mayr of Augsburg, who had examined the water organ at the Villa d'Este in Tivoli in 1576. While other Augsburg makers, such as Marx Günzer and Achilles Langenbucher, produced mainly automatic organs, Bidermann specialized in automatic spinets besides building small and large organs. Examples survive in the Kunsthistorisches Museum, Vienna, the National Museum, Wrocław, and in the Mathematisch-Physikalischer Salon des Zwingers in Dresden. These instruments may be played either from the keyboard or by a clockwork-driven pinned barrel contained in the cabinet. The business was continued after Samuel Bidermann's death by his other sons, Samuel Bidermann (ii) (*b* Augsburg, *c*1600; *d* *c*1653) and Daniel Bidermann (*b* Augsburg, 1602–3; *d* Augsburg, 14 Feb 1663). Samuel Bidermann (ii) had previously worked as a journeyman with the cabinetmaker Konrad Eisenburger, and set up his own establishment in 1633. An automatic spinet by him is in the Rück Collection at the Germanisches Nationalmuseum, Nuremberg.

Automatic spinets by all members of the Bidermann family occasionally were built into pieces of furniture (such as writing and sewing tables and ornate cabinets). An instrument combining a musical clock with a clock-

*William Boyce's 'Rural Beauty, or Vaux-hal Garden' from 'The Musical Entertainer', i (1737), printed from plates engraved by George Bickham jr*

work spinet, pipe organ and automaton parade is in the Time Museum, Rockford, Illinois. It bears the Augsburg cabinetmakers' marks and suggests that it is the result of a collaboration between the Bidermann family, the Langenbuchers and Eisenburger. However, for many years the Bidermanns and the Langenbuchers were locked in futile legal disputes. When Mersenne (*Harmonie universelle*, Paris, 1636–7/*R*) described the automatic spinet as a German invention he may well have had Bidermann instruments in mind.

HANS KLOTZ/ARTHUR W.J.G. ORD-HUME

**Bidon** [Collebaudi, Colebault], **Antonio** [da Asti] (*b* Asti, *c*1480; *d* before 1525). Soprano singer and composer, active in Italy. He was one of the most famous singers of

his time; Castiglione described his manner of singing as one that was 'so skilled, quick, vehement, impassioned, and has such various melodies that the spirits of his listeners are stirred and are so entranced that they seem to be uplifted to heaven'. Similar encomia can be found in other writings. A member of the Savoy chapel from 1500 to 1502, he was recruited to join the Ferrarese chapel in 1502 and stayed in Ferrara until he was lured to Rome by Leo X in 1516. He was first employed by the pope in some sort of private capacity, but had become a member of the papal chapel by 1519. He was not altogether happy in Rome, however, and made an attempt in 1517 to return to Ferrarese service which was rebuffed. He must have died before 1525 as two laudatory epitaphs were published that year. His only known composition is an added voice to Josquin's *Miserere* (*CH-SGs* 463). He may also have been related to Jacques Colebault (Jacquet of Mantua).

RICHARD SHERR

**Biechteler, Benedict** (*b* Obergünzburg, nr Kempten, 26 March 1689; *d* Wiblingen, nr Ulm, 21 Aug 1759). German composer. He was educated at St Gallen, Switzerland, entered the Benedictine monastery at Wiblingen in 1706, and taught in the school there until 1732. In that year he moved to another Benedictine house, at Kempten, where he had charge of the choirboys. Later he returned to Wiblingen, eventually becoming sub-prior there.

Biechteler's three surviving publications belong to the body of church music for parish choirs which appeared in the mid-18th century. The masses of op.1 appeared in the same year as the op.1 of Valentin Rathgeber, the composer who set the pattern for published church music for the next 20 years; but they are less well adapted to the needs of small choirs than Rathgeber's, requiring rather larger and more experienced forces. In particular, the orchestra includes a viola as well as two violins, and separate concertato and ripieno voice parts are provided. The scoring of op.2 is more obviously designed for parish choirs – solo voice and violin or concertante organ. However, these pieces are conceived in a thoroughly instrumental idiom; the voice is expected to negotiate exactly the same figurations as the violin or organ, sometimes even singing a separate syllable to each semiquaver; and they lack both the tunefulness and the simplicity of the best parish church music. An account of his career is given in A. Layer: 'Die Biechteler: Allgauer Musiker der Barockzeit', *Allgäuer Geschichtsfreund* [Dillingen], lxxiv (1974), 98–101.

WORKS

Liturgia musico-sacra ... 6 Masses ... 4 solo vv, 2 vn, va, org, chorus, op.1 (Ulm, 1721)
Vox suprema, 24 ant, S/A, org/vn, bc, op.2 (Augsburg, 1731)
Veni Sancte Spiritus, 8vv, org, *D-Mbs*

ELIZABETH ROCHE

**Biechteler, Ignatius** (*b* Obergünzburg, nr Kempten, 1701; *d* Wiblingen, nr Ulm, 26 Nov 1767). German composer, brother of Benedict Biechteler. He became a monk at Wiblingen in 1719 and studied in Augsburg before returning to Wiblingen to teach. He later worked as parish priest in Wiblingen and in the nearby village of Gögglingen. None of Biechteler's compositions is extant; the only one mentioned by name is his music to the prologue of the Singspiel *Theodorus I, König von Korsika*, which was performed at Wiblingen in 1731. His career is discussed in A. Layer: 'Die Biechteler: Allgauer Musiker der Barockzeit', *Allgäuer Geschichtsfreund* [Dillingen], lxxiv (1974), 98–101.

ELIZABETH ROCHE

**Biechteler** [Biechteller, Biechtele, Piechteler, Wiechteler, Wiechterl] **von Greiffenthal, Matthias Siegmund** [Mattia Sigismondo] (*b* Leibnitz, nr Graz, *c*1668; *d* Salzburg, 27 Aug 1743). Austrian composer and lutenist. He studied at the Jesuit university at Graz from not later than 1684 to 1687, and then moved to the Benedictine university at Salzburg, probably as a result of the election of his father's former master and patron, Johann Ernst, Count Thun, as Prince Archbishop of Salzburg. In 1688 he entered the court Kapelle, perhaps as a solo singer. He became vice-Kapellmeister in 1703, Kapellmeister in 1706, and also taught the choristers singing for some time. In 1723 he was ennobled by Emperor Charles VI. He was appointed high steward in 1726 by the ruling Archbishop of Salzburg. It is notable that as Kapellmeister, a post he filled until his death, Biechteler was paid less than his predecessor, Heinrich Biber.

Biechteler made an important contribution to the construction of a self-contained repertory for Salzburg Cathedral. His numerous liturgical works observe the distinctions, common in Catholic sacred music, between the *stylus a capella*, *stylus mixtus* and *stylus solennis*. They also take account of the particular practice in the cathedral whereby some of the musicians were placed in galleries beneath the dome at the intersection of the nave. Consequently Biechteler laid greater emphasis on sound effects than on contrapuntal structure. Quite often his vocal works revive the older motto technique, while his church sonatas seem to be influenced by Corelli but in form are similar to the contemporary *sonata da chiesa*. Biechteler was taught the theorbo at the behest of Archbishop Thun, and was among the last lute virtuosos in the south German area.

THOMAS HOCHRADNER

**Biedermeier** (Ger.). A term used of the culture of German-speaking Europe between the Treaty of Vienna (1815) and 1848, the year of revolutions. It is associated especially with southern Germany and with the Austria of Metternich, the architect of political stability in post-Napoleonic Europe. The term is borrowed from the name of a fictional schoolmaster created in the early 1850s by Ludwig Eichrodt (1827–92) as a satirical caricature of a bourgeois philistine. It was later adopted to refer to the comfortable domestic architecture and the decorative arts and painting of the period, and to a way of life founded in peaceful domestic harmony by contrast with the turbulence of the Napoleonic years. In the visual arts it is reflected in the domestic scenes and picturesque genre paintings of Josef Franz Danhauser, Peter Fendi and Carl Spitzweg (see illustration).

The Biedermeier culture of domesticity, associated with a politically quiescent bourgeoisie, presents an image of social stability, underpinned by a political conservatism whose aims were summed up in 1839 by Grillparzer in an unpublished essay on Metternich as 'the repression of liberalism and the preservation of the status quo'. The mood of cosy resignation is reflected in a popular song composed in about 1840 by Carl Hampe with words by J.B. Moser, *Die Welt ist ein Komödienhaus* (ex.1): it plays on the traditional metaphor of the world as a stage to express a fatalistic acceptance of the various roles allotted to mankind by providence or chance. However, the Biedermeier image of contented stability was not all it seemed. Beneath the surface there was growing political unrest, which was to lead to the fall of Metternich in 1848; so, too, in the arts the old-fashioned, rather staid taste that the term 'Biedermeier' suggests is only one element in a complex scene fraught with cultural tensions.

*Painting in Biedermeier style, 'The Sunday Walk' by Carl Spitzweg, 1841 (Museum Carolino Augusteum, Salzburg)*

Ex.1

Andante

Die Welt ist ein Ko - mö - dien - haus, wir Men-schen sind *Ac - teurs,* das Schick-sal theilt die Rol - len aus, der Zeit - geist ist *Souf - fleur*

It was in the 1930s that the term was adopted in literary history as a designation for the post-Romantic period, which saw the beginnings of realism but also clung to the heritage of German classicism – a combination typified in the work of the Austrian novelist Adalbert Stifter and the Swabian poet Eduard Mörike, whose poems were set to music by both Schumann and Robert Franz. The use of the term as a historical category came from an attempt to see the arts in a social context (a perspective at odds with the Romantic doctrine of the sovereign artist) and from a perception that much artistic activity was linked to an essentially un-Romantic social context. Yet most of the outstanding authors of the period achieved their lasting stature not by conforming to a 'Biedermeier' stereotype but by transcending it, as Grillparzer and Mörike did. This was also the age of the great German-language dramatists of radical discontent, Büchner and Nestroy. So too in music, there were sharply conflicting styles, so that the term is more accurately used as a description of the everyday musical culture of the period rather than as a designation of a school or a common creative mood: 'to speak of "Biedermeier music" ... is to invent a non-existent category' (Hilmar).

Throughout the Biedermeier period the main musical and theatrical centre in German-speaking Europe, and the focal point for composers and performers, was Vienna, still the largest city in the German-speaking countries (it was not overtaken in size by Berlin until the 1850s). Public concerts flourished: the Gesellschaft der Musikfreunde, founded in 1812, opened the first public concert hall in Vienna in 1831, and 11 years later the Vienna PO, based on the orchestra of the opera house, gave their first concert. Commercial instrument manufacture also prospered: in 1828 Ignaz Bösendorfer founded his piano-making firm in Vienna (the equivalent in Berlin, the firm of Carl Bechstein, followed in 1853). The steady growth of the urban middle class also fostered the development of private music-making in small circles. The Schubertiads of the 1820s are the best-known example. There was also a vigorous salon culture, commemorated by Stifter in his essay 'Wiener Salonszenen' (first published in 1848) and by Danhauser in a painting, *The Concert*, which reputedly depicts a chamber concert in the house of one of the leading Viennese patrons. The music-making of the Viennese middle classes was recorded by the exiled Moravian novelist Charles Sealsfield in his (generally hostile) account of Metternich's Austria, *Austria As It Is* (London, 1828):

> Wherever you go, the sound of musical instruments will reach your ears. Whatever family of the middle class you enter, the pianoforte is the first object which strikes your eyes; you are hardly seated, and a flagon filled with wine, another with water, and Pressburg biscuit placed before you, when the host will tell Caroline to play a tune to the gentleman.

In this culture it was natural that the fashion for lieder should thrive, also small-scale pieces for solo piano (or small groups), dances, études, and short lyrical pieces bearing titles such as 'Albumblatt', 'Moment musical', 'Bagatelle' and the like. Tastes ranged from the sentimental to the ironic (Schumann's Heine settings *Dichterliebe*). In the theatre, French Romantic operas such as Meyerbeer's *Robert le diable* enjoyed sustained success, while at the same time the commercial theatres in Vienna cultivated a tradition of musical pastiche. This is best exemplified by the figure of Adolf Müller, who provided the scores to most of Nestroy's plays in the 1830s and 1840s, including his parodies of Hérold and Meyerbeer, *Zampa der Tagdieb* (1832) and *Robert der Teuxel* (1833), both at the Theater an der Wien. Successful German operas and Singspiele included *Der Freischütz* (first performed in Berlin in 1821) and the works of Spohr and, above all, Lortzing in the 1830s and 1840s; Conradin Kreutzer's *Das Nachtlager von Granada*, first performed in 1834 at the Theater in der Josefstadt, is often cited as the archetype of Biedermeier opera. But the dominant operatic fashion of the time, in Vienna as in London, was Italian opera. The Rossini craze – 25 Rossini operas were performed in Vienna between 1816 and 1825, and Sealsfield records that a new Rossini opera at the Kärntnertortheater would produce 'even more excitement than the opening of the Parliament in London' – was followed by a vogue for Donizetti, who, appointed court composer in 1842, provided two new operas for the Kärntnertortheater, *Linda di Chamounix* (1842) and *Maria di Rohan* (1843).

Conservative ('Biedermeier') musicians tended to see themselves as followers of Mozart and the heirs of

Classicism, while the Romantics saw themselves as followers of Beethoven. Both figures were treated by central authors of the Biedermeier period, including Grillparzer and Mörike. In the oration written to be spoken at the unveiling of the monument over Beethoven's grave in 1827, Grillparzer extolled Beethoven as the true inspirational artist; 15 years later, in a poem written at the time of the unveiling of the statue to Mozart in Salzburg, he defined Mozart's 'greatness' in terms of the quintessential Biedermeier virtues of control and moderation. Mörike's short story *Mozart auf der Reise nach Prag*, written in the early 1850s and regarded as a prime example of Biedermeier writing, presents the artist in a setting of happy domesticity. Mozart was revered in traditionalist spirit as the 'Shakespeare of music', but the lack of understanding showed itself in the limited part of the opera repertory devoted to him in Vienna. In 1842 a reviewer of a new production of *Die Zauberflöte*, commenting on the high attendance, remarked that the number of Mozart lovers was generally reckoned to be very low (*Der Humorist*, 13 January 1842).

The juxtaposition of the Romantic and the parodistic, of the spectacular and the trivial, of traditionalism and timid philistinism, is typical of the contradictions of Biedermeier culture. The one common denominator in musical tastes that may be linked with the political climate is an element of escapism. This can readily be detected in the more trivial fashions: the phenomenal popularity of the waltz, inspired by Johann Strauss (i) and Joseph Lanner; the many expressions of sentimental local patriotism in popular songs of the time, which would often be sung to the zither in popular taverns (a number of Viennese examples are included in Eduard Kremser's collection *Wiener Lieder und Tänze*); in the 1840s, a vogue in the commercial theatres for trivial comedies punctuated by slight musical numbers, based on the model of the Parisian *comédie-vaudeville*. But there is also an escapist element underlying more serious trends, including the fondness for both Romantic opera and Romantic ballet: the star dancers (Jules Perrot, Carlotta Grisi, Maria Taglioni, Fanny Elssler) were as popular in Vienna as in the other great capitals. Escapism also underlies the cult of virtuoso performance: Paganini and Liszt were lionized in Vienna, and one of Nestroy's biggest successes, *Einen Jux will er sich machen* (1842), contains a telling satirical allusion to the expensiveness of the recitals that were all the rage.

All this was only part of the Romantic scene. As in literature and the theatre, though major figures may reflect elements of Biedermeier taste (examples commonly cited include some of Schubert's settings of Wilhelm Müller, or again Schumann's *Frauenliebe und -leben*), the undemanding naivety of that taste stands at odds with the tensions, the pre-revolutionary spirit fermenting beneath the surface.

W.E. YATES

**Biego, Paolo** (*fl* 1682–1714). Italian composer, organist and singer. A member of the clergy, he worked at S Marco, Venice, from 12 January 1687 until his death in 1714, as an 'organetto' player and bass singer (promoted to *basso del maestro* in 1690). From 1688 to 1698 he was *maestro di coro* of the Venetian Ospedale dei Darelitti. At least two operas by him were staged in Venice; he may be the Don Paolo who sang at the Teatro S Giovanni Grisostomo there in 1682 and 1684.

LORENZO BIANCONI/JENNIFER WILLIAMS BROWN

**Biehle, August Johannes** (*b* Bautzen, 18 June 1870; *d* Bautzen, 4 Jan 1941). German acoustician. After studying at the Dresden Conservatory he became Stadtkantor at Bautzen from 1898 to 1914 (from 1908 with the title of director of church music), where he organized music festivals in 1905, 1907 and 1912. He then went on to study acoustics, especially the acoustics of bells, in which field he was a pioneer, at the Technische Hochschule, Dresden. From 1916 he taught acoustics at the Technische Hochschule, Berlin, becoming professor in 1922. Meanwhile in 1918 he took up a lectureship in church music at the University of Berlin, and in 1920 became adviser on church bells and organs to the Prussian Ministry of Culture. In 1927 he set up the Institut Biehle, under the auspices of the University and the Technische Hochschule, Berlin, for the study of church buildings, organs, bells and acoustics. Further information is given in E.M. Müller, ed.: *Festschrift Johannes Biehle* (Leipzig, 1930).

MALCOLM TURNER

**Biel, Michael von** (*b* Hamburg, 30 June 1937). German composer. After leaving school in Canterbury, England, Biel abandoned his business training in order to study the piano, theory and composition at the University of Toronto (1956–7). He went on to study privately in Vienna (1958–60), in New York with Feldman (1960) and in London with Cardew (1961–2). In 1961 he began attending the Darmstadt summer school where he won the first prize for composition (*Book for Three*) in 1962. He moved to Cologne in 1963, to create *Fassung* for four groups of loudspeakers (1963) in the electronic studio of WDR. From 1965 to 1966 he served as composer-in-residence at SUNY, Buffalo. His 'American experience' led, in the mid-1960s, to an engagement with the ideas of Fluxus, resulting in the creation of 'concert actions', musical 'happenings' and 'world pieces' that paid considerable attention to the circumstances of performance. After studying with Joseph Beuys at the Düsseldorf Kunstakademie (1968–9), Biel turned the majority of his creative energy to the field of graphic design. Since the mid-1970s he has composed series or cycles of works particularly for solo instruments. While his early works (such as the String Quartet no.2) are concerned primarily with the analysis of musical material, more recent compositions – especially those written for guitar or piano – are postmodern, freely exploiting tradition, reflecting personal and period styles and seeking engagement with pop and entertainment music. The process of composition becomes the process of summarizing and assimilating music history. In spite of the composer's stylistic changes, one central principle has remained constant throughout his career: Biel conceives of his activity as process oriented. Improvisation plays such an important role in performance that he considers even completed compositions to be open and subject to change.

HANS-JOACHIM WAGNER

**Bieling, Franz Ignaz** (*b* after 1700; *d* Kempten, 14 Aug 1757). German organist and composer. He was a court musician in the service of the Prince-Abbot of Kempten. In 1731 he married there in the collegiate church of St Lorenz. Two works by him were published by Lotter in Augsburg: *X Ariae de Deo & Sanctis, ad modernum stylum elaboratae* (1729), and *VI Lytaniae Lauretanae de B.V. Maria, cum annexis II Te Deum laudamus* (1731) for four voices and instruments. These works remained in the publisher's catalogue for two decades.

His son Joseph Ignaz Bieling (*b* Kempten, 7 March 1735; *d* Kempten, 7 Jan 1814) studied logic and possibly theology at Salzburg University in 1752, and while there was a pupil of Leopold Mozart. He married at the church of St Lorenz in 1762. He succeeded his father in the post of court organist, and in addition was Kapellmeister of the Hofmusik and Kammermusik, the last Kapellmeister to the princely court before the secularization of Kempten. Besides writing church music (in *A-ST*, *CH-MÜ*, *SAf*, *D-KPsl*, *Tl* and Kempten civic archives) he composed instrumental works (in *CH-E*), including a harpsichord concerto, as well as theatre music and a setting of a poem by the music director Count Fugger zu Kirchberg und Weissenhorn.

**Bienvenu, Florent** (*b* Rouen, 3 March 1568; *d* Paris, 20 July 1623). French organist and composer. The family name (possibly Norman) was Helbic, but his father Jean, a hospital bursar in Rouen, adopted the French name Bienvenu. The young Florent was presumably influenced there by Titelouze, five years his senior. He became a priest and moved to Laon, where he was cathedral canon, and then to Paris, where he was chaplain and organist at the Ste Chapelle by September 1597. His widowed mother, Marguerite Lefèvre, was also there, and documents regarding a controversy with ecclesiastical authorities about her lodging in 1598 show him to have been strong-willed and independent. He became prominent enough to be asked to test the renovated organs at the abbey of St

Denis in 1604 and at Poitiers in 1612, and he must have supervised the rebuilding of the Ste Chapelle instrument in 1616–20. At his death he owned two spinets, the larger described as his preferred instrument, as well as a clavichord and a five-stop chamber organ by Valeran de Hémant. His pupil Jean Denis called him the finest organist and composer of vocal music of his time (*Traité de l'accord de l'espinette*, Paris, 1643, 2/1650). No music is known today.

BRUCE GUSTAFSON

**Bierdiajew, Walerian** (*b* Grodno, Belorussia, 7 March 1885; *d* Warsaw, 28 Nov 1956). Polish conductor and teacher. He studied with Nikisch and Reger in Leipzig, and made his début as a conductor at Dresden in 1906 with Tchaikovsky's *Yevgeny Onegin*. From that time he appeared as an opera and concert conductor both in Poland and abroad, and was active as a teacher and musical organizer. In 1930 he was appointed conductor of the Warsaw Opera, in 1945 conductor of the Kraków PO, in 1949 conductor of the Poznań Opera, and in 1954 director of the Warsaw Opera. He was a fine interpreter of Classical music, particularly by Beethoven, and he taught a number of leading Polish conductors, including Bohdan Wodiczko, Artur Malawski and Henryk Czyż.

MIECZYSŁAWA HANUSZEWSKA

**Bierey, Gottlob Benedict** (*b* Dresden, 25 July 1772; *d* Breslau [now Wrocław], 5 May 1840). German composer and conductor. He learnt singing, the oboe and the violin at home and studied basso continuo and composition with the Kantor of the Kreuzschule, Christian Ehregott Weinlig. In 1788 he became musical director of the Voigt drama company and in 1790 of the Döbbelin opera company. From 1791 to 1806 he held the same position in Joseph Seconda's company, which toured Dresden, Leipzig, Brunswick and Ballenstedt. He married the singer Sophie de Merell in 1794. Following the successful première of his opera *Wladimir, Fürst von Nowgorod*, commissioned for the Theater an der Wien by its director Prince Esterházy, Bierey became Kapellmeister and musical director of the Breslau Stadttheater in January 1808 and remained there for 20 years, much to the advantage of the city's musical and operatic life. He founded a choral society in 1812 and directed it until 1816. In January 1824 he took over the entire management of the theatre, of which he was also principal musical director, but after attacks from his enemies he resigned both posts in December 1828. Thereafter he divided his time between Leipzig, Weimar, Wiesbaden and Mainz, returning to Breslau in 1834.

Bierey was regarded as a 'skilful, conscientious and artistic conductor' (Mendel and Reissmann). He also won considerable renown as a prolific and versatile composer, and was even described as a 'favourite composer of Germany' (*AMZ*, 31 March 1840). His 30 or so operas and Singspiels, in particular, were popular during his lifetime, but the generally poor quality of their librettos prevented their having any lasting success. For serious opera, he admired and imitated Cherubini, whose influence is perceptible in, for instance, *Wladimir*. This and the delightful Singspiel *Rosette, das Schweizer Hirtenmädchen* are among Bierey's best works and, like most of his pieces, were performed on the leading German stages and in Budapest. Pleasing melodies, skilful ensemble writing and effective instrumentation are characteristic of his music, which unites Classical and early Romantic elements.

DIETER HÄRTWIG

**Biernacki, Nikodem** (*b* Tarnopol, 1826; *d* Sanok, 6 May 1892). Polish violinist and composer. He began learning music from his father and Tonini, an Italian Kapellmeister at the court of Count Konstanty Przeździecki. In 1841 he played in a military band at Czerniowce and later he was Konzertmeister of the Lemberg (now L'vov) theatre orchestra. He studied at the Leipzig Conservatory with Hauptmann (piano and composition) and David (violin), at the same time playing in the opera orchestra. In about 1850 he began a soloist's career, soon making his début at the Gewandhaus and then accepting the post of leader of the Warsaw Opera orchestra. He also made an extensive concert tour of eastern Europe. In autumn 1857 he went to Paris, where he continued his studies with Spohr, H.W. Ernst and Reber and gave concerts, including one at the Salle Pleyel in March 1858. In 1859 he made an extensive tour of Germany, Belgium, Austria and Russia; in 1862 he went to the USA and in 1864 he played at the court of Emperor Maximilian of Mexico. Later he was leader of the royal orchestra in Stockholm. After his return to Poland he settled in Poznań, where he organized a music school, taught and gave concerts until 1886, when he was forced by the occupying German authorities to leave the town. He spent his last years at Chyrów, teaching music at a Jesuit school. His small output, most of it unpublished, includes songs, chamber music and, above all, pieces for the violin.

ELŻBIETA DZIĘBOWSKA

**Biezen, Jan van** (*b* Wassenaar, 22 April 1927). Dutch musicologist. He studied mathematics at the University of Leiden (MSc 1954) and organ with Adriaan Engels; he was a secondary school teacher (1954–72) and organist and choirmaster of the Dutch Reformed Church in Wassenaar (1954–97). He took the doctorate at Utrecht University in 1968, with a dissertation on middle Byzantine Kanon notation. He taught musicology at the Universities of Leiden (1970–89) and Utrecht (1971–88) and was deputy chairman of the Vereniging voor Nederlandse Muziekgeschiedenis (1975–9).

Van Biezen's research is chiefly concerned with aspects of tempo and rhythm (especially in Byzantine and Latin hymns, Genevan psalms, hymns of the Reformation, and 15th-century 'stroke notation'), tuning and temperament, and Dutch organ history. He played a key role in the creation of the *Liedboek voor de Kerken*, the collection of psalms and hymns that has been used in most of the Dutch Reformed churches from its publication in 1973. He has been involved with the restoration of several important organs in the Netherlands, and has written a standard work on the Dutch organ from the 15th century to the 18th (1995). He has also prepared scholarly editions, chiefly of Dutch music from the 16th and 17th centuries.

JOOST VAN GEMERT

**Bifara** [Biffaro]. *See under* ORGAN STOP.

**Bifetto** [Biffetto], **Francesco** (*b* Bergamo; *fl* 1545–61). Italian composer. In Pietro Aaron's *Lucidario* (1545) he is described as an exceptionally good 'cantore a libro', i.e. a singer of polyphonic music. Through the influence of Rore he was engaged as *maestro di cappella* at S Maria Maggiore, Bergamo, on 17 September 1551; he left after a year but returned in 1554 and remained until 1561. He is known by two volumes of four-part madrigals (Venice, 1547, 1548, inc.). They are written in the C signature (*a note nere*) fashionable in the 1540s and include the use of declamatory melodic formulae, with a good deal of internal repetition, particularly in his settings of Ariosto and of other ottava stanzas.

JAMES HAAR

**Biffi, Antonio** [Antonino] (*b* Venice, 1666/7; *d* Venice, early 1733). Italian composer and singer. His approximate date of death derives from a manuscript note (*I-Vnm*), which also states that he was 66 when he died. He is widely supposed to have been a pupil of Legrenzi, but there is no firm evidence. On 6 July 1692 he joined the choir of S Marco, Venice, as a contralto. After barely a week the procurators entrusted him with the task of helping the *maestro di cappella*, G.D. Partenio. On Partenio's death in 1701, he applied for the vacant post together with the *vicemaestro*, C.F. Pollarolo, and the two organists, Antonio Lotti and Benedetto Vinaccesi; he was appointed on 5 February 1702 and held the post until his death, though he may well have been assisted, or replaced, by Antonio Lotti during his last year because of infirmity. He also succeeded Partenio as director and *maestro di coro* of the Conservatorio dei Mendicanti; Giovanni Ferrandini and perhaps D.G. Treu were among his many pupils there.

The style of Biffi's music is in general influenced by the spirited, colourful and expressive music characteristic of the Venetian school. Although this influence is tempered by a restraint typical of the more sober Roman school, he adhered in general to the concertato style, and counterpoint does not play a prominent role in his textures, which, although his output is predominantly sacred, may well have been influenced by secular music.

ARGIA BERTINI

**Biffi, Gioseffo** (*b* Cesena; *fl* 1596–1606). Italian composer. His *Primo libro delle canzonette*, for six voices (Nuremberg, 1596), and his *Madrigali con duoi soprani*, for five voices (Milan, 1598), identify him as *maestro di cappella* for Zsigmond Báthory, and his *Madrigali libro terzo*, for six voices (Nuremberg, 1600), states that he was a composer for Friedrich I, Duke of Württemberg. His *Della ricreatione di Posilipo libro primo*, for three to six voices (Naples, 1606), also survives.

BARBARA KIMBALL ANSBACHER

**Bigaglia, Diogenio** (*b* Venice, *c*1676; *d* Venice, *c*1745). Italian composer. He entered the Benedictine monastery of S Giorgio Maggiore, Venice, on 11 March 1694. He became subdeacon in 1698, priest on 22 August 1700 and deacon on 12 June 1704 (or 1706), and in 1713 he was given the priorate of the monastery. Printed librettos indicate that his oratorios were performed in Bologna, Rimini and Faenza as well as Venice, but few copies of his sacred music have come to light. Large liturgical works for soloists and chorus with continuo or orchestral accompaniment indicate considerable skill; many of the solo motets and solo cantatas, written in a progressive style, are also very fine. In some manuscripts he is identified as Padre Benedettino Bigaglia.

SVEN HANSELL (with OLGA TERMINI)

**Bigard, Barney** [Albany Leon] (*b* New Orleans, 3 March 1906; *d* Culver City, CA, 27 June 1980). American jazz clarinettist. He first learnt to play E♭ clarinet, studying with fellow black jazz musician Lorenzo Tio jr and using an Albert system instrument. Discouraged on the clarinet, he adopted the tenor saxophone and late in 1922 joined Albert Nicholas's band, with which he travelled to Chicago late in 1924. There the two men joined King Oliver at the Plantation Café from February 1925 to March 1927. Bigard recorded with a contingent from Oliver's band and with Oliver.

As Oliver altered his band's personnel, Bigard was occasionally called upon to play the clarinet, which soon became his principal instrument. He also recorded with Jelly Roll Morton and, in April 1927, with Johnny Dodds and Louis Armstrong. He joined Charlie Elgar's group in Milwaukee for the summer and then returned to New York, playing with Luis Russell for two months before joining Duke Ellington at the end of 1927 or the beginning of 1928.

Except for a brief absence in summer 1935, Bigard remained with Ellington until June 1942. During this period he perfected a highly individual clarinet style characterized by a warm tone in all registers, sweeping chromatic runs and long, continuous glissandos. His quickly became a distinctive voice in the Ellington orchestra, and he was prominently featured on hundreds of recordings, most notably on *Clarinet Lament* (*Barney's Concerto*) (1936, Bruns.), which he wrote with Ellington (Bigard also collaborated on *Mood Indigo* (1930, Bruns.), *Ducky Wucky* (1932, Bruns.) and *Saturday Night Function* (1929, Vic.), among others). In addition he recorded with Morton in 1929.

After leaving Ellington, Bigard led his own groups in Los Angeles and New York. His work during the autumn

of 1946 with Louis Armstrong in the film *New Orleans* led to his next important association, as the clarinettist with Armstrong's All Stars. During his long tenure with this group (1947–52, 1953–5, 1960–61) he toured the world. He went into semi-retirement in 1962, but continued to play occasionally at concerts, for recording dates and television appearances, and at numerous jazz festivals, both in the USA and overseas.

LEWIS PORTER

**Bigelow, Michael L.** (*b* Annapolis, MD, 7 Dec 1946). American organ builder. After graduating from the University of Utah with a degree in architecture, he studied organs informally in America and Europe before serving an apprenticeship with John Brombaugh for four years. In 1978 he opened his own workshop in Provo, Utah, to build mechanical-action organs based on historical northern European tonal principles, and in 1984 moved to a larger workshop in American Fork, Utah. A characteristic of some of his smaller two-manual organs is his unique 'either-or' stop action whereby three-position stop knobs allow the organist to use any stop on either of the two manuals, or to put it off altogether. An example of this type of organ, housed in a decorated case of classical design, was built in 1987 for the Mormon Church in Provo. Among Bigelow's larger instruments are those built for First Congregational Church, Oroville, California (1985), Victory Lutheran Church, Mesa, Arizona (1987), and Conception Abbey, Conception, Missouri (1996).

BARBARA OWEN

**Biggs, E(dward George) Power** (*b* Westcliff, Essex, 29 March 1906; *d* Boston, 10 March 1977). American organist of English birth. He studied at the RAM in London. After touring the USA in 1929 as the soloist in an ensemble, he took up residence there in 1930 and became an American citizen in 1937, initially holding church and teaching positions before embracing a career as a recitalist, broadcaster and recording artist that did much to popularize the concert organ and organ music as well as the artist. From 1942 to 1958 he broadcast weekly solo programmes over a nationwide radio network. Originating in the Germanic (now Busch-Reisinger) Museum at Harvard University, these recitals on an Aeolian-Skinner 'classic style' organ brought the sound of organ mixtures, mutations and Baroque reeds, as well as the music itself, to many listeners for the first time. Biggs was meanwhile an indefatigable public performer. A product of both activities was the extensive series of recordings, made in the USA and in many European cities, including the 'Historic Organs of England', the 'Mozart Organ Tour' and the award-winning 'The Glory of Gabrieli', the Handel organ concertos (recorded at Great Packington), various Bach projects, and others with instrumental ensembles. Biggs published editions of early music and performed new works (by Hanson, Piston, Quincy Porter, Sowerby and others, with particular emphasis on those for organ and orchestra). His career was marked, then, by interest in organ music of all eras and in many kinds of organs most suitable to its interpretation, and by unfailing energy in performance. He played with most major American orchestras, and in 1962 joined Catharine Crozier and Virgil Fox in inaugurating the organ at Philharmonic Hall, New York. He was a major contributor to the 'Organ Reform' movement of the mid-20th century.

VERNON GOTWALS/R

**Biggs, (William) Hayes** (*b* Huntsville, AL, 5 May 1957). American composer. He studied at Southwestern [now Rhodes] College, Memphis (BM 1979), the Berkshire Music Center (1981), Southern Methodist University (MM 1982) and Columbia University (DMA 1992). His principal composition teachers included Mario Davidovsky, Jack Beeson, Donald Erb, Donald Freund and Marvin Lamb. He first came to public attention in 1984 with the humorous song *Northeast Reservation Lines*. In 1993 his *Mass for All Saints* was awarded second prize in the 5th Concours International de Musique Sacrée, Festival de Musique Sacrée de Fribourg. It was given its première the following year in Fribourg by the NDR Chor. In 1995 he received a commission from the Fromm Music Foundation to write *When You are Reminded by the Instruments* (1997) for the Parnassus ensemble, New York.

Biggs's experience as a vocal accompanist and choral singer has shaped his approach to text setting. His performances of Gregorian chant and Renaissance motets, in particular, have influenced the rhythmic and contrapuntal suppleness of his instrumental writing. Seeking to integrate tonal and non-tonal elements by means of tight motivic unity, his music also displays a concern for highly variegated and subtly shifting timbres.

DON C. GILLESPIE

**Bignami, Carlo** (*b* Cremona, 6 Dec 1808; *d* Voghera, 2 Oct 1848). Italian violinist, composer and conductor. A pupil of his father Giovanni, also a violinist, as was his elder brother Giacomo, he gave his first public concert in 1819 in Cremona. He then played in theatre orchestras in Cremona and later in Milan; in 1829 he became concert leader and director at the Teatro Sociale in Mantua. From there in 1836 Paganini summoned him to Parma and after a rigid examination gave him a ten-year contract as leader of an orchestra there. After Bignami had resigned his Mantua post, however, it appeared that Paganini had not cleared the appointment with the archduchess Marie-Louise, who rejected it, perhaps partly because Bignami was suspected of liberalism; his fame rests mainly on his having been the innocent cause of this embarrassment to Paganini. In 1837 he returned to Cremona as conductor at the Teatro della Concordia; financial difficulties caused him in 1839 to apply for help to Paganini, who bought him off with 400 francs and a letter of patronizing advice (he was to give recitals in neighbouring towns with piano accompaniment to avoid the expense of an orchestra) and praise (he was 'the greatest violinist in Italy', a phrase which there is no evidence that Paganini meant seriously). A report of a concert that Bignami gave at La Scala with the cellist Alfredo Piatti (*AMZ*, xliii (1841), col.641) describes Piatti as an 'excellent' player and Bignami as a 'respectable' one. Having taken part in the Revolution of 1848, he was forced to flee on foot to Piedmont and died on the trip at an inn near Voghera. He wrote a number of works for violin, of which *Capricci estudi per violono solo* was published.

SERGIO MARTINOTTI

**Bignami, Otello** (*b* Bologna, 6 Aug 1914; *d* Bologna, 1 Dec 1989). Italian violin maker. Originally a violinist, Bignami became interested in violin making towards the end of the 1940s. During the early 1950s he studied with Gaetano Pollastri (1886–1960), who schooled him in the Bolognese violin tradition. A period of intense activity and considerable success followed, with numerous commissions received from Italian conservatories and artists. In 1956 he won the first prize (viola section) of the Accademia di S Cecilia in Rome; in 1957 he obtained the Gold Medal at the Exhibition in Ancona and in 1976 he was awarded the 'gold violin' at the Bagnacavallo competition. From 1979 until 1983 he directed the Violin Making School in Bologna. A natural disposition for teaching ensured his success in this role, for which he was awarded a special prize at the Bagnacavallo Competition in 1979.

Bignami's instruments possess classic Bolognese features and are always coated with a red or golden orange varnish, rich in colour and texture. He was inspired by the Amati style; the tonal qualities of his instruments reflect this and have assured him a world-wide reputation.

ROBERTO REGAZZI

**Bignens, Max** (*b* Zürich, 9 June 1912). Swiss designer. In 1939 he became chief designer and director of the costume workshops at the Berne Stadttheater, moving to the Basle Stadttheater in 1946. After 1952 he began collaborating with the opera houses in Munich, Stuttgart and Frankfurt, becoming chief designer and head of technical and artistic services at Cologne in 1964, where he designed sets and costumes for productions of *La traviata*, Auber's *Fra Diavolo*, *Stiffelio* and *Der Rosenkavalier*, as well as for the première of Zimmermann's *Die Soldaten* (1965). A meeting with the Argentine producer Jorge Lavalli led to a fruitful artistic partnership lasting 15 years. Their production of *Idomeneo* for Jean-Albert Cartier at the Angers Opéra in 1975 won the French Critics' Prize. That year Rolf Liebermann invited them to stage *Faust* at the Paris Opéra, followed by *Pelléas et Mélisande* (1977), *Oedipus rex* (1979) and Rameau's *Dardanus* (1980), and also mounted their La Scala stagings of *L'enfant et les sortilèges* (1976) and *Madama Butterfly* (1980). The Aix Festival invited them for *La traviata* (1976), *Figaro* (1979) and *Zauberflöte* (1989). While he always insisted that he had no specific style, Bignens's hallmarks were the grand scale of his sets, the use of hanging lighting projectors like hair dryers, and the exploitation of each stage to the utmost limits of its technical capabilities. He and Lavalli collaborated in opera productions throughout Europe, including *Carmen* (1979, Brussels), *Norma* (1983, Bonn), *Andrea Chénier* (1986, Bonn), Sutermeister's *Le roi Bérenger* (1985, Munich) and *Salome* (1986, Zürich). Bignens also designed sets for the Comédie Française, and for *Die Entführung* with Everding (1980, Munich), *La fanciulla del West* with Kurt Tscherer (1981, Munich), and Cherubini's *Médée* (1985), *Turandot* (1986) and the beginning of a *Ring* cycle (1990) in Bonn with Jean-Claude Riber.

CHARLES PITT

**Bignetti, Emilio** (*fl* 1671). Italian composer and organist. He was *maestro di cappella* and organist at Prato. He published *Novelli fiori di messe* (Bologna, 1671) for four and five voices with the addition of violins in some of the works. An earlier volume of masses that he is thought to have published in Rome is not extant.

□

**Bigonzi, Giuseppe** (*b* Rome; *fl* 1707–?33). Italian alto castrato. He sang intermittently in Venice (1707–23), appearing in five operas, including works by Albinoni and Michelangelo and Francesco Gasparini, and in Florence (1718–19) in Predieri's *Partenope*. He was probably the 'Biganzo' who according to the Ruspoli account books sang in the Roman Chiesa degl'Agonizanti in June 1715. About 1723, also in Rome, he took the title role in Caldara's oratorio *Santo Stefano*. Engaged for the London season of 1723–4, he arrived on 7 October and made his début in Ariosti's *Vespasiano* at the King's Theatre on 14 January 1724. He sang small parts in Handel's *Giulio Cesare* and Bononcini's *Calfurnia*, but made little mark. He sang in Paris later in 1724, and

probably in Macerata in 1730 and Camerino in 1733. A caricature by A.M. Zanetti in the Cini collection (*I-Vgc*) may represent him as Megabise in M. Gasparini's *Arsace* (Venice, 1718). Another Bigonzi, Giovanni Battista, also an alto, sang at Senigallia in 1709.

WINTON DEAN

**Bigophone** [Bigothphone]. A MIRLITON invented in 1888 by Bigot. A descendant of the EUNUCH-FLUTE, it was made of zinc or cardboard in various shapes, often in the form of orchestral brass instruments. Similar mirlitons were called Varinette, Jazzophone or Cantophone. Bigophones were given literary recognition by André Malraux in *Lunes en papier* (1921).

□

**Bigot, Eugène** (*b* Rennes, 28 Feb 1888; *d* Paris, 17 July 1965). French conductor. After studying the violin and the piano at the Rennes Conservatoire, he entered the Paris Conservatoire in 1905, where his teachers included Xavier Leroux, André Gédalge and Paul Vidal. He was appointed chorus master in the Théâtre des Champs-Elysées in 1913, and then, after World War I, toured Europe with the Ballets Suédois, for whom he composed several works, including *Dansgille* and *La princesse d'Elide*. He conducted the Paris Conservatoire Orchestra from 1923 to 1925 before returning to the Théâtre des Champs-Elysées as musical director (1925–7). Bigot's most important appointments were as president and director of the Concerts Lamoureux (1935–50), as principal conductor of the Opéra-Comique (1936–47), and as a radio conductor. He was responsible for the orchestral and operatic broadcasts of the Compagnie Française de Radiophonie from 1927 to 1935, and from 1947 until his death was principal conductor of the ORTF. From 1947 to 1958 he also directed a conductors' course at the Paris Conservatoire for students of the special foreign section.

Bigot's repertory consisted largely of 19th-century works. He was highly regarded as a conductor of Wagner, Russian music and French composers from Berlioz to Pierné, but he also gave many first performances of new music, including works by Alain, Barraud, Hubeau, Rivier and Sauguet. He was a thoroughly competent conductor, faithful to the composer's score and eschewing all spectacular effects. He also composed numerous instrumental pieces, chamber music, ballet suites and symphonic works.

CHRISTIANE SPIETH-WEISSENBACHER

**Bigot (de Morogues)** [née Kiené], **Marie** (*b* Colmar, 3 March 1786; *d* Paris,16 Sept 1820). Alsatian pianist. At the age of five she moved with her parents to Neuchâtel, Switzerland, where her mother gave her early piano lessons. In 1804 she married Paul Bigot, librarian to Count Razumovsky in Vienna, and thus gained introductions to Haydn, Salieri and Beethoven. On 20 February 1805 she played to Haydn, who exclaimed 'Oh! my dear child, it is not I who wrote that music, it is you!'. In May 1805 she played at the opening concert of the Augarten, encouraged by Beethoven, and Nohl recorded that she played the 'Appassionata' Sonata at sight from the autograph, which Beethoven later gave her. It is clear from Beethoven's correspondence that he was on friendly terms with the Bigots, and Marie also partnered Schuppanzigh in his concerts. There was intense rivalry between Marie Bigot and the eminent piano manufacturer Nanette Streicher .

In 1809 the Bigots moved to Paris, where she came in contact with Cherubini, Baillot and many others; Cramer and Fétis praised her playing highly. Her husband was captured during the Russian campaign of 1812, and the remaining years of her life were devoted to teaching; one of her pupils was the young Mendelssohn. She also published some piano works in Vienna and Paris. Her playing was clearly of exceptional quality. Fétis wrote: 'exquisite feeling gave her a rare understanding of every masterpiece, and enabled her to interpret every kind of expression, and, reaching to her fingertips, gave her playing-style indefinable charm unequalled in her time'.

HUGH MACDONALD

**Big Youth** [Buchanan, Manley Augustus] (*b* Kingston, 19 April 1949). Jamaican DJ and rapper. Born into poverty, his career began in the early 1970s as the resident toaster for the Emperor Lord Tippertone sound system in Kingston. However, it was through his alliance with the producer Keith Hudson that he achieved success. Between 1971 and 1973 in Jamaica he had seven songs in the charts, five of them in the top ten, including his sound-effect driven *S.90 Skank*, named after a Japanese motorcycle. In 1973 he appeared in New York at one of the first major reggae events in America, performing *Every Nigger is a Star*, co-written with the American actor Calvin Lockhart and recorded with Bob Marley's female vocal backing trio, the I Three. In the mid-70s he caused controversy when he attacked Michael Manley's socialist government in the song *Green Killing Bay* (1978).

Big Youth became one of the most influential and emulated DJs. His style was often alive with calls to consciousness and rebellion and was simultaneously humorous and intimidating. Over familiar roots rhythms and foreign pop tunes, his vocal style included shrieks, squeals, shouts and growls, as can be heard on the albums *Screaming Target* (Trojan, 1973) and *Natty Cultural Dread* (Trojan, 1976). Recognized by the red, gold and green jewels embedded in his front teeth, he still recorded and toured sporadically into the 1990s.

ROGER STEFFENS

**Bihari, János** (*b* Nagyabony, Hungary [now Vel'ké Blahovo, Slovakia], bap. 21 Oct 1764; *d* Pest, 26 April 1827). Hungarian violinist and composer. He appeared in Pest in 1801 (or 1802) with his band, which is said to have consisted of four violinists and a cimbalom player. From then on he worked mainly in Pest and soon became widely known.

It was his superb interpretation, not his own music, that was praised in contemporary records. Of the former not even a rough idea can be formed from the three publications (Vienna, 1807–11), which include nearly a quarter of Bihari's surviving Hungarian dances, written down and transcribed by others, perhaps partly by Count János Fáy. When he played to the members of the

Hungarian Parliament in Pozsony, he was praised by the best-known Hungarian paper (*Hazai tudósitások*, 24 November 1811) not as a composer, but as 'a consummate master of the violin'. The only letter in his own hand that has come down to us was written to the palatine in the capital (Buda-Pest) in 1814; in it he referred to his recruitment of soldiers at the time of Napoleon's offensive in 1809, presenting himself not as a composer but as 'a musician well known to the public'.

To Bihari, recital and composition, or reshaping, were probably fairly similar notions, since his own world of music was so close to folk art (doubtless due to his gypsy origins). Some of his compositions were variants of folksongs, others completely original. Many of both these categories have survived as folk music to the present. The genre of which he (together with Lavotta and Csermák, two non-gypsy violin virtuosos) was the most illustrious representative, the recruiting music, the *verbunkos*, had its origin in popular music, more particularly in an energetic male peasant dance which had been performed during recruitment since the mid-18th century. This is the source of the captivating pathos and heroism of the *verbunkos* and of Bihari's music, and of its noble, dance-like character common to his slow and fast movements. Still older were the tunes he used which are probably contemporary with or slightly later than Rákóczi's war of independence (i.e. early 18th century). One of these, a Rákóczi song which was widespread in the 18th century and extant in a number of variants, was amalgamated in about 1810 with the recruiting music to produce the Rákóczi March. Bihari played both the song and the march; it cannot be proved whether the latter was devised by him or another, but it was he who made it most widely known.

All social classes found pleasure in his music, which was halfway between folk music and well-written art music, and in his matchless skill as a performer. Bihari was praised by such poets as Sándor Kisfaludy and Dániel Berzsenyi as well as by Count István Széchenyi; Beethoven heard him play on several occasions in Vienna, and used one of Bihari's tunes in his overture *König Stephan* (1811). In 1814 he played in Vienna during the Congress. In 1815, on Margaret Island, well-born young men performed a stately national dance to his music at one of the Grand Duchess Pavlovna Katharina's festivities. In 1820, on Csepel Island at a great popular spectacle following the military exercises, it was to Bihari's music that peasants performed dances in the presence of the Emperor Franz, Prince Albrecht and other royalty. It was at this time that Baron Podmaniczky sent some pieces by Bihari to Weber. In 1823 Liszt, then still a child, played the Rákóczi March together with compositions by Bihari, Lavotta and Csermák from Ágoston Mohaupt's *verbunkos* collection, which was then published, at one of his Pest concerts. In 1825 Bihari performed at the queen's coronation ceremony and ball in Pozsony, with works of his own composed for that occasion (published in Vienna in 1828, arranged for the guitar by Pfeifer and for the piano by Joseph Czerný). That, however, was during his decline as a performer; in the previous year he had broken his left arm and he was gradually deserted by his former colleagues. He died in poverty.

A large number of compositions by Bihari, who never read or wrote a note, had by that time been published in various Hungarian *verbunkos* collections, written in far simpler notation than that in which their composer played them. His influence was lasting. It can be felt in the character of Liszt's Hungarian Rhapsodies, observed in the formal principles of one type of Erkel's arias, and traced even in the latest published transcriptions and current musical practice.

**Biland, Ambrose.** *See* BEELAND, AMBROSE.

**Bilash, Oleksandr Ivanovych** (*b* Hraduz'k, Poltava region, 6 March 1931). Ukrainian composer. He graduated in 1957 from the Kiev Conservatory where he studied with Vilinsky; he taught at the Kiev Pedagogical Institute from 1956 to 1961. He became vice chairman of the Composers' Union of Ukraine in 1968, then chairman in 1989; he was also chairman of the Kiev branch of the Composers' Union of Ukraine from 1976. He was the recipient of the Shevchenko Prize in 1975. He achieved fame as a very prolific writer of over 200 songs (of both concert and popular variety) which combined elements of traditional Ukrainian folk songs (primarily lyrical), 19th-century romance, 20th-century cabaret and Ukrainian popular choral music. At the height of his popularity (1960–85), Bilash's musical style completely conformed to the tradition of socialist realism, but it possessed a national face: it was very tuneful, exploiting the populist urban quasi-folk manner, and embraced either the sentimental, heroic or dance-like modes. In his operas (and orchestral pieces) the style became more academic but retained its basic naïve quality. The characterization in the stage works were clearly defined, but two-dimensional, while his orchestral style owed much to late 19th-century Russian operatic tradition.

VIRKO BALEY

**Bilbao** (Basq. Bilbo). City in the Basque country of Spain. It was founded in 1300 by Diego López de Haro (*fl* 1295–1310), whose family is known to have patronized *juglares* and troubadours, for instance Pero da Ponte, Raimon Vidal de Besalú and Aimeric de Peguilhan. Two musical chapels existed. The chapel of the convent of S Francisco, built in 1498, ceased its activities in 1851,

when it was demolished after a fire. The Capilla de Santiago, documented as early as 1577 and supported financially by the Ayuntamiento (town council), functioned until 1882, when its last director and organist, Nicolás Ledesma, retired after a 52-year tenure. Important directors were Simón de Huarte Arrizabalaga (*fl* mid-17th century), José de Zaylorda (*c*1688–1779) and Manuel de Gamarra (1723–91). The use of the regional language, Euskera, is documented earlier in the convent church of S Francisco (in 1755 with *Nay duen ezquero sein ederrac* by Martín Jarabeitia) than in the church of Santiago (in 1794 with *O padre amoroso* by Pedro Estorqui, which includes the Basque *zortziko*, *Urte Guztijetaco*). Not much of the music used in the chapels has been preserved. Among the organists, often considered more important than the directors, Joaquín Ojinaga (1719–89) became organist of the cathedrals of Burgos and Toledo and of the Capilla Real.

Musical instruments were imported; in a census from the last years of the 18th century only two organ builders are listed. The organ of Santiago, built in 1662, was rebuilt by the Franciscan friar Domingo de Aguirre in 1710, and renovated in 1792 by Diego de Amezua. It was rebuilt in 1890; work began again on a new organ, by Pellerin & Uys, during the 1990s. The other three churches possessed small organs. S Nicolás, consecrated in 1756, had an organ only when that of the Jesuit Colegio de S Andrés had been transferred to it, the Jesuits having been expelled from Spanish territory in 1767. When the convent church of S Francisco was demolished, its organ was moved to the nearby church of Begoña. Music education took place in the two chapels, but private teachers were active in the town as well. Music was taught at the Colegio de S Nicolás, founded in 1603 to help poor children. For official events the Ayuntamiento maintained three city waits and several *tambolineros* for dance music. The Consulado, an association of local merchants, employed a minstrel until 1713. Most of the waits and minstrels were of foreign origin.

In 1733 amateurs are known to have taken part in the *capilla* of Santiago for the first time. Professional musicians performed chamber music at the gatherings of the Real Sociedad Bascongada de los Amigos del País, a society patronized by Javier María de Munibe, Count of Peñaflorida (1729–85), which met in the nearby villages of Azcoitia, Marquina and Vergara from 1764, and is still in existence. This society, the first in Spain to promote the ideals of the French Enlightenment, regarded musical activities as among its most important objectives. One member functioned as *maestro de capilla*, and several were musicians, mostly from Bilbao. Instrumental music and opera were performed by this ensemble. In 1772 members of the society endorsed the performances of the first Italian opera company to visit the Basque country, that of the impresario Nicolà Setaro.

The musical activities of the Real Sociedad Bascongada provided important support for the regime of Carlos III (reigned 1759–88), organized by his most important counsellor, the Count of Aranda (1719–98). The Count's downfall in 1773 caused these activities to be restricted to private settings. Setaro was captured and tried on false accusations of amorality, and the *maestro de capilla* of the Real Sociedad Bascongada, who also directed the *capilla* of Santiago, was threatened with dismissal. After these incidents the works of musical theatre performed at Bilbao were Spanish *comedias* and *tonadillas*; Italian opera was not given regularly again until the 19th century. Chamber music continued in the houses of such families as the Mazarredo, Torres and Villabaso. This was the setting of the early activities of Michael Rophino Lacy and Juan Crisóstomo de Arriaga. When the royal family of Spain passed through Bilbao in 1845 the Orquesta Filarmónica Vascongada was founded, though its activities remained limited.

Regular performance of musical theatre became possible after the construction of the first public theatre in 1799. The Teatro de la Villa, a free-standing building, was opened in 1834. It was demolished in 1886 and replaced by the present Teatro de Arriaga, whose inauguration in 1890 coincided with a period of major industrial development, rapid population growth and an incipient nationalist movement. Emiliano de Arriaga (1844–1919) and other enthusiasts encouraged the organization of the Sociedad de Cuartetos in 1884 and the founding of the Sociedad Filarmónica in 1896; the latter still offers an excellent chamber music series.

In the mid-19th century the first signs of a choral movement appeared. In 1886 the Orfeón Bilbaíno (later Sociedad Coral de Bilbao) was founded. The admission of women made possible the development of the so-called Basque opera, treating Basque themes and using librettos in Euskera and idealized folk melodies. Most of these operas had their premières in the Teatro Campos Elíseos during the second decade of the 20th century.

During the 1880s Luis Dotesio set up as a publisher of music. His firm became a major publishing house after buying several other small firms and moving to Madrid. Juan Carlos de Gortázar (1864–1926) published the *Revista musical*, a periodical of high quality, from 1909 to 1914.

The Conservatorio Vizcaíno de Música was founded in 1919; its primary goal became the education of musicians for the Orquesta Sinfónica de Bilbao, which was founded in 1922. The orchestra's conversion into a purely municipal institution was an event of the utmost importance in Spanish musical life. From 1959 on the Ayuntamiento shared its patronage with the Diputación, a regional council, and the orchestra suffered notable neglect during the last years of Franco's government (to 1975). It subsisted only thanks to private sponsorship. During the 1980s it was reorganized, concurrent with the city's project of converting itself into a centre of cultural interest, having been deindustrialized. From 1953 the Asociación Bilbaína de Amigos de la Opera maintained a chorus and staged an annual season of opera. The Palacio Euskalduna was inaugurated in 1999 as the new home of the Bilbao SO and the Asociación Bilbaína de Amigos de la Opera.

CARMEN RODRÍGUEZ SUSO

**Bilbao, Beatriz** (*b* Caracas, 8 Dec 1951). Venezuelan composer. She studied composition and choral conducting with Bor and Grau in Caracas. She later studied orchestral conducting with Emil Simon in Romania and composition at the University of Wisconsin with Les Thimmig, and at Indiana University in Bloomington with Juan Orrego-Salas, Eaton and Fred Fox (BA, 1982). On her return to Venezuela in 1982 she started teaching composition and founded several children's choirs in schools in Caracas. In 1990 she was appointed head of the composition department of the Instituto Universitario de Estudios Musicales in Caracas. With the composer Ricardo Teruel and the percussionist Edgar Saume she founded in 1985 the ensemble Ipso-Facto, dedicated to the performance of electro-acoustic and mixed-media compositions. Their joint project, the *Concierto de las tres esferas*, won the Previsora prize in 1989. In 1992 she founded the Arkeom ensemble to develop projects exploring the relationship between the arts. She returned to the United States in 1994 to present her compositions at the Inter-American Composition Workshop of the Indiana University Latin American Music Center and at the Sonidos de las Américas Festival of the American Composers Orchestra in New York.

Bilbao has earned several Venezuelan national composition prizes, and she is considered a leading representative of mixed-media, interdisciplinary and middle-of-the-road trends in her country. By the 1990s she was using indigenous Venezuelan elements in her composition.

CARMEN HELENA TÉLLEZ

**Bildstein, Hieronymus** (*b* Bregenz, *c*1580; *d* in or after 1626). Austrian composer and organist. He came from a respected middle-class family from Bregenz and received his first musical education there, though he probably soon started studying at Konstanz. According to his own testimony he received particular encouragement from Jakob Fugger, an energetic advocate of Catholic reform and the Counter-Reformation, a great patron of the arts and himself a practising musician. Fugger was Prince-Bishop of Konstanz from 1604 to 1626 and made Bildstein court organist immediately after his enthronement. Bildstein was one of a number of prominent organists at important centres in southern Germany, and his reputation as an excellent organist and teacher gradually spread from Meersburg, where the prince-bishop usually resided: in 1604 Ferdinand de Lassus unsuccessfully recommended him as organist to the Hohenzollern court; in 1607 his advice was sought over the building of the large organ in the church of the monastery at Mittelzell on the Reichenau; in 1613 there was close competition between him and Christian Erbach for the position of organ teacher to Heinrich, Lord High Steward of Waldburg; and from 1617 to 1620 a chorister from the Hohenzollern court was his pupil. Prince-Bishop Fugger very early rewarded his 'loyal services' with annual salary rises, which in 1615 became a pension that was to remain valid until the many children born of his marriage (1604) came of age. In return he had to pledge himself to continue in his post at Konstanz and Meersburg until Fugger's death. This occurred in 1626, after which there is no further trace of Bildstein.

His only surviving volume of music is *Orpheus christianus seu Symphoniarum sacrarum prodromus, 5–8 vocum cum basso generali* (Ravensburg, 1624; ed. in DTÖ, cxxii, 1971; cxxvi, 1976). It comprises 25 motets that show him to have been a gifted south German pioneer of the new concertato style. In the preface he mentioned a second collection, *Amphion christianus*, but it presumably either never appeared or is lost; either it or the 1624 volume may be identical with the *Symphoniae sacrae* mentioned in a Freising inventory of 1651. Bildstein's only other extant piece is the five-part motet *Maria Frau, hilf* (ed. in TM, viii, 1972, p.20) in an important Counter-Reformation anthology (RISM 1604[7]); the motet shows that he was also a master of the *stile antico*.

WALTER PASS

**Billart** (*fl* ?*c*1400). French composer. He is known only from the four-voice Marian isorhythmic motet *Salve virgo virginum/Vita via veritas/Salve regina* in *GB-Ob* Can.misc.213 (ed. in Van den Borren, no.24). This is a work of exceptional mensural complexity and repeated harsh dissonances in the upper voices, optimistically described by Van den Borren as giving 'some idea of improvised counterpoint, as it was practised in the fifteenth century'. The top voice has as its text one of the best-known glosses (Chevalier no.18318) on the antiphon used in the tenor. Given the manuscript context and the style of the work, Billart may well be identifiable with

Aubert Billard (Albertus Billardi), a clerk and chaplain at Notre Dame, Paris, from 1392 to 1394.

DAVID FALLOWS

**Billaudot.** French firm of music publishers. It was founded in Paris in 1896 by Louis Billaudot (1871–1936) with his purchase of Editions Alphonse Laurens and initially specialized in choral, band and theatrical music as well as works on the study of harmony. The business was expanded with the publication of new music and the acquisition of other firms: Cordier (1903), Lory (1905), Gobert (1907), Tilliard (1914), Guille (1918), Thomas (1921), Pinatel (1926), Librairie Théâtrale (1929) and, since World War II, Béthune (1945), Costallat (1958), Andrieu (1962), Pierre Noël (1966), Jacquot (1973) and Editions Françaises de Musique (the former publications section of Radio France; 1988).

In the 1920s Robert Billaudot (1910–81) and Gérard Billaudot (1911–86) joined the firm; from 1958 it was run by the latter as Gérard Billaudot Editeur, and from 1979 by his son-in-law François Derveaux (*b* 1940). The firm has specialized since the 1950s in educational publications, including instrumental methods and study notebooks, edited by such musicians as Maurice André, Pierre Pierlot, Daniel-Lesur, Jacques Lancelot, Pierre-Yves Artaud, Jean-Yves Fourmeau and Gérard Caussé; it has also established a substantial instrumental and orchestral catalogue including early French music and the works of many modern and contemporary composers, including Auric, Barraud, Castérède, Clostre, Denisov, Dubois, Dutilleux, Françaix, Ibert, Jolas, Jolivet, Koechlin, Nigg, Ohana, Schmitt, Tailleferre and Tansman as well as representatives of the younger generation including Hurel, Dalbavie, Qigang Chen, Levoux and Escaich. Theatrical publishing and bookselling continues with the Librairie Théâtrale in the place de l'Opéra-Comique. (*Gérard Billaudot Editeur: 1896 Centenaire 1996*, Paris, 1996)

JEREMY DRAKE

**Billeter, (Otto) Bernhard** (*b* Zürich, 26 July 1936). Swiss musicologist and organist. He studied the piano with Grete Hinterhofer and the organ with Anton Heiller at the Hochschule für Musik in Vienna (1958–61) and the piano with Paul Baumgartner at the Basle Music Academy (1962–4). He also studied musicology with Kurt von Fischer at the University of Zürich, where he took the doctorate in 1970 with a dissertation on the harmony of Frank Martin. He was organist at the church of Zürich-Unterstrass (1963–91) and taught a piano class at the Lucerne Conservatory (1969–81). He also taught theory at Zürich University (from 1971) and organ at the Musikhochschule of Zürich (from 1975). He was appointed editor of the *Schweizer musikpädagogische Blätter* in 1984.

Billeter's reputation as an interpreter rests particularly on his performances on historic keyboard instruments, particularly the clavichord and fortepiano, and he was the pianist of the Zürich Piano Quintet, 1967–87. He has, however, achieved great success as an interpreter of the music of Frank Martin, which he has made the subject of two definitive books. He has also done important work on the history and construction of the organ, tuning, 20th-century music theory and the works of Brunner and Rheinberger.

JÜRG STENZL

**Billhon, Jhan de.** *See* BILLON, JHAN DE.

**Billi, Lucio** (*b* Ravenna; *fl* 1601–3). Italian composer. A Camaldolese monk, he was working at Ravenna in 1601 but had moved further down the Adriatic coast to Pesaro the following year. His three published volumes show him to belong to the generation of Giovanni Gabrieli, for they comprise double-choir sacred music and five-part madrigals. The double-choir music is of course provincial: it is simple, lacks Venetian splendour, and uses an eight-part texture rather than Gabrieli's bolder ten or 12 parts, and the word-setting is generally syllabic. However, Gabrieli's concern for formal symmetry is echoed in two of Billi's motets of 1601, which are in ternary form; in one of them the central section is in a lively triple time with sequences. (J. Roche: *North Italian Church Music in the Age of Monteverdi*, Oxford, 1984)

WORKS

Messa e motetti, 8vv, bc, libro primo (Venice, 1601)

2 madrigals, 5vv, in 1604[12]; 1 motet, 8vv, in 1611[1]; 1 mass, 8vv in org tablature, in *D-Mbs*

JEROME ROCHE

**Billings, William** (*b* Boston, 7 Oct 1746; *d* Boston, 26 Sept 1800). American composer and teacher of choral singing. The son of a Boston shopkeeper also named William Billings, he was apprenticed to a tanner following elementary schooling and worked in the leather trade on and off for much of his life. His primary musical education probably came in singing schools (class instruction in music reading and choral singing). In composition he is thought to have been largely self-taught, learning his craft by studying the tune books and choral works of English psalmodists, such as William Tans'ur, Aaron Williams, John Arnold and Uriah Davenport. Later in his career he may also have had some help in the techniques of modulation from Hans Gram, a Danish immigrant musician in Boston.

Billings began teaching singing schools in the Boston area as early as 1769 and quickly gained a high reputation that led him, by 1778, to musical leadership in many of Boston's most fashionable churches. While his teaching centred on Boston, in 1774 he taught as far south as Providence, Rhode Island, and later perhaps as far north as Yarmouth, Maine. On 26 July 1774 Billings married Lucy Swan, who had been a student in his 1774 singing school in Stoughton, Massachusetts. They had nine children, six of whom survived their parents. Although no portrait of Billings is known to exist, he was described by contemporaries as a man of moderate size, with a short leg, one eye, a withered arm, a stentorian voice and a habit of taking enormous amounts of snuff. Still, according to the diarist William Bentley, he spoke, sang and thought as a man above the common abilities.

Billings's physical handicaps did not prevent him from achieving great success as a singing master, and by 1780 he was affluent enough to purchase a house at 89 Newbury Street in Boston and to rent a pew at the Hollis Street Congregational Church. During the American Revolutionary War he supported the patriot cause musically and was friends with such leaders as Samuel Adams and Paul Revere. In 1783 he attempted to broaden his activities by becoming editor of *The Boston Magazine*, a literary publication, but protests from Boston's gentlemen forced his removal from this post after only one issue. In the mid-1780s Billings was active with the Aretinian Society (a choir of accomplished singers) presenting concerts of sacred music in Boston.

The late 1780s saw his financial fortunes decline, because of which he accepted several menial public positions, such as scavenger, hogreeve, and Sealer (inspector) of Leather for the City of Boston, a post he retained until 1797. By 1790 his financial condition was desperate, and Boston choristers arranged a benefit concert on his behalf. Soon afterwards Billings mortgaged his house and attempted to sell all of his music to the publishing firm of Thomas and Andrews, an offer they declined. As an act of charity, Boston's choristers arranged for Thomas and Andrews to publish his final tune book, *The Continental Harmony* (Boston, 1794), and give him the profits, which were probably very small. On 26 March 1795 Billings's wife died, leaving him with six children under the age of 18. His last five years are shrouded in obscurity, and while he probably continued to teach singing schools, all that is known is that upon his death in 1800 he left an estate valued at about $800, principally his house. He is thought to have been buried in an unmarked grave in the Boston Common cemetery.

Billings composed over 340 compositions, almost exclusively sacred choral pieces for four-part unaccompanied chorus, intended for use in singing schools and churches. He composed no instrumental music or solo songs. Most of his works are hymn tunes, but he also composed 51 fuging tunes, 4 canons and 52 anthems and set-pieces. Billings published six collections of his music between 1770 and 1794, with *The New England Psalm-Singer* (Boston, 1770) being the first tune book devoted solely to compositions by a single American composer. In spite of musical and graphical deficiencies, it was widely popular and gained considerable fame for its author. In 1772 Billings attempted to secure copyright for his tune book. Although the Massachusetts legislature passed a bill approving copyright, the royal governor refused to sign it. His most successful tune book was *The Singing Master's Assistant* (Boston, 1778), known as 'Billings's Best', which went through four editions by 1789 and contained many of his most popular pieces. Before the US copyright law of 1790, his music could be freely reprinted, and many of his best pieces appeared in collections of other musicians. After 1790, however, his new pieces were seldom reprinted while his old ones continued to be held in high esteem. *Music in Miniature* (Boston, 1779) contains a group of pieces for congregational singing printed in a small, upright format designed to be bound with a metrical psalter. *The Psalm-Singer's Amusement* (Boston, 1781) has been described as 'Billings's most flamboyant performance' because of the audacity of the music. It contains anthems, fuging tunes and hymn tunes designed to attract and challenge the accomplished singer. *The Suffolk Harmony* (Boston, 1786) provides a set of newer pieces in a more restrained style, some of which were probably intended for use by the Universalist Church. *The Continental Harmony* (Boston, 1794) was, as noted above, published as an act of charity. It is Billings's largest tune book, containing some of his most advanced music, and is considered a 'retrospective compendium of [Billings's] musical achievements' (Kroeger and Nathan, 1977–90). In addition to the six tune books, during the 1780s and 90s Billings issued half a dozen pamphlet-sized booklets containing five anthems, two fuging tunes and two hymn tunes, including *An Anthem for Easter*, his most enduringly popular work. A few pieces first appeared in tune books other than his own, including John Stickney's *The Gentleman and Lady's Musical Companion* (Newburyport, MA, 1774), John Norman's *The Massachusetts Harmony* (Boston, 1784), *The Worcester Collection* (Boston, 1788) and William Norman's *The Boston Collection* (Boston, 1799). Over a dozen pieces are found only in manuscripts (not in Billings's hand) and were unpublished in his day.

Billings was attracted to the poetry of Isaac Watts, and the great majority of the texts he set were taken from Watts's psalms and hymns. Other texts were drawn from Brady and Tate's *A New Version of the Psalms*, the Universalist poets James and John Relly, and local poets such as Mather Byles and Perez Morton. Billings himself wrote about a dozen hymns that he set, modelled on the poetry of Watts. He constructed his anthem texts from various biblical verses, but often interspersed biblical prose with poetry drawn from Watts or which he wrote

himself. He frequently altered the biblical texts to suit his own aesthetic purposes.

Billings used an additive method of composition, akin to techniques found in Renaissance choral music. The principal melody was composed first and assigned to the tenor voice. The bass was added following the rules of consonant counterpoint. The treble (soprano) was then composed to fit consonantly with the tenor and bass, and finally the counter (alto) was written to fill in any missing pitches in the harmony. He advocated doubling the tenor part an octave above with a few trebles and the treble part an octave lower with a few tenors. He recommended that half the voices in the choir be assigned to the bass part. Billings attempted to give each voice an interesting melodic line, passing motifs between the parts to form a generally tightly knit, complex and rhythmically exciting musical structure. He had a great gift for expressive melody, but his contrapuntally derived harmony is sometimes static and does not follow the harmonic principles of Classical art music. In his later works he seems to have made a conscious effort to align his harmonic procedures closer to the norms of his day. He achieved his highest artistic goals in his anthems, many of which are dramatic settings of prose and poetry exceeding ten minutes in length. He enjoyed composing fuging tunes (strophic pieces with at least one section of imitative polyphony having overlapping text) and highly praised the form as having 'more variety in one piece of fuging music, than in twenty pieces of plain song [i.e. hymn tunes]'. He claimed to follow compositional rules that he had devised for himself and encouraged 'every *Composer* to be his own *Carver*'.

Billings was the most talented member of a group of largely self-trained composers who arose in New England during the period 1770–1820. They created an indigenous sacred music intended to be sung by their friends and neighbours that achieved a great popularity. A reform movement, dating from the 1790s but begun in earnest about 1805, suppressed this music and led to a European-orientated repertory. After 1820 little of Billings's music is found in mainstream American sacred music collections, and during the 19th century Billings's music was denigrated as crude in technique and irreverent in spirit. His style and some of his pieces were, however, kept alive by the southern shaped-note singers in the American rural south. Following World War II a new generation of scholars and performers found his music fresh and vigorous, leading to a re-evaluation of his work.

WORKS

Edition: *The Complete Works of William Billings*, ed. K. Kroeger and H. Nathan (Charlottesville, VA, and Boston, 1977–90)

Catalogue: K. Kroeger: *Catalog of the Musical Works of William Billings* (Westport, CT, 1991)

COLLECTIONS

*all published in Boston*

The New-England Psalm-Singer (1770)

The Singing Master's Assistant, or Key to Practical Music (1778/*R*, 4/1786–9)

Music in Miniature (1779)

The Psalm-Singer's Amusement (1781/*R*)

The Suffolk Harmony (1786)

The Continental Harmony (1794/*R*)

KARL KROEGER

**Billington** [née Weichsel], **Elizabeth** (*b* London, 27 Dec 1765; *d* nr Venice, 25 Aug 1818). English soprano. On her death, the *Gentleman's Magazine* described her as 'the most celebrated vocal performer that England ever produced', although it was as a child pianist that she first attracted public notice. Her mother was a singer and her father an oboist; she was taught by him, J.C. Bach and J.S. Schroeter and was playing the piano at her mother's benefit concerts from an early age. She first sang in public in March 1775. Her brother Charles, a year younger than her, appeared with her in these concerts and was to be leader of the orchestra for many of her later operatic performances. She composed two sets of piano music before she was 12. She sang at Oxford in July 1783, and that October married her singing teacher, James Billington. They went to Dublin, where she made her début as Eurydice in an adaptation in English of Gluck's *Orfeo ed Euridice*. At this time, according to Mount Edgcumbe, she was young and pretty with 'a delightful fresh voice of very high compass'. Her first London stage appearance was as Rosetta in a royal command performance of *Love in a Village* (February 1786); she was an instant success, commanding high fees and playing only leading roles. She sang Clara in *The Duenna*, the title role in *Rosina* and Polly in *The Beggar's Opera*, and created parts in works by Shield and others. She sang in London concerts, including the Professional Concert, in oratorio seasons and in provincial festivals. In the Concerts of Ancient Music George III asked that she should be persuaded 'to sing pathetick songs and not to over *grace* them', but Anna Seward wrote that 'she had too much sense to gambol like [Mara] in the sacred songs'. She continued to

improve her technique, working with Michele Mortellari, and with Antonio Sacchini in Paris in 1786. The accuracy of her intonation, the brilliance and taste of her ornaments and the high tessitura of her voice dazzled audiences and impressed the connoisseurs. Burney declared: 'nothing but envy or apathy can hear her without delight'.

The scandal following the publication of the scurrilous *Memoirs of Mrs Billington* in 1792 caused her to leave London and that November there were overflow audiences for her in Dublin. In 1794 the Billingtons, accompanied by her brother, were on the Continent. Here she mastered a new repertory of Italian opera, singing first at Naples, where her husband died suddenly the day after her triumphant début. After two years she embarked with her brother on a highly successful tour of other Italian operatic centres. In Milan she sang with John Braham, was received by Josephine Buonaparte and married her second husband, Felissent. They lived near Venice, but he ill-treated her and she returned to London, where rivalry for her services resulted in her singing alternately at Drury Lane and Covent Garden in 1801–2. From January 1803 she starred in four seasons of Italian opera at the King's Theatre, where for her benefit in 1805 she revived J.C. Bach's *La clemenza di Scipione* and in her 1806 benefit sang Vitellia in *La clemenza di Tito*, the first Mozart opera to be given in London. This was her last season on stage, but she continued to perform regularly in concerts for a few more years, including subscription series she helped organize at Willis's Rooms in 1808 and in 1810. In 1817 she returned with her husband to Italy and there were rumours that he was responsible for her death.

*The Harmonicon* praised her 'inexhaustible fund of ornaments, always elegant, always varying, always extemporaneous: not even a pencil memorandum of what she meant to do was ever in her singing copy', but admitted that later in her career '*Enbonpoint* deprived her of elegance, and even ease of motion'. She was generous to younger singers and Michael Kelly describes her travelling to Bath to sing, for no fee, at Rauzzini's concerts. To Kelly she was 'an angel in beauty, and the Saint Cecilia of song'.

OLIVE BALDWIN, THELMA WILSON

**Billington, Thomas** (*b* Exeter, 1754; *d* ?Tours, ?1832). English composer and music teacher. He described himself as a 'Harpsichord and Singing Master'. His brother James, a double-bass player, was the husband of Elizabeth Billington: another brother, Horace, was an artist of some repute. He was a chorister at Exeter Cathedral and was admitted to the Society of Musicians on 6 April 1777. On 6 May 1783 he sang catches and glees at Covent Garden alongside Reinhold and Champness. He sang in the Handel Commemoration in 1784 and from 1790 to 1792 took part in the annual charity concerts for the clergy at St Paul's Cathedral. He lived and taught for most of his career at 24 Charlotte Street, Rathbone Place, and moved to Sunbury, Middlesex, in 1824. Although the *Gentleman's Magazine* for April 1832 mentions the death in Tunis of 'Thomas Billington, late of Sunbury', his place of death was probably Tours. His will, which was signed 13 September 1827 but not witnessed, was ratified by two of his neighbours, who swore 'acquaintance of the deceased formerly of Sunbury but late of Tours in the kingdom of France'.

Billington began with chamber works, but was soon concentrating on secular cantatas for soloists, chorus and orchestra, and setting poems of consistently high quality, undeterred either by length or by unwieldy decasyllabic lines. *Young's Night Thoughts* (1788) is virtually a secular oratorio in three acts, each with its own overture, and *Pope's Eloisa to Abelard* (1786) is as long, with 366 lines. Billington usually eked out his own fitful invention with borrowed items; *Young's Night Thoughts* includes music by Handel and Arne, *Gray's Elegy* (1784) music by Haydn. His short solo cantatas include three based on Thomson (*The Seasons*) and one on Petrarch (*Laura*, 1790). The fourth of his sets of *Love Canzonets* for one or two voices (1784) includes some 'Observations on Singing' in which it is stated that falsetto is bad for the male voice and French bad for any voice; a list of London's singing teachers is provided. Billington set 30 poems by Shenstone; the six 'pastoral ballads' of 1787 were published with an overture, and of the 24 that appeared about 1795 two have orchestral accompaniment given in full score. This latter publication is one of several that offers a list of Billington's compositions. Billington also arranged concertos by Corelli and Geminiani for organ or harpsichord and some Boccherini quintets for keyboard with violin accompaniment. Pope's *Dying Christian to his Soul* was almost the only poem he ever set that was actually intended for music, or indeed suitable for it. Unsurprisingly, Billington had to publish most of his music at his own expense. (*BDA*)

WORKS

*published in London, not dated*

VOCAL

The Te Deum, Jubilate, Magnificat & Nunc Dimittis, 3vv, op.1

Cants.: Celadon and Amelia (after J. Thomson: *The Seasons*), vv, hpd; The Children in the Wood, S, S, B, insts; Damon & Musidora (after Thomson: *The Seasons*); Gray's Elegy, vv, pf, op.8; Lavinia (after Thomson: *The Seasons*); Laura (after F. Petrarch); Pope's Dying Christian to his Soul, 1v, hp; Pope's Eloisa to Abelard; Pope's Messiah, op.13; The Soldier's Farewell on the Eve of a Battle; Young's Night Thoughts

Ballads: Shenstone's Pastorals, consisting of 24 Ballads, acc. hp/pf; 6 Pastoral Ballads after Shenstone

Glees: A First Set of Glees . . . selected from the Scots Songs, 3–4vv; A Second Set of Glees . . . selected from the Scots Songs, 3–5vv; I Lost my Poor Heart with a Kiss, 3vv; Laura's Wedding Day; The Coast Storm, 4vv

Canzonets: 8 Canzonets peculiarly adapted for Ladies, 1–2vv, pf/hp; A Fourth Set of 12 Love Canzonets . . . to which is added a Sonata, & a Few Hints to Young Vocal Performers, 1–2vv, op.10; Sylvia

Other vocal: Jubilee Songs in Honor of Handel; Be it the god's peculiar care; How rapid how fleeting; A Lovely Rose; Maria's Evening Service to the Virgin; Pope's Elegy to the Memory of an Unfortunate Lady; Prior's Garland; Sterne's Soliloquy on hearing Maria sing her Evening Service to the Virgin, 1v, insts; St George

and the Dragon; Strephon and Sylvia; The Consolation for a Nation's Loss; The Faded Bouquet; The New Storm

INSTRUMENTAL

6 Sonatas, hp/pf, 4 with obbl fl, 2 with obbl vc, op.5
3 Trios, vn, va, vc, op.7
6 Duets, vn, va, op.12
Qt, F, ob, vn, va, vc; Str qt, E♭: both *US-BEm*

Arrs. of works by Boccherini, Corelli, Geminiani, Handel, Haydn, Pleyel, Sammartini, Stamitz

ROGER FISKE/R

**Billon** [Billhon], **Jhan** [Jan, Jehan, Joannes] **de** [du] (*fl* 1534–56). South Netherlandish composer. His *Missa 'Content désir'*, printed by Attaingnant in 1534, parodies Sermisy's chanson, which had appeared from the same press 13 months earlier. The work also exists in a manuscript copied in the middle of the century by the papal scribe Joannes Parvus; this was no doubt the basis for Fétis's claim that Billon was a singer in the papal chapel. However, more recent studies of Vatican musicians have failed to substantiate this hypothesis. Billon's musical style closely resembles that of Jhan Gero and Jacquet de Berchem, maintaining a similar balance of canonic writing, imitation, voice-pairing and chordal passages. His other sacred works, a three-voice *Magnificat* and five motets for two to five voices, were first printed in Paris or Lyons between 1534 and 1553 before being reprinted or copied in Italy and Germany.

The 'Jo. debillon' who set a chanson text by Mellin de Saint-Gelais, *Quand viendra la clarté*, is almost certainly the same composer. Only the bassus part survives, but it is sufficient to show the simple syllabic text-setting, root-position harmony and short, clearly defined phrase-structure typical of the *voix de ville* favoured at Paris in the mid-16th century.

WORKS

Missa 'Content désir', 4vv, 1534[1], *I-Rvat* C.S.154
Magnificat primi toni, 3vv, 1534[8], ed. A. Smijers, *Treize livres de motets parus chez Pierre Attaingnant*, vi (Paris, 1960)
Virgo prudentissima, 5vv, 1539[5], ed. in SCMot, x (1998); Nativitas tua Dei genetrix virgo, 4vv, 1539[10], ed. in SCMot, xi (1998); Constantes estote videbitis auxilium, 5vv, 1542[5], ed. in SCMot (forthcoming); Pleni sunt caeli, 2vv, 1543[19]; Ego Joannes vidi, 5vv, 1553[7]
Quand viendra la clarté, 4vv, 1556[20]

FRANK DOBBINS

**Bilson, Malcolm** (*b* Los Angeles, 24 Oct 1935). American pianist and fortepianist. After receiving his BA from Bard College in 1957, he studied with Grete Hinterhofer at the Akademie für Musik und Darstellende Kunst in Berlin, with Reine Gianoli at the Ecole Normale de Musique in Paris, and with Stanley Fletcher and Webster Aitken at the University of Illinois (DMA 1968). He was appointed to the faculty of Cornell University in 1968, became a full professor in 1976 and the Frederick J. Whiton Professor of Music in 1990. In 1969 he purchased one of the first five-octave fortepianos by Philip Belt, based on a Louis Dulcken original in the Smithsonian Institution, and in 1977 he acquired a copy by Belt of Mozart's Walter concert instrument. Bilson was one of the first artists to make a persuasive case for the use of period instruments in Viennese Classical music. He achieved this through stylish and imaginative performances that took the idiomatic capabilities of the fortepiano as their starting-point; he has played all over the USA and Europe, and given numerous masterclasses. With Sonya Monosoff and John Hsu, he formed the Amadé Trio in 1974 and made several recordings with the ensemble; in 1983 he embarked on an admired complete recording of Mozart's piano concertos with John Eliot Gardiner and the English Baroque Soloists. His solo recordings of Mozart, Haydn, Beethoven and Schubert sonatas have received high praise for the new light they throw on a well-established repertory. More recently Bilson has ventured further into the 19th century, playing works by Schumann, Chopin and other composers on an 1825 Alios Graf piano.

ROBERT WINTER

**Bilstein** [Bilstenius], **Johannes** (*b* Ober- or Niedermarsberg, *c*1560; *d* after 1595). German writer and theologian. During his youth he lived for a time at Emden and in 1581 matriculated at the University of Marburg, but in 1582 he transferred to Rostock, where he studied with David Chyträus. He was again living at Marburg in 1587. In 1588 he matriculated at the University of Basle, where on 15 May 1593 he became a doctor of theology. He gave some lectures at Kassel in 1590. Between 1584 and 1596 he published numerous learned books on grammar, rhetoric and so on, among them *Syntagma Philippo-Rameum artium liberalium* (Basle, 1588, 2/1596), which includes a chapter on music ('De musica', 355–60). In this book, which he wrote for a private pupil at Marburg in ten weeks in 1587, he steered a middle course – as its title suggests – between the views of Philipp Melanchthon and Petrus Ramus. In the chapter on music he subscribed to Ramus's definition 'Musica est ars bene canendi' as well as to the rules for ligatures set out by Friedrich Beurhaus, whose *Musicae erotematum* (first published in 1573) he recommended as a textbook along with Listenius's extremely popular *Musica*.

KLAUS WOLFGANG NIEMÖLLER

**Bimboni, Alberto** (*b* Florence, 24 Aug 1882; New York, 18 June 1960). American composer of Italian birth. He studied at the Cherubini Conservatory in Florence and began his career there as a conductor. As an accompanist he later worked with Caruso, Eugene Ysaÿe and John McCormack; he was also active as an organist. In 1911 he emigrated to the USA, where he toured as a conductor with the Henry Savage Opera Company; he also conducted the Century Opera Company and later appeared at the Havana Opera House. He taught at the Curtis Institute and at the University of Pennsylvania, and for 20 years was conductor of the Chautauqua Opera Association. For the last 26 years of his life he coached French and Italian at the Juilliard School.

Bimboni composed six operas, of which the most important is *Winona*, first performed by the American Grand Opera Company in Portland in 1926. Basing the opera on a Sioux-Dakota legend, Bimboni incorporated melodies which he had either collected from Minnesota Indians or obtained from the Smithsonian collection; overall, however, the opera's music may be likened to the idealized 'Indian style' of his contemporary Charles

Wakefield Cadman. Bimboni was awarded the David Bispham Memorial Medal when the opera was revived in Minneapolis in 1928. He also composed songs, including the collection *Songs of the American Indians* (1917). Further information is given in E.E. Hipsher: 'Alberto Bimboni', *American Opera and its Composers* (Philadelphia, *c*1934); repr. with introduction by H. Earle Johnson (New York, 1978), 72–6.

WORKS

Calandrino (The Fire Worshippers), 1902 (1, after G. Boccaccio), ?unperf.
Fiaschi?! Delitto perpetrato dagli studenti W.C. e Costanzo Arrigoni (operetta-ballo, 3), Florence, 1903
Winona (3, P. Williams), Portland, 11 Nov 1926

THOMAS WARBURTON

**Bimio, Giacomo Filippo.** *See* BIUMI, GIACOMO FILIPPO.

**Bimler, Georg Heinrich.** *See* BÜMLER, GEORG HEINRICH.

**Bi-musicality.** This was first proposed by Ki Mantle Hood who argued that if a scholar's 'desire is to comprehend a particular Oriental musical expression so that his observations and analysis as a musicologist do not prove to be embarrassing, he will have to persist in practical studies until his basic musicianship is secure' (Hood, 1960, p.58). He dismissed 'the argument that an alien musical expression has cultural or racial characteristics which make it inaccessible' (p.55). Intellectually, he was reacting against anthropologists of music and an earlier generation of comparative musicologists who limited their research to 'passive observation, working with informants and museum studies' (p.55). Hood claimed that learning to improvise, 'the crowning achievement' of bi-musicality, involved the assimilation of 'the whole tradition', including 'the related arts . . . language, religion, customs, [and] history' (p.59). The anthropologist Alan Merriam, an advocate of holistic studies of music, remained unconvinced, and criticized scholars' active participation in studying music and performance as 'sandbox ethnomusicology'. He and some others at the time found bi-musicality 'too subjective, too self-indulgent, too unscholarly [and] too much fun' (Titon, 1995, p.289).

Though controversial in the 1960s, the acquisition of bi-musicality through active training and participation in the music making of a second culture has become a standard, useful and largely unproblematic aspect of ethnomusicological fieldwork. In the United States, prefieldwork training in bi-musicality is a feature of graduate programmes at UCLA (which Hood founded) and those started by UCLA graduates at Brown, Florida State, Michigan, Washington and Wesleyan universities. Programmes founded by anthropologists, folklorists, or European comparative musicologists and their students (including Columbia, Illinois, Indiana and Texas) do not emphasize such training, though their students have effectively employed bi-musicality in their research.

In a 1995 issue of the *Journal of American Folklore* devoted to bi-musicality, ethnomusicologists and folklorists advanced Hood's position that bi-musicality led to cultural and social, as well as musical, understanding. Bi-musicality, they claimed, allows ethnomusicologists to enter into realms of feeling, value and social relations opened up by music and to experience them in ways that deepen and amplify the results of observation and explanation.

**Bīṇ (ii).** A North Indian stick zither. *See* VĪṆĀ, §4.

**Bin 'Abd al-Jalīl, 'Abd al-'Azīz** (*b* Meknes, 1931). Moroccan musicologist. After completing his musical training in Morocco and later in Paris (1959), he was appointed director of the Conservatory in Meknes (1979–97). He writes on Moroccan music, focussing on Arab-Andalusian music, known in Morocco as Andalusian-Maghrebian music. He has tried to link the opinion of current practitioners and their colloquial terminology for musical vocabulary to the historical roots preserved in old treatises, which resulted in his publishing a dictionary on Andalusian-Maghrebian music (1992). He has also written about Moroccan countryside music and in his recent publications has turned to the study of Moroccan music manuscripts. He is a member of the Arab Academy of Music.

CHRISTIAN POCHÉ

**Binaghi** [Binago], **Benedetto** (*b* Milan, late 16th century; *d* before 1619). Italian composer. According to the title-page of his *Sacrarum cantionum*, in 1598 he was the organist of S Ambrogio in Settala, near Milan. From 1602 to 1610 he was organist of S Gaudenzio, Novara, and from 1611 *maestro di cappella* of S Maria della Scala, Milan. According to Borsieri, Binaghi left a large number of printed works, notably several books of motets; only two publications, however, along with several individual works in anthologies, are known. Borsieri also indicated that the composer was dead by 1619.

WORKS

Sacrarum cantionum, liber primus, 5vv (Milan, 1598)
Coronae divinarum laudum, liber primus, 3vv (Milan, 1604) [score pubd separately, Milan, 1604]

Sacred vocal works in 1608[13], 1609[20], 1612[9], 1616[2], 1619[3], 1619[4], 1620[2], 1622[2], 1627[1]

MARIANGELA DONÀ

**Binaria** (Lat.). A *ligatura binaria* or ligature comprising two notes. *See* LIGATURE (i).

**Binary form.** A musical structure consisting of two mutually dependent sections of roughly equal duration. It is usually symbolized as *AB*, but often may be better expressed as *AA′*.

1. Definition. 2. To 1700. 3. After 1700.

1. DEFINITION. Binary form is characterized by an articulated movement to another key followed by an articulated return to the tonic. A conclusive arrival on the principal contrasting key (normally the dominant) marks the end of the first section, and is matched by the final return to the tonic at the end of the second half. Each section is usually marked to be repeated. Binary form is generally understood to imply a continuous form in which the harmonically incomplete first half demands continuation. It may also be sectional or composite, however, and contain harmonically complete and thematically distinct first and second halves. In its most characteristic manifestations binary form is associated with Baroque instrumental music, in particular the dance movements of the suite; but so obvious a form was in use long before the Baroque period.

2. TO 1700. The medieval BAR FORM can be classed as a sectional binary form in which only the first part is repeated, giving an *AAB* structure. Even in the early rondeau and other *formes fixes*, in which a complex system of phrase repetition was required by the verse structures, the music itself was often made up of two periods or phrases. With the disappearance of the *formes fixes*, and the development of instrumental music whose shaping owed a good deal to the symmetries of phrases required for dancing, binary movements became more and more frequent.

Some of the keyboard settings from a Venetian collection of about 1520 (*I-Vnm* Ital.iv.1227) illustrate this. *De che le morta la mia signora* has two strains closely corresponding in rhythm, the first in G minor, the second beginning in B♭ and moving back to G minor. No repeats are indicated but they would make good sense. Elsewhere in the collection double bars suggest that repeats should be made (*O Dio, ch'a fatto il ciel con la fortuna*), or such repeats are actually written out (*Margaritum*). Attaingnant's publications of the 1530s contain branles in binary form; an allemande by Claude Gervais (HAM no.137) and Ammerbach's *Wer das Töchterlein haben wil* from the Leipzig *Orgel order Instrument Tablatur* of 1571 are similarly constructed, and partsongs like Anerio's *Al suon* (HAM no.160) and Hassler's *Ach Schatz* (HAM no.165) provide vocal examples. In balletts such as Morley's *My bonny lass* or Weelkes's *Hark, all ye lovely saints*, fa-las provide a textual identity for the close of each section: a comparable musical identity was to become a usual feature of instrumental dances later in the development of the form.

Many dances of the late Renaissance were written in three strains, however, and such pieces are preponderant in a collection like the Fitzwilliam Virginal Book, though galliards by Bull and Philips (nos.17 and 87 respectively) and *Muscadin* (no.19) show the new tendency towards binary form. But the pavan in three strains persisted almost to the end of the 17th century and sarabands and minuets were also occasionally constructed in this way. By the close of the century, however, binary form was usual in the majority of dances.

3. AFTER 1700. In the 18th century sectional binary form continued to appear in folk music and in chorales (for example in Bach's chorale no.38, *Straf mich nicht in deinem Zorn*). It is most commonly found in arias, and may be understood retrospectively as a da capo form that unexpectedly fails to complete itself. This almost always occurs for dramatic reasons, as in Jonathan's 'No, no, cruel father, no!' from Handel's *Saul*, where a lamenting first section in B minor is succeeded by a G major Allegro. Both sections are harmonically closed, leaving the larger structure open; *AB* is clearly a more appropriate designation here. A more complex example is Iole's aria 'My father! ah! methinks I see' from Handel's *Hercules*. In the first section, beginning and ending in C minor, Iole relives the killing of her father by Hercules. The relative major is held in reserve for the second section, in which Iole bids her father rest in peace. Rather than finishing in E♭ major, though, the music clouds over into E♭ minor, implying that Iole's remembrance of the violent death has invaded her thoughts. The close thus reverts to the mode of the first section and creates some sense of rounded shaping to the whole, if in the first instance for dramatic reasons; there are also some subtle thematic recollections from *A*. Handel therefore manages to give both an informal hint of a da capo in terms of mode and material and a sense of coherence to an unusual sectional binary structure.

Simple binary form was the most common type of continuous binary form used in the Baroque period. It is characterized by a broad continuity of manner, with much freedom of detail, and the second section is often at first only loosely thematically related to the first. In the second half of the Courante from Handel's Suite no.6 in G minor, for example, references to the material of the *A* section are sporadic and unsystematic, and although much of the material is new, it is not distinctively so and is similar to the manner of the first part. The two halves are roughly equal in length, creating a large-scale temporal balance that helps secure the coherence of the whole. (This simple continuous binary form is rarely found after the mid-18th century, and it is perhaps for that reason that Schoenberg omitted it from his *Fundamentals of Musical Composition*, implying that it was no longer of use to the student of tonal music.)

Both these aspects of design were subject to alteration. It became increasingly common during the Baroque era for the second half to relate more precisely to the first. In particular, the listener's comprehension of the form was aided by a 'rhyming' of the outer parts of each half. Thus the second half would often begin with a dominant version of the first half's opening unit or phrase, either briefly acknowledged or quoted extensively. An inversion of the material was also common, particularly in gigue movements (see, for instance, the Gigue from Bach's English Suite no.4 in F). In the Allemande from the same work, not only does the material appear in retrograde,

but also the hands swap roles, the left hand now taking the melodic lead. This dominant version of material was often used as a springboard to regaining the tonic, albeit often only briefly before the harmony moved further afield.

The dominant equivalent of the first-half opening was retained as if by force of habit for some time in sonata-form movements, remaining common until the 1780s. In the first movement of Haydn's Sonata no.46 in E, for example, the account of the theme in the dominant is followed immediately by one in the tonic. This acts rather like a false reprise, although it is quickly deflected by a turn towards V of VI. The two features may be seen in conjunction in a simple binary context in the Presto of Benedetto Marcello's Sonata no.2 in G. Occasionally the return to the tonic is still more direct, such as in the Sonata no.21 in A by Seixas (ed. in PM, ser.A, xxxiv, 1980), where the first two bars of the second half are almost identical with the first two bars of the first. With the first half ending unusually in the relative minor, though, the tonic and its initial material are a necessary reference point before further ambitious harmonic journeys can be undertaken. This exposes the underlying premise of this harmonic habit.

Such rhyming could also be found at the ends as well as the beginnings of the respective halves. At first it may have amounted to little more than a correspondence between the respective cadences, as in the Allemande of Froberger's Suite in E minor, but the explicit thematic matching became more extensive, as often the entire final strain of the first half in the dominant was repeated in the tonic at the end of *A′*. This procedure yields the so-called balanced binary form. It is perhaps associated above all with the sonatas of Domenico Scarlatti, where a significant amount of end-rhyme is common. Many binary-form pieces of the period are 'balanced' at both the beginning and the end of the second half.

The end-rhyming form has perhaps received more emphasis (to the extent of earning its own label) because of its apparent anticipation of one of the governing principles of sonata form. That is, it restores to the tonic prominent material originally exposed in another key, making thematically explicit the harmonic structure that underpins the form. Sonata form in fact exemplifies the other principal binary type, rounded binary form. Here the double return creates a discontinuity of design that leads to the perception of three sections in thematic terms, yet the harmonic process remains the same as that found in simple binary form. This conflict between melodic and cadential design leads to a designation of *ABA′* for this binary form. Sonata form does not have to coincide with rounded binary form, however. Chopin's sonata-form movements are closer to the principles of balanced binary form, avoiding as they do the return of the opening material in the tonic but transposing all the important non-tonic material in the last section. On the other hand, there are also many rounded binary movements that are not in sonata form, particularly minuets and scherzos. A representative example is the Minuetto from Clementi's Sonata in A op.10 no.1. Where the first section ends in the tonic, though, the form should be thought of as a sectional rounded binary form: in spite of the firm tonic cadence at the end of *A*, the thematic continuity between first and second sections makes the description 'ternary' misleading (*see* TERNARY FORM). The Minuet of Haydn's String Quartet in E♭ op.20 no.1 provides an instance of this.

The development of rounded binary form is indicative of a trend found also in simple binary form: the tendency for the second half to become longer than the first. A succinct example is the Sarabande of Bach's French Suite in D minor. The first half, a single eight-bar strain moving to a half-cadence on the dominant, is answered by a second half of precisely twice the length. Although there is no rounding of the form as such nor any end-rhyme beyond the rhythmic resemblance of the two final cadential bars, similar impulses are at work. Bach begins *A′* by transferring the melody of the first five bars to the left hand, untransposed, and reharmonizing it with new upper parts; this is part of an eight-bar phrase that cadences on the subdominant. The final eight-bar phrase restores the first five melodic bars to the soprano, but transposes them with slight adaptations up a 5th. The whole of the second section, while obviously maintaining continuity of material with the first part, has the more expansive and somewhat exploratory character typical of this lengthened version of simple binary form.

There was no simple progression from simple to balanced to rounded binary form, however. For a considerable time in the earlier 18th century these types were merely alternative means of structuring an instrumental movement. Bach's Partita no.4 in D, for example, exploits all the resources and nuances of binary construction. A simple binary form can be found in the Minuet, but the minimal end-rhyme found between the left-hand parts of the respective final bars of each half is not enough to constitute a truly balanced form. The second half begins with fresh material, and, although there are two references to the opening melodic unit, neither would justify the description 'rounded' binary form. The second half is much expanded, having 20 bars as opposed to the eight of the *A* section. The Allemande, on the other hand, has nearly equal halves, the first having 24 bars and the second 32, and it is balanced at both ends. The start of the second half provides an equivalent of only the first bar of the piece, with the characteristic flattening of the fourth scale-degree and consequent touching on the tonic, but the end-rhyme is extensive, the final six bars of the first half being transposed at the end of the second. Bach inserts some derived material near the end to create a grander sense of climax. Apart from this, almost every event of *A* is accounted for in *A′*, but is reordered to yield a still larger, if complex, sense of rhyme. The Sarabande, too, is balanced at both ends of the second half, but it also exemplifies rounded binary form, the opening two bars being straightforwardly recapitulated at bars 29–30. After this, though, the music seems to revert to the processes and material of the central section, so that any sense of recapitulation in a later, sonata-form sense is denied. Thus, although seemingly more 'progressive' in its formal essentials, the Sarabande is considerably less concerned with establishing a large-scale equilibrium than the Allemande.

The example of Domenico Scarlatti also reminds us that balanced binary form should not be considered less well developed or less versatile than the rounded form. Scholars have been much preoccupied with the composer's consistency in this formal regard and have failed to do justice to the variety of its realizations. Indeed, Scarlatti can hardly have been aware of the fact that he was using

what we would now define as the subspecies of one historical form. After all, that many subsequent composers consistently employed sonata form in certain movements is hardly a matter for comment. In any case, Scarlatti's sonatas often begin with material that is relatively indeterminate thematically (but certainly not in the force of its expression) and do not arrive at something more clearly shaped, and more 'thematic' in its behaviour (in other words, reiterated as a unit), until the end of the first half. By ensuring, like Chopin later, that this material is accounted for in the tonic at the end, the composer is in fact articulating the same principles of harmonic argument that are evident in rounded binary and sonata forms.

**Binchois** [Binchoys], **Gilles de Bins** [Binch, Binche] **dit** (*b* ?Mons, *c*1400; *d* Soignies, 20 Sept 1460). Franco-Flemish composer. He is one of the three major musical figures from the first half of the 15th century. Modern critics normally rank him behind his contemporaries Du Fay and Dunstaple, for he had none of the legendary influence attributed to Dunstaple and far less music than Du Fay. But the extent to which his works were borrowed, cited, parodied and intabulated in the later 15th century implies that he had more direct influence than either. His composing career was shorter than Du Fay's; but in the musical sources of the 1420s and 1430s his work is more often recopied than that of Du Fay – a notable detail, considering that these sources are mainly from northern Italy, where Du Fay was living, whereas Binchois was in far-away Flanders. He was the only one of the three composers to have had any significant connection with the Burgundian court in the 'Burgundian era'. The years he spent there resulted in a body of work whose consistency of style lends meaning to the concept of a Burgundian tradition in music. All ascriptions for his music read simply 'Binchois' or 'Binchoys', and archival references tend to use that or the forms 'Gilles de Bins' or 'Gilles de Bins dit Binchois' (with varying orthographies); evidently, then, his professional name or sobriquet was simply Binchois, his personal name was Gilles de Bins, and the conflated form 'Gilles Binchois' is a misnomer (though he does appear in the much later theorist Tinctoris twice as 'Egidius Binchois').

1. LIFE. An obit-book of St Vincent, Soignies (Archives de l'Etat, Mons, Obituaire 51, ed. in Demeuldre, 1904), names his parents as Johannes and Johanna de Binche. They are probably to be identified with Jean de Binch (*d* ?1425) and his wife Jeanne, née Paulouche (*d* ?1426), both bourgeois of Mons. Jean was a councillor to Duke Guillaume IV of Hainault and from 1417 to his daughter Jacqueline of Bavaria; he also built a new chapel for the church of St Germain (with provision for daily masses to be said in his memory in perpetuity) and was a councillor of the neighbouring church of Ste Waudru in Mons. So the composer was probably born in the same city as Lassus rather than the town of Binche 16 km away; and he may have received his first musical education around the Mons court which had strong cultural ties with the courts of France and Burgundy. The earliest known documents mentioning the composer are in the accounts of Ste Waudru, where he played the organ from 8 December 1419 (Archives de l'Etat, MS 71) and was registered as 'fil Ghinoit l'orghanistre', '1 jovene homme appelet Binchois liquels jeuwa des dittes orghenes' and 'maistre Ghile l'orghanistre'; on 28 July 1423 'Ghuis l'orghanistre' paid the town of Mons for the privilege of going to live in Lille (Archives de l'Etat, Comptes de la ville, 294, f.9).

Gilles probably trained as a chorister, in which case it may have been at St Germain, Mons, whose choristers also served Ste Waudru. Certainly there is no evidence for the common assertion that he was a chorister at Cambrai Cathedral. It derives from a carelessly phrased sentence in J. Houdoy, *Histoire artistique … de Cambrai* (Lille, 1880/*R*1972, p.83). The Binchois concerned is a Jean de Binche who entered as a chorister on 17 August 1469 and subsequently sang both at the Burgundian court (1472–94) and at 's-Hertogenbosch (1495–1507).

In Ockeghem's *Deploration* for Binchois it is stated that in his youth he was 'soudart/De honnourable mondanité' – an honourably chivalrous soldier. This may have been in the service of William Pole, Earl of Suffolk, who was among the English occupying forces in France. A legal deposition made by one Guillaume Benoit in 1427 concerning a suspected assassination attempt on Duke Philip the Good of Burgundy tells, as peripheral background information, how in 1424 Suffolk commanded 'Binchoiz' to create the rondel *Ainsi que a la foiz m'y souvient*; and the same deposition tells how in April 1425 'Binchoiz' supported the Duke of Burgundy rather than the Duke of Gloucester in an argument against two Norman servants of Suffolk's.

Later in the 1420s Binchois joined the Burgundian court chapel. The precise date cannot be determined since the payment lists between 1419 and 1436 are missing. The first evidence of his presence is in his own motet *Nove cantum melodie* written for the baptism of the short-lived Prince Anthoine of Burgundy on 18 January 1431; its text names the 19 chapel singers, among them Binchois himself. But he must have been there some years earlier since the list of 1436 places him as fifth chaplain in order of seniority within the choir. Moreover the otherwise irrelevant references to Binchois in Benoit's deposition of 1427 suggest that he was already a ducal employee at that time.

Lists of chapel payments show that Binchois did not have a university degree and was not an ordained priest, though he was ordained subdeacon in 1437 (Strohm, 1985, p.153). This was one of the few choirs in which it was possible to be a chaplain without being a priest. Nor was it necessary for him to be a priest to hold his prebends at St Donatian, Bruges (7 January 1430), at Ste Waudru, Mons (17 May 1437), at St Vincent, Soignies (from 1452), and at St Pierre, Cassel (21 May 1459), all of which he retained until his death. These were almost certainly acquired by the collation of the duke, from whom Binchois received further favours: about 1437 he was made an honorary secretary to the court; on 29 May 1438 he was paid for the volume of *Passions en nouvelle*

*maniere* (see work-list); and he seems also to have had some powers as a healer, for in July 1437 he was sent 28 sous to provide for the duchess a ring that cured toothache.

Each day's absence from the choir was scrupulously noted in the court accounts, however, so Binchois cannot have travelled independently much during these years: the prebends were held *in absentia*. But he did visit Mons in March 1449 when he arrived there together with Du Fay for a convocation of the canons of Ste Waudru. This is the only documented meeting of the two composers, though they probably met in Chambéry in February 1434 and could have met frequently in the 1440s when Du Fay was at Cambrai and freer to move as he chose. By an intriguing coincidence, Du Fay's apparent patron Jehan Hubert appears as a witness in many Mons court documents alongside Binchois' father; there is therefore a possibility that the two composers knew one another from an early age.

Soignies was Binchois' retirement home. He was appointed provost of the collegiate church of St Vincent in 1452 and any payments in the Burgundian court accounts after the end of February 1453 have the annotation that he was 'paid even though he was absent'. At his death he was still receiving this extremely generous pension, presumably as a reward for some three decades of distinguished service. During these last years the composers Guillaume Malbecque (an executor of his will) and Johannes Regis, were both present in Soignies, whose musical reputation was then growing such that it was later to be praised by both Lessabaeus (*Hannoniae urbium*, Antwerp, 1534) and Lodovico Guicciardini (*Descrittione di tutti i paesi bassi*, Antwerp, 1567) for its exceptionally fine singing in an age when musicians from this area were in demand throughout Europe. Binchois died there on 20 September 1460, as recorded in his *execution testamentaire* (Archives de l'Etat, Mons, Chapitre de Soignies, 42) that also mentions his brother Andri de Binch, his nieces Catherine and Biétrison, daughters of Ernoul de Binch, and a more distant relation Maigne Tramasure, wife of Aimery Dirich, living in Graty (7 km north-west of Soignies).

2. PORTRAITS. Four alleged portraits of Binchois survive. (1) The illumination in a manuscript of Martin le Franc's *Le champion des dames* prepared at Arras in 1451 (for illustration *see* DU FAY, GUILLAUME). Binchois holds a harp and faces Du Fay who stands by an organetto; Binchois points his hand upwards and Du Fay points downwards. No convincing explanation of this symbolism has been advanced. Both composers are named in the illumination. (2) Jan van Eyck, *Portrait of 'Tymotheos'*, signed and dated 10 October 1432, with the motto 'LEAL SOVVENIR' (fig.1). Panofsky (1949) argued persuasively that this could be Binchois on the thesis that the name Tymotheos might symbolize a musician who extended the range and scope of music (after Timotheus of Miletus) and that of the three major composers of the day only Binchois was at the Burgundian court in the 1430s. But nothing specifically defines the sitter as Binchois; indeed he may even not be a musician since the scroll in his hand contains script, not music. Although this identification has been supported by Lowinsky and Seebass, there must remain doubt so long as there is no convincing explanation for either the odd pseudo-Greek lettering or the antique scuffing of the parapet on which the sitter leans. Other proposed identifications are reported in Campbell (1998).

*1. 'Tymotheos' (perhaps Binchois): portrait by Jan van Eyck, 1432 (National Gallery, London)*

(3) *The Wedding of Philip the Good and Isabelle of Portugal* (otherwise known as *The Hawking Party of Philip the Good*; see Mullally, 1977). The original, formerly attributed to Jan van Eyck, was destroyed by fire in 1608, but late copies are at the Musée National du Château de Versailles (*see* BURGUNDY, fig.3) and the Musée des Beaux-Arts, Dijon (formerly at the Château d'Azay-le-Rideau). Besseler (1959) suggested that the man dressed in black (one of only two in the whole picture who are not in white) could be Binchois. The man is apparently singing with the two ladies and the man who surround him. Besseler asserted that the scroll of music in his hand contained music from the tenor of Binchois' four-voice song, *Filles a marier/Se tu t'en marias*; but this cannot be confirmed, either from the Versailles detail published by Besseler or from the Dijon detail presented here (fig.2). As with the Tymotheos portrait, the arguments lean rather too heavily on the assumption that Binchois was the only eminent musician at the Burgundian court. (4) A funeral monument now in the cloister of St Vincent, Soignies, taken from the body of the church during restoration in the 19th century. Kreps (1960) suggested it was that of Binchois as described in his *execution testamentaire*. The donor kneels between two figures in an annunciation scene. The monument is badly

2. *Detail, perhaps a portrait of Binchois, from the 'Wedding of Philip the Good': late copy of a lost original, ?1430 (Musée des Beaux-Arts, Dijon)*

rubbed and few details remain; the inscription now below it, in pseudo-Gothic script, was made at the suggestion of Kreps and reflects no demonstrable fact.

Doubt is in order for all of these identifications. Only the first can be accepted with any conviction; and manuscript illuminations are not often careful portraits. The most this one tells is that Binchois may have been slightly taller than Du Fay.

Eyewitness descriptions provide another kind of portrait. Martin le Franc wrote (1442) of the composer's self-effacing reaction to the two blind vielle players from Castile:

> J'ay veu Binchois avoir vergogne
> Et soy taire emprez leur rebelle

('I saw Binchois ashamed and silent at their rebec playing'). He contrasted this with the more angry and envious reaction of Du Fay. Ockeghem's *Deploration* described Binchois as 'Le pere de joyeuseté' and 'patron de bonté', adding that he served God 'en humilité'.

3. Reputation and influence. His reputation among writers went hand in hand with that of Du Fay: Martin le Franc twice mentioned the two composers in one breath, and the habit has continued to this day. Simon Greban's *Complainte sur la mort de Jacques Milet* (1466), Guillaume Crétin's *Deploration sur la mort d'Ockeghem* (1497), Jean Molinet's *Naufrage de la Pucelle* and Eloy d'Amerval's *Livre de la deablerie* (probably *c*1490, though printed only in 1508) all mention them together and only Eloy d'Amerval – himself a musician – showed any awareness of the difference between the two.

Binchois is similarly represented in the theoretical and critical writings. Martin le Franc's opinion that the influence of Dunstaple caused Du Fay and Binchois to produce a 'nouvelle pratique' was taken over by Tinctoris (*Proportionale musices*; CSM, xxii/2a, 1978, p.10) who called it an 'ars nova'; the idea appeared again in Sebald Heyden (*De arte canendi*, 1540), Johannes Nucius (*Musices poeticae*, 1613) and even in an inaugural discourse given by the German schoolmaster Joannes Moller (*De musica eiusque excellentia*, 1667, published 1681). In his *Liber de arte contrapuncti* (1477; CSM, xxii/2, 1975, p.12) Tinctoris described Binchois, Dunstaple and Du Fay as the teachers of the next generation; and in the *Proportionale musices* (CSM, xxii/2a, 1978, p.45) he endorsed an unusual mensuration sign in Binchois. His list of ten famous composers in the *Complexus effectuum musices* (CSM, xxii/2, 1975, p.176) appeared again in Hermann Finck (*Practica musica*, 1556), with severe reservations in Adrianus Petit Coclico (*Compendium musices*, 1552), and was the single fact about Binchois relayed in the earliest modern dictionaries of J.G. Walther (1732), Choron and Fayolle (1810) and Gerber (1812). A similar but different list of ten famous composers representing the peak of contrapuntal skill in the anonymous Spanish treatise in *E-E* C.III.23 (*c*1480) included Binchois. But it would seem that the only critic between Martin le Franc and Ficker to remark independently on the music was Gaffurius, who in his *Practica musicae* (1496) observed that Binchois, like Dunstaple, Du Fay and Brassart, was apt to employ a passing dissonance on the *semibrevis*. (The frequently found assertion that Binchois is mentioned in Vincenzo Galilei's *Dialogo* is incorrect and derives from a misreading of a passage in Haberl.)

If his name survived in the literature only alongside that of Du Fay, his music had more of an independent reputation attested by the intabulations of six songs in the Buxheimer Orgelbuch (one of them seven times), by the citation of 11 song titles in the poetry of Jean Molinet (who cited one of them four times), and by other citations in plays and in the poetry of Jean Régnier and John Skelton. The appearance of his *Te Deum* in the choirbooks of Gaffurius at Milan and (with two additional voices) in the Segovia Cathedral manuscript gives it a longer active life than almost any work of its generation. Tenor lines were abstracted from two (possibly three) of his songs to make basse danses; and the tenor of *Vostre tres doulx* appears in two English sources in contexts that suggest it was used as a basis for improvisation. His songs were used for four mass cycles of the mid-15th century: Ockeghem's *Missa 'De plus en plus'*, Bedyngham's *Missa 'Dueil angoisseux'*, the anonymous mass *Se tu t'en marias* and the anonymous mass-motet cycle *Esclave puist il devenir*. The subsequent generation made extensive use of three pieces that may not be by Binchois: *Tout a par moy* (possibly by Frye), *Je ne vis oncques* (possibly by Du Fay) and *Comme femme desconfortée* (thought by Rehm to be unauthentic). But if they are his – and the evidence of the sources suggests that all three are – Binchois' song tenors provided the material for no fewer than seven works by Agricola, and three each by Josquin and Ghiselin as well as other works by Brumel, Tinctoris, Obrecht and Isaac. The latest Renaissance setting of a Binchois tenor

is probably in the motet *Ave rosa sine spinis* by Senfl who may have known the tenor of *Comme femme* only through its use in Josquin's *Stabat mater*.

Nevertheless the finest tribute came at his death in the form of laments by his two greatest surviving contemporaries. Ockeghem's *Mort tu as navré de ton dart* contains more biographical information than any other single source. It is a ballade written at a time when ballades were almost extinct, and it adds a fragment of the Requiem Mass in the tenor towards the end. At the opening, before the entry of the French text, the three lower voices have a section texted 'Miserere', as though quoting from a work of Binchois, though no such quote can be located. Du Fay's magnificent rondeau *En triumphant de Cruel Dueil* must date from around 1460, has a text lamenting the loss of a friend, and contains the words 'Dueil Angoisseux' and 'Triste Plaisir'. Du Fay must have known these two most successful of Binchois songs, and their presence here can hardly be a coincidence. The most reasonable explanation is that this song, too, was written to commemorate the composer who embodied Burgundian music.

Surviving sources of information are clear in their estimate of Binchois. He was always numbered among the great composers. The musical sources of the 1420s and 1430s appear to suggest that in those years Binchois was rather more valued than Du Fay: even though Du Fay was in Italy, where most of these manuscripts were copied, it is the works of Binchois that more often appear in multiple copies during these years. In the later 15th century his works are far more quoted and borrowed than those of Du Fay and Dunstaple. Tinctoris (CSM, xxii/2a, 1978, p.45) said that his immortality was ensured by his 'compositione jocundissima' ('most joyful composition'), but the music itself does not fully endorse the remark which may simply be a paraphrase of Ockeghem's description of him as 'pere de joyeuseté'.

4. Binchois and England. Several writers suggest that Binchois may have visited England with either Suffolk or Gloucester, but the evidence is to the contrary. Suffolk did not return to England until 1432, by which time Binchois was permanently employed by the Duke of Burgundy. A letter written by Gloucester's third wife, Jacqueline of Bavaria, from Valenciennes (Rehm, 1957, p.5*, incorrectly states that it was from England) on 23 November 1428 mentions a 'Binchois': but the references in Guillaume Benoit's testimony of 1427 suggest that Binchois was already at the Burgundian court by then.

Despite this, he would have known English music well. Martin le Franc in *Le champion des dames* (1442) told how Binchois and Du Fay developed a new style by following Dunstaple and taking on the *contenance angloise*. That the work of Binchois shows no stylistic change comparable to that identified by Besseler (1950) in the work of Du Fay may be merely because Binchois would have come across English music rather earlier than the colleague who was making his career in Italy. The English occupation of France brought with it English singers and English liturgies; if he worked for Suffolk in 1424 Binchois would have had direct contact with English music.

Insular characteristics often appear in his music: clear cases of this are the Sarum antiphon for *In exitu Israel*, the use of a favoured English text for *Ave regina celorum* and the general pauses in *Gloria laus et honor*. In addition the *Kyrie feriale* and the paired *Sanctus–Agnus feriale* bear a family resemblance to the *Missa ferialis* in *GB-Lbl* Eg.3307; and the section from 'Visibilium' to 'omnia facta sunt' of his Credo K18 appears identically as the verse of the English carol *Pray for us* (ed. in MB, iv, 1952, no.106) – though in this last case there may be room for wondering whether the Credo is really by Binchois. Other manifestations of English style in Binchois were tentatively mentioned by Harrison (1958) and have been fully explored by Peter Wright (in Kirkman and Slavin, 2000). The discussion in Kenney (1964) is an interesting attempt to define the Binchois song style and draw parallels with the English carol repertory; but it treats Binchois as though he were a contemporary of Walter Frye, rather than a leader of the preceding generation, and it makes much of the conflicting ascriptions of Binchois' works to English composers, while omitting to mention those to Du Fay, Grossin and Clibano. Such matters are easily overstressed; and they are extremely difficult to interpret with any precision. Some of the pieces may actually be by English composers and only mistakenly ascribed to Binchois, but it is dangerous to use style as a criterion for attribution in that repertory. Moreover, the city of Bruges, where the Burgundian court often resided, was a vital point of both commercial and cultural interchange between England and the continental mainland; several other composers from that area show bafflingly English details in their style. Some writers refer to the chant paraphrase in the middle voice of two hymns and a Kyrie as being in the English style: indeed it is, but the same is found in two hymns, a Kyrie and a sequence by Du Fay. If these are exclusively English fingerprints – and evidence has yet to be brought to prove it – then they merely confirm Martin le Franc's testimony that both composers were influenced by English music.

The two works of Binchois which were demonstrably known in England are songs. *Vostre tres doulx* is mentioned twice in the works of John Skelton, and its tenor appears in two English manuscripts. *Dueil angoisseus* was used for a mass cycle by Bedyngham who may never have left England; and the song itself has so many characteristics of English style that it would be tempting to doubt his authorship were it not that it is ascribed (as is *Vostre tres doulx*) in the most authoritative of all Binchois manuscripts and sets a poem by Christine de Pizan. In such cases interchange of ideas between English and continental musicians seems clear, as indeed it was inevitable, even though evidence of its influence on subsequent English music is negligible.

5. Transmission of his works. Although music of Binchois appears in over 50 manuscripts of the 15th century, the survival of many pieces in only one source implies a substantial loss over the centuries. The very diversity of format in his smaller sacred pieces, for instance, gives reason to suspect that more is buried in the anonymity of Trent codices 90 and 88. In this way history has perhaps favoured Binchois less than Du Fay, who spent much of his active life in that part of Europe where most of the major surviving manuscripts were prepared.

Binchois the songwriter is most strongly represented in *GB-Ob* Canon.misc.213 (copied probably between 1428 and 1436), which contains nearly half of his secular music, most of it ascribed to him in that source only; since several of the Binchois ascriptions are over erasures it is

possible (as Schoop suggested) that the manuscript was revised by somebody close to the composer. *I-TRmn* 92 and the related manuscript *AO* 15 are similarly responsible for most of the mass sections while the *Magnificat* settings and smaller sacred pieces are mostly in *MOe* α.X.1.11. These four manuscripts, which account for most of what is known of his work, were copied in Italy, far from the Burgundian court where he spent his life.

In the few surviving northern sources he is poorly represented. The Cambrai choirbooks (*F-CA* 6 and 11) contain only five Binchois works between them. The chansonnier *E-E* V.III.24 (EscA), written in the north, has excellent readings but unfortunately very few ascriptions, and may thus contain more Binchois songs than we now know (see Kemp, 1990). A northern-looking hand of unusual authority added two Binchois pieces (*Kyrie 'Cunctipotens'* and *Magnificat primi toni*) to an otherwise Italian manuscript, *I-Bu* 2216.

Northern origin seems probable for an extremely important source, *D-Mbs* Ms. Galloram monacensis 902, a fragment of four parchment bifolia containing 11 songs, some more complete than others. Eight are ascribed 'binchois'. For the other three, the facing page which would contain the ascription is missing, though one of them, *Margarite fleur de valeur*, is ascribed to Binchois elsewhere. The remaining two songs are included below as probable works of Binchois on the grounds that the collection is apparently exclusively of his work. None of the songs in *GB-Ob* 213 is found in this Munich fragment, which may therefore contain a later repertory, perhaps from 1435–40. Such a hypothesis provides a guide to a chronology of his songs and makes it easier to see how in the early 1450s he could have written more complex works such as *Comme femme*, *Je ne vis oncques*, *Tout a par moy* and the textless rondeau found in the Schedelsches Liederbuch (*D-Mbs* Cgm 810).

6. SECULAR WORKS. Binchois belongs to the first generation of composers for whom the rondeau was the dominant form in secular song. For the rest of the 15th century over three-quarters of the polyphonic song repertory was to be in rondeau form. In Binchois this concentration is matched by a restriction to four- and five-line stanzas, which appear in approximately equal proportions. (*Comme femme* is his only rondeau with a six-line stanza.) Over three-quarters of his rondeaux have an eight-syllable line. Add to this that all but one of the songs are in triple time, and a picture emerges of a singular restriction in external stylistic features.

Courtly manners and traditions inform not only the musical form but the poetic content. Whereas the songs of his contemporaries include May Day songs, New Year's Day songs, songs to celebrate an occasion and whimsical spoof songs, those of Binchois almost always remain firmly within the strictest courtly conventions. The Burgundian court was reputed to be the embodiment of courtly tradition; and Binchois supplied what was expected of him. *Filles a marier/Se tu t'en marias* is well outside this boundary, of course, but it is alone. Otherwise the nearest thing to an infringement is the mildly obscene *Je ne pouroye estre joyeux*; but even this remains far closer to the court code than do the equivalent songs of Du Fay or Hugo de Lantins.

His use of textures is also more restricted than that of his contemporaries. Many Du Fay songs are clearly designed to be sung by several voices, whereas little of Binchois seems suited to having more than one voice texted. For him a song almost invariably has a discantus which carries the text (sometimes with an untexted introduction), a tenor in longer notes a 5th lower in range, and a contratenor normally in the same range as the tenor but sometimes a little lower. Deviations from this format are rare, just as the textural experiments with overlapping voices so common in Du Fay's songs do not seem to have appealed so much to Binchois.

Over all his contemporaries Binchois excelled in an effortlessness of melody. This is found not only in the unforgettable grace of *De plus en plus* or the restrained elegance of *Mon cuer chante* but more tangibly in the carefully balanced phrases of *Adieu jusques je vous revoye*. His melodic style is a relatively simple one involving an almost complete absence of hemiola or rhythmic intricacy. Any rhythmic displacement is confined to the lower parts and is normally restricted to a simple hemiola pattern; rhythmic complexity is apt to come only in the coda (as in *Vostre tres doulx*). His melodies are also characterized by a tendency for iambic or trochaic patterns to underlie apparently more complex rhythmic schemes. Most striking is the extreme economy of material, which led Reese to describe *Adieu m'amour* as 'a mere perfunctory stringing together of cadence formulas', but which when seen in the context of a careful deployment of cadential pitches, a precise balance of phrase lengths, a wide range of passing dissonances and a precisely calculated melodic peak is merely another aspect of the restrained but refined courtly tradition within which Binchois worked.

In line with this melodic perfection is a classic approach to balance. Rehm noted how many of the songs are symmetrical, in terms of their length, about the midpoint cadence. This tendency may be coincidental, and becomes less common in the later works. But in stanzas of five lines Binchois often inserted an extra untexted line as though to restore the balance between the sections. Occasionally, too, it is this added, untexted line that contains the melodic peak of the song (as in *Adieu adieu*, *Jamais tant*, *Je me recommande*). It is as though the poetic form was much less important than the musical design: for it is in Binchois that matching of melodic material sometimes specifically contradicts the rhyme scheme of the poem, as in *Amours et souvenir* where a poetic scheme of *abba* is set by music in the form $ABA^{1}B^{1}$. Whatever the reasons, Binchois is one of the few composers from the 15th century in whose music the poetic form of a song cannot always be deduced correctly from the music alone.

So also, there is a concern for keeping musical form free of the shackles imposed by the poetic *formes fixes*. The untexted prelude and postlude to *Je ne pouroye* are identical and imply that the music should continue nonstop in cyclic fashion; and the sectional nature of the rondeau form is thereby avoided. Similar short cuts can be found in several other Binchois songs. The idea may have come from the famous 'circle rondeau' of Baude Cordier, several of whose works anticipate the style of Binchois. Alongside that phenomenon, and perhaps for the same reasons, is Binchois' odd approach to tonal centres: most famously in *De plus en plus*, but also in many of his other songs, the final pitch can be almost impossible to predict from what has gone before (see Slavin in Kirkman and Slavin, 2000).

7. SACRED WORKS. Neither the chronology nor the stylistic profile of the songs can be extended to apply to

the sacred music. As is perhaps inevitable for a composer so deeply committed to fulfilling specific functions, the different categories of his work are markedly different in style. The octave-leap cadence which is found in practically all his songs appears seldom in the sacred music. Major prolation, so common in the early songs, appears but twice in the sacred music, and then just to mark the contrast between sections. With one exception, *tempus perfectum diminutum* is found only in the multi-sectional sacred works (see Bent, 1996). The precious symmetry of the songs gives way in the mass movements to a discursive structure in which sections are contrasted by changes of texture, range and mensuration.

Before the publication of Kaye's edition of the sacred music (1991), several writers tended to portray Binchois as primarily a song composer; that view does not correspond to either the relative quantity of his works in the various categories or the greater variety of styles and techniques found in his sacred music. According to such criteria, the mass movements are at the centre of his artistic world. Here there is a more freely articulated flow of melodic and rhythmic invention. The lower parts move more independently: their large melodic leaps, long held notes and attention-seeking patterns contrast strongly with the gentle passive accompaniments to the songs. His Credo settings include some of the longest works of their generation.

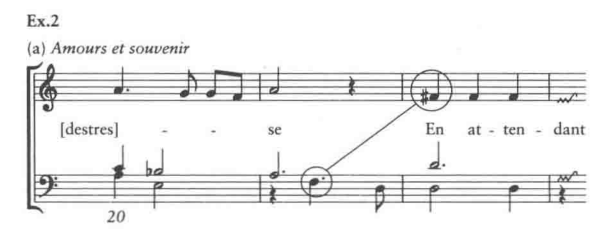
No complete cyclic mass by Binchois survives. Even though Feininger and Parris have attempted to deduce cycles from the scattered movements, none can be established with any of the kind of coherence found in the contemporary cycles of Du Fay, Dunstaple, Power, Grossin, Reson, Liebert, Johannes de Lymburgia and Arnold de Lantins, nor even that of the 14th-century cycles. Only pairs survive. These are united not by a common tenor or motto opening, but by more general stylistic features. Moreover, there is room for a reconsideration of how composers in the 1420s planned their pairing of mass movements: three independent manuscripts of high authority (*GB-Ob* Canon.misc.213, *I-Bc* Q15, *TRmp* 92) pair the Gloria K1a with the very different Credo K19; the much more closely matched Credo in the two Cambrai manuscripts and elsewhere in *TRmp* 92 (all probably after 1440) may well have been written much later to fit in with different attitudes to pairing.

In the mass movements, as in his other sacred pieces, chant is used as a basis for melodic paraphrase but apparently never as a structural foundation in the form of a long-note cantus firmus. (The few long-note tenors, *Kyrie feriale*, *Nove cantum melodie* and *Veneremur virginem*, have not been traced in the Gregorian repertory.) Thus for all their increased freedom in relation to the songs, his mass movements show a conservative manner in their outward shape.

Binchois wrote only one isorhythmic motet in an age when Du Fay and Dunstaple employed the form for their most dazzling technical displays. But the pattern is clear: his sacred music, apart from the Mass Ordinary settings, is mostly simple in style. Expansive writing appears in only two other motets, *Veneremur virginem* and *Domitor Hectoris*. The longer votive motet, so popular with the English composers and with Johannes de Lymburgia, is almost entirely absent: four of those ascribed to Binchois are more convincingly ascribed elsewhere to English composers, and the fifth, *Inter natos mulierum* (second setting, K42), leaves many hints that it too is the work of an Englishman. These considerations suggest that the Burgundian court chapel was less festive and ambitious than its emulators in the south and less longwinded in its devotions than the more pretentious English establishments.

Thus also in Binchois there is also a large amount of extremely simple service music in a homophonic style, often based on melodies of the Parisian rite that was favoured at the court of Burgundy. In terms of contrapuntal complexity his *Magnificat* settings are positively ascetic, even when compared with the relatively simple settings by Du Fay and Dunstaple. In many such pieces fauxbourdon style is the norm, although sometimes the inner part is written out in full and shows a modicum of independence in its figuration. The most appropriate comparison is with similar works by Brassart and Johannes de Lymburgia; and in this context Binchois excels with his declamation rather than his counterpoint. Even with slightly more ambitious works, such as the *Sanctus* and *Agnus feriale*, and the *Magnificat secundi toni*, the counterpoint is severely functional, almost defensive in its manner. Comparison of the two versions of *Asperges me* shows that his main concerns were declamation and the contour of the chant paraphrase in the discantus.

Characteristic of the composer who so frequently spurned contrapuntal sophistication in favour of a supple word-setting is his tendency to cadence an otherwise regular piece on an unexpected beat. *In exitu Israel* consistently cadences in a manner that implies a lengthening of the last bar in a triple-time section to four beats; and the same technique is employed in some of his songs.



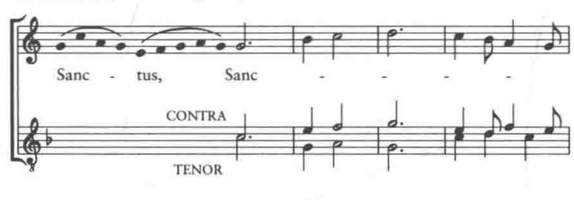
8. STYLE. As a melodist Binchois scarcely had an equal in the 15th century. Ex.1 shows an extreme example of a discantus line shaped from the minimum of material. Its total reliance on conjunct movement is not typical, but it exemplifies a tendency in Binchois' melodic writing. The manner in which the melodic repetitions are at variance

Ex.1

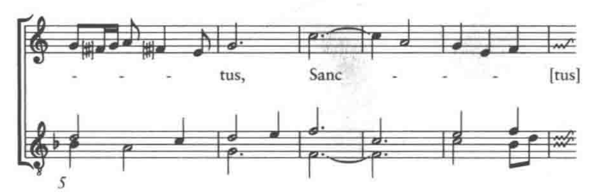
Ex.2

(a) *Amours et souvenir*

(b) *Adieu, jusques*



**Ex.3** Magnificat tercii toni



**Ex.4** Sanctus (*I-TRmn 87, f.33v*)

with the text underlay and with the poetic scheme is absolutely characteristic of Binchois.

Details that recur in his work as both fingerprints of his style and characteristics of his individuality include the apparent 'cross-relations' effect in exx.2*a* and 2*b* as well as the rhythmic figure 'a' in ex.3. These occur repeatedly throughout his work; and while they do not predominate in the same way as the underlying trochaic rhythms (seen in exx.2, 3, 4 and 5), their presence has been used convincingly as an aid to identifying possible Binchois works among the anonymous works of the Escorial chansonnier (see Kemp).

Binchois sometimes seems a crude stylist. In ex.4 the parallel 5ths in bars 2–3 and the unisons in bar 9 are similar to many in the work of Dunstaple and Power; but as the opening gesture of a piece they are a little startling, no doubt intentionally. Parallel 5ths are relatively common in Binchois but occur almost exclusively in a single context: when two parts are moving outwards to a 12th (as in ex.4; but for an exception see ex.3, bar 4). In this manner they are still found in Ockeghem's Requiem (and occasionally even in Josquin); but such progressions were avoided in Du Fay's three-voice music from his earliest years, and it is in that context that the Binchois style seems strange.

Similarly, his dissonance treatment is usually less systematic and detailed than that of Du Fay. Bockholdt (1960, pp.196ff) gave several instances from the sacred music of Binchois where an easily avoided contrapuntal dissonance is nevertheless retained, and often confirmed by several manuscripts of independent authority. Ex.5 shows a frequently found cadential formula in which the internal logic of a single line is seemingly unperturbed by a momentary dissonance in another part. But perhaps the most successful treatment of dissonance is found in such cases as ex.6, where one of the parts is delayed and resolves upwards in a manner that seems characteristic of Binchois.

Any suspicion that Binchois was not aware of the effects of a well-placed dissonance must surely be dispelled in the face of the insinuating manner of this gentle pushing dissonance and many like it. But it is a style that poses problems of understanding and interpretation.

If the details are problematic, the larger form is less so. The interest in overall form manifest in the structural short cuts in the rondeaux and in the mensuration schemes of the larger works is also apparent in the key scheme of several of his songs. Finscher (1958, following a lead from

**Ex.5** *Je loe Amours*

**Ex.6** *Qui veut mesdire*

Besseler) showed how several of them deploy their cadences across the final and fifth degree in a manner that makes the concept of functional tonality seem applicable for the first time in Western music.

The time is not yet ripe for a judicious evaluation of Binchois' position in musical history. Placed alongside Du Fay he inevitably suffers in the face of the inexhaustible range of techniques and ideas in the more cosmopolitan composer; and it is largely in this context that he has received an unkind press from students of 15th-century music. But his work shows no signs of having the same aims as that of Du Fay. The Burgundian court that employed Binchois was by all accounts a home of tradition; and Binchois wrote traditional music for it. His skill lay in how he handled the accepted forms, not in external innovations. The sense of tradition, closely coupled as always with the concept of a paramount 'good taste', resulted in a body of music that keeps fairly closely to a middle road, with nothing outrageous or startling; and from a distance this can look both unadventurous and drab. His music can be considered the classic example of the central tradition in the north, and the aims of his contemporaries and followers are most easily seen in terms of how they accepted or rejected the tradition epitomized by Binchois.

MASS MOVEMENTS

| *Title* | *Sources* | *Editions* | *Chant or pairing* | *Remarks* |
|---|---|---|---|---|
| Kyrie 'angelorum' | *D-Mbs* 14274, *I-AO* (twice), *Bc* Q15, *TRmp* 87 (twice), 90, 92, *TRmp* 93 | K9, F 48; also ed. in Feininger (1949) | Kyrie 'de angelis' (*LU* 37, Mass VIII) in Ct | in *TRmp* 87, f.56*v*: 'Illud Kyrie pertinet ad Et in terra' followed by incipit of Gl K1*a* (below); it is difficult to justify the pairing |
| Kyrie 'apostolorum', 'de martiribus' or 'brevioris perfecta' | *I-AO* twice, *TRmp* 87, 90, *TRmd* 93 | K10, F 49 | Kyrie 'Orbis factor' (*LU* 46, Mass XI) in T | apparently sets only the 5 solo sections of the chant |
| Kyrie [Cunctipotens] | *D-Mbs* 14274, *I-Bu* 2216, *TRmp* 90, *TRmd* 93 | K11, F 65, M 154 | Kyrie 'Cunctipotens' (*LU* 25, Mass IV) paraphrased in Dc | |
| Kyrie 'de domina' or 'de beata Maria' | *AO*, *TRmp* 87 | K12, F 50 | Kyrie 'cum jubilo' (*LU* 40, Mass IX) in Dc | final Ky sections apparently missing |
| Kyrie 'feriale' | *TRmp* 87 (twice), 92 | K13, M 158 | ferial Ky (GS, pl.9*) paraphrased in Dc | perhaps forming 3-section cycle with San and Ag feriale (see below) |
| Kyrie 'in simplici die' | *AO*, *TRmp* 87 | K14, M 156 | T of 1st Ky also used in motet 'Nove cantum melodie' (see below); it is chant-like but has not been identified | presumably connected with either foundation of *Toison d'or* (1429) or baptism of Anthoine (1431), though the setting is the simplest of the Binchois Kyries |
| Paired Gloria and Credo | *F-CA* 6, 11; *GB-Ob* 213, *I-Bc* Q15, *TRmp* 92 (Gl); *F-CA* 6, 11, *I-TRmp* 92 (Cr) | K1*a-b*; B 53 (Gl); M 169 (Cr) | pairing on basis of range, mensuration signs, texture and melodic content; MS authority only in *F-CA* 6 but implied in *CA* 11 | alternates 2vv 'O' with 3vv 'Φ'; in *GB-Ob* 213, *I-Bc* Q15 and *TRmp* 92 Gl is paired with Cr K19, which is quite different in style; Gl ed. in Feininger (1949) |
| Paired Gloria and Credo 'brevioris imperfecta per medium' | *I-AO* (twice), *TRmp* 92 (Gl); *AO* (Cr) | K2*a-b*; F 42 (Gl) | paired in *AO* | title from index of *AO*; Ͼ throughout |
| Paired Gloria 'hominibus' and Credo 'factorem' | *AO* (twice), *TRmp* 87, 92 (Gl); *AO*, *TRmp* 87, 92, *F-CA* 11 (Cr) | K3*a-b*; F 55, 58 | paired in *AO* and *TRmp* 87 | titles from indexes of *AO*, *TRmp* 92; texture alternates high Ct with low, and other sections in 4vv, cf Du Fay's Sanctus 'papale' |
| Gloria | *TRmp* 92 | K16, F 44 | | |
| Gloria | *F-CA* 11, *I-AO*, *TRmp* 87, 92 | K17, M 163 | this and next setting possibly a pair in terms of range, texture, material and tonality; but not of scribal authority | alternating 3vv and 2vv |
| Credo | *TRmp* 92 | K18, M 176 | | alternating 3vv and 2vv; the 2-v music is all in the carol 'Pray for us', ed. in MB, iv (1952), no.106 |

| *Title* | *Sources* | *Editions* | *Chant or pairing* | *Remarks* |
|---|---|---|---|---|
| Credo 'aversi' or 'autenti triti irregularis' (Tinctoris) | *F-CA* 11, *GB-Ob* 213, *I-Bc* Q15, *TRmp* 92 | K19, B 63; also ed. in Feininger (1949) | paired in 3 sources with Gl K1*a*, though not a pair musically | alternating 3vv and 2vv; title 'aversi' from index of *GB-Ob* 213; section 'Qui ex patre Filioque procedit' cited in Tinctoris, *CS*, iv, 170 |
| Paired Sanctus and Agnus | *I-AO*, *TRmp* 90, 92, *TRmd* 93 (San); *AO*, *TRmp* 90, *TRmd* 93 (Ag) | K4*a-b*; F 53, 55 | paired in 3 sources and in use of chants from Mass XV in Dc | |
| Paired Sanctus and Agnus [for low voices] | *AO*, *TRmp* 92 (San); *AO*, *TRmp* 92, *TRmd* 93 (no.1827b, following 1st section of Ag by Ja. de Clibano (Ag); Ag frag. in *B-Bc* 33346 | K5*a-b*; F 51, 53 | paired in 2 sources and in use of chants from Mass XVII in Dc | 3vv except for word 'Osanna' which is 2vv; also ed. in Feininger (1949) as last 2 sections of a Missa 'de angelis' |
| Paired Sanctus and Agnus [feriale] | *AO*, *TRmp* 92 (San); *AO*, *TRmp* 92 (Ag) | K6*a-b*; M 182 (San); F 50 (Ag) | paired in *AO* and in use of chants from Mass XVIII in Dc | fauxbourdon style: perhaps forming 3-section cycle with Ky 'feriale' (see above); opening sections closely related to San in *GB-Lbl* Eg.3307, ed. G. McPeek, *The British Museum Manuscript Egerton 3307* (Oxford, 1963), 51 |
| Paired Sanctus and Agnus | *AO*, *TRmp* 92, *SI-Lnr*71 (San); *I-AO*, *TRmp* 88, 92 (3 times), *SI-Lnr*71 (Ag) | K7*a-b*; M 183 (Ag) | paired in *I-AO* and *SI-Lnr*71 | alternating 3vv and 2vv |
| Paired Sanctus and Agnus | *GB-Ob* Mus.c.60, *I-TRmp* 87 | K8 | San setting with words of Ag also underlaid; San chant from Mass IV lightly embellished in Dc | Kovarik (1973, pp.451–65) made strong case for Eng. origin, pointing in particular to Eng. chant and duo sections |
| Sanctus | *AO*, f.147 | K20 | | only use of C mensuration in his sacred music |
| Agnus Dei | *TRmp* 92 | K21, M 185 | c.f. similar to Ag of Mass IX in higher T | 4vv with middle section in 3vv; 2 voices are marked 'tenor', taking turns to function as structural centre; for almost certain matching San identified by Gozzi, see 'Doubtful works' below |

PSALM AND CANTICLE SETTINGS

| *Title* | *Sources* | *Editions* | *Chant or pairing* | *Remarks* |
|---|---|---|---|---|
| In exitu Israel (Ps cxiii) | *I-Fn* 112bis, *MOe* α.X.1.11 | K40, M 196 | tonus peregrinus (*LU* 160) in Dc; ant, AS, pl.109, in Dc | fauxbourdon style; followed by Sarum ant 'Nos qui vivimus' and liturgically superfluous 'Amen' |
| Magnificat primi toni | *I-Bu* 2216, *MOe*; *Rvat* S Pietro B80 (odd vv. only); *Fn* 112bis (even vv. only); *TRmp* 90 (even vv. only, rev.) | K22, M 131 | *LU* 213 elaborated in Dc | mostly in loose fauxbourdon style; *I-MOe* has dual ascription to Du Fay and Binchois; possibly dual authorship |
| Magnificat secundi toni | *I-Fn* 112bis, *MOe*; *TRmp* 90 (even vv. only); *Rvat* S Pietro B80 (odd vv. only, with 3rd voice added) | K23, M 138 | *LU* 214 elaborated in Dc | verses alternate 2vv and 3vv |
| Magnificat tercii toni | *MOe* (even vv. only) | K24, M 144 | *LU* 215 elaborated in Dc | loose fauxbourdon style |
| Magnificat [quarti toni] | *TRmp* 87 | K25, M 148 | *LU* 216 in Dc | fauxbourdon style |
| Magnificat sexti toni ad omnes versus [= rondeau: Mort en merchy] | *D-Mbs* 14274 | K26, R 32, M 69 | ? *LU* 211 elaborated in Dc, but cadencing at the midpoint on E rather than F | ?contrafactum; 1 stanza of music only; though unlike 15th-century Mag settings, it is even more unlike a rondeau; ascription 'Egidius Pinchoys' |
| Magnificat octavi toni | *I-MOe* (even vv. only) | K27 | *LU* 218 elaborated in Dc | |
| Te Deum laudamus | *I-Md* 2269 (2vv), *MOe*, *Rvat* S Pietro B80, *VEcap* DCCLXI; *E-SE* (vv.1–6, 4vv with newly composed contratenor and bassus) | K48, M 219 | *LU* 1834 in Dc | 2vv + fauxbourdon; earliest polyphonic setting apart from 2 frags. in Eng. sources |

| A solis ortus cardine | *I-AO*, *TRmp* 92, *D-Kl* 4° mus.259 | K28, M 188 | hymn, Christmas | *LU* 400 in Ct | text by Sedulius, Analecta hymnica, 1 (Leipzig, 1907), 58 |
| Asperges me (i) (verse: Miserere mei) | *I-AO*, *TRmp* 87, 90, 92 (with discantus altered to setting ii), *TRmd* 93 | K29 | ant, Mass Ordinary | *LU* 11 in Dc | in *TRmp* 90 and *TRmd* 93 it immediately precedes setting ii |
| Asperges me (ii) (verse: Miserere mei) | *Bc* Q15, *TRmp* 90, *TRmd* 93, *Rvat* S Pietro B80 | K30 | | | an adaptation of K29 |
| Ave corpus Christi carum | [= rondeau: Adieu mes tres belles amours] | K31 | ant 'Ante Christi corpus carum', Corpus Christi | | contrafactum |
| Ave dulce tu frumentum | [= ballade: Je loe Amours] | | versus, Corpus Christi | | full poem scattered among 3 such tenor contrafacta on 2 facing pages in *D-Bsb* 40613 |
| Ave regina celorum | *I-MOe* | K32, M 189 | ant, BVM | *LU* 1864 at beginning only of Dc and T | text has strong Eng. connections, set also in *D-W* 628 [W1]. fasc.xi, *GB-Ob* Selden B26, *Lbl* Add.5665 and by Frye |
| Beata nobis gaudia | *I-TRmp* 92 | K33, M 191 | hymn, Pentecost | *Hymn. aest.* 22 in Dc | text, Analecta hymnica, li (Leipzig, 1908), 97 |
| Da pacem Domine | *D-Mbs* 14274, *I-MOe* | K34, M 192 | ant for peace | *LU* 1867 in Dc | 2vv + fauxbourdon |
| Deo gracias | *TRmp* 92 | K35, M 192 | re, Mass Ordinary | | |
| Dixit sanctus Philippus | *MOe* | K36, M 193 | ant, St Philip | | |
| Domitor Hectoris Paride | *AO* | K37, de Van (1948) | motet, Holy Cross | | Cobin (1978) proposes 1435, for Cardinal Albergati at Peace of Arras; Strohm (1993) proposes 1429 for 10th anniversary of death of John the Fearless |
| Felix namque es | *AO*, *MOe* | K38 | off, Mass of BVM | not related to *LU* 1271, and not nearly so intricate as that cited by Hamm and Scott (1972) | |
| Gloria laus et honor (verse: Israel es tu rex) | *TRmp* 87 | K39, M 194 | hymn, Palm Sunday | GS, pl.83, in Dc; related to *LU* 586 | refrain 3vv; verses 2vv; text by Theodulf, Bishop of Orleans, Analecta hymnica, 1, 160 |
| Inter natos mulierum (i) | *TRmp* 87 | K41, M 209 | psalm ant, St John the Baptist | AS, pl.573, in Dc; related to *LU* 1504 | fauxbourdon style |
| Inter natos mulierum (ii) | *MOe* | K42, M 210 | psalm ant, St John the Baptist | | |
| Nos qui vivimus | see In exitu Israel | | psalm ant, Sunday at Vespers | AS, pl.109, in Dc | |
| Nove cantum melodie/Tanti gaude germinis/... enixa meritis [textless] tenor | *MOe* (most of 1st section missing) | K43, M 212 | isorhythmic motet | T also used in Ky 'In simplici die' (see above) | for baptism of Anthoine, 1st son of Philip the Good, 18 Jan 1431 |
| 'Passions en nouvelle maniere' | lost | | | | 29 May 1438 Binchois paid for having 'fait et composé' this book, to be placed in court chapel |
| Quem terra pontus | *Vm* IX 145 | K44, M 218 | hymn, Purification of BVM | chant, unidentified, in Ct | text, perhaps by Venantius Fortunatus, in Analecta hymnica, l, 86 |
| Rerum conditor respice | [= ballade: Dueil angoisseus] | K45 | | | contrafactum |
| Salve sancta parens (i) (verse: Sentiant omnes) | *AO*, *TRmd* 93 | K46*a* | int ant, Mass of BVM | *LU* 1263 | 2vv + fauxbourdon |

| Text | Sources | Editions | Form | Chant | Remarks |
|---|---|---|---|---|---|
| Salve sancta parens (ii) | *AO*, *TRmp* 90, *TRmd* 93 (twice) | K46*b* | | | 3vv with discantus identical with previous setting; verse and doxology identical with setting i |
| Sancti Dei omnes | *MOe* | K47, M 218 | psalm ant, All Saints | AS, pl.569, in Dc closest version | 2vv + fauxbourdon |
| Ut queant laxis | *D-Mbs* 14274, *I-Vm* IX 145 | K49, M 226 | hymn, St John the Baptist | as set by Du Fay in CMM, v, 61 | 2vv + fauxbourdon; text, by Paulus Diaconus, in Analecta hymnica, l, 120 |
| Veneremur virginem | *AO* | K50 | seq, Assumption of BVM | long-note T c.f., unidentified | |
| Veni Creator Spiritus | *TRmp* 92 | K51 | hymn, Pentecost | *LU* 885 in Dc | 2vv + fauxbourdon; also ed. in DTÖ, liii, Jg.xxvii (1940/*R*), 89 |
| Virgo rosa venustatis | [= rondeau: C'est assez] | K52 | | | contrafactum |
| Vox de celo ad Anthonium | *MOe* | K53, M 231 | ant, St Anthony, hermit | | |

RONDEAUX

Sources in this and following 3 sections cited only to note unica or to make adjustments to the otherwise complete listing in R.

| Text | Edition | Source observations | Remarks |
|---|---|---|---|
| Adieu adieu mon joyeulx souvenir | R 1 | | ascription in *GB-Ob* 213 over an erasure; 2 versions of Ct |
| Adieu jusques je vous revoye | R 2 | | cited twice in Molinet |
| Adieu m'amour et ma maistresse | R 3 | | |
| Adieu ma dulce [no more text] | R 4 | *D-Mbs* 14274 only | |
| Adieu mes tres belles amours [= motet: Ave corpus Christi carum] | R 5 | also 3 intabulations in *D-Mbs* 3725 (Buxheim) | cited in Molinet; only Dc and T are by Binchois since the Ct is different in each source and entirely omitted in the most authoritative source, *E-E* V.III.24 |
| Ainsi que a la foiz m'y souvient | | lost | possibly composed in 1424, see Desplanque (1865); the context does not specify whether the poem was set or written by Binchois |
| Amoureux suy et me vient toute joye | R 6 | | |
| Amours et qu'as tu en pensé | R 7 | *GB-Ob* 213 only | |
| Amours et souvenir de celle | R 8 | *Ob* 213 only | |
| Ay douloureux disant helas | R 9 | *Ob* 213 only | |
| Bien puist [no more text] | R 10 | *F-Sm* 222 only | |
| C'est assez pour morir de dueil [= motet: Virgo rosa venustatis] | R 11 | | |
| Comme femme desconfortée | R 56 | | for further sources and later works based on it, see Fallows (1999); authorship suggested as doubtful in Atlas (1975) |
| De plus en plus se renouvelle | R 12 | ascription in *GB-Ob* 213 over an erased ascription to Arnold de Lantins | cited in Molinet; T used for mass by Ockeghem, in which Henze (1968) found the numerological acrostic 'Egidius de Binche' |
| Depuis le congié que je pris | CMM, lxxvii (1980), 6 | *D-Mbs* Ms Gallorum monacensis 903, *E-E* V.III.24 | attrib. on the basis of presence in *Mbs* 3192, f.13. of the 2 lower parts; facing verso probably contained ascription to Binchois, as do all surviving versos in this MS |
| En regardant vostre tres doulx maintieng | R 13 | *GB-Ob* 213 only | text perhaps by Alain Chartier; first stanza set to related music, 4vv, in *c*1528[9], ed. in CMM, xciii/4, no.3 |
| En sera il mieulx a vostre cuer | R 14 | *I-Rvat* Urb. lat. 1411 only | |
| Esclave puist yl devenir | R 15 | only intabulation in *D-Mbs* 3725 is no.102 | cited twice in Molinet, basis of mass-motet cycle in *I-TRmp* 88 |
| Helas que poray je plus faire | R 16 | *D-Mbs* Ms Gallorum monacensis 903 only | final text line illegible |
| Jamais tant que je vous revoye (i) | R 17a | *F-Pn* n.a.fr.6771 only; text also in *Jardin de plaisance*, f.92*v* | Ͼ mensuration; anon. |
| Jamais tant que je vous revoye (ii) | R 17 | | O mensuration; more florid reworking of R 17 A |
| Je me recommande humblement | R 18 | | |
| Je ne fay tousjours que penser | R 19 | | cited in Molinet |
| Je ne pouroye estre joyeux | R 20 | *GB-Ob* 213 only | earlier ascription to 'Ar. de Lantins' erased and replaced by one to Binchois |

| Text | Edition | Source observations | Remarks |
|---|---|---|---|
| Je ne vis oncques le pareille | R 57 | ascription not in *D-Mbs* 810 but in *F-Pn* 57 | contrary ascription to Du Fay; sung at 'Banquet du voeu' in Lille (1454); Basiron's virelai 'Nul ne l'a telle' contains musical and textual citation of opening of Dc; for many later quotations, see Fallows (1999) |
| Joyeux penser et souvenir | R 21 | *GB-Ob* 213 only | |
| La merchi ma dame et Amours | R 22 | | |
| L'amy de ma dame est venu | R 23 | *I-TRmp* 87 only | T related to basse danse 'Maistresse', only 1 stanza of text survives |
| Les tres doulx ieux du viaire ma dame | R 24 | *GB-Ob* 213 only | ascription over an erasure |
| Liesse m'a mandé salut | R 25 | ascription not in *E-E* V.III.24 but in *GB-Ob* 213 | contrary ascription to Grossin |
| Ma léesse a changié son non | R 26 | *Ob* 213 only | |
| Margarite fleur de valeur | R 27 | | ?for Margaret of Burgundy (*d* 1441) |
| Mes yeulx ont fait mon cuer porter | R 28 | *Ob* 213 only | |
| Mon cuer chante joyeusement | R 29 | add text sources listed in Fallows (1999); music also in *D-Bk* 78 C 28 | text perhaps by Charles d'Orléans; cited in Molinet |
| Mon doulx espoir tres desireux las [no more text] | R 30 | *I-Rvat* Urb.lat.1411 only | |
| Mon seul et souverain desir | R 31 | text listed by Rehm in *D-Bk* 28 B 17 is a different poem | clefless, see Dahlhaus (1964) |
| Mort en merchy [no more text] [= Magnificat sexti toni] | R 32 | *Mbs* 1474 only | if this is a rondeau it is one with a 3-line stanza, otherwise extremely rare in 15th-century song |
| Nous vous verens bien Malebouche | R 33 | *GB-Ob* 213 only | text in Rehm can be completed from *Jardin de plaisance* |
| Plains de plours et gemissemens | R 34 | | ascription over an erased ascription to A. de Lantins |
| Pour prison ne pour maladie | R 35 | for text sources, see Fallows (1999) | text perhaps by Alain Chartier; cited twice in Molinet; Pullois, 'Pour prison', includes direct citations |
| Qui veut mesdire si mesdie | R 36 | *F-Pn* n.a.fr.6771 only; but also intabulated in *D-Mbs* 3725 (Buxheim) and text in *F-Pn* fr.1719 | |
| Quoy que Dangier, Malebouche et leur gent | R 37 | *GB-Ob* 213 only | |
| Rendre me vieng a vous sauve la vie | R 38 | text also in *A-Wn* 2619 | acrostic: ROBIN HOQVEREL (not Robin Verel, as in Marix and Reese); text perhaps by Chartier |
| Se je souspire, plains et pleure | R 39 | *F-Pn* n.a.fr.6771 only | |
| Se j'eusse un seul peu d'esperanche | R 40 | | |
| Se la belle n'a le voloir | R 41 | ascription not in *E-E* V.III.24 but in *I-TRmp* 87 | |
| Seule esgaree de tout joieulx plaisir | R 42 | ascription not in *E-E* V.III.24 but in *I-Rvat* Urb.lat.1411 | mensuration: C; only Binchois song not in triple time; citations in Brown (1963), 274 |
| Tant plus ayme tant plus suy mal amé | R 43 | *GB-Ob* 213 only | |
| Tout a par moy afin qu'on ne me voye | R 58 | | 2 contrary ascriptions to Walter Frye; cited twice in Molinet; to later refs. in Fallows (1999), add text citation in ballade 'Ung jour allant', in *Jardin de plaisance*, f.202*r* |
| Toutes mes joyes sont estaintes | R 44 | *GB-Ob* 213 only | |
| Tristre plaisir et douleureuse joie | R 45 | *Ob* 213 only; ed. not in *Early English Harmony* but in *OHM*, ii/2 (1905), 177 | text by Alain Chartier and sung by Jean Régnier on his release from prison in 1433; T related to basse danse 'Triste plaisir' but probably not to monophonic rondeau in *F-Pn* 9346; basis of Ernst Pepping's 'Zwei Orchesterstücke über eine Chanson de Binchois' (1959) |
| Vostre alee me desplast tant | R 46 | | |
| Vostre tres doulx regart plaisant | R 47 | T alone also in *GB-Lbl* Harl.1512, f.2; source in *Lbl* 5665 is 2vv using only the tenor of Binchois, text in *Lbl* Lansdowne 380 | cited twice in garbled form in the work of John Skelton |
| [textless] | — | *D-Mbs* cgm 810, f.71*v*-72*r*, 'Binzois' | normally read as 'Buczois' and attrib. Busnois |

BALLADES

| Text | Edition | Source observations | Remarks |
|---|---|---|---|
| Adieu mon amoureuse joye | R 48 | text for 1st stanza also in Namur, Archives de l'Etat, Reg. aux transports, 12, f.320 | |
| Amours merchi de trestout mon pooir | R 49 | complete in both sources | only 2 stanzas of text survive |

| Text | Edition | Source observations | Remarks |
|---|---|---|---|
| Dueil angoisseus rage demeseurée [= motet: Rerum conditor respice] | R 50 | Rehm printed 2 versions: (i) 3vv, (ii) 4vv, which seems to be the earliest state; he omitted what seems to be the latest and most widely distributed version, found in most sources, ed. E. Droz and G. Thibault, *Poètes et musiciens du XVe siècle* (Paris, 1924), where completion of poem is also found | text by Christine de Pizan; for further sources and later citations, see Fallows (1999) |
| J'ay tant de deul que nul homs peut avoir | R 51 | *GB-Ob* 213 only | |
| Je loe Amours et ma dame mercye [= versus: Ave dulce tu frumentum] | R 52 | also in fragment owned by Stanley Boorman | only 2 stanzas of text survive; intabulations discussed in Funck (1933); for later arrangements and citations, see Fallows (1999) |
| Ma dame que j'ayme et croy | R 53 | *D-Mbs* Ms Galloram monacensis 903 only | only 1 stanza of text survives; perhaps connected with Croy family, powerful in Burgundian court |
| Mesdisans m'ont cuidié desfaire | R 54 | *GB-Ob* 213 only | |

VIRELAI

| Text | Edition | Source observations | Remarks |
|---|---|---|---|
| ... Et osci [only the 2 lower parts extant] | | *D-Mbs* Ms Gallorum monacensis 903, f.19 | Slavin (1987), after p.143 facing verso probably contained ascription to Binchois, as do all surviving versos in this MS |

COMBINATIVE CHANSON

| Text | Edition | Source observations | Remarks |
|---|---|---|---|
| Filles a marier ne vous mariez ja/[Se tu t'en marias] | R 55 | *I-Rvat* Urb.lat.1411 only | 4vv; form *aabb*; text and later history of the tenor in Picker (1965); the 3 other parts are imitative and should probably all carry the text, frag. in source, but more complete in different setting in *E-Sc* 5–1–43; basse danse 'Filles a marier' unrelated musically |

DOUBTFUL WORKS

| Title | Source or editions | Remarks |
|---|---|---|
| Mass cycle with troped Kyrie 'Omnipotens Pater' | *B-Br 5557* | ed. in EECM, xxxiv (1989); now ascribed 'G. Binchois' though as recently as 1844 it read 'Jean Plourmel', see Staehelin (1973); Eng. style in fasc. devoted to Eng. work, musically reminiscent of Walter Frye, though the more intricate melismatic writing with smaller note values suggests an even later date, perhaps from the 1470s |
| Missa 'Pax vobis ego sum' (Gl and Cr only), 5vv | *I-TRmp* 88 | ed. in Monumenta polyphoniae liturgicae, 1st ser., ii (Rome, 1952), attrib. Binchois or Eloy; no reasons given |
| Gloria | K54, F 46 | contrary ascription to Ja. de Clibano in *I-AO*, where it appears with matching Cr and Ag, the latter also ascribed to Clibano |
| Gloria | K15, M 160 | in a style otherwise unknown in the work of Binchois and showing strong influence of Ciconia; Bockholdt indentified its pair as the Cr (F 25) ascribed in *I-TRmp* 92 to 'Jo Bodoil' and elsewhere to 'Anglicanus' and 'Anglicus'; perhaps a scribe misread a hastily written 'Bodoil' as the more familiar 'Binchois' |
| Sanctus, 4vv, with trope 'Marie filius' | *TRmp* 90, *TRmd* 93 | ed. M. Gozzi in Kirkman and Slavin (2000), where it is shown that this must be the pair to the 4-v Agnus Dei K21 |
| Magnificat sexti toni | CMM, i/5, 75 | ascribed variously to Dunstaple and Du Fay, but in *I-TRmp* 92 with erased ascription to Binchois; normally considered to be by Du Fay |
| Alma Redemptoris mater | MB, viii, no.40 | ascribed variously to Dunstaple and Leonel; *I-Bc* Q15 has ascription to Binchois that is crossed out and replaced by 'Leonelle' in another hand |
| Beata Dei genitrix | K56, MB, viii, no.41 | ascribed in *D-Mbs* and *I-MOe* to Dunstaple, in *AO* with illegible ascription and in *Bc* Q15 to Binchois, there might just be an argument for accepting the Binchois attrib. on stylistic grounds |
| Beata mater | K55, MB, viii, no.42 | in *TRmp* 87 an earlier Dunstaple ascription is erased and replaced by one to Binchois; nevertheless ascriptions to Dunstaple in *I-MOe* and *D-Mbs* 14274 seem convincing, especially since the piece appears (anonymously) in the insular MS *GB-Ob* Selden B26 |
| Beata viscera | *I-AO*, f.10 | comm; ed. in Cobin, no.10; indirectly proposed in Dangel-Hofmann (1975), 113, as part of a BVM proper cycle with K46 (int) and K38 (off) |
| Quam pulchra es | MB, viii, no.44 | although 3 authoritative MSS ascribe to Dunstaple, *I-AO* ascribes 'Egidius'; in view of the excellence of the piece the only Egidius who comes into question would be Binchois, and many features in it are not all unlike his style; on the other hand, to accept this would seriously confuse most received opinion on Eng. style in the 15th century |

| *Title* | *Source or editions* | *Remarks* |
|---|---|---|
| Virgo prefulgens | K57, M 227 | in *I-TRmp* 92 1st 30 bars of discantus are copied and ascribed 'Winchois'; but the scribe abandoned the piece; there is no reason to disbelieve ascription to Sandley in *I-MOe*; *see* STANDLEY |
| Adieu ma tresbelle maistresse | CMM, lxxxvi (1980), 16 | attrib. on stylistic grounds in Kemp (1990); Slavin (1987) see the trimmed ascription in *I-TRmp* as being to Binchois; text perhaps by Charles d'Orléans, see Fallows (1999) |
| Ce moys de may | CMM, i/6, 59 | ascribed in *GB-Ob* 213 to Du Fay; Kiesewetter, knowing only the anon. *F-Pn* 6771 source, attrib. Binchois on basis of line 'Carissime Du Fay vous en prie' and of assumption that Binchois was Du Fay's closest friend; more recent scholarship amends the line and agrees that this must be genuine Du Fay; but Kiesewetter's publication as Binchois' in *Schicksale und Beschaffenheit* (1841) represented the only published 'Binchois' for Fétis and Ambros and until Riemann's *Sechs bisher nicht gedruckte dreistimmige Chansons* (1892) |
| Je cuidoye estre conforté | R 60 | attrib. in Rehm (1952), 144–5 |
| Va tost mon amoureux desir | R 59 | text by Charles d'Orléans: attrib. by Marix (1939), 188, and Rehm (1952), 144–5 |
| Songs in *GB-Ob* 213 | CMM, ix/4 | Reaney tentatively attrib. the following rondeaux: Dame que j'ay lointamp servie, Espris d'amours l'autre jour, Faisons bonne chiere et lie, Soyés loyal a vo povoir, Veuillés hoster de che dangier |
| Songs in *E-E* V.III.24 | CMM, lxxviii (1980) | Kemp (1990), 3–64, attrib. the following on the basis of style: Adieu ma tresbelle maistresse, Bien viengnant ma tres redoubtee, De ceste joieuse advenue, Je ne porroye plus durer, Je vous salue ma maistresse, La tresorire de bonté, L'une tresbelle clere lune, Mon coeur avoec vous s'en va; more tentatively he attrib.: Bien viegnés mon princhе gracieux, Je n'atens plus de resconfort, L'onneur de vous dame sans per, Tous desplaisir m'en sont, Va t'en mon desir gracieux |

DAVID FALLOWS

**Binder, Carl** (*b* Vienna, 29 Nov 1816; *d* Vienna, 5 Nov 1860). Austrian composer. He spent almost his entire career as a Kapellmeister at Viennese suburban theatres, writing a large number of scores for Possen (farces) and Singspiele, most of which did no more than satisfy the expectations of the audiences of his day. He did, however, achieve a few major successes, most notably with the scores to seven of Nestroy's plays written between 1851 and 1859, and in his instrumentation (from pirated vocal scores) of Offenbach's operettas which reached Vienna in the late 1850s. From 1840 to 1851 he wrote over 60 scores for the Theater in der Josefstadt, the first being to F. Blum's *Die Tochter des Räubers* (7 July 1840) and the most successful probably being that to J. Nikola's *Der letzte Zwanziger* (12 September 1850), which was performed first at the Hernals Arena and altogether 111 times. Of approximately 80 works written by Binder between 1849 and 1860, those most frequently performed at the Carltheater (formerly the Theater in der Leopoldstadt) included the scores to Nestroy's *Kampl* (1852) and *Umsonst* (1857), Kaiser's *Verrechnet* (1851) and the 'Charakterbild' *Die Frau Wirtin* (1856), and Kalisch's *Ein gebildeter Hausknecht* (1858). The only score truly to outlive its composer was for Nestroy's parody *Tannhäuser* (1857), which enjoyed 75 performances in the Carltheater between 1857 and 1860 and has been revived successfully (and recorded) in modern times.

The recent discovery of a letter (now in *A-Wst*) from Binder to his colleague A. E. Titl has resolved some longstanding uncertainties about the middle years of Binder's career. Sent from Pressburg and dated 15 December 1847, this letter lists nine operas Binder had conducted at the theatre there in two months since his arrival, and shows that he considered he had been unfairly dismissed from his post at the Theater an der Wien by its director, Franz Pokorny. It is unclear when he returned to Vienna, but he mentions plans to perform Titl's opera *Das Wolkenkind* in Pressburg for the latter's benefit evening, 15 January 1848. Another recent discovery indicates that Binder was elected an honorary member of the Dom-Musik-Verein in Salzburg on 10 April 1854. The music of Binder's vocal numbers for Nestroy's plays is included in *Johann Nestroy: Historisch-kritische Ausgabe* (ed. J. Hein and others, Vienna, 1977–); the full vocal score of the *Tannhäuser* parody is in *Stücke*, xxxvi (ed. P. Branscombe).

Binder's son Karl, a promising musician, died in Vienna in 1870, at the age of 27.

PETER BRANSCOMBE

**Binder, Christlieb Siegmund** (*b* Dresden, bap. 29 July 1723; *d* Dresden, 1 Jan 1789). German composer. The son of an oboist, he probably received music instruction as a Dresden choirboy from Pantaleon Hebenstreit, to whom he was referred by the court in 1742 to learn his teacher's dulcimer-like invention, the pantaleon. It was as a pantaleonist that he became a court musician in 1751, but he also performed as a harpsichordist. In 1764 he became second organist to Peter August in the court's Catholic chapel, and he was first organist from August's death in 1787; both were active as harpsichordists in Dresden's public musical life.

Most of Binder's career took place in the reign of Friedrich August III, an amateur musician, and his compositions reflect the court's active interest in keyboard and chamber music. His extant works show a mixture of *Empfindsamkeit* and earlier Baroque elements, although they require greater virtuosity. The intense slow movements and the concentrated development of thematic material echo the style of C.P.E. Bach, but the keyboard figuration and choice of genres hark back to J.S. Bach; similarly, exact gradations of dynamics are interspersed with Baroque echo effects. Although Binder was a prolific composer, his influence was virtually confined to Dresden; few of his works were published in his lifetime.

Binder had two sons who were also musicians. August Siegmund Binder (*b* Dresden, 1761; *d* Dresden, early March 1815) was an organist and composer who became first organist of the electoral chapel on his father's death in 1789; he composed harpsichord sonatas, organ preludes, cantatas and sacred music, but only the preludes have survived (*D-Dl*). Carl Wilhelm Ferdinand Binder (*b* Dresden, 1764) was an instrument maker in Weimar who specialized in harps.

WORKS

*MSS, in D-Dl, unless otherwise indicated*

Hpd: 6 sonatas, before 1758; 6 suonate, op.1 (Dresden, 1759); 6 divertimentos, after 1762; 12 sonatas, lost, listed in Breitkopf catalogue, 1763; Sonata, in 6 Easy Lessons (London, ?1765), attrib. G.D. Binder; 2 solos, lost, listed in Breitkopf catalogue, 1768; 6 sonatas, after 1768; 6 sonatas, before 1776; Sinfonia, *D-Bsb*; other pieces in contemporary anthologies

Orch: Hpd Conc., in 4 concerti per cembalo composti da vari autori (Paris, 1758); Fl Conc., lost, listed in Breitkopf catalogue, 1763; 12 hpd concs., *c*1760–80 [with 2 later adagios]; 18 hpd concs., before 1768, also arr. for 2 hpd; 3 concs., 2 hpd, orch, *c*1767; 3 org concs.; 12 Piècen; 3 syms., *B-Bc*, *CH-E*, Kloster Marienthal, Bibliothek, Ostritz bei Görlitz, doubtful

Chbr: 6 sonate a 3, hpd, fl/vn (Leipzig, 1763); 2 trios, hpd, vn, lost, listed in Breitkopf catalogue, 1763, 1769; Trio, hpd, va, vc, 1771; 2 qts, hpd, 2 vn, vc, ?1773; Trio, hpd, fl, vc, 1774; Trio, hpd, fl; Trio, fl, hpd/fl/vn, b; Trio, 2 fl/vn, b; 2 trios, hpd, vn; 4 divertimentos, hpd, fl/vn; Sonata, hpd, fl/vn, *PL-WRu*

DIETER HÄRTWIG/ANNEGRET ROSENMÜLLER

**Binet, Jean** (*b* Geneva, 17 Oct 1893; *d* Trélex, 24 Feb 1960). Swiss composer. After studies in Geneva at the Institut Jaques-Dalcroze and with Otto Barblan, William Montillet and Templeton Strong, he went to the USA in 1919 where he became a pupil of Bloch and with him founded the Dalcroze Rhythmic School, New York, and later the Cleveland Institute of Music. From 1923 to 1929 he taught the Dalcroze method in Brussels; he then returned to Switzerland and settled in Trélex, devoting his attention to composition. Many of his orchestral works were introduced by Ansermet, and his ballet *Le printemps* (1950), commissioned by the Pro Helvetia Foundation, was first performed at the Paris Opéra. The *Psaumes de la délivrance* (1952) were written for the canton of Geneva to commemorate the 350th anniversary of the Reformation. From 1951 until his death Binet was president of the Société Suisse des Auteurs et Editeurs, and in 1955 he received the composition prize of the Swiss Musicians' Association. His music was influenced by French impressionism and by Dalcrozian rhythm. Rejecting large forms, he expressed a refined and intimate sensibility in music that deliberately avoids extensive development. All of Binet's work is tonal and shows a mastery of tender nuances.

WORKS
(*selective list*)

STAGE AND VOCAL

Ballets: L'île enchantée, 1947; Le printemps, 1950

7 sets of incid. music incl. Antigone, 2 pf, 2 perc, 1937; Les joyeuses commères de Windsor, small orch, 1940; Coriolan, hn, 2 tpt, trbn, perc, 1956; La grange au Rouds, chorus, fl, ob, 2 cl, bn, tpt, 1957

Choral: Ps cxxx, A, T, chorus, brass, perc, 1924; 5 choeurs mixtes (C. Marot), 1929; Ode à Diane et Apollon (Horace), chorus, orch, 1932; Ode à Sestius (Horace), chorus, orch, 1932; Cantate de Noël (N. Soutter), children's vv, org, 1935; 4 choeurs mixtes (C.F. Ramuz), 1942; Psaumes de la délivrance (Piachaud), Bar, chorus, orch, 1952; Les comptines de l'oiselier (J. Cuttat), chorus, cl, 1956; Pétrarque (G. Nicole, after Petrarch), solo vv, chorus, orch, 1958; Ode à la musique (R. Morax), S, female chorus, 2 male chorus, orch, 1959

Songs: 4 chansons (Ramuz), 1v, pf, 1927; 6 mélodies (Marot), 1v, pf, 1928; 3 mélodies (G. Apollinaire), 1v, pf/orch, 1933; 10 chansons (Cuttat), 1v, pf/orch, 1943; 6 chansons (Cuttat), 1v, pf/orch, 1945; L'or perdu (Cuttat), 1v, pf/orch, 1953

INSTRUMENTAL

Orch: Concertino, small orch, 1927; Suite d'airs et de danses populaires suisses, small orch, 1931; Divertissement, vn, pf/small orch, 1934; 4 danses, 1936; 3 pièces, str, 1939; Cartes postales, small orch, 1940; Musique de mai, 1943; L'île enchantée, 2 suites, 1946 [from ballet] ; 6 pièces enfantines, small orch, 1947; Le printemps, suite, 1949 [from ballet]; Prélude symphonique, 1949; Petit concert, cl, pf/str, 1950; Suite grisonne, small orch, 1951

Chbr: Str Qt, 1927; Dialogues, fl, vn, 1936–7; Sonatine, fl, pf, 1942; Kaval, fl, pf, 1945; Sonate brève, vn, pf, 1946; 3 dialogues, 2 fl, 1957; Variations sur un chant de Noël, bn, pf, 1957; 4 chorals, org, 1958

MSS in *CH-Bps*

Principal publishers: Foetisch, L'Oiseau Lyre, Henn, Heugel, Symphonia

PIERRE MEYLAN/JACQUES TCHAMKERTEN

**Bing,** Sir **Rudolf** (*b* Vienna, 9 Jan 1902; *d* New York, 2 Sept 1997). British impresario of Austrian birth. The son of an iron and steel magnate, he began his career in a Viennese bookshop whose proprietor soon branched out as an impresario of artistic events. In the 1920s Bing worked in Berlin before becoming assistant to Carl Ebert at the Hessisches Staatstheater in Darmstadt (1928–30), assistant to the Intendant of the Charlottenburg Opera, Berlin (1930–33), and general manager of the Glyndebourne Opera (1936–49). In 1946 he took British nationality and helped to found the Edinburgh Festival, of which he was artistic director from 1947 to 1949.

In 1950 Bing became general manager of the Metropolitan Opera, New York. His tenure (until 1972) was the second longest in its history. He had a great influence on both the company and American opera in the 1950s and 60s, particularly because of his autocratic attitudes. In the early years he improved standards of performance and direction. His emphasis on scenic design and imaginative direction reflected his European experience, and was new to the USA. Bing introduced a number of black singers and dancers and extended the season to fill the whole year; he also supervised the move to the Lincoln Center. In the later years, however, like his predecessor Gatti-Casazza, he failed to develop new ideas for coping with the economic and artistic climates of the period, although the house continued to have individual successes. In 1973 he was appointed Consultant for Special Projects by Columbia Artists Management. His *5000 Nights at the Opera* (London, 1972) and *A Knight at the Opera* (New York, 1981) relate some of the many vicissitudes of his career. He was knighted in 1971.

PATRICK J. SMITH

**Bing, Stephen** (*b* Canterbury, bap. 20 Sept 1610; *d* London, 26 Nov 1681). English cathedral singer and music copyist. He was trained as a chorister at Canterbury Cathedral (1617/18–24) and probably left Canterbury soon after his voice changed. It seems likely that sometime during the 1630s he moved to Cambridge, where he became acquainted with the music patron Sir Christopher Hatton and his musicians and copyists, in particular George Jeffreys and John Lilly. During the 1630s Bing took holy orders, and in 1640 or 1641 he was appointed as a minor canon of St Paul's Cathedral, London. Among Bing's colleagues at St Paul's were John Barnard and John Woodington (also a court violinist). The association between Barnard, Bing and Woodington is apparent in a number of surviving manuscripts copied by Bing in the late 1630s and early 1640s, the most important of which are the sets of viol consort music in the library of Christ Church, Oxford, copied in conjunction with Lilly whilst working under the patronage of Hatton.

Bing's appointment as minor canon unfortunately coincided with the king's forced withdrawal from London and the start of the Civil War. He left St Paul's sometime after midsummer 1642 and probably joined the king's supporters in Oxford. There he would have been reunited with Hatton and Jeffreys. It appears that Hatton, as Comptroller of the King's Household, assumed responsibility for the music at the Oxford court, and surviving manuscripts suggest that Bing was closely involved. Oxford yielded to parliamentarian forces on 20 June

1646 and Bing probably took advantage of the surrender terms to return to his former employment at St Paul's. In April 1649, however, the act of parliament abolishing 'Deans, Deans and Chapters, Canons, Prebends, and other Offices' and ordering the sale of ecclesiastical land and property deprived Bing of both his job and his home. Thereafter, like many redundant church and court musicians during the Commonwealth, he earned his living as a teacher.

Following the Restoration, Bing was appointed senior cardinal at St Paul's, as well as warden of the College of Minor Canons (1660–62). After the Fire of London (1666), which destroyed the cathedral, Bing was appointed senior vicar-choral at Lincoln Cathedral, where he stayed until early 1672. It is from this period that we have the first evidence of his Restoration liturgical-copying activities: the set of eight books now known as the Bing-Gostling Partbooks (*GB-Y* M 1 S). It is probable that they were begun at Lincoln in the late 1660s, but the majority of pieces appear to have been added in the 1670s following Bing's appointment as lay vicar at Westminster Abbey (on 1 April 1672). Bing also renewed his connections with St Paul's, and by midsummer 1672 his signatures resume in the minor canons' accounts. As a lay vicar at Westminster Abbey in the late 1670s, Bing was a colleague of Henry Purcell and copied a number of the composer's early anthems. His close associations with the country's best musicians and most influential music patrons for more than 50 years make Bing one of the most important 17th-century English music copyists yet identified.

JONATHAN WAINWRIGHT

**Binge, Ronald** (*b* Derby, 15 July 1910; *d* Ringwood, 6 Sept 1979). English arranger and composer. After work as a cinema organist and arranger he moved to London in 1930 to play in theatres and café ensembles. From 1936 he arranged for Mantovani's Tipica Orchestra, and during war service in the RAF began a long association with Sidney Torch, subsequently providing many scores for Torch's radio broadcasts, especially for 'Friday Night is Music Night'. With Mantovani, Binge also orchestrated Noël Coward's musicals *Pacific 1860* (1946) and *Ace of Clubs* (1950). A love of Church music, especially Monteverdi, inspired Binge in 1951 to create the famous 'cascading strings' effect which made the Mantovani orchestra world-famous. This contribution to Mantovani's success only became public knowledge in later years, by which time he was concentrating more on composition. His *Elizabethan Serenade* won an Ivor Novello Award in 1957, and he contributed many works to London publishers' mood music libraries for use by radio, television and film. Other successes included *The Watermill*, *Concerto for Alto Saxophone* (1956) and *Saturday Symphony* (1966–8), while *Sailing By* became particularly known through its use as the closing-down music for BBC Radio 4.

WORKS
*(selective list)*

Orch: Spitfire, 1940; Trade Winds (1949); Elizabethan Serenade, 1951; Impressions of London, suite, 1953; Cornet Carillon, brass band (1954); Conc. for A Sax, E♭, 1956; The Watermill, ob, str (1958); Scherzo – Allegro molto, 1961; Sailing By (1965); Las Castanuelas; The Dance of the Snowflakes; Faire Frou-Frou; The Fire God; Fiesta; High Stepper; The Liberty Boat; Madrugado (Daybreak); Man in a Hurry; Miss Melanie; Prelude; The Red Sombrero; Scottish Rhapsody; Skylarks; String Song; Thames Rhapsody; Venetian Carnival; The Whispering Valley

Film scores, incl. Desperate Moment, 1953; Our Girl Friday, 1953; The Runaway Bus, 1954

DAVID ADES

**Bingham, Judith (Caroline)** (*b* Nottingham, 21 June 1952). English composer and mezzo-soprano. She attended the RAM from 1970 to 1973, where she studied composition with Alan Bush and Fenby, and singing with Eric Vietheer. She continued her composition studies with Hans Keller (1975–8) and in 1971 won the Principal's Prize for Composition. She was elected an ARAM in 1997.

From the mid-1970s Bingham followed careers both as a singer and as a composer, winning the BBC Young Composer Award in 1977. She sang with the BBC Singers on a full-time basis (1983–96), before resigning in order to concentrate on composition. Several early scores have been lost; those that survive show a quixotic imagination, a fondness for pungent harmonies, prickly rhythms and pithy statement, and an ear for unusual instrumental combinations. Later, after exposure to large-scale polyphonic scores during her time with the BBC Singers, she moved away from overt experiment to a more homogenous, direct style, developing an individual approach to structure based on organically related, through-composed mosaics extended over long time-scales. This is seen in two pivotal works, *Irish Tenebrae* and *Chartres*, which established her reputation. Recurring features are a fondness for brass (ensembles or band) and the voice, which coalesce in *Salt in the Blood*, commissioned for the 1995 Proms. She is also interested in educational work with young performers and composers. Her music embraces a wide range of literary sources, subjects and metaphors. While her contribution to choral music has been widely recognized, it is in the visionary orchestral works that her best writing is to be found. Her compositional voice is independent rather than subversive and stands apart from both British and European models.

WORKS
*(selective list)*

Stage (all texts by Bingham): Flynn (op), 1978; The Red Hot Nail (children's music theatre), 1994; The Mysteries of Adad (children's music theatre), 1996

GILES EASTERBROOK

**Bingham, Seth Daniels** (*b* Bloomfield, NJ, 16 April 1882; *d* New York, 21 June 1972). American organist and composer. He studied with Horatio Parker at Yale (BA 1904; BMus 1908) and in Paris with d'Indy, Widor, Guilmant and Harry Jepson (1906–7). After teaching at Yale from 1908 to 1919, he was a member of the music faculty of Columbia University until his retirement in 1954; he also held classes in advanced composition at the Union Theological Seminary and was for 35 years organist and music director at the Madison Avenue Presbyterian Church. Bingham was a prolific composer, whose rhythmic vitality, quasi-modal lines and mildly chromatic contrapuntal textures can best be heard in his liturgical choral and organ works. He also wrote numerous concertos, suites and sonatas in a conservative, lyrical vein; perhaps his best-known secular work is the Concerto for brass, snare drum and organ.

WORKS

Op: La charelzenn, 1917

Choral: Come thou Mighty King, SATB, 1916; Let God Arise, male vv, 1916; The Strife is O'er, SATB, 1916; Wilderness Stone, nar, solo vv, chorus, orch, 1933; Canticle of the Sun, chorus, orch, 1942; Perfect through Suffering, chorus, org, 1971; many other sacred choral works

Orch: Wall Street Fantasy, 1916; Passacaglia, 1918; Memories of France, 1920; Pioneer America, 1926; The Breton Cadence, 1928; Org Conc., 1946; Conc., brass, snare drum, org, 1954

Chbr: Suite, 9 wind, 1915; Str Qt, 1916; Tame Animal Tunes, 18 insts, 1918; Connecticut Suite, org, str, 1953; sonatas, suites

Org: Roulade, 1920–23; Suite, 1923; Pioneer America, 1925; Harmonies of Florence, 1928; Carillon de Château-Thierry, 1936; Pastoral Psalms, 1937; 12 Hymn-Preludes, 1942; Baroques, suite, 1943; Variation Studies, 1950; 36 Hymn and Carol Canons, 1952; many other org pieces

Pubd songs, incl. An Old Song (1908), 5 Cowboy Songs (1930), Brahma, The 4-way Lodge, 2 Japanese Songs

MSS in *US-NYp*, *US-Wc*

H. WILEY HITCHCOCK/MICHAEL MECKNA

**Bini, Pasquale** [Pasqualino] (*b* Pesaro, 21 June 1716; *d* Pesaro, April 1770). Italian violinist and composer. He evidently attracted patronage at an early age, for when he was 15 years old Cardinal Olivieri sent him to Padua to study with Tartini. He remained there for more than three years and then went to Rome, where he played so well that rumour credited his success with causing the death from embarrassment of the violinist Montanari. Bini soon returned to Padua for more study, however, having heard that Tartini had changed his style. His admiration for Tartini was returned by the teacher, who spoke of no other pupil except Nardini in such complimentary terms. On Bini's return to Rome a year later, Tartini wrote recommending him to an English patron: 'He plays better than I do, and I am proud of it, for he is an angel in morals and religion'.

Cardinal Olivieri died in 1738, and Bini entered the service of Cardinal Acquaviva Troiano. After the latter's death in 1747, Bini was unhappy in Rome and returned to his native Pesaro. Exactly what his difficulties were is unknown. Tartini, who again tried to help, hinted at serious emotional problems in recommending him to Algarotti and to Prince Lobkowitz. Bini, Tartini wrote, had suffered

> a hundred disasters of body and soul. He is most good and saintly in morals, marvellous in his profession, but feeble in spirit. Persecuted in Rome since the death of His Eminence Acquaviva, he has become so familiar with persecution as to have been in a manner of speaking maddened by it.

Bini remained in Pesaro teaching and playing at the Teatro del Sole until 1754, when he entered the service of the Duke of Württemberg at a high salary as director of concerts and chamber music. He held the post until about 1759 and then returned once more to Pesaro. His emotional problems had perhaps worsened, for a contemporary account from Pesaro speaks of a 'cerebral complaint' which eventually caused his death.

Bini was evidently a fine player and widely admired, but he owes his lasting reputation almost entirely to Tartini's esteem for him. As a composer he had almost no fame and left only a handful of compositions, none of which was published. All his works, particularly the concertos, reflect a good technique and contain graceful passage-work, but they are conventional in form and generally unimaginative. Tartini's early and middle works are the obvious models for the concertos and the sonata, but the duets are slightly more modern in style.

CHAPPELL WHITE

**Binički, Stanislav** (*b* Jasika, nr Kruševac, 27 July 1872; *d* Belgrade, 15 Feb 1942). Serbian composer and conductor. After studying mathematics at Belgrade University, he studied composition (with Rheinberger) and singing in Munich. Back in Belgrade he took part, with Mokranjac and Manojlović, in the founding of the Serbian School of Music in 1899. He conducted the newly formed Beogradski Vojni Orkestar (Belgrade Military Orchestra) and in 1904 founded the Muzika Kraljeve Garde (The Music of the Royal Bodyguard); with these orchestras as well as the choir of the Stanković Musical Society he took an active part in the musical life of Belgrade, and introduced Haydn's *Creation* (1908) and Beethoven's Ninth Symphony (1910) to the city. In 1911 he became the first director of the new Stanković Music School. During the war he was a bandmaster in various French cities. From 1920 to 1924 he was the first director of the new opera company at the National Theatre; his wife, the singer Miroslava Binički (née Frieda Blanke, *b* Munich, 9 Oct 1876; *d* Belgrade, 5 Aug 1956), acted as répétiteur and choir trainer.

Most of Binički's music is theatrical, and includes much incidental music and an opera, *Na uranku* ('At Dawn', 1903). This was the first Serbian national opera to be performed, and, though based on the manner of Italian *verismo*, it makes significant use, to reflect the opera's subject of the conflict with the Turks, of Serbian as well as oriental folklore. The incidental music for *Ljiljan i omorika* ('The Lily and the Pine Tree', 1900) and *Ekvinocio* ('Equinox', 1903) displays characteristic motifs from the beginning of the overtures, and the concert overture *Iz mog zavičaja* ('From my Homeland') uses folk music. His songs are more sentimental in character, and in his choral compositions he uses a very simple, folk-influenced idiom. He also wrote some religious music and a number of military marches: of these the *Marš na Drinu* ('March on the Drina', 1915) has been exceptionally popular.

Binički's brother Aleksandar (*b* Belgrade, 16 May 1885; *d* Zagreb, 7 Aug 1963) was a *buffo* tenor and producer, who studied in Munich with Reger and Mottl. He was director of operetta in Zagreb; his own notable roles included Vašek (*The Bartered Bride*) and Beppe (*Pagliacci*).

WORKS

Stage: Na uranku [At Dawn] (op, B. Nušić), 1903, Belgrade, 2 Jan 1904, arr. pf (Belgrade, 1903); Ljiljan i omorika [The Lily and the Pine Tree] (incid music, after Nušić), 1900; Ekvinocio [Equinox] (incid music, after I. Vojinović), 1903; Put oko sveta [A Trip around the World] (incid music, after Nušić), 1908; Nahod (incid music, after Nušić), 1923

Orch: Iz moga zavičaja [From my Homeland], ov., 1899; many marches, incl. Marš na Drinu [March on the Drina], 1915

Seljančice [Peasant's Songs], 1908; Opelo [Serbian Orthodox Requiem], 1912; Tetovka [Tetovo Songs], 1914; Liturgija, 1923

Vocal: Mijatovke [Song dedicated to Mijat Mijatovič], *c*1925; other songs

**Binkerd, Gordon (Ware)** (*b* Lynch, NE, 22 May 1916). American composer. He studied the piano at Dakota Wesleyan University (BMus 1937), where Russell Danburg and Gail Kubik helped to shape his musical thinking. After teaching in Kansas and Indiana, he pursued further training at the Eastman School of Music (MMus 1941). Following US Navy service during World War II, he entered Harvard University (MA 1952), where he studied with Walter Piston, Irving Fine, Otto Kinkeldey and Archibald Davidson, among others. From 1949 to 1971 he taught at the University of Illinois, Urbana-Champaign. His numerous honours include a Guggenheim Fellowship (1959), an award from the National Institute of Arts and Letters (1964) and commissions from the St Louis SO, the Fromm and Ford foundations, and the McKim Fund of the Library of Congress. In 1996 a week-long series of concerts was organized at the University of Rhode Island and Brown University in celebration of his 80th birthday.

Binkerd's harmonic style developed from conventional tonality (in the early works, later withdrawn), through serialism (forsaken between the second and third movements of the First Symphony) and highly chromatic tonality (from the mid-1950s to the early 1980s), to simple but unconventional tonality (from the early 1980s). A deft handling of counterpoint is common to all of his compositions. In 1980 he began to concentrate on works for solo piano, an instrument he dubbed the 'sonic machine', and on works for solo voice and piano. Also notable are his penetrating choral settings.

WORKS

THEODOR DUDA

**Binkley, Thomas (Eden)** (*b* Cleveland, OH, 26 Dec 1931; *d* Bloomington, IN, 28 April 1995). American musicologist, lutenist and player of early wind instruments. He graduated from the University of Illinois (BM 1954) and then went to Germany to study musicology at the University of Munich. In 1959 in Munich he founded the Studio für alte Musik for the performance of early music; the other members were the mezzo-soprano Andrea von Ramm, the tenor Nigel Rogers and the string player Sterling Jones. This group, later known as the Studio der Frühen Musik, toured throughout the world until 1972, when it moved to Basle in Switzerland to take up residence at the Schola Cantorum Basiliensis. Binkley returned to the USA in 1978 as a visiting professor at Stanford University. In 1979 he became director of the Early Music Institute at the School of Music of Indiana University, remaining in that position until his retirement in January 1995. Binkley's publications include articles on performance practice. He made more than 40 recordings with the Studio der Frühen Musik, for which he was awarded many European prizes, including the Edison Award, Amsterdam (1964 and 1974), the Grand Prix du Disque, Paris (four times between 1968 and 1974), and the Preis der deutscher Schallplattenkritik, Berlin (seven times between 1965 and 1982). An account of his career is given in D. Lasocki: 'The Several Lives of Tom Binkley: a Tribute', *Early Music America*, i/1 (1995), 16–24.

LARRY PALMER

**Binns** [Hoyle], **John** (*b* Halifax, *c*1744; *d* Grantham, 6 May 1796). English bookseller and dictionary compiler. He was the eldest son of Nathaniel Binns, printer and bookseller in Halifax, under whom he studied the book business. Early in life he went to London as an apprentice of, or employee in, the firm of Crowder. By 1770 he had established his own firm in Leeds, where he was also a partner in the commercial bank of Scott, Binns, Nicholson & Smith, and an amateur performer on the violin and cello. He published a *Dictionarium musica* (*sic*) (London, 1770, 2/1790, 3/1791) which appeared under different titles and was issued under the pseudonym John Hoyle. The work is derived chiefly from the dictionary published by James Grassineau in 1740.

JAMIE C. KASSLER

**Binns, Malcolm** (*b* Nottingham, 29 Jan 1936). English pianist. He studied with Arthur Alexander at the RCM, where he was awarded the Chappell Medal. A well-schooled and energetic pianist, with a quick memory, cultivated musicianship and reliable fingers, he made his London début in 1958, and soon afterwards was engaged to play with all the British orchestras. He first appeared at the Promenade Concerts in 1959, and played there in 14 subsequent seasons. In September 1961 Binns gave the first British performance of Prokofiev's Piano Concerto no.4 for the left hand with the RPO at the Royal Festival Hall. He has given recitals and broadcasts on late 18th- and 19th-century pianos, and has recorded the complete Beethoven sonatas on a series of historically appropriate instruments. His other recordings include concertos by Stanford, Sterndale Bennett and Rawsthorne, as well as Lyapunov's *Etudes d'exécution transcendante* op.11 for solo piano. He taught at the RCM (1962–9), and in 1966 formed a duo partnership with the violinist Manoug Parikian.

DOMINIC GILL/JAMES METHUEN-CAMPBELL

**Biography.** Music biography is a literary genre consisting of ordered, written accounts of the lives of individuals who are involved in the creation, production, dissemination and reception of music, particularly the lives of composers and musicians but including also librettists, publishers, instrument makers, patrons, music lovers, scholars and writers. In the broadest view, biography is the life history of an individual: it therefore may be said to involve the totality of phenomena impinging upon or shaping the individual, every event participated in or generated by the individual's activities, as well as every aspect of the subject's mental and psychological processes and every product of his or her creativity. Music biography centres on the documentation and interpretation of events, influences and relationships in a life, but its legitimate field of inquiry extends to the biological and ancestral inheritance, the social and historical nexus, the musical tradition and the intellectual milieu. Thus, music biography is inextricably joined to disciplines such as history, mythology, music history, genealogy, sociology and psychology.

1. Origins and early history. 2. The early 19th century. 3. The later 19th century. 4. The age of musicology. 5. The later 20th century.

1. ORIGINS AND EARLY HISTORY. The prehistory of music biography is to be found in folklore, myth and theology, with accounts of legendary musicians and musical deities such as Apollo, Dionysus and Orpheus, David and Jubal, Narada and Sarasvati, Odin, and Väinämöinen. From as early as the 10th century, compendia and lexica offered brief biographies of musicians, but music biography, having no Vasari, was delayed in its further development until approximately the early 18th century, when the genre developed as a component and offshoot of the burgeoning fields of musical lexicography and music history (*see* DICTIONARIES AND ENCYCLOPEDIAS OF MUSIC, §I and Lenneberg, 1988). The proliferation of descriptive and taxonomical dictionaries and encyclopedias in every sphere of interest included separate dictionaries of music, both with and without biographies, and volumes wholly devoted to biography. Several notable examples of the latter are W.C. Printz, *Historische Beschreibung der edelen Sing- und Kling-Kunst* (1690/*R*), which contains concise biographical sketches of musicians, chronologically arranged; J.G. Walther, *Musicalisches Lexicon, oder Musicalische Bibliothec* (1732), a

general dictionary with entries for 900 composers; Johann Mattheson, *Grundlage einer Ehren-Pforte* (1740), with 148 entries, including numerous contemporary autobiographies; G.O. Pitoni, unpublished biographical compendium of composers from 1000 to 1700 (*c*1725); J.-B. de La Borde, *Essai sur la musique ancienne et moderne* (1780), the third and fourth volumes of which contain a biographical dictionary of musicians, poets and writers on music; and J.A. Hiller, *Lebensbeschreibungen berühmter Musikgelehrten und Tonkünstler neuerer Zeit*, i (1784). The most influential 18th-century dictionary of music biography is E.L. Gerber's *Historisch-biographisches Lexikon der Tonkünstler* (1790–92), revised as *Neues historisch-biographisches Lexikon der Tonkünstler* (1812–14), which served as precedent for such monumental biographical dictionaries as those of F.-J. Fétis (1835–44), Robert Eitner (1900–04) and Theodore Baker (1900). The 18th-century interest in music biography was also manifested in a variety of music journals and almanacs, such as F.W. Marpurg's *Historisch-kritische Beyträge zur Aufnahme der Musik* (1754–78) and in periodicals, edited by such music journalists as C.F. Cramer, H.P. Bossler, J.F. Reichardt and J.F. Rochlitz, which fed a healthy public appetite for anecdotes, reminiscences and memoirs.

Leaving aside the occasional early example of autobiographies by musicians, such as those by Thomas Whythorne (*c*1576) and Lodovico Zacconi (1620), and the memoirs of such figures as Benvenuto Cellini and Jean-Jacques Rousseau who happened also to be musicians, the brief *Berufsbiographien* solicited for the pages of the 18th-century lexica and journals made autobiography a new sister-genre of music biography: significant examples are autobiographical accounts by J.J. Quantz, J.S. Bach, C.P.E. Bach, Franz Benda, Leopold Mozart and C.G. Neefe.

2. THE EARLY 19TH CENTURY. The age of music biography as a distinct literary genre opened towards the turn of the 19th century (but see John Mainwaring's stray *Memoirs of the Life of the Late George Frederic Handel*, 1760), and by 1840 several of the enduring types of music biography were established. Many early biographies loosely combined the factual *Berufsbiographie* with personal memoirs, anecdotes and surveys of the music. Among these were Friedrich Schlichtegroll's obituary of Mozart (1793), F.X. Niemetschek's Mozart (1798), J.N. Forkel's Bach (1802), G.A. Griesinger's and A.C. Dies's books on Joseph Haydn (both 1810), G.J. Schinn and F.J. Otter's Michael Haydn (1808), F.-G. Wegeler and Ferdinand Ries's biographical notes about Beethoven (1838–45) and Anton Schindler's initial biography of Beethoven (1840). The earliest biographies to be based upon archival and historical research included Luigi Angeloni's *Sopra la vita, le opere, ed il sapere di Guido d'Arezzo* (1811), Giuseppe Baini's *Memorie storico-critiche della vita e delle opere di Giovanni Pierluigi da Palestrina* (1828) and Carl von Winterfeld's *Johannes Gabrieli und sein Zeitalter* (1834). A rough prototype of the documentary biography, with copious documentation and correspondence, was G.N. Nissen's *Biographie W.A. Mozart's* (1828).

Music autobiography and fictional music biography came into their own simultaneously with music biography. Musicians such as C.F.D. Schubart (1791), A.-E.-M. Grétry (1789, 1797) and Carl Ditters von Dittersdorf (1801) wrote extended memoirs, inaugurating a vigorous genre that eventually came to include famous writings by Spohr (1860–61), Berlioz (1870), Wagner (1870–80) and Stravinsky (1935–6), among numerous others. Beginning with W.H. Wackenroder's 'The Remarkable Musical Life of the Tone-Poet Joseph Berlinger' (1797 [*recte* 1796]), Romantic writers wrote imaginative fictional accounts of musicians, most famously E.T.A. Hoffmann's 'Ritter Gluck' and 'Johannes Kreislers, des Kapellmeisters musikalische Leiden', establishing the narrative of the suffering and/or alienated musician that was later taken up in novels by Romain Rolland in *Jean-Christophe* (1904–12), Jakob Wassermann in *Das Gänsemännchen* (1915), Hermann Hesse in *Das Glasperlenspiel* (1943) and Thomas Mann in *Doktor Faustus* (1947).

3. THE LATER 19TH CENTURY. This period saw the high tide of music biography, in a series of monumental efforts to write definitive lives of the great composers: Otto Jahn, *W.A. Mozart* (1856–9, 2/1867); Friedrich Chrysander, *G.F. Handel* (1858–67); Heinrich Kreissle von Hellborn, *Franz Schubert* (1865); K.F.L. Nohl, *Beethovens Leben* (1864–77); A.W. Thayer, *Ludwig van Beethovens Leben* (1866–79); C.F. Pohl, *Joseph Haydn* (1875–1927); Philipp Spitta, *Johann Sebastian Bach* (1873–80); and Max Kalbeck, *Johannes Brahms* (1904–14); plus noteworthy biographies of Chopin by Frederich Niecks (1888) and of Schumann by Joseph Wasielewski (1858), and significant monographs on Beethoven, Schubert and Mendelssohn by George Grove in his *Dictionary of Music and Musicians* and of Mozart and Haydn in Constantin von Wurzbach's *Biographisches Lexikon des Kaiserthums Österreich, 1750–1850*. The great biographers of the period – whether musical amateurs like Jahn and Thayer or professional music editors like Chrysander, Pohl and Spitta – dedicated themselves to documentation of a single biographical subject. Led by Nohl and Marie Lipsius (La Mara), however, there also developed a class of prolific music biographers, writing a variety of accessible biographies for popular audiences. Additional testimony to the widespread interest in musical biography was the abundance of lives, reminiscences and personal memoirs of virtuosos, from Paganini and Liszt to such as Ole Bull, L.M. Gottschalk and Jenny Lind.

4. THE AGE OF MUSICOLOGY. Music biography was increasingly in high repute during the later 19th century, except within the new discipline of musicology. Guido Adler's methodical taxonomy of 'musical science' (1885, 1919) acknowledged 'Biographistik' as one of the auxiliary fields of historical investigation, but left little room in practice for biography, either as a serious field of study or as an explanatory factor. Similarly, despite Hugo Riemann's recognition that music is an emanation of a composer's psychology (1908) and Hermann Abert's defence of biography (1919–20), biography in the first three quarters of the 20th century became peripheral to the concerns of the musicologist and the subject tended to fall outside the realm of musicological discourse.

Biography's possible significance for musicology has been left virtually unexamined in systematic studies of musicology or music historiography in the 20th century; nor has there been an entry on the subject in any previous general encyclopedia of music. Partly, this may be seen as a reaction against the later-18th-century aesthetic of 'expression' and the 19th-century Romantic 'cult of

genius', which had overemphasized the biographical factor in creativity and even advocated views of music as 'autobiography in tones'; these presuppositions gave way in the 20th century to a wide variety of formalist, sociological and structuralist aesthetics which stressed the autonomy of the musical work or its place within a particular stylistic tradition or its essential derivation from historical or ideological factors.

Several major musicological projects involved the editing, revision and completion of leading biographies of the previous century (e.g. Pohl-Botstiber, Thayer-Deiters-Riemann, Thayer-Krehbiel and Thayer-Forbes, Jahn-Deiters and Jahn-Abert), leaving essentially intact their 19th-century theoretical premises and psychological assumptions. The biographical genre perhaps best suited to the age of 'objective' musicology became the documentary biography, originated by O.E. Deutsch in *Franz Schubert: die Dokumente seines Lebens und Schaffens* (1913–14) with further examples including Deutsch's documentary lives of Handel (1955) and Mozart (1961), Hans T. David and Arthur Mendel's *Bach Reader* (1945), Werner Neumann and H.-J. Schulze's *Bach-Dokumente* (1963–72), Jay Leyda's *Musorgsky Reader* (1947) and Kurt Blaukopf's documentary iconography of Mahler (1976). A profusion of special biographical dictionaries devoted to numerous sub-categories of music and musicians – e.g. by particular genre (jazz, folk, popular, theatre, opera), nationality, gender, ethnicity, instrument – attests the lexicographical and taxonomic preoccupations of recent times (see Duckles; *see also* DICTIONARIES AND ENCYCLOPEDIAS OF MUSIC, §I). Other specialized forms of biographical documentation also flourished, including thematic catalogues, discographies, pictorial biographies and oral histories, the last ranging from Vivian Perlis's interviews of those who knew Ives (1974) to Nat Shapiro and Nat Hentoff's interviews with jazz musicians (1955). Musicology in effect largely withdrew from interpretative biography, leaving the field to non-academic biographers and music journalists, and to encyclopedia-style life-and-works overviews. It became a common practice in both popular and academic biography to preface a survey of the music with a biographical sketch or series of biographical essays: some landmark studies of composers are of this type, for example Paul Bekker's *Beethoven* (1911), Walter Riezler's *Beethoven* (1936), Alfred Einstein's *Mozart: his Character, his Work* (1945), several biographies by Karl Geiringer, and the volumes in such series as Dent's Master Musicians. Nevertheless, worthy full-length biographies in the 19th-century tradition continued to be written, such as C.S. Terry, *Bach: a Biography* (1928), Ernest Newman, *The Life of Richard Wagner* (1933–47), Jacques Barzun, *Berlioz and the Romantic Century* (1950), Maurice J.E. Brown, *Schubert: a Critical Biography* (1958), Paul Henry Lang, *George Frideric Handel* (1966) and H.C. Robbins Landon, *Haydn: Chronicle and Works* (1976–80), the last combining documentary biography with a chronological critical survey of the music. For the most part, such biographies are untouched by 20th-century theories of creativity, psychology or genetic causation.

5. THE LATER 20TH CENTURY. In the later 20th century, a heightened interest in biography as a narrative form of literature combined with a general weakening of the authority of traditional belief systems – including musicology – revived the willingness to test biography as an explanatory tool in the study of creativity. Biographers have undertaken to investigate the achievements of women and other under-reported groups in music history and to explore the implications of sexual orientation upon creativity. Studies of musicians and composers by psychoanalytically orientated biographers have placed issues of fantasy, familial conflict and unconscious sources of creativity on the biographer's agenda. Similarly, T.W. Adorno's idiosyncratic writings on Mahler, Berg, Wagner and Bach have encouraged prospects for biographies that apply a synthesis of psychoanalysis and critical theory. Musicology, too, had by this time achieved an ambivalent reconciliation with biography, which resulted in biographies too numerous to mention individually marked by a high degree of accuracy and scholarly acumen. Proponents of biography see its resurgence in terms of a renewed emphasis on the individual, as part of a search for meaning and as embodying a need to find exemplary models. But the revival of biographical modes of exploration has not gone unchallenged, with some critics concerned about tendencies that would impose on the life a fairly restrictive array of mythic, narrative or other extramusical structures.

It has long been recognized that the accumulation and analysis of biographical data – performances, correspondence, autographs, sketches, publications – are crucial in dealing with matters of chronology, the authenticity of compositional sources, personal motivations, creative intentions, patronage, ideology and reception. And it is unquestioned that the biographer's legitimate subject matter includes the nature of creativity, documentation of the minutiae of daily life, the historical impact of individual creativity and trans-historical patterns of behaviour and belief. In the end, the primary area of dispute about the value of biography appears to centre on the vexed question of how – or whether – the pathways between life and art can be mapped, whether a 'personal' factor in creativity can be identified. The ancient Platonic and Plotinian archetypes, viewing the poet now as a mirror of nature and again as an active agent capable of shaping reality, thus continue to play themselves out in shifting conceptions of the nature of musical art and biography.

MAYNARD SOLOMON

**Biondi, Fabio** (*b* Palermo, 15 March 1961). Italian violinist. He began violin studies at five and at 12 played concertos on Italian television. During his teens he became interested in period instrument performing practice and since then he has played violins set up in Baroque, Classical and modern styles with equal mastery. In 1981 he formed the Stendhal Quartet, which played a repertory ranging from the Classical to the contemporary, on instruments appropriate to the music. Several Italian composers wrote for the group. Biondi also worked with Hesperion XX, Les Musiciens du Louvre, Musica Antiqua of Vienna, the Camerata di Lugano and the orchestra of the Due Dimensioni festival in Parma. In 1990 he founded the Baroque ensemble Europa Galante, which can vary in size from an orchestra to the handful of players required for a sonata. His full-blooded approach to the music of Corelli, Vivaldi, Biber, Bach, Tartini, Leclair and others, going side by side with the similar approach to Monteverdi adopted by Rinaldo Alessandrini, has caused some scholars to rethink their ideas on Baroque practice. Biondi's own playing, full of personality yet always directed to the service of the music, is based on a virile, italianate tone, a magnificent technique and superb intonation. He has recorded not only much of the Baroque repertory but also Mozart, Schubert and 20th-century music by such composers as Pizzetti, Malipiero, Respighi, Casella and Prokofiev. His instruments include a 1750 violin by Paolo Antonio Testore.

TULLY POTTER

**Biondi** [Cesena], **Giovanni Battista** (*b* Cesena; *fl* 1605–30). Italian composer. He was often known in his lifetime as Cesena after his birthplace. He was a Minorite friar. Despite his large output of church music he seems not to have held a church post; he was living in Bologna before 1606 and at Brisighella, near Faenza, in 1610. He may have died in 1630 (perhaps from the plague), for his last publication was edited by another friar at Cesena in that year. He published as many as 19 volumes of sacred music, some of which were reprinted and 14 of which survive; he is also well represented in anthologies of the period, German as well as Italian. Five of his volumes contain motets, and there are several collections including masses and music for Vespers and Compline. The *Secondo libro de concerti* of 1606 is unusual in that each motet is ascribed to a specific major feast. All this music is provided with continuo parts, and very little of it relies on the conventional double-choir medium often used for functional music in Italy in the early 17th century. Even so, the style of the 1608 compilation is transitional: polyphonic textures inform the masses – one of which is a parody on Palestrina's *Vestiva i colli* – and the continuo is merely a gesture to fashion. With its three-part scoring, op.12 of a year later is more up to date. The post-Viadana concertato idiom is best seen in the motets, e.g. op.14 of 1611: the solo motets have simple melodies, with quaver melismas as ornamentation (as in Viadana), the duets have formal schemes such as *ABCB*, and in the four-part pieces tutti refrains contrast with solos. In the duet *Alleluia haec dies*, in RISM 1623², a tautly constructed rondo form, *ABACABADABA*, is used, *A* being a four-bar 'Alleluia' in triple time and *B* comprising a setting of the text 'haec dies ... laetemur in ea'.

JEROME ROCHE/ELIZABETH ROCHE

**Biondin.** *See* SEGNI, JULIO.

**Bioni, Antonio** (*b* Venice, ?*c*1698; *d* after 1739). Italian composer and singer, active mainly in Bohemia and Silesia. Other than his Venetian origins, which are confirmed in many documents, almost all the information usually given about his life before his arrival in Bohemia is unverifiable, including reports of his birth in 1698 as the son of a tailor in the Rialto district of Venice, study with Giovanni Porta and productions of his operas in Chioggia, Ferrara, Venice and Baden-Baden in the years 1721–4. The first known records of him date from 1720, when he sang in productions of *Lucio Papirio* and *Astarto* in Udine and *La ninfa bizzarra* in Rovigo. He may be the singer listed as Antonio Biondi in librettos for productions

of *Il pastor reggio* in Chioggia in 1721 and *L'Arminio* in Mantua in 1722.

In May 1724 Bioni was contracted by Antonio Denzio in Venice to serve as composer for the Peruzzi company that was to perform in Prague, but before arriving in Bohemia the Peruzzi company was engaged to provide operatic entertainments during summer 1724 at Kuks, the estate of Count Franz Anton von Sporck in north-east Bohemia. Bioni's most important work, *Orlando furioso*, was performed first at Kuks and then as the inaugural opera for the opening of the Sporck theatre in Prague on 23 October 1724. After Denzio won control of the Italian opera company in Prague late in 1724, Bioni followed a newly formed Peruzzi company to Breslau in 1725. From this time until 1734, the only period of Italian opera in Breslau, Bioni contributed music to at least 24 of the 42 operatic productions given at the Ballhaus theatre in addition to serving as Kapellmeister for the orchestra after 1727. In 1731 he was named court composer to the Elector of Mainz, Franz Ludwig, Pfalzgraf of Neuburg (simultaneously Archbishop of Mainz, Breslau and Trier), and during the years 1732–4 served as impresario for the Ballhaus. He still maintained connections with Prague, however, due to the instability of the opera companies that performed in Breslau. He was almost certainly resident in Prague in 1730–31 during a period of operatic inactivity in Breslau, and he definitely returned to Prague in the summer or autumn of 1734 after the Breslau opera collapsed permanently. He attempted unsuccessfully to mount an operatic venture in Prague at this time, but may have contributed music for productions mounted in the Malá Strana ballhouse by singers stranded in Prague in 1734–5 after the collapse of the Denzio company. His career after 1734 cannot be traced with confidence, but it is supposed that he visited Vienna in the late 1730s. Gerber claimed that his opera *Girita* was performed at the Hoftheater in 1738. A manuscript score of his setting of Metastasio's *La pace fra la virtù e la bellezza* is dated 1739 with a dedication to the Archduchess Maria Theresa, but no performance of it is known. What little of Bioni's music survives confirms that he found it necessary to tailor his compositions to the modest instrumental and vocal resources available to him in Prague and Breslau.

WORKS

OPERAS

*unless otherwise stated, first performed at Breslau, Ballhaus theatre, and music lost*

Orlando furioso (dramma per musica, G. Braccioli, after L. Ariosto), Kuks, estate of Count Sporck, Aug 1724 [according to *FétisB*, composed in 1723, first perf. Baden-Baden, 1724]
Armida abbandonata (dramma per musica, F. Silvani, after T. Tasso: *Gerusalemme liberata*), Prague, Sporck, Nov 1725
Armida al campo (dramma per musica, Silvani, after Tasso: *Gerusalemme liberata*), 24 June 1726
Endimione (? F. Mazzarà, after P. Metastasio), 7 Jan 1727
Lucio Vero (dramma per musica, A. Zeno), May 1727
Attalo ed Arsinoe, Nov 1727
Artabano re dei Parti (dramma per musica, ? A. Marchi), 12 Jan 1728
Filindo (? P. d'Averara), 20 April 1728
La fede tradita e vendicata (Silvani), carn. 1729
L'innocenza rinosciuta in Engelberta (?Zeno), sum. 1729
Andromaca (?Zeno), 16 Jan 1730
Ercole su'l Termodonte (dramma per musica, S. Burigotti), 17 April 1730
Adone (pastorale per musica, ? A. Denzio), Prague, Sporck, carn. 1731
Siroe, rè di Persia (dramma per musica, Burigotti or Metastasio), 4 Feb 1732
Silvia (dramma per musica, E. Bissari), 24 Feb 1732
Lucio Papirio (dramma per musica, A. Salvi), carn. 1732
La verità conosciuta (dramma per musica), 28 April 1732
Demetrio (dramma per musica, Metastasio), June 1732
Issipile (musicalische Op, Metastasio), aut. 1732, Breslau, Ballhaus, *A-Wgm*
Alessandro Severo (Zeno), July 1733
L'odio placato (Silvani), aut. 1733
Alessandro nell'Indie (Metastasio), carn. 1734
Music (lost) in: L'innocenza giustificata, Prague, Sporck, 27 Dec 1724 [?=Giuditta, 3 July 1730]; Ariodante, Oct 1727; Griselda, 18 June 1728; Merope, Nov 1728; Costantino il grande, May 1729, doubtful; Il ritorno del figlio con l'abito più approvato, Prague, Sporck, carn. 1730; Teseo in Creta, aut. 1730, doubtful; Artaserse, July 1733; Aglatida, wint. 1733, doubtful
Doubtful: Climene, Chioggia, carn. 1721, mentioned in *FétisB*; Mitridate, Ferrara, spr. 1722, mentioned in *FétisB*; Cajo Mario, Ferrara, spr. 1722, mentioned in *FétisB*; Udine, Venice, 1722, mentioned in *FétisB*; Arsinoe, 1728; Nissa ed Elpino (int for Griselda), 18 June 1728; Girita (Vienna, 1738), mentioned in *GerberNL*

SVEN HANSELL/DANIEL E. FREEMAN

**Biordi, Giovanni** (*b* Rome, 1691; *d* Rome, 11 March 1748). Italian composer. In 1714 he was *maestro di cappella* of Tivoli Cathedral, where he remained until 1716. On the recommendation of Cardinal Ottoboni, he was made a chapel singer to the pope on 19 December 1717. In May 1722 he won a competition for the post of *maestro di cappella* at S Giacomo degli Spagnoli in Rome, where he remained until his death. From 1724 onwards, he taught singing at the pope's municipal college, where Pasquale Pisari was among his pupils. In 1730 he became secretary, and in 1737 chamberlain, of the Cappella Sistina. In 1742 he retired from there as a singer but continued as chamberlain. In recognition of his ability to write in the style of Palestrina, he was given the task of completing the *Lamentations* of Palestrina and Allegri. Biordi was also significant as a composer in the concertante style. His compositions, however, show a simpler technique and are often far removed from Palestrina's polyphony. He wrote exclusively church music.

WORKS

Motetto Transfige dulcissime Domine Jesu, ed. K. Proske, Musica divina, ii (Regensburg, 1855)
Ave maris stella, 4vv, ed. K. Proske, Musica divina, iii (Regensburg, 1859)
Litanie di SS Maria, 4vv, ed. K. Proske, Musica divina, iv (Regensburg, 1863)

**Bi-punctum, tri-punctum** [double punctum, triple punctum]. In Western chant notations, groups of *puncta* of the same pitch (*see* PUNCTUM).

**Biquardus.** *See* PICARD, (2).

**Birchall, Robert** (*b* ?London, *c*1750; *d* London, 19 Dec 1819). English music seller, instrument dealer and publisher. From his early imprints it appears that he had been apprenticed to Walsh's successors, WILLIAM RANDALL (ii) and his wife Elizabeth. In 1783 he was in business with T. Beardmore as Beardmore & Birchall (or Birchall & Beardmore). From 1783 to May 1789 he was in partnership with Hugh Andrews as Birchall & Andrews; he also issued publications under the name Birchall & Co., and established a circulating music library. He then continued alone in the firm until 1819, though John Bland appears to have had some association with Birchall after he sold his own firm in 1795, until about 1801.

Birchall managed the series of Ancient Concerts and most of the benefit concerts of the time. In 1783 he proposed a complete reissue of Handel's works in 80 folio volumes, but the project never materialized, though Birchall subsequently published many Handel items. In addition to glees, country dance books and much Italian vocal music, his publications included the first English edition of J.S. Bach's *Das wohltemperirte Clavier*, edited by Samuel Wesley and K.F. Horn in 1810. He also published many of Beethoven's works, including the original English editions of the 'Battle' Symphony, the Violin Sonata op.96, the Piano Trio op.97 and a piano adaptation of the Seventh Symphony, the English copyrights of which he purchased from the composer.

Birchall was succeeded at his death by the firm of Birchall, Lonsdale & Mills (also known as Birchall & Co., or Mills & Co.), Christopher Lonsdale having been in Birchall's employ since at least 1817. The firm was known as Lonsdale & Mills from about 1829 until the dissolution of the partnership in 1834. Richard Mills (*b* ?1798; *d* London, 28 Nov 1870), a nephew of Birchall, remained active until about 1868, when he was succeeded by Richard Mills & Sons, a firm run by Richard Mills jr and Robert M. Mills, which continued until 1903. The firm of Christopher Lonsdale (?1795–1877), which had a large circulating music library, continued until 1880 when it was succeeded by Alfred Hays. At an early date the firms' catalogues included vocal scores of Mozart operas.

FRANK KIDSON/WILLIAM C. SMITH/PETER WARD JONES

**Birchensha** [Berchenshaw, Berkenshaw, Birkenshaw], **John** (*b* early 17th century; *d* ?London, bur. 14 May 1681). English theorist, composer and teacher. He seems to have been a younger son of Sir Ralph Birchensha, who in 1598 was sent to Ireland as Comptroller of the Musters and Cheques. According to Anthony Wood (*GB-Ob* Wood D 19 [4], f.19) he resided in Ireland with the Earl of Kildare until the rebellion of 1641 forced him to quit Dublin for London. In *A Musicall Banquet* (1651) he is listed among teachers of the viol active in London; but it was as a teacher of the rudiments of composition that he made his name. He boasted that by means of his rules 'not only those, who skillfully can sing or play on some Instrument, may learn to compose but also those, who can neither sing nor play' (letter to the Royal Society, 26 April 1664), and claimed in a printed prospectus for his treatise *Syntagma musicae* that with its aid a beginner might within two months '(exquisitely, and with all the Elegancies of Musick) Compose two Parts; in three Months, three Parts; and so forwards to seven Parts'. Wood mentioned a published sheet of *Plaine Rules and Directions for Composing Musick in Parts*, which seems not to have survived, but a manuscript in the British Library (Add.4910, ff.39–61) contains notes of *Mr Birchensha's 6 Rules of Composition; & his Enlargements there-on to the Right Hon*[ble] *William Lord Viscount Brouncker*, partly autograph and partly in Silas Taylor's hand; another manuscript of the *Rules of Composition* (*B-Br* 6689) belonged in 1695 to William Corbett. Taylor was an enthusiastic disciple of 'Mr Berchenshaw's way', which according to Pepys (10 June 1664) he 'magnifies mightily'. Pepys took a course of lessons from Birchensha early in 1662, costing £5; it terminated 'in a pet' after Pepys criticized his rules, which he nevertheless conceded to be 'the best I believe that ever yet were made'. Another pupil was Thomas Salmon, on Matthew Locke's recommendation; Birchensha subsequently wrote a preface to Salmon's *Essay to the Advancement of Musick* (London, 1672/*R*). Evelyn knew him as the inventor of 'a mathematical way of composure very extraordinary: True as to the exact rules of art, but without much harmonie' (3 August 1664). Another reference to his method occurs in Thomas Shadwell's *The Humorists* (1671): 'Berkenshaw is a rare fellow, give him his due, fa, la, la, for he can teach men to compose that are deaf, dumb and blind'. After his death his reputation remained sufficiently high for Philip Becket, a former musician to Charles II, to advertise in 1681–2 for pupils 'desirous to Learn Composition in Musick in Mr Birchinshaw's Method', and for the Oxford musician Francis Withy to include a version of the rules ('M[r] Joh: Birchensha's notes') in his commonplace book (*GB-Och* 337).

Birchensha attached great weight to his 'compleat Scale of Musick', a chart showing all 'consonant and dissonant intervals suitable to musical harmony' (including those involving double flats and double sharps) with their ratios in Pythagorean intonation. This was probably what Pepys saw at his house in Southwark on 24 February 1662 ('his

great Card of the body of Musique, which he cries up for a rare thing'). In a lecture on 9 June 1665 he contended that 'by this Scale I will make any rationall Man understand more of the mathematicall part of Musick ... then can be known ... by reading & studying of all the Bookes, which have been written' (*Lbl* Add.4388, f.67), and on 10 February 1676 he demonstrated the scale to the Royal Society. Birchensha's insistence on correct notation of intervals (at a time when notes such as E♯ were often represented in viol music by enharmonic substitutes) was admirable, but he must have been well aware of the obstacles to the practical adoption of Pythagorean tuning.

Birchensha was unusual among professional musicians in holding that all aspects of music were susceptible of rationalisation, and it is here that his chief significance lies. Some scorned his pretensions, but others regarded him highly. In the Royal Society's *Philosophical Transactions* (9 February 1674) he was praised as a 'judicious and extraordinarily skilful Musitian'; Henry Oldenburg, its secretary, described him as 'in Musica tum theoretica tum practica apprime versatus' (letter to Marcello Malpighi, 7 June 1673). *Templum musicum*, his translation of part of Alsted's *Encyclopaedia* of 1630, was an outcome of his desire to disseminate 'some Principles of the Mathematical part of Musick'. The first of several papers from him to the Royal Society was presented in 1662; two years later a committee including Lord Brouncker and Robert Boyle was set up to examine his ideas. There ensued a series of discussions on tuning and temperament, in which such eminent mathematicians as John Wallis and Christiaan Huygens were involved, and Birchensha was invited to participate in some experiments. His most important surviving theoretical work is the unpublished *Compendious Discourse* that he wrote for Robert Boyle: it includes 13 chapters on 'Practicall' and 21 on 'Mathematicall' aspects of music. His intention in *Syntagma musicae* was to cover the subject 'Philosophically' as well as 'Mathematically, and Practically'; but despite a call for subscribers in 1672–3 and encouragement from the Royal Society this *magnum opus* remained unpublished, and it is doubtful whether he ever completed it.

Birchensha made more impact as a speculative theorist than as a composer. In his fantasia-suites he adopted a crude, jagged, declamatory style reminiscent of William Lawes, though without Lawes's imaginative richness; in other instrumental pieces he embraced the fashionable French violin style. Pepys owned a manuscript of his two-part settings of the *Ordinary Church-Tunes of the Singing Psalms*, in which proper and common tunes (such as 'Winchester' and 'York') are provided with alternative counterpoints; though probably intended for teaching, these doubtless illustrate the kind of simple descant used in some churches. His three-part psalms are included in a manuscript collection of 'Choicest Divine Hymns or Anthemnes' dated 1688 (*GB-Y* M 5 S). Two meetings of the Royal Society (3 and 10 August 1664) were followed by concerts featuring 'some Instrumental Musique of Mr Berchenshaws'; the first of these was attended by Evelyn, the second by Pepys, who wrote that he 'found no pleasure at all in it'. Birchensha was buried in the cloisters of Westminster Abbey.

CHRISTOPHER D.S. FIELD

**Birchtree.** American firm of music publishers, previously known as SUMMY-BIRCHARD.

**Birck** [Birckh], **Wenzel Raimund (Johann).** *See* PIRCK, WENZEL RAIMUND.

**Birckenstock, Johann Adam.** *See* BIRKENSTOCK, JOHANN ADAM.

**Bird, Arthur H(omer)** (*b* Belmont, MA, 23 July 1856; *d* Berlin, 22 Dec 1923). American composer, organist and pianist. He received his early training from his father and uncle, who were composers and compilers of hymn tunes, and in 1875 was admitted to the Berlin Hochschule für Musik, where he was a pupil of K.A. Haupt, A. Loeschhorn and E. Rohde. In 1877 he returned to America and was appointed organist at St Matthew's, Halifax, Nova Scotia. During his second stay in Germany (1881–6) he studied composition under H. Urban and became a close friend and disciple of Liszt. After a brief visit to the USA, where he was honoured at the Milwaukee Musical Festival for his compositions, he returned permanently to Berlin and became the Berlin correspondent for the Chicago journal *Musical Leader*. He also wrote on musical topics for *The Etude* and *The Musician*.

Bird's music was well known in Germany, and most of it was published there, but after about 1895 he composed relatively little. He was the first American composer to receive commissions from France and Germany, and *Rübezahl* (1886) was the first major ballet written by an American. Contemporary critics agreed that his music, late Romantic in style, was pleasing and melodious, that he was an excellent contrapuntist, and that his orchestrations were colourful. He was elected to the National Institute of Arts and Letters in 1898.

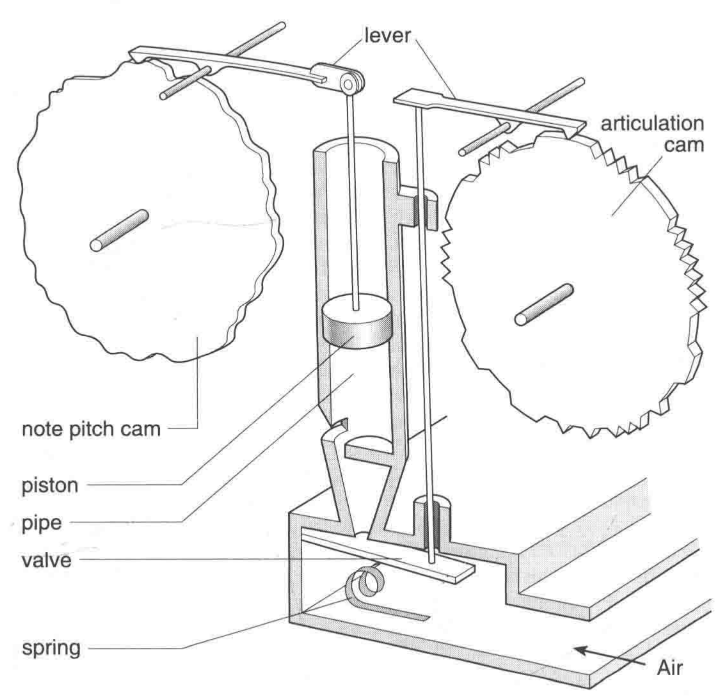
W. THOMAS MARROCCO/WARREN APPLE

**Bird instruments.** Mechanical instruments that imitate birdsong. The earliest known references to automatic singing birds date from the 3rd century BCE with the descriptions of Hero of Alexandria. In the second half of the 9th century two automatic musical instruments with artificial trees and singing birds are said to have been created for the Byzantine emperor Theophilus (*see* ORGAN, fig.24). About 1250 the poet Konrad von Würzburg wrote of an artificial tree on which synthetic birds were sitting, flapping their wings and singing. In his *Musurgia Universalis*, Kircher referred to 'an automatic organ that produces the sound of animals and even the singing of birds'.

1. Bird organ. 2. Mechanical bird whistle. 3. Bird whistle (orchestral).

1. BIRD ORGAN. A small BARREL ORGAN designed to encourage caged birds to sing. It is also known as a canary organ but is more correctly called a serinette. These very small hand-cranked instruments first appeared in France early in the second quarter of the 17th century. Their manufacture centred on the border region of the Vosges. The flourishing period of the serinette lay in the second half of the 18th century and the first half of the 19th, but the instrument remained virtually unaltered in design and appearance for over 200 years. The majority of serinettes had one rank of open metal pipes at 2′ pitch with a compass of ten notes, tuned to the diatonic scale $c'''$– $d''''$ with an added $b\flat'''$. Some had an additional 4′ rank of stopped metal pipes on a slider chest (*see* ORGAN, §II, 2–4); these were called *pionne* or *serinette-pionne*. Larger instruments, sometimes called *perroquette*, *serinette-merline* ('blackbird serinette') or *turlutaine* ('curlew'), had a 14-note scale and were provided with three registers by the addition of an 8′ stop, operated manually and usually

*1. Bird organ by Ferry, Paris, 1784 (Musée de la Musique, Paris)*



of stopped wooden pipes but occasionally of stopped metal. Songs, dances and *airs d'oiseau* (simple bird-like melodies) were composed or arranged to fit the compass; the melodies were often richly decorated with trills, mordents, slides and appoggiaturas. As on larger church and chamber barrel organs, tunes were changed by shifting the barrel sideways. Although contemporary illustrations show them in use with caged birds (fig.2), it seems unlikely that these instruments would have succeeded in their goal.

2. MECHANICAL BIRD WHISTLE. Early attempts to create instruments to imitate birdsong employed sets of small organ pipes. By their nature, such instruments precluded miniaturization and could not reproduce the microdivisions of reference pitch that is a feature of real birdsong. Around 1768–70 the Swiss watchmaker Henri Maillardet (1745–*c*1820) invented a mechanism with a single pipe and a sliding piston. This was the first use of the principle which, a century later, would be used in the 'swanee whistle'. Here the movement of the piston was controlled by a multiple cam while air to the pipe (and thus articulation) was governed by another cam which opened and closed a single pallet (fig.3). Not only was the size of the mechanism reduced dramatically, but a high degree of realism could now be attained. Swiss makers such as Jaquet-Droz, Rochat, Leschot, Bruguier and Frisard excelled in the creation of miniature singing birds which demanded the highest watch-making craftsmanship. The mechanism was used in singing-bird snuffboxes (where a tiny bird would spring up under a hinged lid and appear to sing) and similar mechanisms in scent bottles, watches and jewellery. These reached the peak of their popularity in the 1780s when Swiss craftsmen (working both in Switzerland and in London) enjoyed a rich trade. Early in the 20th century, the Bontems family of Paris produced life-sized singing birds in cages. Blasé Bontems was responsible for the remarkably realistic song these produced and the best pieces very accurately simulate the songs of the blackbird, thrush, canary, nightingale and goldfinch. Similar technology was applied to other automata, specifically the 'whistling man' or 'whistling boy' pieces made in Triberg between 1920 and 1960 by Griesbaum, which in the mid-1990s was Europe's only remaining singing-bird maker. (*See also* MUSICAL BOX.)

3. BIRD WHISTLE (ORCHESTRAL). Instruments used in the orchestra to imitate birdsong. Two distinct types are found: the bird warbler, which is also known as the SWANEE WHISTLE, and the bird whistle or *ornithophone*. The latter consists of a small metal canister into which water is placed with a mouthpipe leading to a semi-submerged whistle. Blowing into the mouthpipe displaces the water and creates a bubbling in the whistle which can

*2. Lady with a bird organ: painting by Jean-Siméon Chardin, 1751 (Frick Collection, New York)*

3. *Principle of the mechanical bird whistle*

imitate the warbling and trilling of birds. The popular name for this device is the *nightingale*. The sound of the cuckoo is produced by a two-note whistle on an air reservoir or by a small duct flute with one or two finger-holes.

Various bird-imitating toy stops have been used in organs. *See under* ORGAN STOP *(Vogelgesang)*.

ARTHUR W.J.G. ORD-HUME

**Birdsong.** The present article is concerned with the use of birdsong in human music; for discussion of birdsong itself *see* ANIMAL MUSIC.

The vocalizations of birds have been of interest to musicians since at least the 14th century. They have been described as *musica avicularis* (Schröder, 1639), 'proto-music' (Hartshorne, 1973) or 'micromusic' (Szöke, Gunn and Philip, 1969). Music notation of birdsong began with Kircher's *Musurgia universalis* (1650); options include graphic notation (Hold, 1970) and sound spectrograms, available since the 1940s.

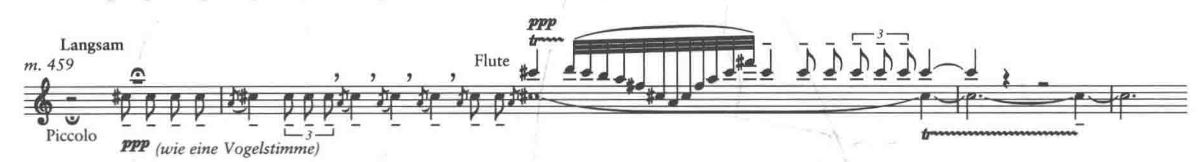
Ethnomusicological studies indicate that listening to birdsong has influenced some musical cultures, especially in areas with intense bird vocalizations, such as the rain forest of Papua New Guinea (Feld, 1982). Non-Western people have imitated birdsong in daily life and rituals (Feld) for hunting purposes (Brandily, 1982) and to aid the learning of rhythmic structures in their own music (Shimeda, 1986). While the aural sensitivity of the inhabitants of rain forests is shaped by their continuous immersion in the tapestry of avian sounds, birdsong is more distant from city dwellers, and has been domesticated by the keeping of captive birds in homes and attracting them to gardens. Some caged birds can be taught human melodies; various instruments and tunes have been devised for this purpose (e.g. *The Bird Fancyer's Delight* for flageolet, 1717).

Composers have included birdsong in their music in these ways: (a) by imitation, by voices or instruments (including BIRD INSTRUMENTS); (b) by quotation, using recordings; and (c) by using live birds' voices. Aristophanes' comedy *The Birds* (414 BCE) illustrates two forms of birdsong imitation common before the advent of recordings, syllabic onomatopoeia (e.g. 'io, io, ito, ito') and with wind instruments (e.g. the flute as nightingale). Here birds serve as an allegory for human relationships, as they do in some musical repertories, such as the Parisian chanson (van Orden, 1995) or in folksongs from India (Sharma, 1979).

Birdsong portrayal may appear in music for anecdotal, symbolic or ornamental purposes, or simply for its significance as sound (*see* PROGRAMME MUSIC). Migratory songbirds carry associations with (*i*) the spring and joy, as in the English 13th-century rota *Sumer is icumen in*, (*ii*) love and love relationships, as in Szymanowski's 'Nightingale' from *Three Songs of the Fairy Princess* (1915), (*iii*) the serenity of nature, as in Beethoven's Pastoral Symphony (1808, where three birds described by Kircher – the nightingale, cuckoo and quail – are imitated) and (*iv*) spiritual jubilation, as in Messiaen's *Messe de la Pentecôte* for organ solo (1949–50). The first three meanings are intertwined; less common significations of birdcalls and songs include (*v*) freedom (Wishart's *Red Bird* for tape, 1985), (*vi*) mystery (Mahler's 'Der Vogel der Nacht' in Symphony no.3 (1893–6)), and (*vii*) madness (Maxwell Davies's *Eight Songs for a Mad King*, 1969).

In European music, birdsong frequently shares the decorative role of captive birds; repertories of 'bird' music (see Jensen, 1985; Schneider, 1985–6; Roggenkamp, 1987) include 14th-century virelais (Vaillant, Senleches), 16th-century chansons and madrigals (Gombert, Janequin, Morley, Weelkes) and 17th- and 18th-century harpsichord miniatures (Couperin, Daquin, Frescobaldi, Kerll, Pasquini, Rameau). Composers portray calls and songs of a small group of familiar, local species by means of simple patterns, such as a descending 3rd for the cuckoo (also a 2nd, or a 4th in Janequin's *Le chant des oiseaux*, *c*1559) and a series of repeated pitches with trills for the nightingale (see exx. 1, 2, 3, 4, 5, and 6). Other musical birds include blackbirds (Tiessen, 1953), skylarks, quails, owls, crows, hens and roosters; the last three groups have been assigned comic functions in Italian madrigals and frottolas.

In vocal music, birdsong may be rendered by syllabic onomatopoeia or by extended vocalises. In instrumental music, birdsong is usually simplified and accommodated to musical conventions, appearing at cadence points (Beethoven's Pastoral Symphony), in episodes (Vivaldi's *Four Seasons*), cadenzas (Handel's Organ Concerto no.13 in F) and more rarely in thematic material (J.S. Bach's Sonata in D for keyboard, BWV963). Instrumental virtuosity is a common feature of generic birdsong representation; Liszt used pianistic trills and arabesques to suggest bird timbres and flight patterns in *Légende: St François d'Assise: la prédication aux oiseaux* (1862/3). In orchestral music, the voices of songbirds are represented primarily by woodwind timbres, high registers, brief motifs, staccato articulation, grace notes and trills. Wagner's 'Forest Murmurs' in *Siegfried* (1856–71) evokes



Ex.1 The nightingale's syllabic onomatopoeia in Janequin's four-part chanson *Le chant des oiseaux* (*c*1559), fragments of two voices

Ex.2 Stereotypical woodwind nightingale in Beethoven's 'Scene am Bach, and Sixth Symphony (1808)

Ex.3 The nightingale's repeated pitches, trills and grace notes in the finale of Mahler's Second Symphony (1893-4)

Ex.4 Chromatic vocalise and rhythmic flexibility in Stravinsky's 'Chanson du Rossignol' from *The Nightingale* (1908-14)

Ex.5 The nightingale's repertory of motifs in Messiaen's *Quatuor pour la fin du temps (1941)*

Bien modéré *(comme un oiseau)*

Ex.6 The nightingale's timbre rendered by harmonic means in Messiaen's *Catalogue d'oiseaux*, no.9, *'La bouscarle'* (1956-8).

birdsong in the natural habitat with a texture of fragmented motifs set against a static chordal background. Stylized birdsong soundscapes appear in works by Rimsky-Korsakov, Mahler, Delius (*In a Summer Garden*, 1908), Strauss (*Eine Alpensinfonie*, 1911–5), Bartók (the 'nature music' idiom), Britten (*Spring Symphony*, 1949) and others. While these textures usually represent bird choruses, an individual may sing a free-flowing melody in a quasi-improvisatory manner, for example the soprano vocalise in Stravinsky's 'Chanson de Rossignol' from *The Nightingale* (1908–14).

Before the 20th century, musical birdsong belonged to the domain of ornamental beauty; birds could be lyrical and, at times, amusing, but seldom dramatic or tragic. Messiaen transformed birdsong from an ornament to an element of musical style, drawing particularly on its complex rhythmic ostinatos and varied melodic contours, and approximating birds' microtonal intervals with the 12 chromatic pitch classes (Messiaen, 1944, 1995). His first attempts at a free 'style oiseau' in organ music from the 1930s (e.g. *La Nativité du Seigneur*, 1935) emphasize the asymmetry and rhythmic irregularity of birdsong (Johnson, 1995). Bird species are first named in 'Liturgie de cristal' from *Quatuor pour la fin du temps* (1940–41), in which the clarinet has the 'principal melody' of the blackbird and the violin plays the 'secondary counterpoint' of the nightingale. *Réveil des oiseaux* (1953) contains only transposed and slowed-down birdsong, of 38 species, faithfully rendered in its daily variations including the dawn chorus and the silences of the sunrise and noon. The monumental piano cycle *Catalogue d'oiseaux* (1956–8) seeks to portray the birds of France within their visual and aural landscapes. After 1950, birdsong appears in virtually all Messiaen's works: he used his own transcriptions and related the choice of birds to the subject matter, for example, Japanese birds in *Sept haïkaï* (1962) or birds of the American desert in *Des canyons aux étoiles* (1971–4). From *Oiseaux exotiques* (1955–6) onwards, he included birds from all the continents and represented all available birdsong models, from brief calls to elaborate compositions. The ornithological accuracy is less important than the development of a new musical style with the birds' irregular phrase structures, rich timbres, complex melodic contours and intricate rhythmic patterns in incessant variation (see Hold, 1971; Kurenniemi, 1980; and Mâche, 1987).

In the bird choruses of the opera *Saint François d'Assise* (1983), Messiaen employed controlled aleatory techniques, which had been used by Lutosławski in woodwind textures with traits of musical birdsong (e.g. Symphony no.2, 1965–7; *Mi-Parti*, 1975–6). The virtuoso tempos and rhythmic spontaneity of birdsong have inspired jazz musicians, particularly in the bebop tradition (e.g. Mingus's *Birdcalls*, 1959). Charlie Parker's creative improvisations, especially in a series of 'bird' pieces (*Ornithology*, 1946; *Bird of Paradise*, 1947) share traits with The Birds' *Free Composition*, especially in his use of quotation from many musical sources (reminiscent of avian mimicry) and the *cento* technique of improvisation, based on a corpus of distinct formulae, arranged in ever new patterns.

While the improvisations of jazz musicians may display some general stylistic traits of birdsong, the notated music of North America contains representations of various local species, especially the hermit thrush (Amy Beach's *Hermit Thrush at Morn*, 1922; Bartók's Piano Concerto no.3, 1945; see Harley, 1994) and R. Murray Schafer's *The Princess of the Stars* (1981, rev. 1984). The two last portray whole choruses of birds: Bartók stylized motifs of the wood thrush and the towhee, while Schafer used vocal and instrumental imitations of the white-throated sparrow, whippoorwill, chickadee and others to incite live birds to sing. His work, designed for performance at dawn at a wooded lake, blends birdsong imitation and presence.
